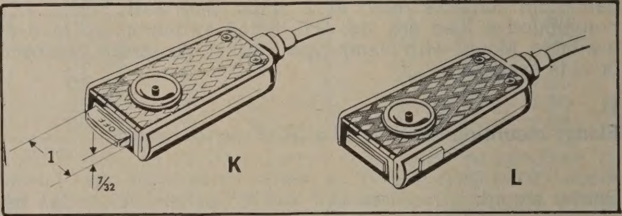
"CORDMASTER" SWITCH PENDANT SWITCHES



Extremely versatile pendant (cord) switch with top or edge operated pushbutton operation, illuminated and non-illuminated. Attractively patterned stainless steel sheath fits over white shock resistant thermoplastic switch housing to provide greater strength. Series 4200, Fig. K, has top operated pushbutton action. Three standard functions available: Non-Lock — momentary action; Locking — button locks when depressed, releases when side button is depressed; Push-to-Lock, Push-to-Release — button locks when depressed and is released when depressed again. Series 42000E, Fig. L, has edge operation; supplied with "L" type illumination (top jewel lights when button is depressed). Illumination supplied by Ind. No. 377, 6V miniature, T-1¾ flange base lamp (not supplied with switch). See listing for lamp data. Part No. listed has locking function with front button release. Both Series have spring tempered nickel contact springs with cross-bar welded palladium contacts rated at 2 amps, 200 watts, max., AC, non-inductive load. This switch is not recommended for 120 VAC line switching. Switches accept cables up to .270" dia. Overall dimensions: 1¾" W. x 3 11/16" L. x ⅝" H.

Part No.	Function	Action	Schematic	U.S.A. List Price
42206	Non-Lock	D.P.D.T.	2-C	$11.45
42306	Locking	D.P.D.T.	2-C	12.10
42706	Push to Lock, Push-to-Release	D.P.D.T.	2-C	12.70

SERIES DUS PUSHBUTTON SWITCHES WITH SOLID STATE ILLUMINATION

Series DUS. Compact, S.P.S.T.(n.o.) switch has red LED in pushbutton for bright, 180° indication. Built-in resistor permits operationg on 6 VDC at only 13.5 ma. Terminals are solder/screw type. Dimensions, contact ratings and "Adjusto-Clip" mtg. are same as "Uniswitch" switches on Page 4291.

Part No.	Pushbutton	Schematic	U.S.A. List Price

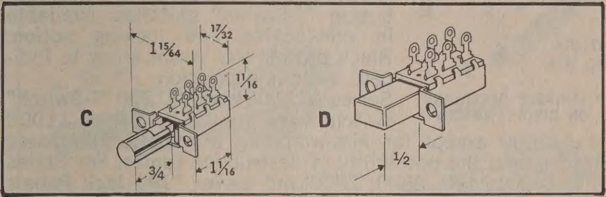
PUSHBUTTON SWITCHES

PUSHSWITCH PUSHBUTTON SWITCHES



C.

Economical Series PS Pushswitch, non-illuminated pushbutton switches are the evolutional outcome of design innovation and traditional Switchcraft quality and applications knowledge. Used for all types of commercial and industrial applications, such as, computers, radio receivers, transmitters, appliances, production line controls, public address, etc., at a drastically reduced cost. Series PS-5000: switching is either 1-C or 2-C. Housing is steel, cadmium plated, with iridescent iridite finish; contacts are brass, silver plated; U-shaped sliders are copper alloy, silver plated, and assure continuous "double-wiping" action for cleaning of contacts and uniform, reliable contact life. Lubricated contacts insure continuous wiping action. Solder lug terminals have .078″ diameter hole and wrap-around notches for wiring on each terminal. Mounted on 3/4″ minimum centers in panels up to 3/16″ thick. Mounting ears are one-piece construction with housing. Mounting holes are .156″ diameter. Handsome 5/16″ diameter molded nylon pushbuttons are integral with actuators. Rated at 0.5 amp, DC, 3 amps, AC, 125 volts, non-inductive load. Submitted to U.L. for listing.

D.

Series PS-6000 Pushswitch switches are similar to Series PS-5000, except for large 7/16″ x 7/32″ rectangular pushbuttons.

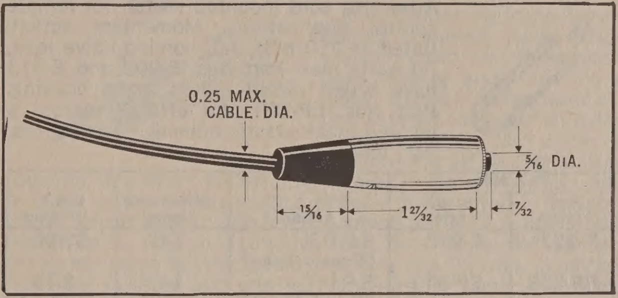
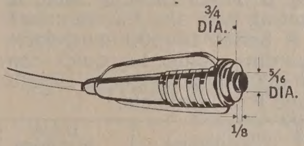
"CORD-SWITCH" CORD SWITCHES, SERIES ED



Rugged, attractive cord switch has brilliant satin nickel finish with red or black pushbutton. Contacts rated at 250 ma., 30 watts (maximum), AC, non-inductive load. Black neoprene cable relief bushing accepts cables up to 0.25″ diameter. Housing diameter 3/4″ length 3″.

Part No.				
Red Button	Black Button	Action	Schematic	U.S.A. List Price
ED-903	ED-913	S.P.D.T. "Break-Make"	1-C	$4.00

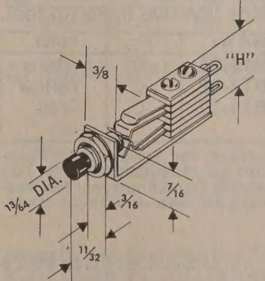
"CORDETTE" SWITCH PENDANT SWITCHES



Small lightweight pendant, momentary action (cord) switches provide remote switching of industrial and commercial instrumentation and control devices. Attractive one-piece grey molded body protects switching controls from dirt and dust. Switch has 1-A (S.P.S.T.) circuit. Integral brass, hard gold contacts rated at 500 ma., 50 watts max., A.C. non-inductive load. Not recommended for use in high voltage circuits. Part No. 921 has phono jack termination molded to body. Mates with Switchcraft molded cable assemblies with phono plug terminations such as 3501, 3501MC, etc. or industry standard phono plugs. Part No. 921K same as 921 except 6′ or 2-cond. unshielded cable molded to switch body. Stripped and tinned cable termination. Overall dimensions 1 3/16″ wide by 2 15/16″ long (not including cable).

Switchcraft Part No. 921	U.S.A. List Price **$6.00**
Switchcraft Part No. 921K	U.S.A. List Price **7.05**

MINIATURE "TF" SWITCH SWITCHES



"Tiny Frame" switches. Small, sturdily constructed, provides simple, direct acting pushbutton switching for use where space is at a premium. Available in Series 970L push-to-lock, pull-to-release; or Series 970, momentary action. Nickel silver springs, integral contacts, recommended for low level circuits where contact resistance is unimportant. Requires only 1 19/32″ depth behind panel; mount in single 1/4″ hole in panels up to 3/32″ thick.

SERIES 970 — NON-LOCKING

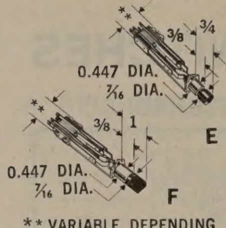
"T-SWITCH" SWITCHES

Rugged, long frame switches for quality communications equipment. Welded crossbar palladium contacts rated at 2 amps, 200 watts max., AC, non-inductive load. Require minimum of panel space, only 9/16" x 13/16"; 2 7/8" depth behind panel. Series 11000, Fig. E, pushbutton T-Switch. Available in momentary action and push-to-lock pull-to-release action. Series 11200, Fig. F, 2-pos. turn button "T-Switch" switches. Available in non-locking and locking action. Black button with white arrow to indicate switching position.



** VARIABLE DEPENDING ON CIRCUIT HEIGHT

Series W11000 and W11200 "T-Switch" switches are similar to Series 11000 and 112000 except for wire-wrapping terminals. Eliminates soldering and the possibility of destructive fumes. For Series 1200, 1400, 2400, 2600, 2800 and Series "JP" Jack Panels and other industry standard telephone jack panels, call directors, comm. panels, P.A. and other communication equipment.

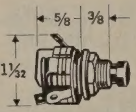
LITTEL-SWITCH® SWITCHES



Series 100, 200, tiny momentary contact pushbutton switches. Rugged, dependable action. All contacts insulated from panel bushing with interlocking phenolic washers. Series 100 and 200, springs are of nickel silver, recommended only for low level circuits where contact resistance is unimportant. Series 100S and 200S have fine silver contacts rated at 3 amps or 300 watts max., AC, non-inductive load. One-piece plastic button and shaft in red or black. Mounts in 3/8" hole in panels up to 1/4".

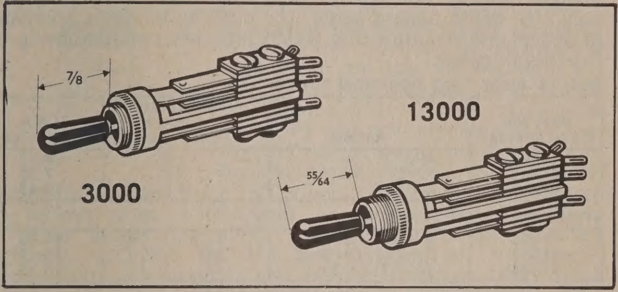
LEVER SWITCHES

"LEV-R" SWITCH SWITCHES, SERIES 3000, 13000



Small lever action switches in two and three position types, locking and non-locking action. Requires half the space usually needed for a lever switch; frame bushing and shaft nickel plated brass. Supplied with locknut and screw-on black knob. Fine silver contacts rated at 3 amps, 300 watts, max., AC, non-inductive load. Non-locking types have spring return. Series 3000 mounts in panels up to 3/32" thick; Series 13000 mounts in panels up to 1/4" thick. Both Series are 5/8" wide; requires 2¼" behind panel; mounts in single ½" dia. hole.

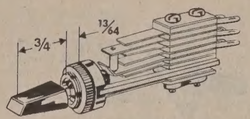
"LEV-R" SWITCH SWITCHES, SERIES 28000



"Lev-R" Switch switches, Series 28000. Compact, lever action switch in two and three position, locking and non-locking types. Smooth, easier lever action assured with special nylon roller. Supplied with locknut, non-turn ring (slips over slotted bushing to prevent switch from turning in mounting hole), and a black knob which is molded directly to the lever. Eliminates loose or lost knobs. Fine silver contacts rated at 3 amps, 300 watts, max., AC, non-inductive load. Mounts on 5/8" centers in panels up to 3/32" thick. Requires only one 15/32" dia. mounting hole for bushing and one 1/8" dia. hole for non-turn device; depth behind panel, 2¼".

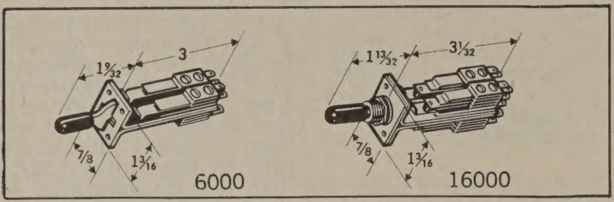
LEVER SWITCHES

"TELEVER" SWITCH SWITCHES



Series 6000 and 16000. Rugged telephone type lever switches featuring "T-Beam" frame construction which results in a relatively light construction with sturdiness of a structural "T-Beam". Available in two and three positions, locking and non-locking types. Nylon rollers on the lever actuate the special nickel silver springs, providing smooth action; assures long dependable spring life. Welded crossbar palladium contacts are standard, rated at 2 amps, 200 watts max., AC, non-inductive load. Series 6000 mounts with four No. 3-48 machine screws. Mounting centers 17/32" x 13/16", mounts in panels up to ¼" thick. Series 16000 features single hole mounting; 15/32-32 threaded bushing. Mounts in ½" dia. hole in panels up to ¼" thick. Part No. 545, "Stop Plate" provides positive "stops" for two position action. Part No. 540, "Stop Plate" provides non-locking or momentary action. The "Stop Plates" can be changed in the field. Both Series switches supplied with black insulated knob. All have tinned solder lug terminals.

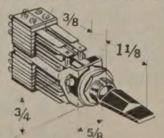
* Add suffix letter "L" to Part No. to indicate locking type. Series 16000 non-locking type can be converted to locking type by removing "Stop Plate".

Part No. 530 Escutcheon Plate. For Series 6000 "Telever" Switch switches with 4 mounting screws U.S.A. List Price **$1.25**

Part No. 540 Stop Plate. For Series 16000 "Telever" Switch switches. Converts from locking to non-locking action. Includes two mounting screws .... U.S.A. List Price **$0.45**

Part No. 545 Stop Plate. For Series 16000 "Telever" Switch switches. Converts from 3-position to 2-position. Includes two mounting screws .... U.S.A. List Price **$0.45**

"LT SWITCH" SWITCHES



U.S. PAT. NO. 3,433,906
CANADIAN PAT. NO. 850,234, AUG. 25, 1970

Series 41000. Smallest high-quality, telephone type lever switch available. Two or three position types with positive locking and/or non-locking action. Special damping block guards against transient leaf bounce. "Can't-Cheat" detent guide prevents accidental actuator by-pass of switching positions. Switch has rigid "U"-shaped, twin girder frame. Its parallel steel members terminate in an interlocked box where spring combinations are mounted. The special long life, nickel-silver springs can be individually fastened to any one of the frame's four switch stacks mounting positions. Welded cross bar palladium contacts rated at 2 amps, 200 watts max., AC, non-inductive load are standard. Series 41000 mounts on 23/32" centers in a 15/32" dia. hole in panels up to ¼" thick. Requires only 2⅛" depth behind panel. The bushing includes a keyway to accept the non-turn ring which prevents switch turning or twisting in panel.

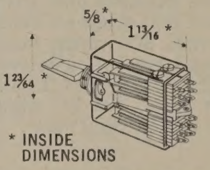
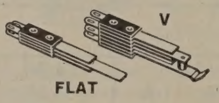
MOLDED DUST COVERS



Molded Dust Covers give full environmental protection and acts as electrical insulating shield for "LT Switch" switches. Protects against moisture, dust, dirt, contamination; guards against tampering and accidental damage of springs/contacts. Hi-temp. molded Lexan polycarbonate plastic; reinforced corners and walls.

Part No.	Description	U.S.A. List Price
P-2360	Used on non-locking and locking version of "LT Switch" switches. Part Nos. 41203, 41206, 41306, 41308, 41312.	$0.55
P-2362	Used on Part Nos. 41208 and 41324 non-locking and locking "LT Switch" switches.	.60

STACK SWITCHES



General purpose stack switch assemblies made from a pile-up of various actuator springs, contact springs and lifters. These stack switch assemblies can be used on manually operated devices where switching is operated by cams, levers, pushbuttons and other mechanical devices. General purpose stack switches are available with a "Flat" or "V" actuator spring. Fine silver or palladium cross bar welded contacts are standard, rated at 2 amps, 200 watts max., AC, non-inductive load. Supplied with pressure plate and two No. 5-40 screws; mounts on ⅜" centers. Height of stack depends on switching circuit; 1-B circuit 21/64" H., min.; 2-C circuit 45/64" H., max. Only the most commonly used "Flat" actuator stack switches are listed below. Contact Switchcraft for price and delivery information on "V" actuator spring stack switches.

LEVER SWITCHES

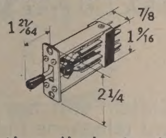
STACK SWITCH KITS

Experimental kits of component parts for assembling switch stacks. Designed to speed the assembly of engineering samples in the lab, aid maintenance men in the field and save time in general replacement. Ideal for mechanical engineers and coin machine servicing; used in relays, electronic organs, etc. Each kit consists of 136 springs in different thicknesses, over 152 phenolic spacers and insulators in various sizes, hard-rubber insulating tubing, two sets of stack assembling pins, two roller assemblies, assorted contacts, etc. Kit No. K-119, consisting of "Tini-Stack" components are miniature variations of standard switch stack springs, spacers, etc. All in compartmented plastic box.

Kit No. K-101. Assorted ¼″ and ⅜″ mtg. center contact springs and associated parts .... U.S.A. List Price **$41.80**

Kit No. K-102. Assorted ¼″ mtg. center contact springs and associated parts .... U.S.A. List Price **$41.80**

"LO-CAP" SWITCH SWITCHES



Series 10000. Low-capacity lever actuated switches, previously referred to as Federal Anti-Capacity switches. Specially designed flat actuator springs are wide spaced on a large molded insulating block. This construction eliminates the build-up of induced alternating current between springs. Rugged "U" shaped aluminum frame. Roller actuation for easy lever operation. Available in 2 and 3 position models, locking and non-locking types. Actuator springs have fine silver contacts rated at 1 amp, 100 watts, max., AC non-inductive load. Supplied with polished chrome escutcheon plate. Mounts with two No. 6-32 flat head screws (not supplied). Mounting centers 1 15/16″. Depth behind panel 3 7/16″.

TWO POSITION TYPES

Part No. Non-Locking*	Old Federal No.‡	Action	Schematic Circuit Pos. 1 Pos. 2	U.S.A. List Price

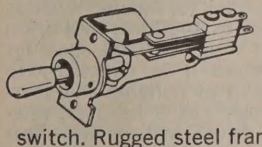
"FEATHER-LEVER" SWITCH MINIATURE SWITCHES



Miniature lever switches, light-weight, compact, mount on 7/16″ centers. Available in 2 and 3 position, locking and non-locking types. Actuator designed with nylon roller for smoother, easy lever operation over entire life of switch. Rugged steel frame withstands rough usage shock and vibration. Nickel silver springs with fine silver contacts, rated at 2 amperes, 200 watts, max., AC non-inductive load. Supplied with black plastic push-on knob. Other push-on knobs, available in 10 colors. See listing below. Series 29000, with bushing, mounts in 5/16″ O.D. panel hole. Supplied with locknut. Require only 1 9/32″ depth behind panel, mount in panels up to ⅛″ thick.

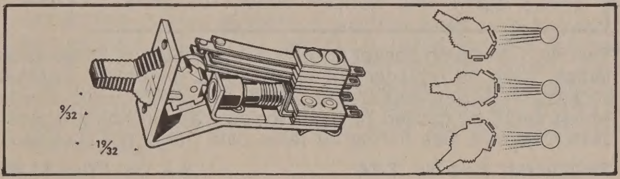
3-COLOR ILLUMINATED LEVER SWITCHES "LEVER-LITE" SWITCH SWITCHES SERIES 25000



"Lever-Lite" Switch switches, Series 25000. Illumination indicates positions at a glance. Individual color chips can be inserted in each switch position. Available in 2 or 3 position, locking and non-locking types. Reduces panel space; minimizes costly wiring. Supplied with 6V (No. P-1217) miniature screw base lamp and six color chips: Red, Green, Amber, Yellow, Blue and White. Other lamps available; see listing for lamp data. Nickel-silver springs, silver contacts rated 3 amps, 300 watts max., AC, non-inductive load. Requires only 2¼″ depth behind panel, can be mounted on ⅝″ centers in panels up to 3/32″ thick. Size: 2¼″ L. x 39/64″ W. x 1 7/32″ H.

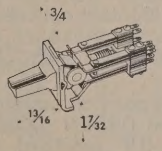
"LEVER-LITE" SWITCH SWITCHES SERIES 27000



"Lever-Lite" Switch switches, Series 27000 illuminated lever switch, 3-color lighting identical to Series 25000, but utilizes a larger, contoured lever and larger, factory installed color filters. Available in 2 or 3 position, locking and non-locking types. Mounts on ¾″ centers, in panels up to 3/32″ thick. Depth behind panel 2 3/16″. Nickel silver springs with fine silver contacts rated at 3 amps, 300 watts, max., AC, non-inductive load. On standard 2 position type AMBER lights in the "NEUTRAL" position; GREEN lights in the "DOWN" position. On 3 position types, RED lights in the "UP" position, AMBER in "NEUTRAL" position and GREEN in the "DOWN" position. Supplied with a 6V lamp (No. P-1217). Other lamps available; see listing for lamp data.

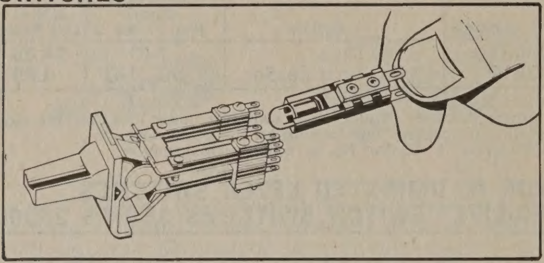
LEVER SWITCHES

LAMP SOCKET FOR "LEVER-LITE" SWITCH SWITCHES



Part No. T-14 Lamp Socket accepts T-1¾ miniature flange base lamps. Used as replacement or specified instead of original sockets on Series 25000 and 27000. Shield prevents shorts which might be caused by lamp socket frame rubbing against switch springs. See listing for lamp data (lamp not supplied).

Switchcraft Part No. T-14 .... U.S.A. List Price **$1.45**

ESCUTCHEON PLATES FOR "LEVER-LITE" SWITCH SWITCHES

For easy and convenient mounting of Series 25000 and 27000 Switches. Satin black finish. Eliminates punching rectangular hole in mounting panel. Part No. 531 for Series 25000, complete with two No. 3-48 black machine screws. Part No. 532 for Series 27000, complete with two No. 2-56 machine screws.

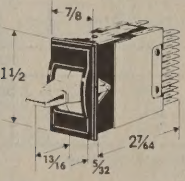
"LEVER-LITE" III SWITCH SWITCHES SERIES 84000



U.S. PATENT NOS. 3,727,020 AND 3,821,533. CANADIAN PAT. NOS. 972,791 (AUG. 12, 1975) AND 990,330 (JUNE 1, 1976)

"Lever-Lite" III Switch switches Series 84000 is the third generation of illuminated lever switches which embody the most modern electrical, mechanical, and human factors design concepts. Available in 2- and 3-position types with locking, non-locking, and talk-listen functions and a variety of circuits form from D.P.D.T. to 8P.D.T. Contact springs are silver plated phosphor bronze. Contacts are welded cross bar silver rated at 8 amps, 125 VAC. All switches are U.L. listed.

Lever illumination is multi-color, i.e., 2-position switches have AMBER color (NEUTRAL position) and GREEN (DOWN position); 3-position switches have RED (UP position), AMBER (NEUTRAL), and GREEN (DOWN position). Switch uses one, standard T-1¾ flange base lamp (not supplied). See listing for lamp recommendations.

Series 84000 switches are mounted, relamped (without tools), terminated, and removed from front of panel. Color filters changeable from front. Terminals are solder lug type, which also accepts AMP 110 FASTON.

Mounting hole is ¾" x 1⅜". Behind panel dimensions are 1⅜" H. x ¾" W. x 1¹³⁄₁₆" D. maximum.

TWO POSITION TYPES

Part No. Non-Locking*	Action	Schematic Circuit Pos. 1 Pos. 2	U.S.A. List Price
84206	D.P.D.T.	2-C	$10.80

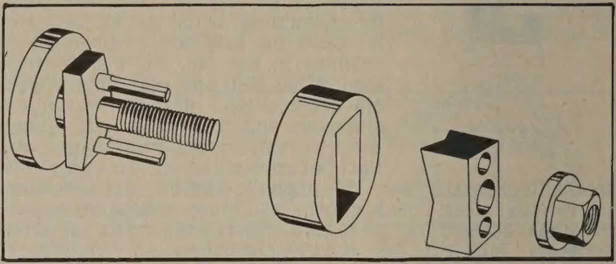
84324	4P.D.T. Ea. Sec.	4-C	4-C	18.40

* Add suffix letter "L" to Part No. to indicate locking type.

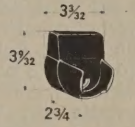
CHASSIS PUNCH



Quick, economical, and accurate individual mounting hole fabrication for Series 84000 switches. Only simple hand tools and minimum torque is needed to punch holes in panel or chassis — 16 ga. (.0625") maximum for cold rolled steel or 12 ga. (.080") maximum for aluminum. Just mark the opening, drill pilot holes and punch out precision ¾" x 1⅜" opening.

Switchcraft Part No. A-1202 .... U.S.A. List Price **$37.50**

"CRADLE-SWITCH" SWITCHES

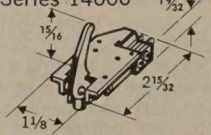


High quality "Cradle-Switch" switches holds W.E. and other standard telephone industry handsets. Housing is sturdy, yet flexible enough to withstand shocks and vibrations. Housing includes specially designed Hook Switch with a 4-C (4P.D.T.) contact arrangement. Switch has long nickel silver springs with welded silver cross bar contacts rated at 8 amps, 125 VAC. Ideal for use in critical low level audio circuits, i.e., in communication and instrumentation applications.

Part No.	Description	U.S.A. List Price
14412G	Handset Cradle Switch. Black housing. 4-C (4P.D.T.) circuit	$13.30
14512G	As above, except beige.	13.30
14612G	As above, except white.	13.30

"HOOK SWITCH" SWITCHES

Series 14000



Quality constructed leaf-type switches actuated by a hook (or hanger) such as designed in Series 14000; or by a nylon actuator as in Series 14100G. Ideal for equipment where it is necessary to actuate a circuit by hanging an accessory on a "hook", as a headset, telephone handset or microphone. Series 14000 utilizes fine silver contacts rated at 3 amps, 300 watts max., AC, non-inductive load. Series 14100G features welded cross-bar gold alloy contacts rated at 1 amp, 100 watts max., AC, non-inductive load.

Part No.	Action	Schematic Circuit	U.S.A. List Price
14006	D.P.D.T.	2-C	$5.30
14106G	D.P.D.T.	2-C	5.75

AMBIENT LIGHT SHIELD

(See Series 27000 on Page 4299.)

For use where Series 27000 switches are mounted on minimum centers. Shield gives positive separation of lighting between switches. Shield is placed between panel and switch, held in place by mounting screws. Two shields can be used per switch if desired.

Switchcraft Part No. P-1864 .... U.S.A. List Price **$0.25**

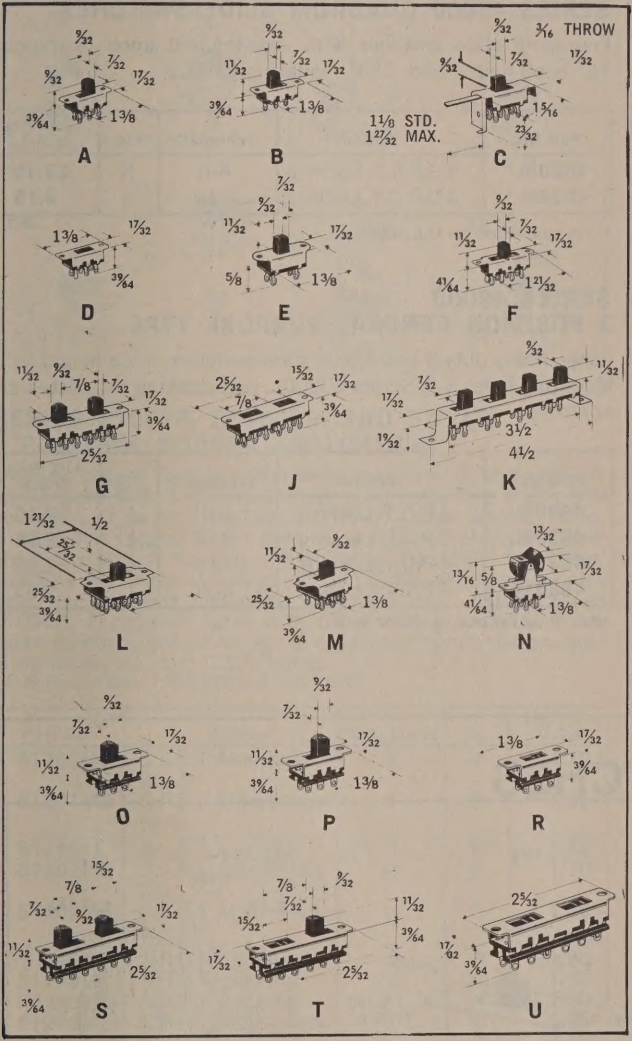
"DOUBLE-WIPE" SLIDE SWITCHES



Series 46000R, 47000R, 48000, 49000, 50000, 51000R, 52000, and 53000 low-cost, precision "double-wipe" slide switches. Switches use special U-shaped, bifurcated sliders to assure continuous wiping action. Contacts rated at 0.5 amp, DC, 3 amps, AC, 125 volts, non-inductive load. Standard solder lug terminals have a 5/64" dia. center hole and wrap-around notch for wiring ease. Most switches furnished with black 11/32" knob and .140" (9/64") dia mounting holes. Nos. 46206LFR, 46256LFR and 47227LFR flush screwdriver actuated knob. All slide and rocker switches are U.L. approved unless otherwise noted. See next page for slide switch contact arrangement.

New Phase III Slide Switches, Series 46000E, 47000E and 51000E high performance switches, feature glass filled nylon terminal boards, allowing excellent mechanical stability, high leakage resistance, the ability to withstand high temperatures, flame retardance, and self extinguishing characteristics. Standard knob color is black. Terminal holes in solder lug are .070" x .085" and accept wires as large as #14 AWG. Series 46000E, 47000E, and 51000E are U.L. and C.S.A. listed.

Series B51000R, B52000, 54000R, 55000 and B55000: All advanced materials and features of other slide switches. Series B51000R, B52000, B54000R and B55000 have offset mounting brackets for recessed mounting. No separate standoff mounting hardware needed. Holes in mounting brackets are 9/64" dia. Series 54000R, B54000R, and B55000 have new black knob with smooth streamline appearance. Electrical ratings are same as Series 46000, above. Submitted for U.L. listing.

IMPORTANT U.L. LISTING NOTE — Switches, Series 46000, 47000, 49000, 50000, 51000, 52000, 54000 and 55000 have additional U.L. listing of 1.5A, 250 VAC.

SERIES 46000R AND 46000E*
2 AND 3 POSITION GENERAL PURPOSE TYPE

Series 46000R rated at 3 amps, AC, 0.5 amp, DC, 125 volts, non-inductive load. No. 46206MP, 2 position momentary switch with 1 1/8" plunger and extruded and tapped 6-32 mounting holes. Nos. 46206LFR and 46256LFR feature a flush screwdriver slotted knob. No. 46204MBR pushbutton switch with 11/32" knob. All Series 46000R U.L. listed except No. 46204MBR. Series 46000E. 2 position types with locking or momentary functions. U.L. and C.S.A. listed. Rated at 0.5 amp, DC, 3 amps, AC, 125 volts, non-inductive load. Unless otherwise indicated, switches have non-shorting contacts and black nylon knob with serrated crown. Nos. 46203LSE and 46206LSE have shorting contacts; Nos. 46206LFE and 46256LFE have flush actuators.

"DOUBLE-WIPE" SLIDE SWITCHES

SERIES 47000R AND 47000E† TANDEM SLIDE SWITCHES

Compact, two-gang slide switches. Series 47000LR and 47000LE; two independent knobs; No. 47206LCR, single knob construction with coupling link between knobs. One knob 11/32" high, other flush screwdriver operated. No. 47227LFR, two knobs flush with switch housing, one knob screwdriver actuated. Knobs are coupled. Shorting bar each section. Rated at 0.5 amp, DC, 3 amps, AC, 125 volts, non-inductive load. Series 47000R are U.L. listed. Series 47000E: 2 position types with locking function and non-shorting contacts. Tandem switches have two switches in one housing, operating independently except for 47206LCE and 47227LFE which have internal mechanical coupling for simultaneous operation. Black nylon serrated knob except for flush actuator types. U.L. and C.S.A. listed.

"TINI-SLIDE" MINIATURE SWITCHES, SERIES 56000

Precision, miniature locking slide switches have unique wiping/lifting/sliding action of silver contacts & 2-C switching rated at 0.5A, 125 VAC or DC, non-ind. Plastic parts self-ext. per U.L. & ASTM specs. Molded term. board prevents solder, flux & other contaminants from entering switch around terms. Solder lug types mount with mach. screws or rivets (not incl.). PC term. types have standoff shoulders for mtg. to boards. Behind panel distance: No. 56206L1 — .590"; No. 56206L2 — .441". Max. above board distance: No. C56206L1 — .573"; No. C56206L2 — .352".

U.S. Patent No. 3,947,391

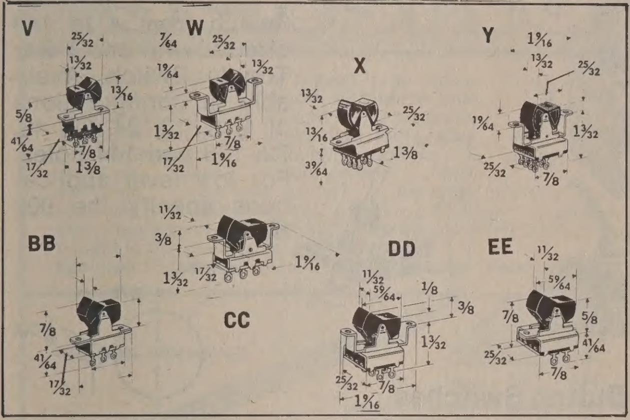
"DOUBLE-WIPE" SLIDE SWITCHES



SERIES 51000R, B51000R, AND 51000E
2 POSITION ROCKER SWITCHES*

Compact rocker switches offer same quality and dependability as standard slide switches. Rocker pivot mounting allows free actuation of switch mechanism. Black rocker knobs. Series 51000R has rugged rocker bracket, precision welded to standard flush switch housing. New Series B51000R has offset brackets for flush or sub-panel mounting, which eliminates need for separate mounting hardware. U.L. listed. Series 51000E: 2 position types with non-shorting contacts. Black nylon rocker knobs have legend areas and serrations on operating faces. U.L. and C.S.A. listed.

* U.S. Patent Nos. 3,502,825 and 3,485,966.

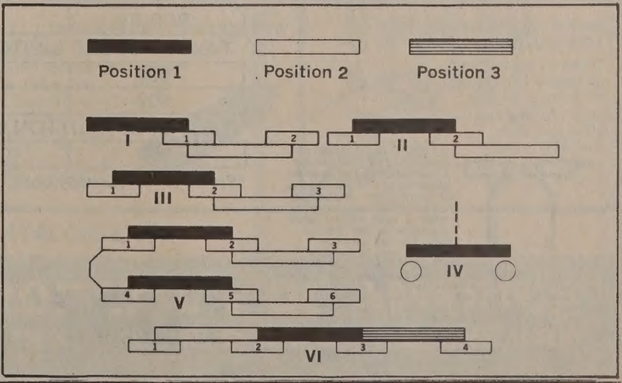
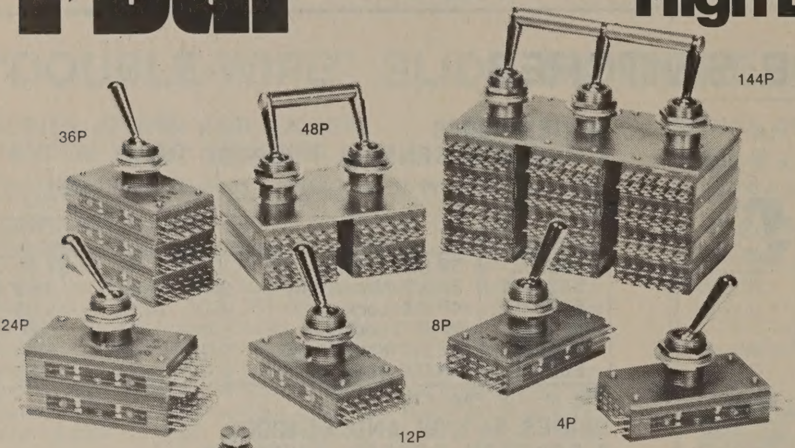
"DW" SLIDE SWITCH CONTACT ARRANGEMENT

Standard "break" before "make" (non-shorting). "Make" before "break" (shorting) switches are available in some models, refer to Series 46000 and 52000.

BASIC SCHEMATIC CHART

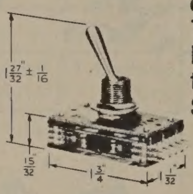


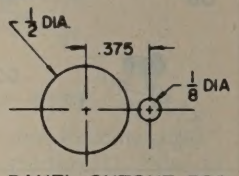
T-bar® SWITCHES for Multipole High Density Switching



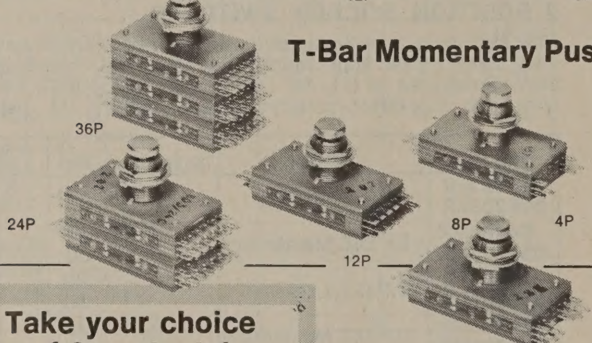
T-Bar Toggle Switches

Switch from 4 to 144 circuits with one T-Bar Toggle Switch. Available in configurations of 4, 8, 12, 24, 36, 48, 72, 108 and 144 poles. For low level applications specify the 902 Series.



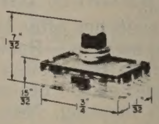


PANEL CUTOUT FOR TOGGLE AND PUSH-BUTTON SWITCHES



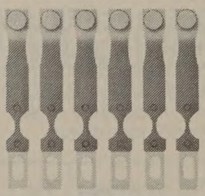
T-Bar Momentary Push-Button Switches

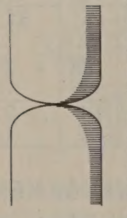
Switch from 4 to 36 circuits with one T-Bar Momentary Push-Button Switch. Available in configurations of 4, 8, 12, 24 and 36 poles.



Take your choice of 2 contacts!

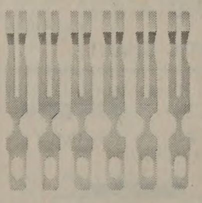
800 SERIES
for reliable General Purpose Switching

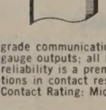




The 800 Series contact is a highly reliable gold-plated button contact. With its high contact pressure and positive wiping action, it is used in control type applications and in general purpose switching, such as relays, valves, lamps, etc. Contact Rating: up to 5 AMPS max.

900 SERIES
for reliable Low Level Switching



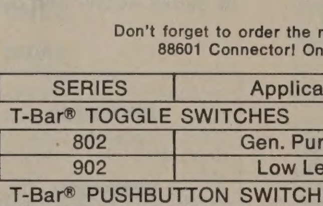


The 900 Series DATA-RITE™ contact has the reliability of a bifurcated contact with the added feature of two degrees of wiping action. The unique EDGE-TO-DOME contact guarantees a clean surface, which is critical for low level signals. The 900 Series is typically used in computer I/O signals; voice and data-grade communications; thermocouple and strain gauge outputs; all low level switching, whenever reliability is a premium, or whenever slight variations in contact resistance cannot be tolerated. Contact Rating: Microvolts up to 1 AMP max.

SWITCH SPECIFICATIONS

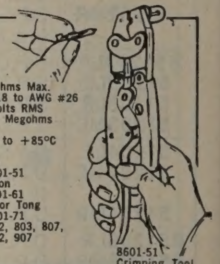
Contacts: Series 800—general purpose gold plated
Series 900—low-level bifurcated gold plated
Contact Rating: Series 800—5 amps max. resistive to 150 watts
Series 900—1 amp maximum resistive to 50 watts
Life Expectancy: at 20 CPM Series 800—50,000 cycles
Series 900—50,000 cycles
Contact Resistance: 20 milliohms typical
Ambient Temperatures: —55° to plus 85°C
Terminals: Mate with T-Bar Connectors
Dielectric Strength: 1000 VRMS @ 60 cycles/sec. (higher available)
Insulation: 5000 megohms min. (higher available)

T-BAR CONNECTORS



The T-Bar Series 88601 Connector has been specifically designed for use with T-Bar switches and relays. The connector contacts are crimp type which are snapped into a plastic insulator block. After installation, connectors are held in place against shock and vibration by use of a retaining clip.

Current Carrying Capacity	5 Amps
Contact Resistance	5 Milliohms Max.
Wire Accommodated	AWG #18 to AWG #26
Dielectric Strength	1000 Volts RMS
Insulation Resistance	100,000 Megohms Min.
Ambient Temperature	—55°C to +85°C
Weight	0.3 Oz.
Recommended Tools	Crimper P/N 8601-51 Extraction P/N 8601-61 Connector Tong P/N 8601-71
Use 88601 With	801, 802, 803, 807, 901, 902, 907



8601-51 Crimping Tool

HOW TO ORDER

1. Specify Series **2.** Specify Number of Poles and Contact Form

Don't forget to order the mating T-Bar Series 88601 Connector! One for each 6 poles.

902 — **12 C**

SERIES	Application	No. of Poles	Contact Forms*
T-Bar® TOGGLE SWITCHES			
802	Gen. Purpose	4 to 144	"A" or "C"
902	Low Level		
T-Bar® PUSHBUTTON SWITCHES			
803	Gen. Purpose	4 to 36	"A" or "C"

*Form "A" — normally open contacts. Form "C" — double throw, break-before-make.

Manufactured under 1 or more of the following patents: 3206990, 3226508, 3689856.

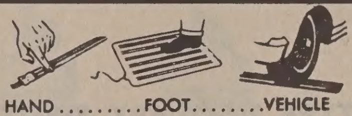
TAPESWITCH®

PRESS-AT-ANY-POINT RIBBON AND MAT

SENSING SWITCHES



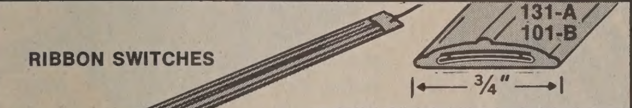
Tapeswitch products are proven in all industries. Patented construction withstands tons of force yet can close on light finger pressure. TAPESWITCHES are unexcelled for—*safety . . . automation . . . antiburglar systems . . . counting . . . timing . . . door control . . . light switching . . . machine control . . . material handling . . . seat switching . . . computer and console switching* . . . plus many other applications. TAPESWITCH RIBBON SWITCHES can be bought in the size and length needed.

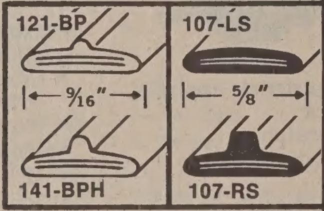
Features: Inherently sealed. Self bottoming. **Press-at-any-point operation** eliminates linkages. All styles except flex-action switches can be coiled without shorting. Millions of impacts at one point.

Rating: All Tapeswitches are rated at more than 1 ampere, 117 VAC. However, for floor switching low voltage is recommended.

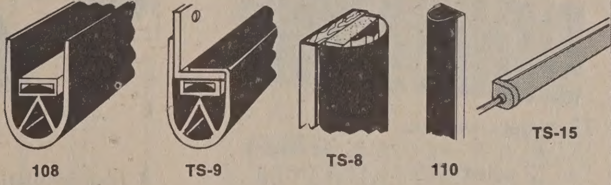
TAPESWITCHES are designed in accord with the best principles of switch and cable design, with jacketing and insulation meeting the requirements of MIL-C-9154 and MIL-I-631C respectively. Unique Fail-Safe circuitry is feasible with all Tapeswitches. See our Literature.

RIBBON SWITCHES



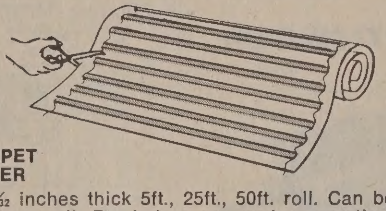


Factory sealed units with 18 inch connecting leads at one end. Sensitivity: 8, 12, or 40 ounces finger pressure. Standard lengths: 1, 2, 5, 8, 10, 12, 15, 18, 20 ft. Double leads on order. See text at top.



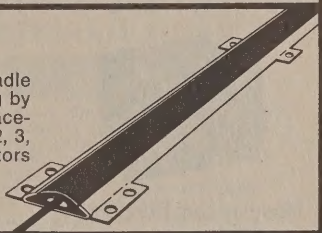
TAPESWITCH CONTROFLEX® SAFETY EDGES

Serve as cushioned sensing switches for the leading edges of doors, gate arms, machinery, presses, elevators, to stop or reverse the acting force. Numerous styles available. Double leads optional for Tapeswitch true "Fail-Safe" Circuit. Write or call for detailed literature.



PE-30 UNDER CARPET SWITCHING RUNNER

30 inches wide x 3/32 inches thick 5ft., 25ft., 50ft. roll. Can be cut to any length from roll. Can be used for indoor use under carpeting. Excellent under plywood or tile. Parallel Tapeswitches between clear sheeting. Tinned wires for easy connections.

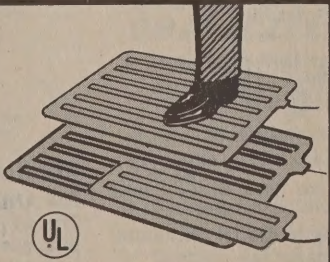


RBMA ROAD SWITCH

Successful, rugged roadway treadle for counting, timing, controlling by vehicles. 7/16" thick. Sealed, replaceable switch element. Lengths: 2, 3, 5, 8, 10 ft. Cast iron end protectors available.

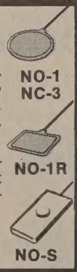
TAPESWITCH RELAY R-1

FOR AC CONTROL WITH ANY TAPESWITCH. This plug-in unit has AC outlet sockets giving Normally **ON** or Normally **OFF** 117 Volts AC at 5 Amperes. Built-in low voltage transformer. Simultaneous action.



CVP SWITCHING MATS

CVP style mats are durable flexible area switches for use exposed or under rubber mat or carpeting. UL listed for use in alarms. 3/32" thick. Available 6" x 23", 17" x 23", 23" x 35".

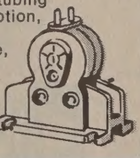


POINT AND WAFER SWITCHES

NO-1 and NO-1R—Rugged compact wafer switch. Normally Open. For under valuable objects or general purpose detection. 2 lb. nom. sensitivity.

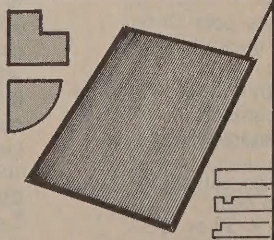
NC-3—Normally closed detector switch. Opens when weight is lifted off. 2 lb. nom. sensitivity.

NO-S—1 ounce sensitivity wiping action. Super sensitive.



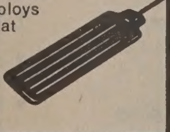
SENSITIVE AIRWAVE SWITCH MODEL AW

High quality diaphragm switch, adjustable sensitivity. Operates from tubing squeeze, air motion, light vacuum, breath pressure, etc. Silver contacts. Many adjustment features.



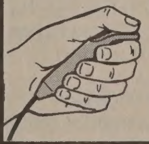
CKP & CRP HEAVY DUTY INDUSTRIAL SWITCH CARPET.

Both styles 1/2 inch thick with ramped edging. Sealed. Available any size or shape. Weatherproof. Standard sizes: 24" x 36", 30" x 30", 30" x 48", 36" x 48", 36" x 72". Optional features available.



111 CONTROFLEX® FOOTSWITCH

Rugged, low-profile sealed vinyl footswitch. Rated at 100 watts. Employs Controflex® in flat pad. Non tiring. Stand or jump on it. 2" x 5" x 3/8" 6 ft. lead wire. SPST N.O.



177 CONTROFLEX® HAND FLEX SWITCH

Innovation in hand controls. Rugged, sealed, compact. Hold in Palm and flex with thumb. 177 NO is **Normally Open.** 177 NC-3 is SPDT.

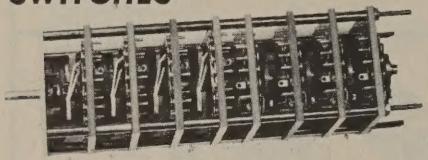
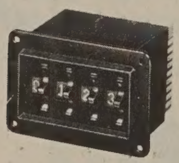
SWITCHES

SQUARE ROTARY SWITCHES



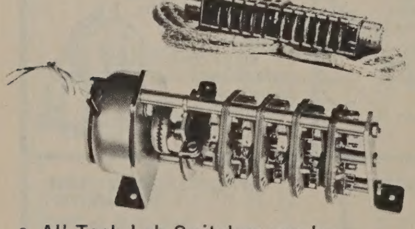
- 13 models available
- 1⁵⁄₁₆″ sq. to 8″ sq. x 15 decks (max.)
- 1 to 12 poles
- Up to 150 positions/pole
- Fixed stops or continuous rotation
- 3 amps at 120 VAC to 15 amps at 120 VAC
- Precious metal contacts

THUMBWHEEL SWITCHES



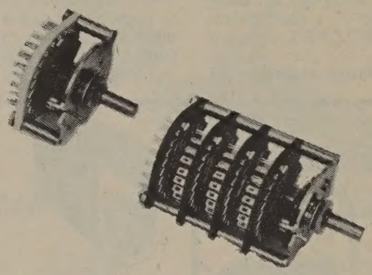
- Modular construction
- Compact
- Wide range of logic codes
- Positive detent
- Simple installation
- Two models available — Panelmite and Thumbmite

REMOTELY CONTROLLED ROTARY SWITCHES



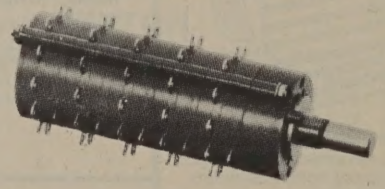
- All Tech Lab Switches can be supplied as stepping switches or continuous motor driven
- Solenoid drives
- Motor and Geneva drives
- Enercon AC incremental motor drive
- Available with interrupters or homing decks
- Completely pre-wired ready to install
- Hermetic sealing available
- May be remotely controlled by: Master-slave arrangement; Computer or other; External pulse
- Either AC or DC operation

TYPE 2 ROTARY SWITCH

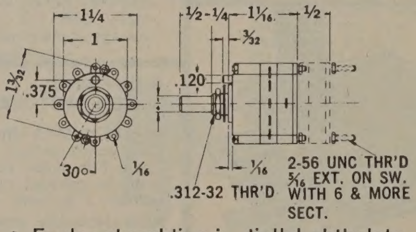


- Four insulation materials available
- 1 to 4 poles/deck
- Up to 24 positions/pole
- 2¼″ x 1¾″ x 24 decks (max.)
- Adjustable stops
- 5 amps, 120 VAC max.
- Precious metal contacts

TYPE 3 ROTARY SWITCH



DIMENSIONS

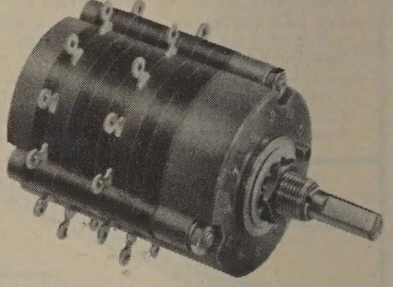


- Enclosed molding in diallyl phthalate
- Molded in terminals
- 1 or 2 poles/deck
- Up to 12 positions/pole
- 1¼″ OD up to 8 decks (max.)
- Adjustable stops
- 12 amps, 28 VDC
- Precious metal contacts
- Mixed decks of shorting and non-shorting
- Mixed shorting and non-shorting contacts on each deck
- Choice of either ⅜-32 or ⁵⁄₁₆-32 mounting bushing

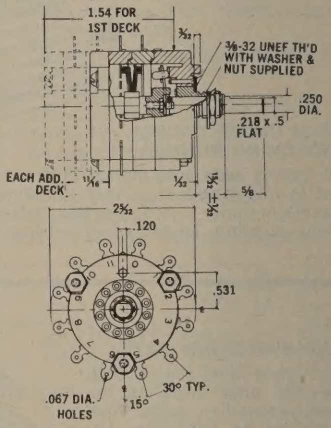
SPECIALS

Tech Labs can customize your Switch and Attenuator requirements, completely pre-wire your switches ready for installation. We can also undertake prototype design and manufacturing. Contact our factory for quotations.

ROTARY INSTRUMENT SWITCH SERIES 2000



- Extremely low contact resistance — <1 milliohm
- Extremely high insulation resistance — more than one million megohms
- Totally enclosed — dust tight
- Long life — > one million
- 12 position/1-6 pole/deck max.
- Solid silver contacts
- External adjustable stops
- Shorting (MBB)



SPECIAL DESIGN VARIATIONS

SIX AND ELEVEN POSITION DETENTS

The six position detent is 60° throw, skipping every other contact. The eleven position detent is 30° throw with the eleventh position omitted so that the detent goes 60° from position ten to position zero.

OFFSET WIPERS

30° and 180° offset wipers are available for use in special circuits.

CAPACITANCE

Less than 1 micromicrofarad between contacts or to ground.

CURRENT CAPACITY

5 amps maximum continuous duty.

THERMAL EMF

Extremely low. Silver contacts & brushes.

VOLTAGE BREAKDOWN

Withstands 1500V RMS between contacts and to ground.

LOSSES

Low electrical losses at frequencies up to several megacycles.

TEC LAB 5 AMP 50 VDC TOGGLE SWITCHES

EQUIVALENT TO TORBAL 5 AMP

Tec Lab switches are available in many **combinations** of bushings, terminals, handles, housings and electrical styles.

The most widely used **combinations**, or **types**, are listed in the table below. These are coded with the outline drawings on this page so you can determine construction details and dimensions of the various parts of the switch.

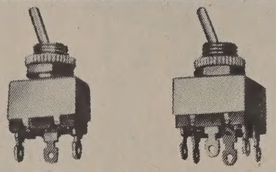
The SP-1, for example, has short bushing, solder terminals, long stem handle, single-pole housing and double-throw electrical style.

Model Designation	Bushing A	Terminal B	Handle C	Housing D	Elec. E
SP-1	1	1	1	1	1
SP-3	2	1	1	1	1
SP-4	1	1	1	1	2
SP-5	1	2	1	1	1
SP-6	1	1	4	1	1
SP-7	1	1	2	1	1
SP-10	2	1	3	1	1
SP-11	1	1	3	1	1
SP-14	2	1	4	1	1
DP-1	1	1	1	2	1
DP-3	2	1	1	2	1
DP-6	1	1	4	2	1
DP-7	1	1	2	2	1
DP-10	2	1	3	2	1
DP-11	1	1	3	2	1

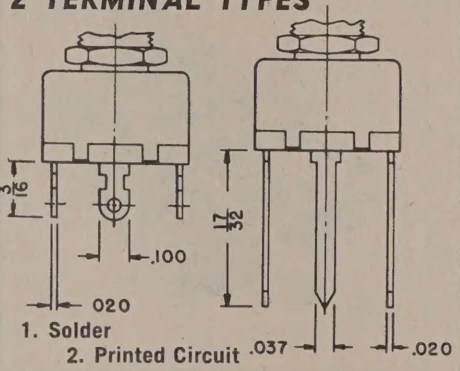
Generally, switch types not listed in this table can be made available. To specify the type desired in your inquiry, list the numerical style desired for each switch feature. Example, to specify switch having the following styles:

	Block Letter	Style No.
Bushing, long	A	2
Terminal, printed circuit	B	2
Handle, ball end, long	C	4
Housing, single-pole	D	1
Electrical, double-throw	E	1

Specify A2 — B2 — C4 — D1 — E1



2 TERMINAL TYPES



APPLICABLE MIL SPEC

MIL-S-3950 MS-75028 MS-75029

MATERIAL SPEC

- **Base**
  Rogers RX-600
  Phenolic Glass Fiber
- **Housing and Mounting Bushing**
  One-piece casting of Duronze III — corrosion proof
  Conforms to QQ-M-151 & AN-QQ-S-91
- **Contacts**
  Fine silver-gold plated

OPERATING CHARACTERISTICS

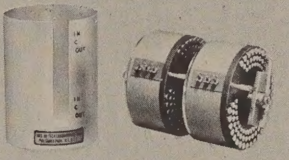
- **Insulation Resistance**
  Greater than 100,000 megohms at 100 VDC and 70°F
- **Dielectric Strength**
  At sea level 1,000V rms at 60 cps for 1 min.
- **Contact Resistance**
  Initial — less than .010 ohms
- **Contact Rating**

DC Load	AC Load
Inductive	Inductive
28V	**125V**
5 amp	5 amp

- **Temperature Range**
  −55°C to 85°C
- **Vibration Endurance**
  10 to 2,000 cps per MIL-R-25018
- **Shock Endurance**
  75G
- **Contact Chatter**
  10 microseconds or less MIL-R-5757
- **Corrosion Resistance**
  of complete assembly 50 hrs per QQ-M-151
- **Mechanical Endurance**
  100,000 cycles switching 10 amp. 50 VDC resistive load

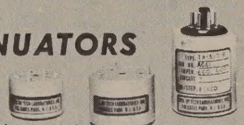
ATTENUATORS

ROTARY/VARIABLE



- Five basic models — 1⅞″ to 3″ dia.
- All circuit configurations
- Wide range of impedance
- Available with detents, tapers and cueing
- Aluminum anodized can
- Precious metal contacts
- Up to 45 steps
- Audio, video and RF

FIXED ATTENUATORS

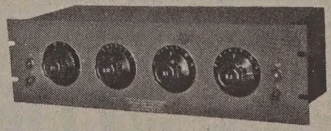


- Two basic models
- Standard circuits "T" and Bridged "H" — others available
- Octal plug-in base available
- Up to 80 db loss
- Many impedance available

VERTICAL/VARIABLE

- Two basic models — 1″ and 1½″ wide
- Many circuit configurations available
- Wide range of impedance
- Available with detents, tapers and cueing
- Black anodized escutcheon plate
- Precious metal contacts
- Up to 30 steps

PRECISION ATTENUATORS



TYPE 11T AND 11H PRECISION ATTENUATORS — DC to 10 MHz*

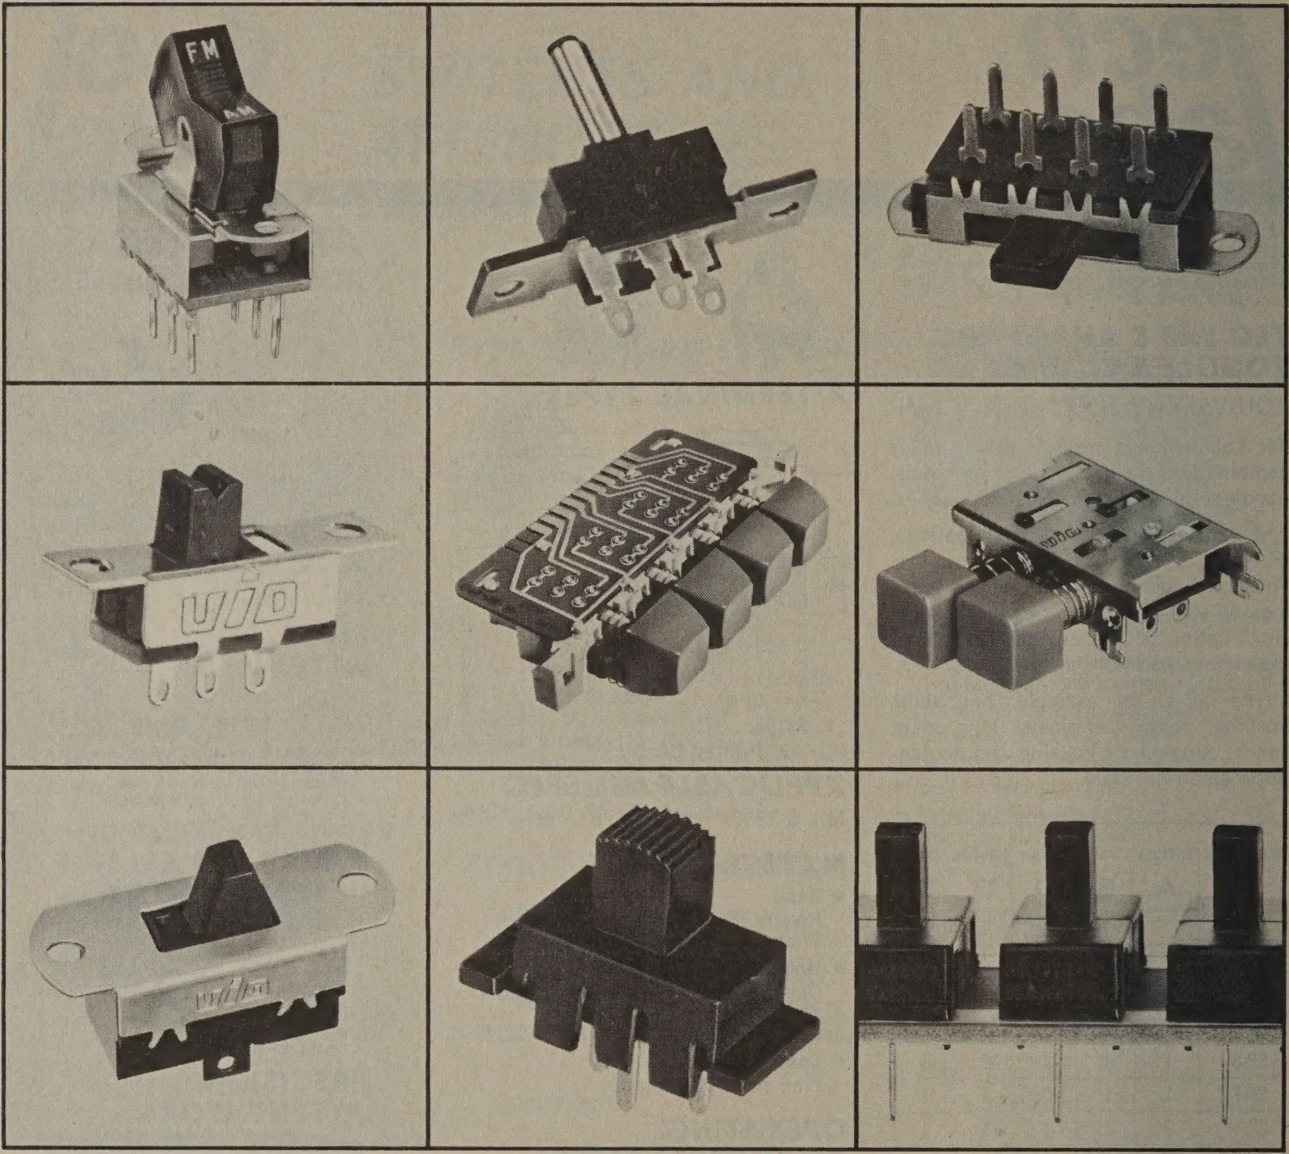
- Circuit: "T" or Balanced "H"
- Impedance: 50 to 600 ohms, as specified
- Resistor Accuracy: ±0.1% or better
- Accuracy: ±0.1 db to 200 KHz (overall) ±0.6 db to 2 MHz
  Lower values of loss, essentially flat to 10 MHz

Type No.	Circuit	db Range	db/ Step	Dimensions
11-T	"T"	111	0.1	5¼″x19″x5″
11-H	Bal. "H"	111	0.1	5¼″x19″x10″

* On Low Impedance Units, Lower Losses Usable to 100 MHz.

TYPE 850T AND 850H FOR THE AUDIO RANGE

- Circuit: "T" or Balanced "H"
- Impedance: 600/600 ohms unless specified — Other values to order
- Range: 2 dial unit gives 93 db in 0.1 db steps: 3 dial unit gives 111 db in 0.1 db steps
- Terminals: Telephone type jacks for input and output — Solder terminals provided on rear for permanent connections: Insertion of plugs into jacks lifts rear connections
- Accuracy: Resistors adjusted to ±0.1% excepting low values of loss are ±.25%



The UID collection goes on. And on. And on.

No matter what you manufacture, from computer peripherals to toys, UID offers you the best switch to turn it on. And if you don't find exactly what you need in the UID collection of rocker switches, toggle switches, slide switches, miniature switches, strip switches, illuminated switches or our newest PC-board mounted switches, UID can custom design the perfect switch for your needs. Before you decide how to turn your product on, send off for UID's total collection catalog. Write or call Ronald J. Stanish, UID Electronics Division, AMF Incorporated, 4105 Pembroke Road, Hollywood, Florida 33021, Telephone (305) 981-1211.

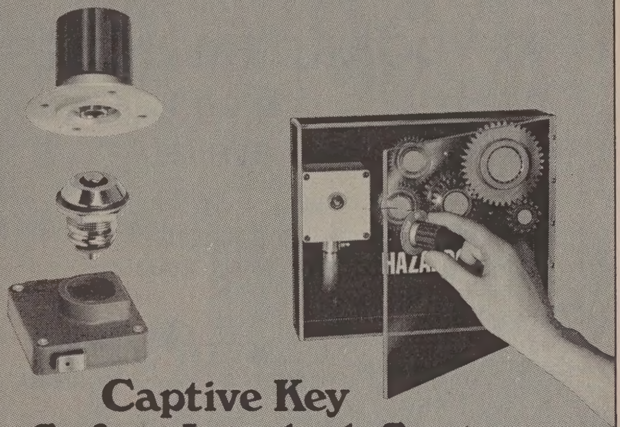
UNIMAX: BETTER SWITCHING SOLUTIONS

Lighted Pushbutton Switches

Ask for Catalog LPB

In a field full of appearance quality/performance switching variables, Unimax switches are the ones that *show* you care about quality, performance and price.

- *Single Lamp*—Round, square or rectangular, lighted and unlighted, momentary or alternate switching. 1-4 poles.
- *Dual Lamp*—Rectagular and square, double pole, momentary or alternate action. 5A @ 250VAC or 28 VDC. Keylock versions.
- *Four Lamp*—Multi-switch configurations. Approved to MIL-S-22885/9-12. Also meets high-shock requirements of MIL-S-910C.
- *Oil-Tight*—Pilot, lighted, unlighted, emergency, key-operated rotary types. 500V @ 10A ratings.

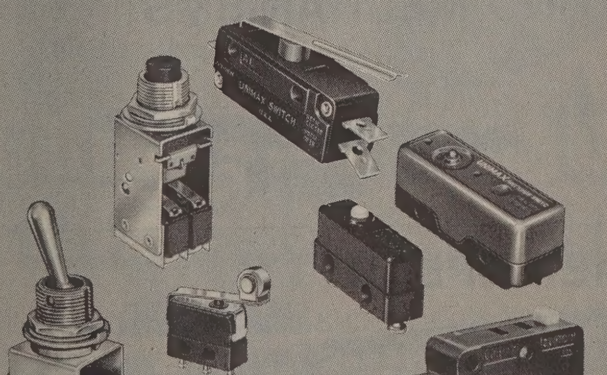


Captive Key Safety Interlock Systems

Current and expanding OSHA regulations attempt to limit mans disregard for his own and others safety. The Unimax "GW" line of "Captive Key" Interlocks and Safety Switches enables designers and users of hazardous machines to comply with the most stringent guard interlocking requirements. The "GW" system combines, in an integral unit, fail-safe electrical switching with a tamper-proof mechanical locking mechanism which positively prevents the release of a guard until the machine is securely isolated. Ask for Catalog 70.

The industry's widest selection of precision, general purpose, miniature and sub-miniature snap-action switches, as well as toggle and push-button switch assemblies. Ratings from low-level to 25A. All actuator styles available. Ask for catalog 60.

Snap-Action Switches



A full range of snap-acting switches enclosed in rugged die cast metal housings for protection against mechanical damage and, depending on the method of sealing, against destructive environmental conditions, Series KS (compact) is available with either through bolt or flange mounting. Series KL (heavy duty) is horsepower rated. Series KWL (splash proof) and KXL (explosion proof) are suitable for use in severe environments. All types are available with a variety of actuators. Ask for Catalog 30.

ELECTRONIC DISTRIBUTORS MASTER CATALOG

Known as O-T-S, OFF-THE-SHELF CATALOG until this edition, the MASTER CATALOG encompasses the following product areas: audio and communications equipment; electromechanical components; electronic circuit components and subassemblies; panel components and hardware; production equipment and tools; test instrumentation; power sources; wire and cable; and related materials and chemicals.

The MASTER CATALOG is broken down into four basic sections. **A GENERAL INDEX** which lists manufacturers and products alphabetically. **A MANUFACTURERS' CATALOG SECTION** which displays their respective product pages and lists their addresses and phone numbers. **A MANUFACTURERS' DIRECTORY,** where participating manufacturers, again listed alphabetically with addresses and phone numbers, highlight their distributors. And a **GEOGRAPHIC DISTRIBUTORS' DIRECTORY** which includes the names, addresses and phone numbers of the local distributors nationwide which stock the products of manufacturers whose data appears in the "Manufacturers' Catalog Section."

CARBORUNDUM THERMISTORS

APPLICATION DATA

Carborundum thermistors are temperature dependent resistors, offered in a wide variety of resistance-temperature characteristics. They are available with a wide range of negative temperature coefficients at 25°C ranging from −0.3%/°C to −5.4%/°C. These parts are made from ceramic materials, bonded in a high-temperature firing process into rod, disc, and chip configurations. They are available in a large range of sizes, thermal characteristics, resistance values, and temperature coefficients to suit the needs of many types of electrical and electronic circuits.

Carborundum offers long experience in the design of special resistance devices. This, together with expertise in the field of ceramic technology, assures a stable and uniform product to meet your thermistor requirements. All materials used in the manufacture of Carborundum thermistors are of the highest quality. Strict quality control is maintained over all stages of manufacture, and a minimum of two calibrations at the specified reference temperature is standard.

DEFINITIONS

Zero Power Resistance . . . is the resistance of a thermistor at the calibrating temperature, measured in such a manner that the measuring current does not appreciably heat the thermistor. Resistance, as used here, means zero power resistance unless otherwise stated.

Beta (β) . . . is the number that satisfies the equation:

$$R_1/R_2 = {}_{\epsilon}\beta\ (1/T_1\text{-}1/T_2)$$

Carborundum determines beta from measurements at 25°C and 73.2°C. Beta is proportional to the slope of the resistance-temperature characteristic, and it is also known as the material constant. It is not truly a constant, but it gives a good approximation of resistance over a substantial working range. In the equation, ϵ is 2.718 . . ., the base of natural logarithms, and β, T_1, and T_2 are in Kelvin (K).

Alpha (α) . . . or temperature coefficient of resistance (TCR) is proportional both to beta and to the square root of the temperature at which it is specified. Very nearly,

$$\alpha = -100\ \beta/T^2$$

In this equation, temperature is in Kelvin (K), and α is in percent per degree C (%/°C). It is evident that alpha becomes much higher as temperatures decrease.

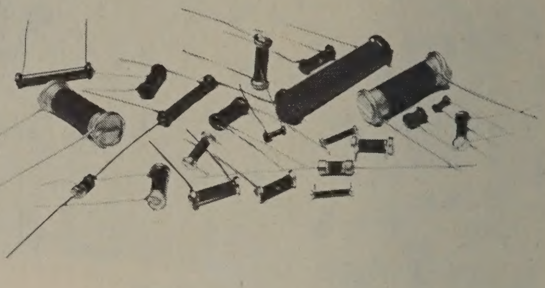
Dissipation Constant (δ) . . . is the ratio of power dissipated by the thermistor divided by the temperature rise above ambient due to self-heating. Here, it is 20 times the power required, in watts, to bring the thermistor to 75°C in an ambient of 25°C, and it is expressed in milliwatts.

Time Constant (τ) . . . is the time required for a thermistor which has attained equilibrium after being self-heated to 75°C to cool to 43.4°C in an ambient of 25°C. It is expressed in seconds.

Both δ and τ are necessarily approximate quantities, and they represent complicated concepts. They cannot be fully defined or used unless the conditions under which they are measured are fully defined.

In particular, note that the dissipation of a thermistor is the sum of dissipation due to conduction, convection, and radiation, which are related to temperature by linear, square-law, and fourth-power equations respectively. Only over narrow temperature ranges can dissipation constant be considered constant.

Also note that time constant is defined by a zero-power cooling curve. If the thermistor is attached to a heat sink the effective time constant is changed substantially. The time required for a thermistor to reach equilibrium due to heating from a current passing through it may be dramatically different from the time constant as defined above.



THERMISTOR SPECIFICATION

Thermistors are most often specified by a zero power resistance, suitably toleranced, at some specified temperature (most often 25°C or 37.8°C), and by a temperature coefficient, also suitably toleranced. This is all that is required as an electrical specification. Additional specifications may result in double dimensioning and be unduly restrictive (and therefore costly) or ambiguous.

The zero power resistance of a thermistor should be read in a temperature controlled, agitated oil bath. Not only does the oil bath provide a more controllable constant temperature, but it also speeds the settling of the reading.

TEMPERATURE COEFFICIENTS

Of a variety of ways in which temperature coefficients may be expressed, beta is chosen as being the most nearly universal. If β is known, then it is possible to calculate the approximate resistance of the thermistor at any given temperature.

Alpha changes with temperature. Due to the problems associated with the accurate measurement of an incremental difference in temperature, direct measurement of α is both impractical and imprecise.

The ratio of resistances between two temperatures may be specified. In order to obtain the approximate resistance at any other temperature, beta must be calculated or a resistance-temperature characteristic curve used.

Resistance may be specified at each of two (or more) temperatures. Where this is done, one resistance usually carries a tight tolerance, the other resistance(s) a much looser tolerance. Two tight tolerances on resistance at two different temperatures may result in an unrealistically tight tolerance on temperature coefficient.

OTHER CONSIDERATIONS

In creating a specification for a thermistor, the following should be taken into account:

- . . . size of the thermistor body and size overall.
- . . . coating material, if any.
- . . . marking, if any.
- . . . lead detail, including material, length, diameter, and trim.

Note that δ and τ are fully defined by the physical parameters of a thermistor. If they are shown on a drawing, they should be shown as nominal or marked for reference only.

When possible, specify a thermistor by part number. Second best, show a part number with exceptions (for example, 0325F5-434 except ±5% tolerance on resistance). When neither of these is practical, it is best to fully define the thermistor by a detail drawing.

CARBORUNDUM

CARBORUNDUM THERMISTORS

RODS AND CHIPS

ROD THERMISTORS

Rod thermistors are manufactured by extruding and firing a suitable ceramic mixture. For a given type of thermistor, low-, medium-, or high-sensitivity, a number of mixtures are available: in general, a mixture yielding a higher resistivity product also yields a higher beta or temperature sensitivity.

Standard rod thermistors are shown in the table below. They have a resistance tolerance of ±10% at 25°C, and they are neither coated nor marked. Special rod thermistors may be ordered with intermediate resistance values, other resistance tolerances, other calibration temperatures, coating, marking, special lead preparation, etc. Parts without wire leads are also available.

Order by the style number followed by the dash number. For example, part number 0540F4-404 is a thermistor of style 0540F4-, of 4.7 ±10% ohms resistance, and with a beta of 1300 ±10% K.

STOCK ITEMS, carried by Carborundum distributors, are styles 0540F4- and 0550H4- of those resistance values marked with an asterisk (*).

CHIP THERMISTORS

Chip thermistors, manufactured by a proprietary process, are available to meet today's needs for miniaturization. Standard parts, shown in the table below, are furnished without leads, and are suitable for use in hybrid microcircuits. Parts with wire leads are also available.

The basic material system is substantially the same as that for disc thermistors, and the data for temperature characteristics of disc thermistors apply. Chip thermistors have a nominal thickness of 0.015 inch. Metallization is Dupont 8032 silver.

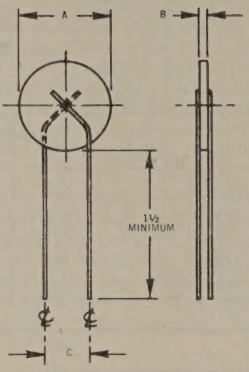
CARBORUNDUM

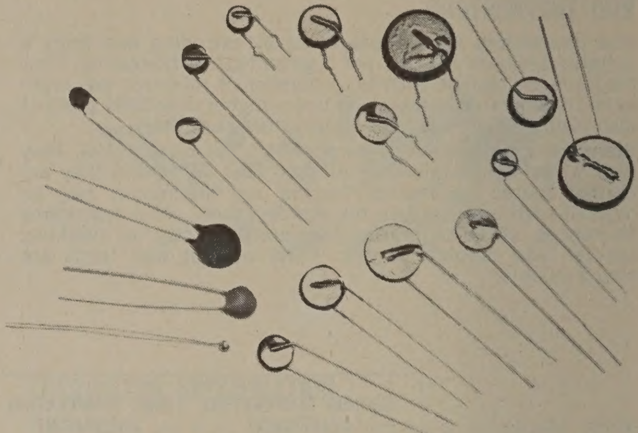
CARBORUNDUM THERMISTORS
HIGH SENSITIVITY NTC DISCS

DISC THERMISTORS

Disc thermistors are manufactured by pressing and firing a suitable ceramic mixture. Carborundum offers six standard mixtures of various resistivity and beta.

Standard disc thermistors are shown in the table on this page. They have a resistance tolerance of ±10% at 25°C, and they are neither coated nor marked. Special disc thermistors may be ordered with intermediate resistance values, other resistance tolerances, other calibration temperatures, coating, marking, special lead preparation, etc. Parts without wire leads are also available.





Notes:

1. Dielectric coating and marking are extra-cost options.
2. Kinked leads for printed circuit use available upon request.

Elmwood thermostats are precision-engineered for quick, reliable response in high limit or control applications. Many meet military specifications, as well as U.L., C.S.A. and European requirements. Exposures are from —65°F to +550°F, ratings to 15 Amps, with narrow or wide differentials as required. A variety of brackets and terminals are available, as well as custom packaging. Write or phone for complete catalog.

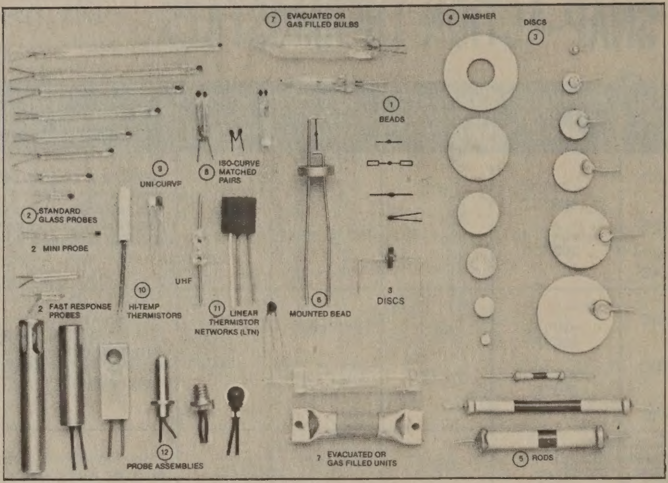
SUB-MINIATURE SNAP-ACTION THERMOSTATS

DESCRIPTION	ELECTRICAL RESISTIVE RATINGS	TEMPERATURE SET POINT RANGE	NARROWEST TOLERANCE ALLOWABLE	NARROWEST DIFFERENTIAL AVAILABLE	APPROV. AGENCY LISTINGS	TYPICAL APPLICATIONS
3100  Hermetically sealed, all welded construction long life, narrow or wide tolerances and differentials.	6 Amp. 125 VAC 7 Amp 30 VDC 3 Amp 250 VAC	—30° to 500°F —34.44° to 260°C	±3°F ±1.7°C	6°F max. 3.3°C max.	U.L.	High-temp control for glue guns, copy machines, computers, aircraft, electronic controls with commercial or military specifications.
3103  Similar to 3100 with additional mfg. and testing procedures to requirement of MIL-S-24236.	6 Amp 125 VAC 7 Amp 30 VDC 3 Amp 250 VAC	—30° to 500°F —34.44° to 260°C	±3°F ±1.7°C	6°F max. 3.3°C max.	U.L.	Similar to 3100, for more stringent military requirements, such as Apollo and Skylab heat controls.
3150  Hermetically sealed, all welded const. Similar to 3100 except low silhouette .301″ max. design	4 Amp 120 VAC 30 VDC 2 Amp 250 VAC	—30° to 350°F —34.44° to 177°C	±3°F ±1.7°C	6°F max. 3.3°C max.	U.L.	Copy machines, computers, aircraft, electronic controls with commercial or military specifications where space is critical.
3153  Similar to 3150 with additional mfg. and testing to requirements of MIL-S-24236	4 Amp 120 VAC 30 VDC 2 Amp 250 VAC	—30° to 350°F —34.44° to 177°C	±3°F ±1.7°C	6°F max. 3.3°C max.	U.L.	Similar to 3150, for more stringent military requirements, such as Apollo and Skylab heat controls.
3305  Subminiature .430″ dia., hermetically sealed, tolerances to ±3°F and narrow differentials.	3 Amp 120 VAC 30 VDC	100° to 250°F 37.8° to 121°C	±3°F ±1.7°C	6°F max. 3.3°C max.	None	Crystal ovens, gyros, electronics overheat protection where subminiature thermostat is required.
3000  Custom package housings for any Elmwood thermostats. Housings all-welded stainless steel.	Any model	—30° to 500°F —34.44° to 260°C	±4°F ±2.2°C	8°F max. 4.4°C max.	See other models	Aircraft bleed air duct sensing, hydraulic oil temp control, liquid bath control, heater control.
3001-3004 Non-hermetic, utilizing 3100 design with phenolic and metal housing.	7 Amp 120 VAC 30 VDC 3 Amp 250 VAC	0° to 335°F —17.8° to 168.3°C	±4°F ±2.2°C	8°F max. 4.4°C max.	U.L. C.S.A.	**3001-** Computers, copy machines, radar equipment, where low height .281″ is required. **3004-** Where 4mm spacing is required for Europe.
3450  Non-hermetic, with 15 Amp 120 VAC rating. U.L. and C.S.A. listings for 100,000 cycles.	15 Amp 120 VAC 12 VDC 10 Amp 277 VAC	32° to 335°F 0° to 170°C	±5°F ±3°C	20°F 11°C min, below set point.	U.L. C.S.A.	Power supplies, communication, medical equipment, computers where high amp loads are present. Where 4mm spacing is required for Europe specify 3455R.
3455RBV  Epoxy overmold constr. of 3455R. For elec. insulation of terminal or moist conditions.	15 Amp 120 VAC 12 VDC 10 Amp 277 VAC	0° to 221°F —20° to 105°C	±5°F ±3°C	20°F 11°C min. below set point.	U.L. C.S.A. Inter-nat'l	Similar to 3455R with epoxy overmold for protection of terminals and sealing of unit.
3450RC-3455RC  High temperature, with 15 Amp 120 VAC rating. Rivet insert sleeve construction for International listings.	15 Amp 120 VAC 12 VDC 10 Amp 277 VAC	32° to 500°F 0° to 260°C	±5°F ±3°C	20°F 11°C min. below set point.	U.L. C.S.A. Inter-nat'l	Similar to above, where high temperatures are present. 3450RC — 3 mm spacing 3455RC — 4 mm spacing
3455RM  Non-hermetic manual reset. Will not recycle automatically at room temperature.	15 Amp 120 VAC 10 Amp 240 VAC	125° to 300°F 52° to 150°C	±8°F ±5°C	Man. reset Auto. reset below 40°F 4.44°C	U.L. Inter-nat'l	High limit protection where manual reset is required. 3455RM meets 4mm spacing required for Europe.

THERMISTORS

Fenwal® Electronics

WORLDWIDE THERMISTOR
LEADERSHIP
THROUGH QUALITY



● THERMISTOR CONFIGURATIONS ●

1. Glass Coated Beads — used where small size, fast response, high precision, stability, and temperatures to 300°C are required.

2. Glass Probes — medium-small in size. Many of the advantages of beads but rugged, more easily mounted, useful in liquid media.

3. Discs — used where medium power dissipation is a requirement and space not a problem. Useful to 150°C.

4. Washers — used where high power dissipation is a prime requirement.

5. Rods — these units have power dissipation intermediate between discs and washers and are also used where their physical shape is an asset.

6. Mounted Beads — provide ease in using glass beads in such applications as gas chromatography, flow and vacuum measurement, etc.

7. Vacuum and Gas Filled Assemblies — high power sensitivity for specialized circuit applications.

● INTERCHANGEABLE THERMISTORS ●

8. Iso-Curve® Interchangeable Thermistors — these units available in bead or glass probe configurations, follow standard curves over wide temperature range, and are completely interchangeable. Units match standard curves as close as ± 1/4 % of resistance or as required.

9. Uni-Curve® Interchangeable Thermistors — completely interchangeable units having an accuracy of +0.2°C over a temperature range of 0°C to 70°C and available on special order to other tolerances and ranges.

● HI-TEMP THERMISTORS ●

10. Hi-Temp Thermistors — designed specifically for HI-TEMP measurement and control in applications having operating ranges from 500°C to 1000°C.

● LINEAR THERMISTOR NETWORKS (LTN) ●

11. Linear Thermistor Networks (LTN™) — precision resistors and thermistors which are designed to produce a resistance change or voltage output that varies linearly with temperature over the selected temperature range. Ask for Bulletin L-9A.

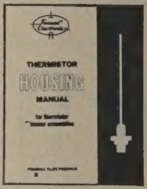
● THERMISTOR PROBES ●

12. Probe Assemblies — standard catalog types or built to specific military or commercial requirements. We are experienced in design of probe assemblies for all fields of application including industrial control and indication, aerospace — specializing in telemetry applications, and oceanographic — featuring fast response, very high pressure, and interchangeability using our Iso-Curve and Uni-Curve Thermistors.

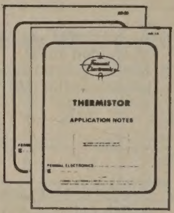
Here's Help in Applying F. E. Thermistors . . .

THERMISTOR MANUAL

THERMISTOR MANUAL (EMC-6). Most complete up-to-date listing of thermistors available. Theory, engineering data, complete specifications.



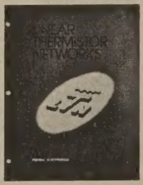
THERMISTOR HOUSING MANUAL (L-5A). Detailed information on how Fenwal Electronics can build thermistor sensor assemblies to fit your requirements.



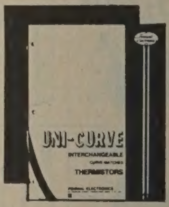
THERMISTOR APPLICATIONS NOTES (AN-1A, AN-2A). "Methods for designing linear temperature read out circuits (AN-1A)" and "Using thermistors to compensate for transistor temperature sensitivity (AN-2A)"

HI-TEMP THERMISTORS

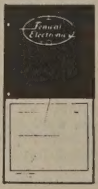
HI-TEMP THERMISTOR BULLETIN (L-8A) features thermistors designed specifically for high temperature measurement and control applications having operating ranges from 500°C to 1000°C.



LINEAR THERMISTOR NETWORKS (LTN™) precision resistors and thermistors which are designed to produce a resistance change or voltage output that varies linearly with temperature over the selected temperature range. Ask for Bulletin L-9A.



INTERCHANGEABLE THERMISTORS: ISO-CURVE manual (L-2B) and UNI-CURVE manual (L-6A) provide indepth data pertaining to precision and low-cost RT, curve-matched interchangeable thermistors.



CAPSULE THERMISTOR COURSES (L-3A). A complete 24-page primer on thermistors, their characteristics and uses, including curves, circuit diagrams and applications data.

EXPERIMENTER'S THERMISTOR KITS

Model G-200 Standard Kit. Contains 12 different thermistors (2 glass probes, 3 beads, 2 discs, 3 rods, 2 washers). Each thermistor is packed with specification sheets showing characteristics. **PRICE: 19.95**

Model G-700 Low-Cost Kit. Includes four glass beads and probes, manual, and computer for a variety of applications. **PRICE: 4.95**

Model G-701 Economy Kit. Includes 10 glass beads and probes, manual and computer for a wider range of applications than G-700 kit above. **PRICE: 9.95**

Model G-500 Uni-Curve Kit. Contains 6 standard Rt curve matched interchangeable thermistors (3K, 5K, 10K, 30K, 50K, 100K. Includes complete data sheets with full specifications and DC. TC listings. **PRICE 19.95**

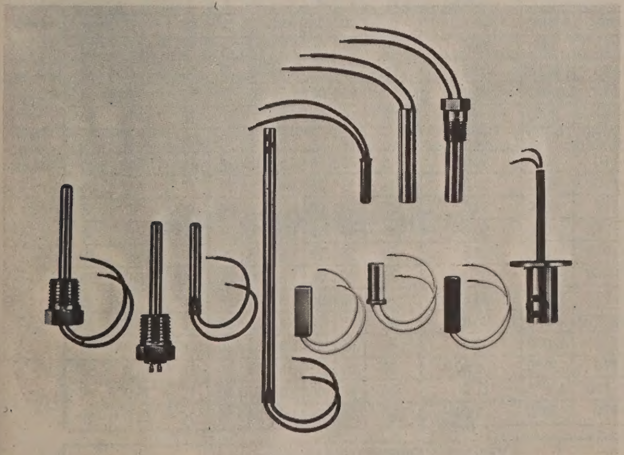
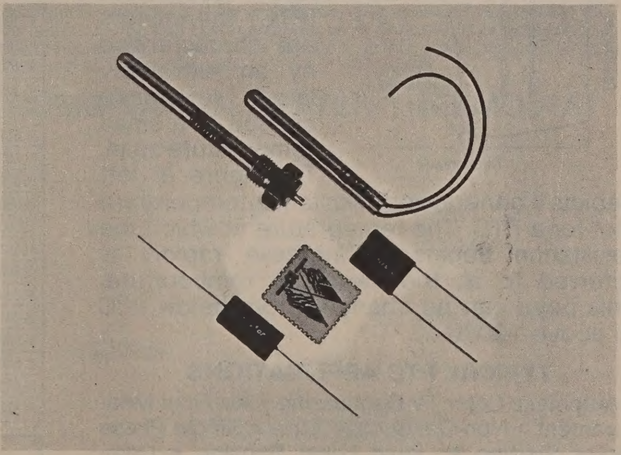
- **-G20** for Glass Bead Assemblies

THERMISTOR PROBES



The probes illustrated above include stainless steel, aluminum, and chrome-plated materials in a variety of configurations. In addition, a variety of other designs are available. These probes are used in conjunction with solid state circuitry for liquid level measurement, and for use as sensors to measure the temperature of liquids or surface temperatures. Write for probe catalog TP-739.

LINISTOR® ASSEMBLIES



Keystone developed Linistor assemblies to give an accurate resistance response over a temperature span of 0° to 100° C. Because Linistor assemblies have flattened out the thermistor resistance curve to a constant and predictable straight-line plot, they are valuable in a wide range of applications. Four standard encasements are available. Tolerance on resistance of Linistor is ± 2% at 25°C. Write for Linistor Bulletin L-601.

Keystone CARBON COMPANY

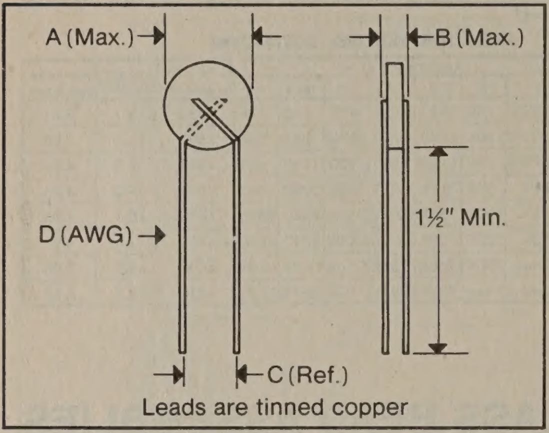
DISC TYPE THERMISTORS WITH CROSSED LEADS



Leads are tinned copper

Maximum operating temperature—125°C

Keystone also offers a line of Disc-Type Thermistors ranging in sizes from .100 inch to 1.00 inch in diameter. Thirty-four different slopes are available (temperature coefficients from −3.75% per °C at 25°C to −5.22% per °C at 25°C). Resistance values range from 11.16 ohms to 518,400 ohms at 25°C. Write for short form catalog T-504 or complete catalog BW2.

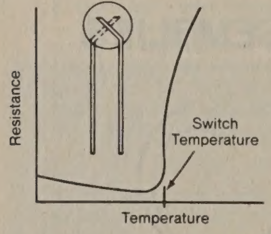
PTC—POSITIVE TEMPERATURE COEFFICIENT THERMISTORS



Positive Temperature Coefficient (PTC) thermistors are characterized by an extremely large resistance change in a small temperature span. The figure at left depicts a generalized resistance temperature plot for a PTC. The temperature at which the resistance begins to increase rapidly is referred to as the switching temperature. This point can be changed from below 0°C to above 120°C.

TYPICAL PTC APPLICATIONS

• Automatic Color TV Degaussing • Air Flow Measurement • Non-Destructive Fuse • Single Phase Motor Starting • Liquid Level Sensing • Combination Heater-Thermostat • Arc Suppression • Time Delay Fusing

For detailed application notes, write for Bulletin PTC-9-75.

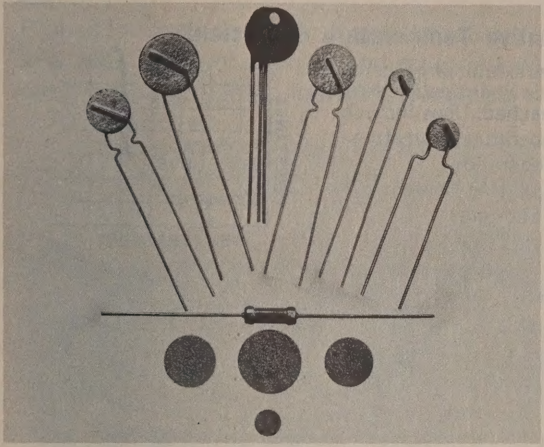
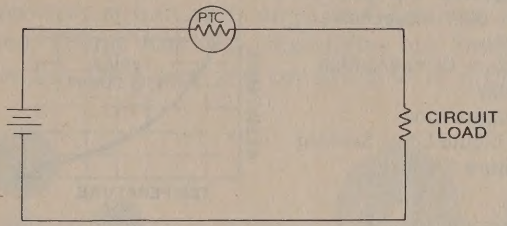
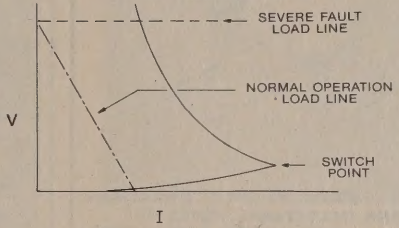
POPULAR PTC CIRCUIT APPLICATIONS

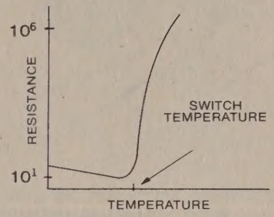


A large resistance change in a small temperature span best describes PTC thermistors. The temperature at which the resistance begins to increase rapidly is known as the "switching temperature." Because of this transformation, PTC's are an ideal component for circuits where the built-in switching temperature can be used to advantage. A few of the many applications are shown on this page.

NON-DESTRUCTIVE FUSE

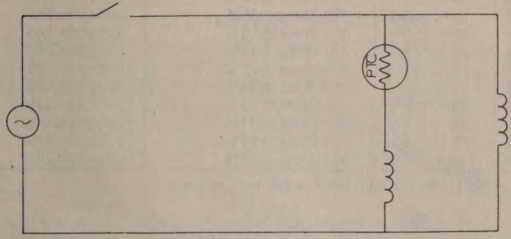






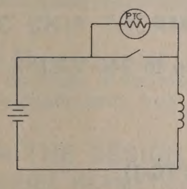
In normal operation the PTC dissipates minimal power keeping its body temperature well below the switch temperature. If a fault of sufficient magnitude occurs, additional power drives the temperature of the PTC up to the switch temperature. At this point additional power becomes available to the PTC, and the only stable operating point is at a much higher resistance than the switch temperature resistance as shown in the illustration above.

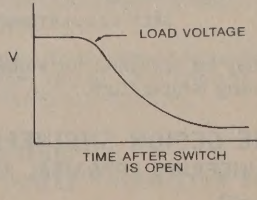
MOTOR STARTING



In the above circuit the PTC thermistor replaces the troublesome starting switch in a single-phase motor. When the circuit is energized the PTC has a low resistance and permits most of the line voltage to be applied to the starter winding. As the motor starts, the PTC heats up until the switch temperature is reached at a rate determined by the thermal inertia of the PTC and current flowing through the starting winding. At this point, the thermistor rapidly changes from a low resistance device to a high resistance unit, and the steady state power applied to the PTC is very low causing the current through the starting winding to be negligible.

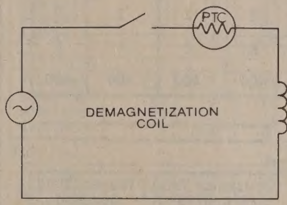
ARC SUPPRESSION

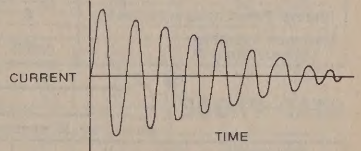




In the above illustrations the PTC switches from a low resistance to a high resistance when the switch is opened. The low resistance of the PTC provides effective arc suppression, and the subsequent PTC switching action transfers essentially all of the power supply voltage from the inductive load to the PTC element.

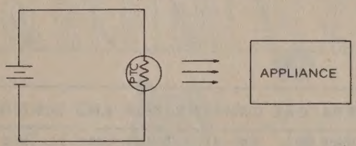
AUTOMATIC DEGAUSSING

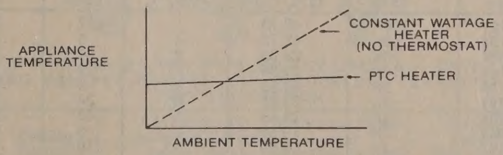




When the switch on the above circuit is closed, a high percentage of the line voltage is impressed across the demagnetization coil. Within a short period of time, the PTC self-heats, switching from a low resistance level to a high resistance, and thereby decreasing the demagnetization coil current to near zero. The length of time for this switching action to occur is a function of the power applied to the PTC and its thermal inertia.

COMBINATION HEATER-THERMOSTAT





PTC thermistors provide an economical method of temperature control by combining the function of the heater and thermostat in one ceramic pellet. This thermostatic action is accomplished by the steep PTC characteristic. As the ambient temperature rises, the resistance of the PTC is increased, thus reducing the input power to the circuit maintaining a relatively constant temperature.

NTC THERMISTORS FOR SURGE SUPPRESSION

Stud assembly allows heat sinking for max. power dissipation. Available in resistances as low as 1 ohm at 25°C.

PTC (Positive Temperature Coefficient)

Thermistors exhibit large increases in resistance when specified switch temp. is reached. Uses include:

- Overtemperature protectors
- Surge Generation
- Self Regulating Heaters
- Current Limiters

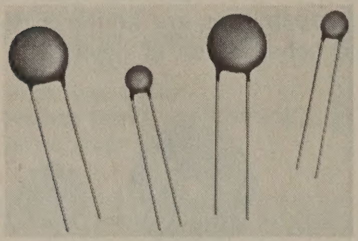
Positive Temperature Coefficient Resistors
POSISTORS®



These Posistors are designed to provide reliable over-current circuit protection. They consist of a barium titanate semiconductor resistance elements that are heat/current sensitive as indicated in the curve below. Once the threshold current is reached, self-heating causes the device to increase resistance rapidly thus protecting the circuit with which it is in series.

For Heating-Control... PTH457 Series

This 457 Series of Posistors is specifically designed for both self-heating and heater-control applications in consumer and industrial products. They eliminate nichrome wire heaters and bimetalic thermostats and are inherently self-compensating.

Part Number	Temp. Char.	Nom. Resist. Value (Ohms)	Resist. Range (Ohms)	Oper. Volt (V)	Current at Oper. Voltage (MA)	Approx. Surface Temp. (°C)	Max. Volt (V)

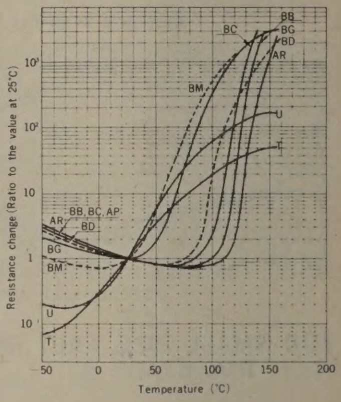
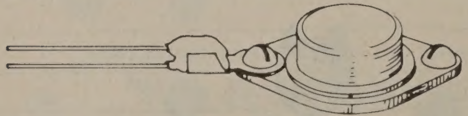
TYPICAL TEMP. CHARACTERISTICS





For Semiconductor Overload Protection... PTH487A Series

The PTH487A is designed to sense the case temperature of high power semiconductors and appropriately reduce the power dissipation of these devices when dangerous power and/or current limits are approached. The PTH487A is normally used in the base biasing circuit of the protected semiconductor as shown in the diagram below. The collector dissipation is limited when constant overloads are present in the manner indicated in the Ic vs temperature curve.

SPECIFICATIONS

Part No.	Temp. Char.	Resistance (1.5 VDC)		
PTH487A	BE	77°F 500Ω Max.	176°F 2KΩ Max.	194°F 3KΩ Min.

Voltage	Current	Withstand Voltage
12.5 VDC Max.	0.1A Max.	15 VDC Min.

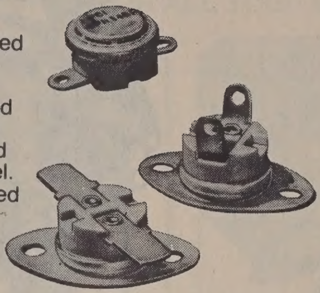
pci SNAP-ACTION THERMOSTATS

SERIES 5002—Miniature High Temp Thermostat

Miniature, rugged switch suited for high temperature applications; plattens, steam equipment, electrically heated press heads, etc. Available in ceramic base only with closed caps of brass or stainless steel. Cap construction can be sealed with resin for additional protection.

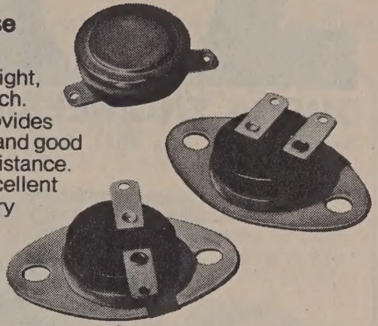


Series Part No.	Type	Contacts Amps	Volts	Operating Temp. Range
5002	SPST Single Break	3 1.5	120V ac 240V ac	−20°F to +575°F

Ask for Reference Sheet 5002

SERIES 5003—Close Control Thermostat

Extremely thin, lightweight, water type thermal switch. Overall depth .250." Provides fast, positive response and good shock and vibration resistance. NC or NO contacts. Excellent repeat reliability. Factory calibrated.

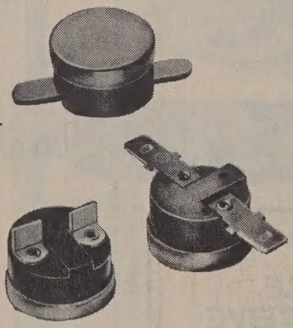


Series Part No.	Type	Contacts Amps	Volts	Operating Temp. Range
5003	SPST Single Break	5	120V ac	−20°F to +350°F

Ask for Reference Sheet 5003

SERIES 5004—240V AC Surface Thermostat

Designed with 4 mm clearance and for operation at 240V ac. Applications include industrial, electronic and electrical equipment such as business machines, radar, computer peripherals, heater blanket controls and heat sink protection. Excellent shock and vibration resistance. Rapid thermal response due to low mass. Factory calibrated. U/L recognized.

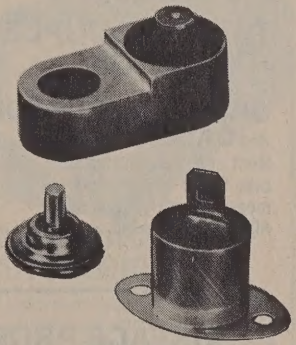


Series Part No.	Type	Contacts Amps	Volts	Operating Temp. Range
5004	SPST Single Break	7	240V ac	−20°F to +350°F

Ask for Reference Sheet 5004

SERIES 5011—Hermetically Sealed Surface Thermostat

Low cost, designed to meet exacting requirements of shock and vibration applications. For use where temperature control, warning or protection is required. Fast response. Factory calibrated and 100% inspected. Available with a variety of adapter packages (plug, bolt or isolated base mounting) to suit specific applications.

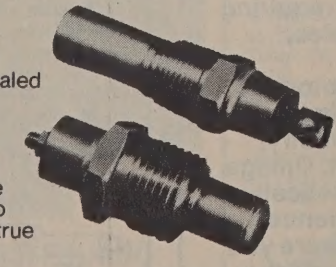


Series Part No.	Type	Contacts Amps	Volts	Operating Temp. Range
5011	SPST Single Break	3	120V ac 32V dc	−20°F to +575°F

Ask for Reference Sheet 5011

SERIES 5020—Immersion Thermostst

A snap-acting hemetically sealed temperature control designed for use where a sealed unit and high vibration resistance are required. Applications include water-cooled engines and engine generator sets. Temperature sensing element confined to very tip, assuring rapid and true response to liquid or air temperature.

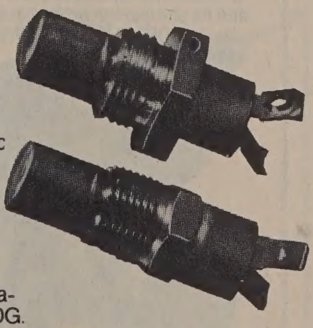


Series Part No.	Type	Contacts Amps	Volts	Operating Temp. Range
5020	SPST Single Break	3	32V dc	−20°F to +525°F

Ask for Reference Sheet 5020

SERIES 5100—Immersion Thermostat

Especially designed for use where a sealed unit and high vibration resistance are required. Applications include water-cooled engines, hydraulic systems, degreasers, industrial air compressors and tanks where liquids are heated as in commerical dryers and sterilizing equipment. Designed for rapid response to liquid or air temperature. Approved for vibration per MIL-E-5272 proc. XII 10G.



Series Part No.	Type	Contacts Amps	Volts	Operating Temp. Range
5100	SPST Single Break	3 1.5	120V ac 240V ac	−20°F to +575°F

Ask for Reference Sheet 5100

NEW! FREE!

THERMOCOUPLE HANDBOOK

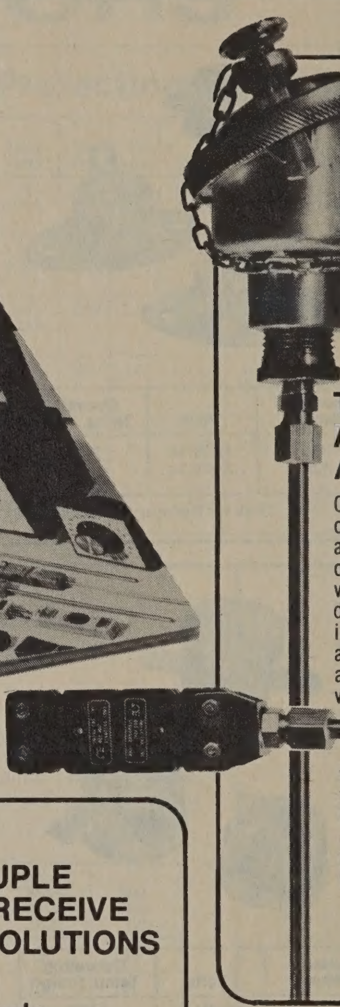
OMEGA'S HANDBOOK and CATALOG . . .
Most complete listing of over 8,000 temperature measurement products. All prices included.

SURFACE PROBES AND PYROMETERS

OMEGA offers a number of unique, patented thermocouple probes designed for measuring the precise temperature of moving and stationary surfaces. Also available are companion readout meters, portable pyrometers and companion probes for heavy duty service. New miniature thermometer and its companion probes are in stock also ALL OFF-THE-SHELF. **Prices start at $15.00 per probe.**

YOUR THERMOCOUPLE PROBLEMS RECEIVE REALISTIC SOLUTIONS AT OMEGA

Most thermocouple problems can be solved using Omega's "off-the-shelf" thermocouple products. But, if you have that SPECIAL problem requiring exotic thermocouples, multipoint/profile thermocouples, motorized switches, or anything unusual in thermometry, just send us a print. Omega will quote you realistically. Our years of experience and technology assure you QUICK DELIVERY and the right temperature sensor for the job. AND, WE KEEP OUR PROMISES.

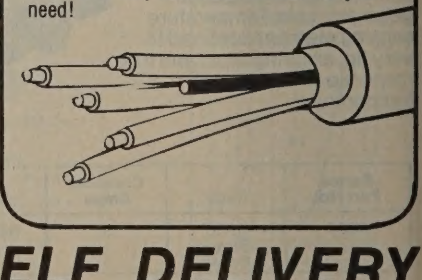


THERMOCOUPLES AND ASSEMBLIES

OMEGA produces a broad range of thermocouples, probes and assemblies, including a full line of sub-miniature probes, bare wire-type thermocouples with a diameter as fine as 0.0005 inches, quick-disconnect type assemblies, replacement probes and thermocouple assemblies with a variety of heads and terminations. All are available for IMMEDIATE DELIVERY. Refer to FREE catalog for complete listing and prices. **Prices start at $2.50 per thermocouple.**

THERMOCOUPLE WIRE

OMEGA's broad range of thermocouple wire encompasses just about every conceivable type available, including bare wire, teflon coated wire, metal-sheathed wire, all types of asbestos, glass, plastic covered and enameled wire in sizes from 0.0005" diameter on up. Even tungsten-rhenium, platinum and base metal alloys, plus various extension wire types . . . all ON HAND for IMMEDIATE DELIVERY. Buy as little or as much as you need!



FOR IMMEDIATE OFF-THE-SHELF DELIVERY CALL OMEGA . . . (203) 359-1660 or TELEX 996404

Ask about "Speed Service": orders shipped within 24 hours when requested. Minimum Order: $10.00.

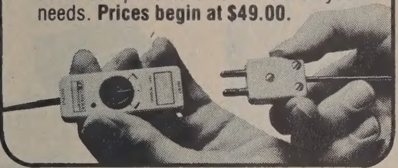
THERMOCOUPLES

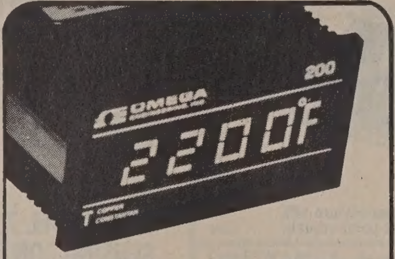
ONE COMPLETE SOURCE FOR ALL YOUR OFF-THE-SHELF THERMOCOUPLE REQUIREMENTS.

NEW! ELECTRONIC ICE POINT

The OMEGA-MCJ is an incredible Thermocouple Ice Point Reference built into a color-coded thermocouple connector! Available in 9 calibrations, converts from a "female" to a "male" connector in seconds. **Priced at $49.00.**

OMEGA also offers many other types of thermocouple references and cold junctions compensators to fill all of your needs. **Prices begin at $49.00.**





200
OMEGA
2200F
T COPPER CONSTANTAN

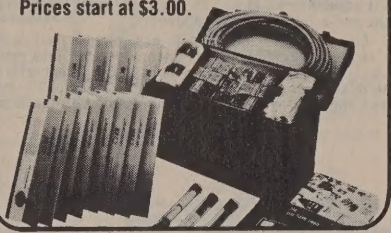
METERS, AMPLIFIERS AND READOUTS

OMEGA's expanded line of readout meters, digital readouts for thermocouples, thermistors and RTD's, plus thermocouple amplifiers are available now for IMMEDIATE DELIVERY. **Meter prices start at $36.00.**

THERMOCOUPLE ASSEMBLY KITS

CEMENTS AND LACQUERS

OMEGA offers an expanded variety of kits to cement fine gage thermocouples in place and to build a variety of thermocouple probes and assemblies in only minutes, available OFF-THE-SHELF. **Prices start at $3.00.**



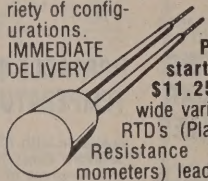
TEMPERATURE SENSITIVE PAINTS, LACQUERS, CRAYONS, SPRAYS AND PELLETS

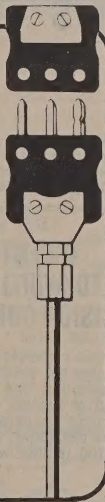
If you require any markers to be used as high quality surface temperature indicators, OMEGA has a vast variety of convenient forms, including paints, lacquers, crayons, sprays and pellets OFF-THE-SHELF. **Prices start at $1.00.**

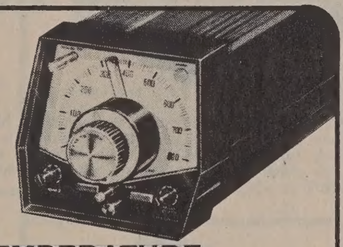
TEMPILAQ
2500°F
1371°C
by TEMPIL° CORP.

THERMISTORS AND RTD's

OMEGA's expanded line of curve matched thermistors and probes is available in a variety of configurations. IMMEDIATE DELIVERY **Prices start at $11.25.** A wide variety of RTD's (Platinum Resistance Thermometers) lead configurations and sizes with a choice of compressions heads and quick disconnects is available for IMMEDIATE DELIVERY. **Prices begin at $49.00 for single units.**

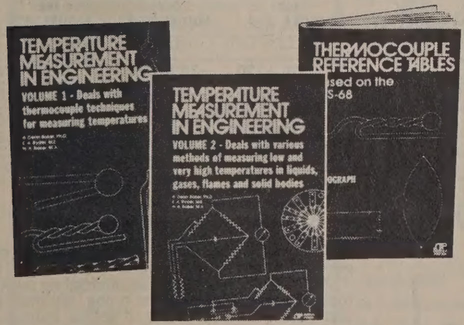






TEMPERATURE CONTROLLERS

OMEGA's solid state plug-in electronic indicating temperature controllers feature full plug-in construction; plug-in relays; full-time, full-scale indication; thermocouple break protection; heating and cooling lights and easy screw terminal wiring. 3 lbs. Available for IMMEDIATE DELIVERY. **Price: $160.00.**



TEMPERATURE MEASUREMENT IN ENGINEERING
VOLUME 1 - Deals with thermocouple techniques for measuring temperatures
TEMPERATURE MEASUREMENT IN ENGINEERING
VOLUME 2 - Deals with various methods of measuring low and very high temperatures in liquids, gases, flames and solid bodies
THERMOCOUPLE REFERENCE TABLES
based on the IPTS-68

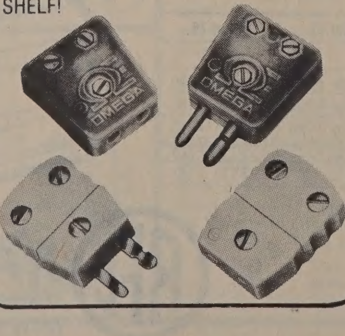
Some of the MOST USEFUL AND NEEDED BOOKS ON TEMPERATURE MEASUREMENT!

Temperature Measurement in Engineering, volumes 1 & 2, by H. Dean Baker, E.A. Ryder & N.H. Baker, are classics in the field of temperature measurement and should be on the shelf of every serious temperature measurement researcher or engineer. Vol. 1 $4.95, Vol. 2 $9.95.

Thermocouple Reference Tables based on the IPTS-68 completely revised and unabridged reference tables were developed the National Bureau of Standards; in a handy pocket editions. $2.95.

THERMOCOUPLE CONNECTORS

Omega has the MOST complete selection of Thermocouple CONNECTORS offered today! We can fill your every connector need . . . from Ultra-High Temperature Ceramic Connectors, to our new extra small Sub-Miniature Connectors. And a full selection of every needed thermocouple accessory is also available . . . connectors and accessories are available for immediate delivery . . . OFF-THE-SHELF!



OMEGA
OMEGA

"OMNI-AMP" THERMOCOUPLE AMPLIFIERS

THERMOCOUPLE AMPLIFIER
OMEGA

Just plug a thermocouple into Omega's unique new miniature, portable amplifier. A choice of ranges will enable you to boost any millivolt signal from unity to 100 times. Low cost and inexpensive operation from two small mercury batteries eliminates need for thermocouple and meter impedance matching. Drives any readout device with 1000 ohms or greater input impedance. Lab models too! NOW . . . OFF-THE-SHELF! Nothing like it is available from any other source. **Prices start at only $95.00.**

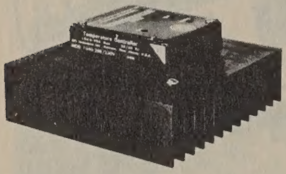
THERMOCONTROL DIVISION Since 1922

Temperature Measurement and Control Equipment

MINIATURE COMPONENT-TYPE PROPORTIONAL CONTROLLERS

RFL Models 70, 72 and 75 are compact, nonindicating units capable of precision control of electrically energized heating applications. 70 & 72 units feature proportional bandwidth and coarse and fine temperature set point adjustments. Model 75 low cost model has a single set point adjustment and a fixed, narrow bandwidth.

Current to heating load is controlled by all solid-state components for reliable long life performance. Operates into resistive loads ranging from 1 to 15 amperes using a negative temperature coefficient sensor (Thermistor) as the sensing element. Model 70's mode of operation is phase angle firing. Models 72 and 75 are zero voltage firing.



9200 WATTS

RFL MODEL 7040 is a completely solid-state, high load capability, proportional controller. The controller, while small in size, will control resistive loads from 100 to 9,200 watts. Thermistor sensors operating between 8000 ohms and 100 ohms are used providing an operating range of −70°C to +325°C.

DIRECT-SETTING, RTD (WIRE) SENSING, PRECISION CONTROLLER

RFL Model 71 is a completely solid-state, null balance, visual set point, proportional temperature controller. The controller is capable of precisely controlling resistive heaters with one RTD type sensor throughout a visual set point temperature range of 0°C to +500°C (+32°F to +932°F). The controller, while small in size, will control resistive loads from 100 to 3000 watts.

Direct-setting control dial 42065 (Optional)

Model	Overall Range (°C)	Accuracy to	Current Load	Sensor Resistance	Sensors
70	−70 to +325	±0.05°C	1-15 Amps	8000 to 100 ohms	Series 27687
71	0 to +500	±0.05°C	1-15 Amps	RTD Type (100 Ohm) Sensor	24928
72	−90 to +325	±0.1°C	1-15 Amps	30,000 to 300 ohms	Series 27687
75	—65 to +325	±0.2°C	1-15 Amps	6000 to 100 ohms	Series 27687
7040	−70 to +325	±0.05°C	1-40 Amps	8000 to 100 ohms	Series 27687

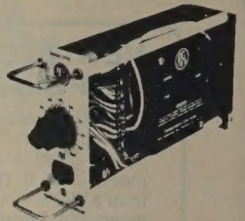
RFL SENSORS

SENSOR	RANGE (C°)			
	Model 71	Models 70 & 7040	Model 72	Model 75
24928	0 to +500			
27687-3		−5 to +120	−30 to +80	−0 to +120
27687-5		+30 to +160	+10 to +130	+40 to +160
27687-7		+80 to +250	+40 to +200	+85 to +250
27687-13		+220 to +325	+165 to +325	+230 to +325
27687-15		−70 to +10	−90 to −10	−65 to +10

Models 70, 72, 75, and 7040 probes 3/16" diameter by 1¼" long.
Model 71 probe 3/16" diameter by 4" long.

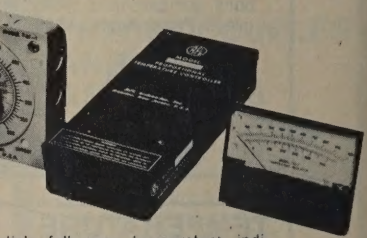
NOTE: 34739 Stainless Steel Well must be used for liquid immersion of all probes except 24928 and 42301
42060 0-100 Setting Dial (for Models 70, 75, and 7040)
42070 0-100 Setting Dial (for Model 72)

PLUG-IN SYSTEM MODULES FOR MULTIPOINT OPERATION



By combining RFL 70 Series Controllers with RFL's new TB-1 Plug-in Modules and TB-3 Chassis, a complete 8-point "do it yourself" control system is possible.

NEW MODEL 76 THERMOCOUPLE/RTD SENSING CONTROLLER

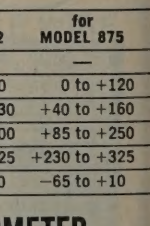


Wide range, all solid-state construction and high accuracy are just a few of the features of the new Model 76. Options include direct setting dials, full range temperature indicator, output level indicator and assorted sensor configurations. Specs· Accuracy to ±0.1°C, loads from 1 to 15 amps—115 or 230 volts, zero voltage firing proportioning mode, size 7¾" x 3⅜" x 1⅝" high.

STANDARD MODELS

76T-1	−100 to +200°C	76J-1	0—300°C	76K-1	0—1000°C
76P-1	0 to 500°C	76J-2	0—500°C		

PORTABLE 800 SERIES TEMPERATURE CONTROLLERS



Available with RFL Models 70, 71, 72, and 75 Temperature Controllers. An ideal unit to evaluate the effectiveness of closer temperature control of your existing equipment. These convenient units consist of the solid-state controller, a control box containing an ON/OFF switch, power level indicator, load-output socket (115 or 230V), sensor jack, set point knob and scale, line fuse and an 8-foot line cord. Select probes from table below.

SENSORS AND RANGES (C°)

SENSOR	for MODEL 871	for MODEL 870	for MODEL 872	for MODEL 875

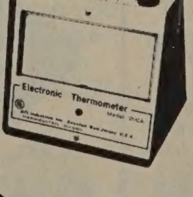
42300-13	—	+220 to +325	+165 to +325	+230 to +325
42300-15	—	−70 to +10	−90 to −10	−65 to +10

DIRECT READING ELECTRONIC THERMOMETER



MODEL 290A Electronic indicating thermometer provides measurement span of —60°C (—76°F) to +130°C (+266°F) in 3 ranges selected by push-buttons using single thermistor probe. Multiple scale taut-band meter has °C and °F scales. Built-in calibration check and adjustment assure long-term accuracy. Storage well for probe in back of unit. Probes available for gas, liquid, and surface contact.

SPECIFICATIONS

Accuracy: ±1.5°C (±2.5°F) with ambient temperatures at 25°C ±10°C
Range: —60°C to +130°C in three overlapping scales: —60°C to +10°C, 0°C to +70°C, and +60°C to +130°C.
Indication: 4½" taut-band meter.
Power Source: 9 volt "transistor" battery.
Size: 5¾" wide x 5½" high x 4½" deep.
Detailed descriptive literature available.

FOR HOME AND INDUSTRY EDSYN® PRODUCTS

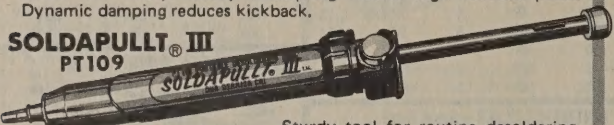
SOLDERING + DESOLDERING + RESOLDERING

HOW TO *Choose* A SOLDERING INSTRUMENT

SOLDAPULLT® DESOLDERING TOOLS

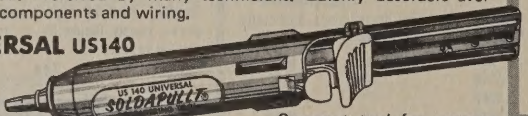
DELUXE DS017

Extremely rugged for volume desoldering. Heavy duty plastic barrel and trigger housing for long, dependable operation. Simple twist-lock separation for fast cleaning. Oversize plunger fully enclosed for safety. Heavy mainspring creates high vacuum pulse. Dynamic damping reduces kickback.



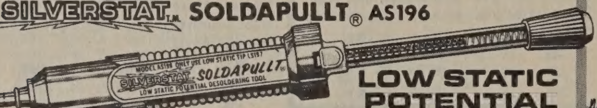
SOLDAPULLT® III PT109

Sturdy tool for routine desoldering. Slim profile without sacrifice in performance has Deluxe Model features; fully enclosed plunger shaft; dynamic damping for very low recoil. Preferred by many technicians. Quickly desolders average size components and wiring.



UNIVERSAL US140

Compact tool for convenient tool box storage. Precision molded plastic barrel and low mass plunger creates rapid vacuum impulse with negligible recoil. Three position plunger adjusts loading span to fit large or small hands. Ample vacuum for most circuit board desoldering requirements.



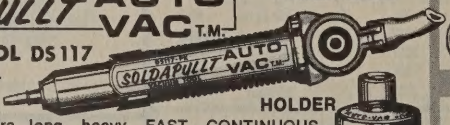
SILVERSTAT™ SOLDAPULLT® AS196

LOW STATIC POTENTIAL

Designed for low static work stations to protect components from effects of static electricity. Low static electrical characteristics providing ground path via operator, reducing discharge to susceptible components. Special material protects operator from a direct electrical short or shock.

SOLDAPULLT AUTO VAC T.M.

VACUUM TOOL DS 117



POWER HEAD

HOLDER

Completely-AUTOMATIC Vacuum Desoldering Tool.

Designed for extra long, heavy, FAST, CONTINUOUS production desoldering requirements. A simple push on the trigger will vacuum up solder-terminal point after point, WITHOUT manual reloading.

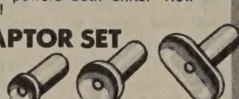
POWER HEAD and HOLDER are offered as a set DS117

HOLDER Simply insert Desoldering Tool in Holder pushing trigger. Presto! Tool is SELF-CLEANED! Vacuum Pump VP171 powers both units. New-clean-fast-safe-efficient = time + money saver!

SP198 PICKUP ADAPTOR SET

OCTAVAC T.M.

Simplifies pickup of small components

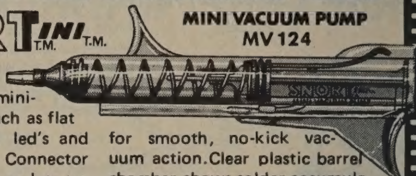


FOR USE ONLY WITH DS117 SOLDAPULLT AUTO VAC T.M.

SPECIAL PURPOSE DESOLDERING TOOLS

SNORT *INI* T.M. T.M.

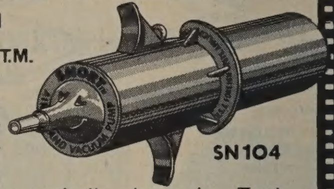
MINI VACUUM PUMP MV124



Designed expressly for desoldering microminiature components, such as flat pac IC's, pin diodes led's and 28-30 AWG wiring. Connector pins on .100 centers or less are easily desoldered. Features are resilient teflon tip, spring arrestor plunger, with de-acceleration tab for smooth, no-kick vacuum action. Clear plastic barrel chamber shows solder accumulation at all times. Easy tool to manipulate for maximum dexterity in minimal working areas.

SNORT T.M.

AIR and VACUUM PUMP

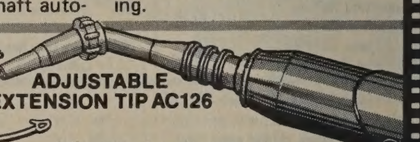


SN104

Ideal tool for occasional TV or Hi-Fi repairs and hobby projects. Operates similarly to bellows or squeeze bulb. Two-piece plastic construction with built in spring. Integral cleaning shaft automatically cleans tips. Tool snaps apart for routine cleaning.

MICRO ADAPTER **MA176**

Tip inserts into regular tip.



ADJUSTABLE EXTENSION TIP AC126

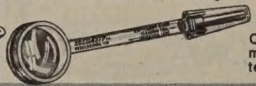
TN129

Tip cleaner needle. Special design for fast tying of wire bundles or components with lacing cord.

Adjustable extension tip extends the reach of SOLDAPULLT® and SOLDAVAC® Tools. 360° swivel tip allows angular adjustment without loss of vacuum. Quickly snaps on or off regular tips.

SOLDASIP® RESOLDERING WICK SW091

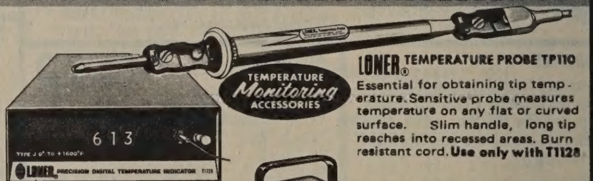
Place SOLDASIP® Wick on solder connection, pressing soldering iron tip against the wick. Solder will flow away from connection and into strands of the wick, making connection ready for removal or resoldering.



BURNISHING TOOL BT028

Combination of fine abrasive, high quality magnifying lens plus hi power lens in protective cap.

TEMPERATURE PROBES and ACCESSORIES



613
TYPE J 0° TO +1600°F
LONER PRECISION DIGITAL TEMPERATURE INDICATOR TI128
TEMPERATURE Monitoring ACCESSORIES

LONER® TEMPERATURE PROBE TP110

Essential for obtaining tip temperature. Sensitive probe measures temperature on any flat or curved surface. Slim handle, long tip reaches into recessed areas. Burn resistant cord. **Use only with TI128**

LONER® DIGITAL TEMPERATURE INDICATOR TI128

Precision instrument temp. range 0°F to 1600°F Integrated circuit A/D processing ± 0.5°F accuracy. 1/2" high characters. Type J lead. 115 or 220 VAC — 50 Watts.

LONER® ANALOG (DIAL) METER LTM95

Dial meter, accurate °C and °F scale covers soldering tip temp. range 400°F to 900°F. Type J. Thermocouple lead, calibration seals included.

Triple M Mate ™ PERFECT SOLDERING TIPS

Designed Exclusively for the LONER® and ERSA Soldering Tools

Work Rated as GOOD, BETTER or BEST for:

1. HEAT TRANSFER
2. DURABILITY
3. THERMAL LOAD IN WATTS

IMPORTANT: WHEN ORDERING TIPS, ALWAYS SPECIFY MODEL NUMBER OF YOUR LONER® OR ERSA® TOOLS

LONER® SOLDERING INSTRUMENT
in a class by itself... for you alone!

Model No. 950 CL080

LONER® STORY

FEATURES: a soldering instrument with nothing to hide, we left everything in plain view so that you can best see how a soldering instrument differs from a soldering iron. One instrument performs most soldering cycles from heavy to micro termination — The **LONER® SOLDERING INSTRUMENT.**

FAST ACCURATE SOLDERING CYCLES: After a fast 45 second warm-up, each soldering cycle is automatically thermally balanced to match each termination load (range: 590°F to 750°F) with the precise preset soldering temperature.

ENERGY SAVER: High power is consumed ONLY during soldering operation and NOT during energy saving idling cycle.

BASIC DESIGN: Allows use of a wide variety of tip styles to simplify a maximum of techniques required in working on today's electronic hardware.

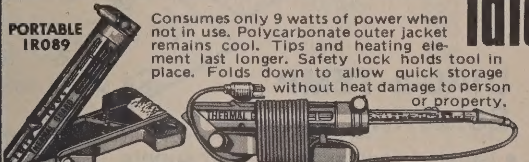
EDSYN® projects the Soldering Technician into the 21st Century, with the NEW Deluxe Base 1 IDLE-REST® Professional Soldering Tool Holder. Blast off with the first fully engineered Soldering Station to reach YOUR technical sphere — make the quickest recovery with a sound turn around — Base 1 IDLE-REST® Tool Holder.

*For UL Listed CL080 Closed Loop LONER® and ERI40 ERSA Tip 16 only

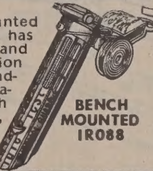
idle·rest®

PORTABLE IR089

Consumes only 9 watts of power when not in use. Polycarbonate outer jacket remains cool. Tips and heating element last longer. Safety lock holds tool in place. Folds down to allow quick storage without heat damage to person or property.

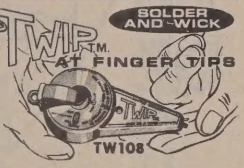


Bench mounted IDLE-REST™ has same thermal and Polycarbonate construction as portable model. Threaded bushing allows permanent installation on bench top. Two spools of solder, accessory apron and sponge included.



BENCH MOUNTED IR088

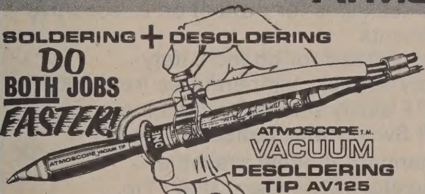
SOLDER AND WICK
TWIP™ AT FINGER TIPS



TW108

ATMOSCOPE T.M. ACCESSORIES

SOLDERING + DESOLDERING
DO BOTH JOBS FASTER!



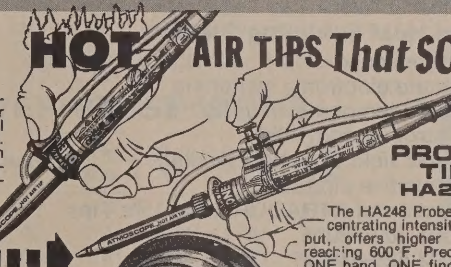
ATMOSCOPE T.M. VACUUM DESOLDERING TIP AV125

Converts LONER to a dual soldering and desoldering tool. Large mass head provides high-heat reserve for continuous production line work. Unbreakable desoldering chamber allows fast & safe handling. Simple ONE hand, ONE finger operation. NO FOOT PEDAL NEEDED.

JET TIP HA120

Converts LONER Soldering Instrument to hot air generator up to 400°F. Solder as usual without removing attachments. Ideal for shrinking tubing in tight areas, forming small plastic parts, heat testing components, etc. Operates on low pressure air.

HOT AIR TIPS That SOLDER



solder as usual with EITHER TIP

PROBE TIP HA248

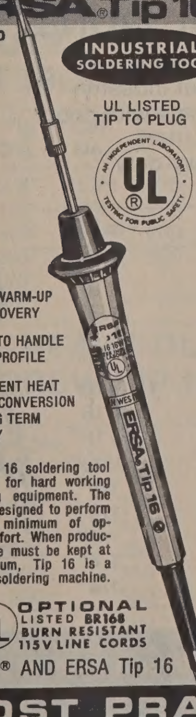
The HA248 Probe Tip, by concentrating intensity of heat output, offers higher temperatures reaching 600°F. Precision trigger, ONE hand, ONE finger operation, NO FOOT PEDAL NEEDED! Operates on low pressure air. Solder as usual.

ERSA® Tip 16

ERI40

INDUSTRIAL SOLDERING TOOL

UL LISTED TIP TO PLUG



- FAST WARM-UP AND RECOVERY
- EASY TO HANDLE PENCIL PROFILE
- EFFICIENT HEAT ENERGY CONVERSION FOR LONG TERM ECONOMY

The Tip 16 soldering tool is built for hard working soldering equipment. The tool is designed to perform with a minimum of operator effort. When production time must be kept at a minimum, Tip 16 is a rugged soldering machine.

OPTIONAL LISTED BR168 BURN RESISTANT 115V LINE CORDS

LONER® AND ERSA Tip 16

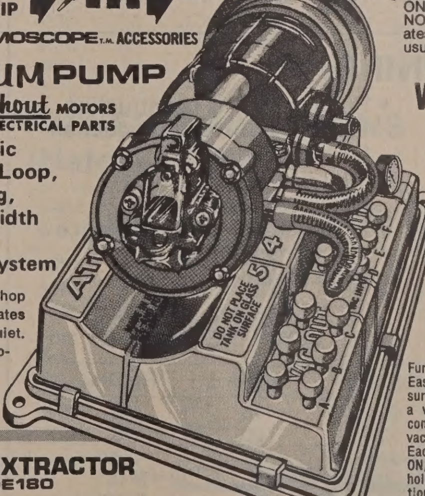
IDEAL SOURCE OF VACUUM FOR ATMOSCOPE T.M. ACCESSORIES

ATMOSCOPE™ VP171 VACUUM PUMP

HIGH VACUUM *without* **MOTORS or ELECTRICAL PARTS**

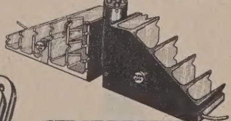
100% Pneumatic
Automatic Closed Loop,
Self-Regulating,
Variable Pulse Width
Modulation
Vacuum Control System

Vacuum to 22" mercury from shop air supply of 90 to 120 PSI. Operates on demand, compact, whisper quiet. Twelve manifold outlets allow operation of several vacuum tools from one pump.



4
5
DO NOT PLACE TANK ON GLASS SURFACE

VICE less VICE



ATMOSCOPE™ HF172 VACUUM HOLDING Fixtures

Furnished as a twin set, each identical. Easily moved on bench top or other FLAT surface, they can be positioned to hold a variety of sizes of circuit boards or components. Quickly connects to any vacuum source of 12 to 20" mercury. Each has a holding power up to 30 lbs. ON/OFF Switch permits VICELESS (nonholding) or VICE (holding), for fast action. ATMOSCOPE™ Vacuum Pump, VP 171, is an ideal source of vacuum.

KLATCH™ DIP EXTRACTOR DE180

QUADRAMATIC Action allows YOU to remove a DIP from SIDES or ENDS ***with the skill of a Surgeon!***

Use with the LONER® Soldering Instrument to remove 14-16 point DIP (Dual Inline Pin) components from circuit boards. Several types and shapes can be easily removed in seconds, depending on type of tip being used. The DE180 DIP Extractor can also be used separately as DUAL AXIS hand tongs.

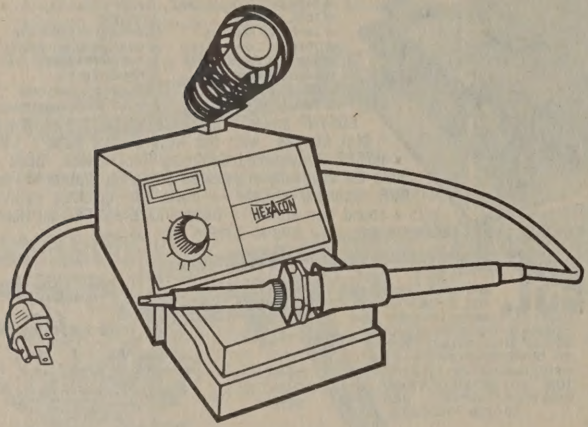
MOST PRACTICAL SOLDER HANDLING TOOLS

HEXACON SOLDERING IRONS

VOLTAGE RANGE: 6 to 240 • OPERATE IDENTICALLY ON A.C. OR D.C., ANY CYCLE
STANDARD VOLTAGES 110/120, 220/240 • SPECIFY VOLTAGE ON ORDER

Equipped with extra flexible, high temperature approved cords. Three wire cords standard with all irons. Nickel chromium replaceable heating elements, insulated with finest mica, protected by rugged outer housing. Replaceable tips.

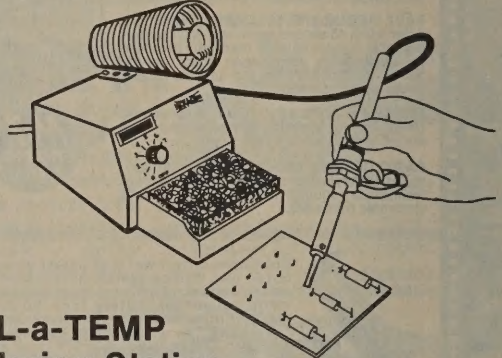
POSI-GROUND® AVAILABLE TO PROTECT VOLTAGE SENSITIVE COMPONENTS



THERM-O-TRAC

Controlled Heat Soldering Stations

- Temperature sensor "up front" where it belongs
- All solid state electronic switching
- Dial selected temperature to 850° F
- Close control—within 10° F
- No magnetic field or voltage leakage—safe for sensitive circuitry
- Wide selection of XTRADUR Long Life Tips
- Model 1001 500-720° F
- Model 1002 525-850° F



DIAL-a-TEMP Soldering Station

- Isolated, low voltage power supply
- Posi-Ground® construction eliminates all voltage leakages for protection of sensitive components
- Internally fused for added safety
- Infinitely variable temperatures from 350° F to 950° F easily selected by dialing
- On-Off Switch with Indicator Light
- Two standard models available:
  Catalog No. 1520—Uses 3/16" Tip
  Catalog No. 1524—Uses 1/4" Tip
- No special tip requirements—uses standard Xtradur and Durotherm Long-Life plug tips

HEXACON MINIRONS

- Rugged quality construction that will withstand production line conditions
- Slim-line case promotes maximum visibility
- Lightweight—perfect balance
- Full wattage range 15 to 60 watts

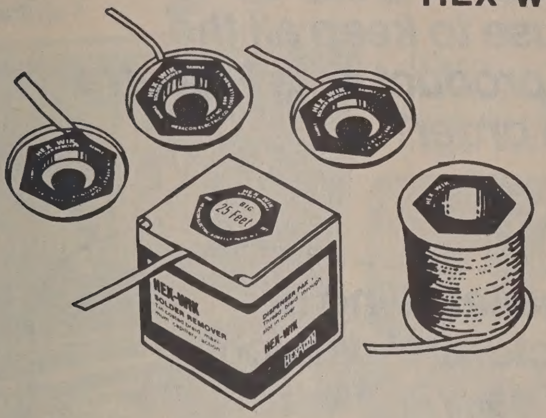
HEXACON SOLDERING ACCESSORIES HEXACON

HEX-WIK the superior solder removal braid



Meets all Military and
Government specifications

- The easiest and most economical method of desoldering printed wiring boards without measling, delamination or lifted pads.
- Simplifies removal and replacement of components.
- Can be used for solder removal on plated thru and multi-layer printed wiring board assemblies.
- Braid processed for long shelf life insures greater capillary action.
- Available in 6 sizes 1/32", 3/64" and 1/16" for micro work, 5/64", 1/8" and 5/32" for larger work.
- For convenience ... 6, 10 or 15 ft. on 2" spools.
- For economy ... 25, 50 or 100 ft. in handy Dispenser Paks. Larger spools available on request.

Hexacon manufactures a complete line of soldering accessories: solder suckers, heat sinks, braid cleaners, erasure cleaners, tweezers, tip cleaning sponges, desoldering tips, desoldering wells, mini pots, etc.

Temperature Control Units

- Controlled AC input provided from 0-95% of line voltage
- Capacity 300 watts on 115 volts
- Solid state circuitry includes built-in fuse protection
- Idling temperature may be readily controlled
- Thermal working zones may be varied by adjusting input control
- Use same iron for different capacity jobs
- Calibrate control settings to maintain proper working ranges as required by government specifications
- Rugged design provides long maintenance, free operational life

SOLDERING IRON CONTROL MODEL TC 871 MAX 300W-120V-AC

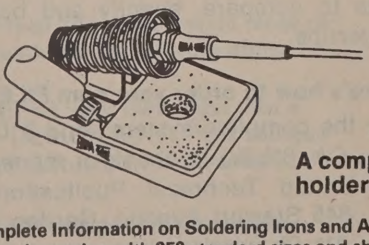
Model 871
3 wire design. Comes with voltmeter for visual indication of voltage input to iron. Size 2" x 6¼".
Weight 18 oz.

HEAT GUARD SOLDERING IRON HOLDERS

- Protect iron and tip
- Conserve energy — nonheat sinking
- Cool, safe holder assembly
- Full operator protection

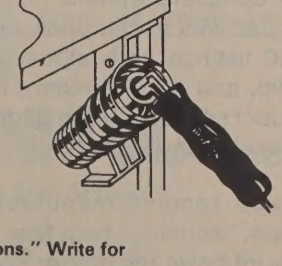
MODEL 890
Ceramic Base with Reservoir and Sponge

- For instrument irons
- Water injection keeps sponge wet
- Non-skid base — can be used in clean room without marring bench
- Base easily cleaned



MODEL 893
Bench Mounted

- For under-bench mounting
- Angle adjustable for operator convenience and safety
- Sturdy construction — easily cleaned



A complete line of iron holders are available.

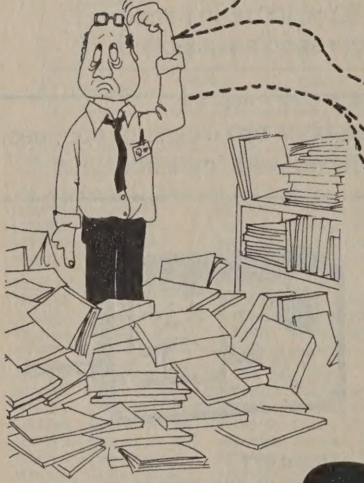
What can I use to keep all the manufacturers' product data I receive in order?

What system makes filing or retrieving manufacturers' catalogs fast and easy?

Which file system have thousands of engineers purchased because they know it works?



eem FILE SYSTEM

THE ONLY FILE SYSTEM DESIGNED SPECIALLY FOR THE ELECTRONIC ENGINEER!

The publishers of **eem** have put together a unique filing system for electronic product information. The complete system includes: a product index booklet which classifies electronic products into 3,000 listings both alphabetically and by product group, and 45 file folders imprinted with the **eem** product sections (extra gummed labels included for expanding the system.)

As you receive manufacturers' catalog data sheets, technical bulletins, or clip magazine articles, jot down the proper Product Section Numbers from the **eem** PRODUCT-TO-SECTION INDEX. Then simply file in order. When you require information on a specific product, refer to PRODUCT-TO-SECTION INDEX again to locate the correct file folder. It's simple, and you'll always have the necessary data to compare, specify and buy, right at your fingertips.

Here's how to order your eem FILE SYSTEM:

For the complete system send $10 (plus tax; N.Y., 8%, CA, 6½%) in check or money order to:

United Technical Publications, Inc.,
645 Stewart Avenue, Garden City, N.Y. 11530
Att: Circulation dept.

For an **eem FILE SYSTEM** without file folders send $7.50 (plus tax; N.Y. 8%; CA, 6½%).

United Technical Publications, Inc., Div. of Cox Broadcasting Corp. • 645 Stewart Ave., Garden City, N.Y. 11530

We've solved your case!

Genesis I

Basic Technician's Kit No. 7609M
18¼" x 13" x 5¾"

It's no mystery why our 7609's have been selling like crazy. We've tracked down the best tools around and placed them under maximum security in a rugged ABS case that stands up to anything. This kit covers just about every need in the service, installation and maintenance of electronic equipment from pinball machines to computers. It includes the most requested items such as punches and alignment tools, hammers, flashlights, inspection mirrors, scribes, spring hooks, soldering iron, VOM's, parts boxes and much, much more!

Techni-Tool

FREE –
Color Tool Kit Brochure contains our comprehensive tool kit line with **Design-a-Kit** for customizing.

Engineer's Tool Kit No. 7615
18" x 12½" x 7¼"

Your prints will be all over this one! It has 138 of the most wanted tools for servicing and installing devices such as terminal and office equipment and military and industrial hardware. Packaged in a unique 3-pallet configuration, the tools are securely housed in a reinforced black leather-grain vinyl hardwood case. Pallets are flow-charted for efficiency. The lid has room for books, papers, etc. Solid brass hardware and comfort grip handle. Many requested options have been included as standard in this, our most complete kit.

PROOF POSITIVE:

1. Our standard line of tool kits cover a wide range of in-plant and field situations. There's something for almost everyone!
2. It's easier than ever to get your own ideas into a custom tool kit. Our DESIGN-A-KIT® has become a popular way for our customers to "personallize" their cases.
3. Only carefully selected tools go into our pallets. Nothing less will do.
4. Variety's a keyword — in our kits and tools. We even do custom tooling to your spec's.
5. We deliver! Check out our prompt and courteous service.

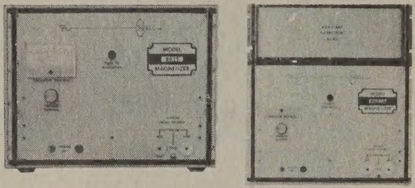
FW BELL INC.

A Subsidiary of
The Arnold Engineering Company

MAGNETIZERS



DESCRIPTION

Bell magnetizers are capacitive discharge power units designed to supply current pulses to a magnetizing fixture coil. The energy level of the pulse is variable and accurately repeatable. Magnetizers are available for all materials including samarium-cobalt and other rare earth magnets. The Bell magnetizers operate at high and low voltages and with high and low impedance fixtures.

A full range of standard fixtures and complete engineering fixture service is available.

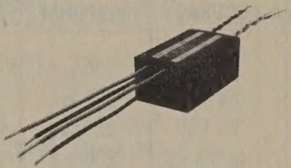
REAL POWER TRANSDUCERS



DESCRIPTION

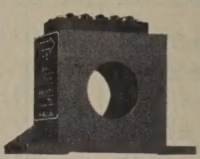
PX 2000 and PX 4000 series transducers are compact, accurate, and dependable solid-state modules for the measurement and control of single-phase and three-phase power in various frequency ranges. The module output is a power proportional dc voltage.

The light-weight transducers are epoxied in small nylon cases with through mounting holes and wire leads. This configuration facilitates assembly with associated devices. Simplicity, versatility, high performance, and low cost make these modules ideal for many applications.

SPECIFICATIONS

	PX 2000 series	PX 4000 series
Rated power levels	50-2000 W	1000-2000 W
Rated current levels	0.5-20A	5 A
Rated voltage	120 V 220 V	220 V
Frequencies, nominal	60-180-360 Hz	1-3 kHz
Frequency range	25 to 1200 Hz	0.5 to 10 kHz
Rated dc output across 50 ohm	± 55 mV	≥ 27 mV
Ripple, peak to peak	< 200%	< 200%
Response time to 99%	<50μs	<5μs
Rated accuracy	0.5%	0.5%
Linearity vs. power	± 0.2%	± 0.2%

DC AND AC CURRENT SENSORS



FEATURES

- Fast responding
- Non-contact operation
- Output voltage isolated from input
- Very low insertion impedance
- Minimal distortion from adjacent conductors
- Amplified and non-amplified models available

DESCRIPTION

FW Bell current sensors are designed to meet the challenging requirements of many different current measurement applications. The sensors are compact non-contact Hall effect devices.

The Bell current sensors function by sensing the magnetic field surrounding a current carrying conductor.

PIEZOELECTRIC ACCELEROMETERS

A complete product line of local or remote sensing accelerometers with a built-in pre-amplifier. Total freedom from expensive and inaccurate charge amplifiers. Drive 60, or more, feet of cable without signal degradation. Cable noise, which introduces distortion in charge-coupled accelerometers, does not affect these accelerometers.

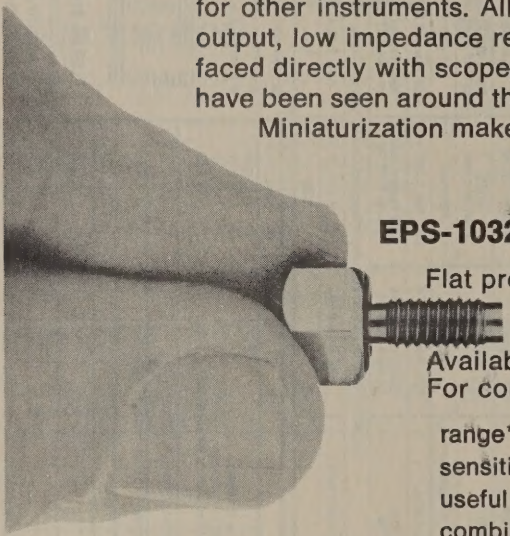
We're making it big

Entran offers four proofs means more measurement

Small gives you advantages you don't get with big.

Like less measuring surface to bear loads, hence better impact resistance. Small means superior handling ease, especially in hard-to-get-at places—meaning more applications flexibility. Small means less mass to distort your test scale. And more room for other instruments. All this at no sacrifice in data. All Entran devices give you high output, low impedance readings, both static and dynamic, so they can usually be interfaced directly with scopes, recorders and milliammeters. No wonder Entran's miniatures have been seen around the big names.

Miniaturization makes sense. And dollars.



EPS-1032. You can screw it in just about anywhere.

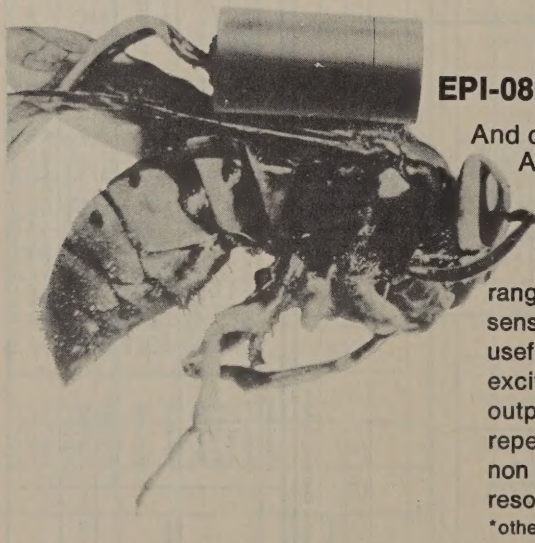
Flat pressure readings, static & dynamic, in 5 to 5,000 psi ranges to as high as 90 KHz. Infinite resolution. Insensitive to acceleration, vibration or shock. Stainless steel, with built in "o" ring seal. Available in our standard UNF thread or optional M5 metric version. For corrosive or water usage, order "welded" version at $50.00 extra.

range*	5 psi	50 psi	100 psi	250 psi	1000 psi
sensitivity mV/psi nom.	3	2	1.2	0.5	0.12
useful frequency nom.	9 KHz	15 KHz	15 KHz	20 KHz	40 KHz
combined non-lin & hyst:	± 1% below 100 psi, ± ½% 100 psi or above				

excitation: 6V
output imp.: 250 Ω nom.
repeatability: 0.25%

$\$340^{00}$

thread length: 7/16"
*other ranges available



EPI-080. Would you believe an 0.080" diameter?

And only 0.25" in length. Gives static & dynamic pressure readings. Atomically bonded diffused diaphragm with leads attached to non-active area make device virtually insensitive to acceleration, vibration and shock. (P. S. We're not kidding. The scale of the photo is real.)

range*	25 psi	50 psi	100 psi	250 psi	500 psi
sensitivity mV/psi nom.	3	1.8	1.0	0.4	0.2
useful frequency nom.	25 KHz	30 KHz	40 KHz	60 KHz	80 KHz

excitation: 5V
output imp: 750 Ω nom.
repeatability: 0.5%
non lin. & hyst: ± 1%
resolution: infinite
*other ranges available

$\$360^{00}$

Must not be used in water or corrosive medium.

Entran Pressure Transducers

Entran Devices, Inc. 145 Paterson Ave., Little Falls, N.J. 07424

by making it small.

that miniaturization for your money.

EGC-500DS. At last, a really rugged accelerometer.

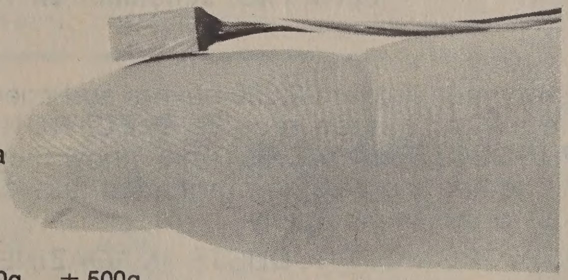
Static & dynamic measurements of acceleration, vibration and shock in ranges from 5 to 1,000 g. Fully damped to eliminate resonance and fitted with mechanical stops to impede overload response—guaranteed overrange of 1000%. And only a half inch cube to boot.

range*	± 5g	± 10g	± 50g	± 100g	± 500g
sensitivity mV/g nom.	25	20	4	2	0.5
useful freq.	150 Hz	200 Hz	600 Hz	1000 Hz	1500 Hz

$325.00

excitation: 15V
damping: 0.7 cr. nom.
linearity: ± 1%
output impedance: 450 Ω nom.
input impedance: 1000 nom.
*other ranges available

size: 0.5″ x 0.5″ x 0.6″ high
mounting: 10-32UNF
tapped hole



EGA-125-D (damped). Think small. And get big results.

Less than 0.006 cu. inches in volume. Weighs only half a gram. Yet gives you static & dynamic readings of acceleration, vibration and shock. And comes with .7 critical damping to eliminate resonance.

range*	± 5g	± 10g	± 50g	± 100g	± 500g
sensitivity mV/g nom.	15 mV/g	12 mV/g	4 mV/g	2.5 mV/g	.5 mV/g
useful frequency nom.	150 Hz	200 Hz	500 Hz	600 Hz	1200 Hz

$270.00

*other ranges available

excitation: 15V
linearity: ± 1%

Wt: 0.5 grams without leads
5 other mounting styles available at no extra charge

Tell us your range and we'll do the rest.

Every Entran device comes complete and ready to use. All you need do is supply the excitation voltages on two leads and read the output in millivolts on the other two leads. All units give you direct linear output in millivolts/psi or millivolts/g. All read both static and dynamic pressure or acceleration. There is no need for charge or voltage amplifiers. All units are supplied with calibration traceable to the National Bureau of Standards.

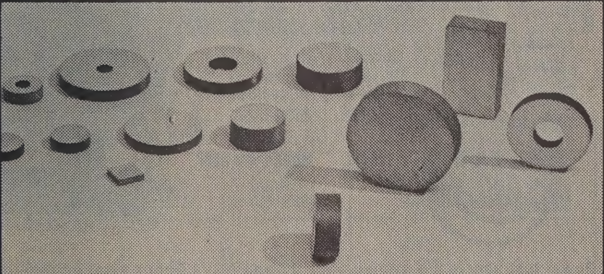
Underwater Transducers

Linden's compact, light-weight, and rugged underwater transducers offer maximum physical strength and electrical performance in both fresh and salt water applications. "Off-the-shelf" models are available with a variety of mountings, housings, cable types and lengths, and cable/connector combinations as well as custom designs manufactured to your specifications. A variety of operating frequencies are available in the range of 40 KHz to 400 KHz, assuring the highest performance and reliability.

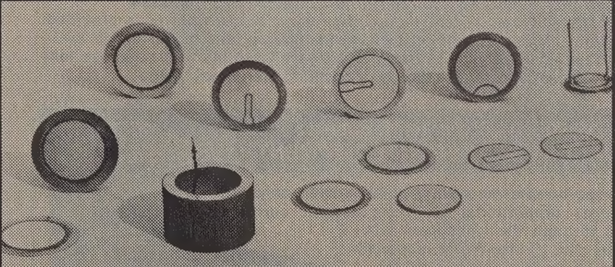
Air Acoustic Transducers

Linden's air acoustic transducers, operating at a standard frequency range of 25 KHz and 40 KHz, offer the design engineer a highly sensitive transmitting/receiving device at the lowest possible cost. Other frequencies are available on a custom basis in ranges 20 KHz to 75 KHz. A choice in housing and leads is available in standard models. Custom-made to your specifications or "off-the-shelf", Linden's versatile air acoustic transducer line offer high quality and reliable performance in a diversity of applications.



Piezoceramics

Linden's high quality piezoceramics are available in Barium Titanate, Lead Metaniobate, and Lead Zironate Titanate ceramics. There are a variety of standard shapes (disc, plate, and ring), sizes, and thicknesses to offer versatility in particular and unique applications. For special properties critical to your application, density, frequency and coupling coefficient can be specified in custom designs.



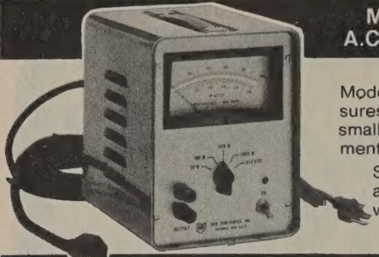
Benders

Linden's benders function as transmitters and receivers in sound system applications offering low frequency with small material mass promoting higher sensitivity. With a wide range of capabilities for recreating pleasant or irritating sounds and a variety of mountings, Linden's ultra-reliable benders, in both standard models or designed to customer specifications, are effectively operated by circuits driven with as little as 1.5 volts DC.

Founded in 1952, Linden Laboratories, Inc. is a major source of supply of piezoceramics, underwater transducers, air acoustic transducers, and benders. With complete in-house manufacturing facilities covering an area of over 23,000 square feet, expert engineering and technological know-how, and stringent quality control procedures, Linden can assure their customers of the highest performance and reliability and timely delivery to meet their requirements.

OSI EQUIPMENT FOR CURRENT AND POWER MEASUREMENT

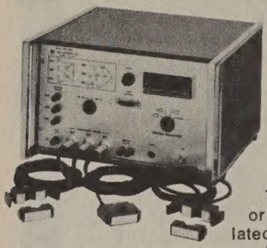
MULTIRANGE A.C. WATTMETER



Model WM1000 wattmeter measures real power consumed by small motors, electronic test equipment and other electrical loads.

Selectable full scale ranges are 50, 100, 500 and 1000 watts with an accuracy of ±3%.

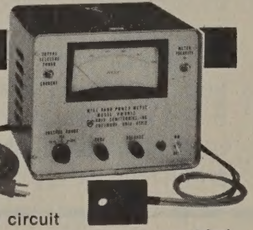
DIGITAL WATTMETER



The Model WM365A Digital Wattmeter measures power in single-phase or three-phase systems where the input power frequency may vary from d.c. to 400 Hertz. The d.c. to 5 kilohertz response insures accurate measurements when harmonics are present due to solid state switching, non-symmetrical waveforms or d.c. components.

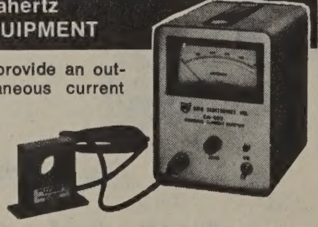
The digital panel meter displays total power or phase power. BCD and analog signals related to power are provided for computer and recorder interface. The BCD and analog outputs are electrically isolated from the power system.

WIDEBAND POWER MONITORS



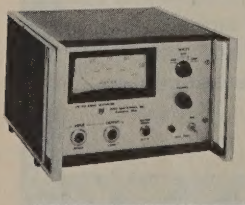
PM-6010 Series Power Monitors are designed to provide power or current measurements where d.c., sinusoidal, non-sinusoidal or pulse power is delivered to a load. Currents up to 1000 Amperes can be handled with negligible circuit interaction due to the use of circuit isolated transducers. Meter display of peak or average power is provided. 0 to 1 volt output proportional to instantaneous power or current is available for oscilloscope monitoring of detailed waveforms with risetimes less than 1 microsecond in the d.c. to Megahertz frequency range.

WIDEBAND d.c. to Megahertz CURRENT MEASURING EQUIPMENT



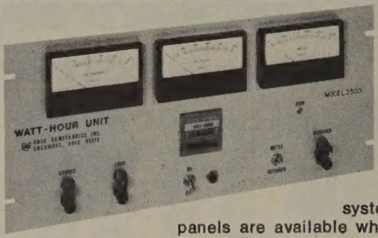
CM Series current measuring units provide an output signal proportional to instantaneous current flowing through the transducer window. The d.c. to Megahertz response and ability to faithfully reproduce 1 micro-second transients provide an ideal way to monitor critical circuits without electrical connection and with minimum interaction caused by measurement. The panel meter provides a display of direct current while the +1 to −1 volt output can be used for monitoring or control purposes with current flow in either direction.

AUDIO WATTMETER



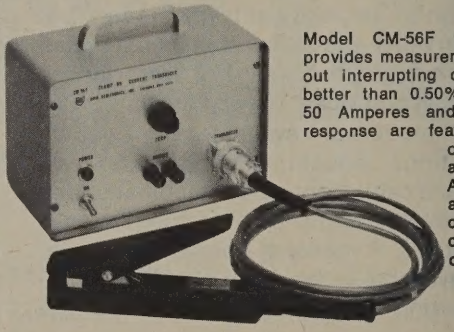
The Model PM1215 Audio Wattmeter measures DC to 30 kHz power delivered to resistive or reactive loads. Full scale ranges of 400, 800, and 1600 watts are provided corresponding to voltage inputs of 25, 50, and 100V RMS. A front panel meter displays average power. A 0 to 1V output is provided for oscilloscope observation of the instantaneous power wave shape.

WATT-HOUR AND AMP-HOUR METERS



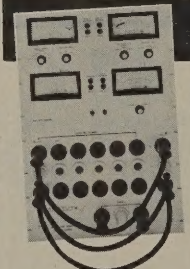
Registration of total energy consumption of motors, processes and equipment in a.c. or d.c. circuits is available on resettable counters. Other units provide a registration of charge flow, or Ampere-Hours, into or out of battery systems. Multiple measurement panels are available which provide display and electrical outputs related to instantaneous current, voltage and power in addition to energy registration.

CLAMP-ON CURRENT TRANSDUCER



Model CM-56F Current Transducer provides measurement of current without interrupting circuit. Accuracy of better than 0.50%, measurements to 50 Amperes and d.c. to Kilohertz response are featured. An electrical output providing an analog 0.1 Volt/Ampere signal is available for use in control systems, computer interfacing or recording.

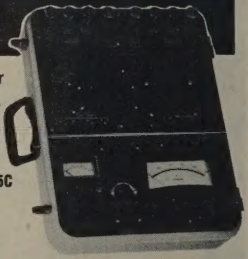
POWER TEST PANELS



Current
Voltage
Power
VARS

Power Factor
Frequency
Watt-hour
Amp-hour

MODEL PTP-100



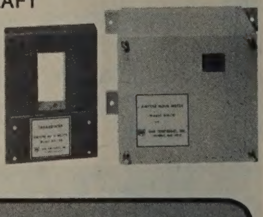
MODEL WM-2C5C

Power test panels are available for DC and AC (2, 3, or 4 wire) system loads. Voltage ranges from 50 to 500 volts and current ranges from 10 to 10,000 Amperes may be specified. Isolated electrical outputs are provided to drive recorders or remote indicators. Packaging methods include 19″ rack panel, standard instrument housings and NEMA type enclosures. Available options: Digital meters, BCD outputs, true RMS outputs, set-point switched outputs and data storage for computer interfacing.

MILITARY EQUIPMENT

SHIPBOARD • AVIONICS • SPACECRAFT
NUCLEAR POWER PLANTS

MODEL AH-10



OSI has an established reputation for building rugged, highly reliable measurement systems to meet government and military specifications. Systems include current, power, amp-hour, watt-hour, etc.

PIONEER IN SOLID STATE TECHNOLOGY FOR ENERGY CONVERSION AND POWER MONITORING

OSI A.C. and D.C. WATT-HOUR and D.C. AMP-HOUR METERS

DESCRIPTION

The O.S.I. Watt-hour and Amp-hour Meters provide a convenient and highly accurate way to characterize, monitor and control critical manufacturing processes where product quality and cost are related to electrical energy input.

These solid-state units utilize low loss transducers and are especially suited for watt-hour or amp-hour totalization, power or current monitoring and observation of waveforms in applications where SCR chopped, or other non-sinusoidal waveforms are involved.

In addition to the display of totalized watt-hours or amp-hours since last reset, these units provide a panel meter indication of average watts or amps.

Many models available for electric vehicle, solar electric system, and commercial building power applications.

FEATURES

4½" Meter, 6 digit counter.
0 to 8 volt output proportional to watts or amps.
±0.5% f.s. accuracy.
Convenient Rack Mount—5¼" high.
Complete—Ready for customer installation.
For complete specifications, contact O.S.I.

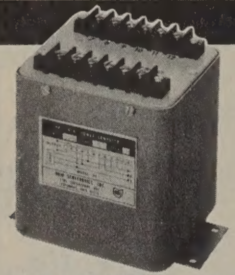
PIONEER IN SOLID STATE TECHNOLOGY FOR ENERGY CONVERSION AND POWER MONITORING

OSI TRANSDUCERS, WATT, CURRENT, VOLTAGE,

WATT TRANSDUCERS



OSI Watt Transducers provide an isolated d.c. output proportional to the true power (EI x Cos θ) consumed in single or three phase circuits. Their fast response makes them very useful on non-sinusoidal as well as sinusoidal waveforms. Outputs of millivolts, milliamperes or volts are available, offering flexibility to the designer in interfacing to control or metering systems.

Over 100 standard units with current ranges of 1 through 1000 Amperes available. Contact O.S. I. for detailed specifications. Bulletin PC76-1.

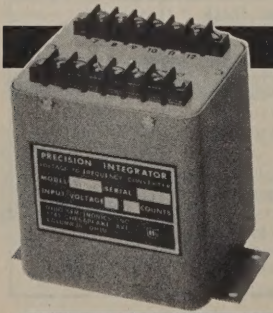
PC5-58 thru PC5-98 ±0.75%f.s.
POWER FACTOR RANGE: 0 lead to 0 lag
FREQUENCY RANGE: 50 to 70Hz
OUTPUT: Single Phase: 0 to 50mv
3 Phase, 3 wire: 0 to 100mv
3 Phase, 4 wire: 0 to 150mv
NOTE: Output options of 0 to 1ma and 0 to ±10 volts are available.

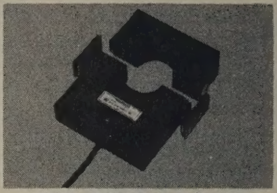
PRECISION INTEGRATOR



The VFC series of Precision Integrators works from analog signals of 50, 100 and 150 millivolts supplied from watt transducers, current transducers or shunts. The output is a pulse with a rate proportional to the input. Pulse rates of 1,500 to 10,000 per hour are available in 21 standard models. The output pulse is derived from relay contacts with 1 ampere capacity, so it is ideal for operating electromechanical counters and data acquisition systems.

CURRENT TRANSDUCERS—d.c. to KILOHERTZ

MODEL CT200LT



MODEL CT1KLTS (Split Version)

These current transducers provide flat d.c. to Kilohertz response which allows accurate waveform monitoring and measurements of d.c., sinusoidal or distorted waveform currents with high accuracy. Since no physical or electrical connection is necessary to the circuit being monitored, they are especially useful where high voltages are present by providing an output which is electrically isolated from the current source.

Standard models are available in full scale currents of 50 to 8000 Amperes, extended temperature ranges and split versions. Signal conditioners for 10 volt outputs, true rms measurements, and interfacing to other equipment are available. (See "Signal Conditioners" below).

Transducers with response from d.c. to megahertz are available. Ask for Bulletin HE7-4 covering the CT-W Series.

SPECIFICATIONS COMMON TO ALL CT-LT SERIES TRANSDUCERS

Linearity: ±0.5% Full Scale
Temperature Effect (−40°C to +65): ±1% Reading
Response: d.c. to 5KHz
Rise Time For Step Input: 100 Microseconds
Isolation from Line to Output: >5000 volts

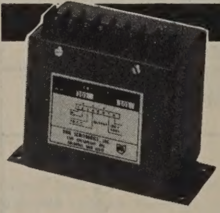
SIGNAL CONDITIONER



These signal conditioners provide excitation current for the CT-L current transducers and other Hall Effect devices requiring a low drift, constant current. They also provide amplification for the outputs of current transducers and other Hall Effect devices. Output of CTA113 and CTA114 is proportional to the true rms of the input.

SPECIFICATIONS COMMON TO ALL CTA SIGNAL CONDITIONERS

Amplifier Section (Output)
Drift: 2mv
Response: d.c. to 5KHz
Linearity: 0.1%
Control Current
Adjustment: ±30%
Drift: <0.005%/°C
Operating Power: 115vac, 60Hz.

MODEL	INPUT	CONTROL CURRENT OUTPUT	OUTPUT FROM AMPLIFIER
CTA101	±50mv	100ma	±10V
CTA201	±50mv	200ma	±10V
CTA113	50mv (AC)	100ma	+10Vdc
CTA114	50mv (AC)	100ma	+1ma (0 to 7K ohm load)

OSI SEMICONDUCTOR MATERIALS, DEVICES HALL EFFECT - INFRARED - THERMOELECTRIC

HALLTRON, MAGNETIC FIELD SENSORS

OSI offers a wide variety of standard Hall Effect probes for magnetic sensing or measuring applications. The high linearity, low noise, excellent stability and ruggedness permit optimum use in your most critical applications. Reliability has been proved by years of continuous operation in industrial and military systems. Large quantity production enables OSI to offer high quality units at attractive prices.

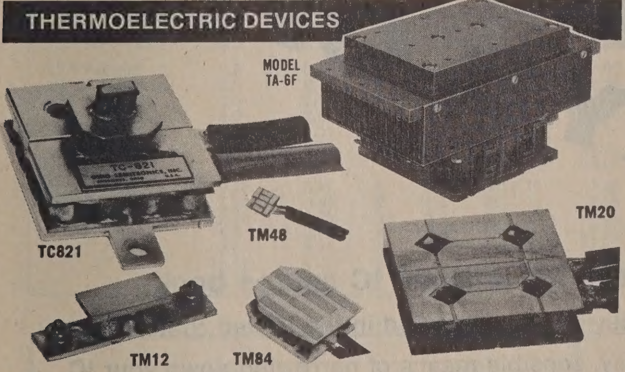
THERMOELECTRIC DEVICES



O.S.I. offers a variety of thermoelectric cooling units ranging from the TC Series, used in spot cooling applications where up to 115 degree Centigrade temperature depression is needed, to the TA Series which can remove up to 85 watts from chemical bath, electronic package, or enclosure. The controllable, reversible heat pumping properties of thermoelectric devices make them ideally suited for temperature control. The MTM85 and TM84 are suited to IR detector cooling. Two and three stage coolers are also available for lower temperature IR detector cooling.

ENERGY CONVERSION — IR — DEVICE MATERIALS

Semiconductor compounds and alloys of the following types, covering a wide range of controlled electronic properties for applications such as INFRA-RED DETECTORS, MAGNETIC SENSORS, THERMOELECTRIC COOLING/POWER GENERATION, OPTICAL AND INFRA-RED COATINGS/FILTERS, AND CRYOGENIC SENSORS, are available from stock. High quality electronically characterized materials suitable for PHOTOCONDUCTIVE and PHOTOVOLTAIC sensors are available.

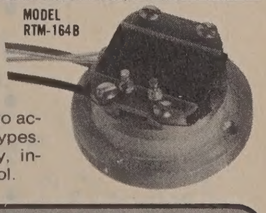
Material	Carrier Concentration/cm^3
InAs	10^{15} - 10^{19}
InSb	10^{14} - 10^{19}
Bi-Te alloys	10^{18} - 10^{19}
PbTe and PbTe alloys	As Desired

These materials are available in ingot, rod, slice and polished wafer form. Oriented single crystals of InSb having dislocation densities well below 100/cm^2 are available for infra-red sensor construction. High figure of merit p and n type Bi-Te alloys are in stock for thermoelectric applications. InAs with Hall coefficients at R.T. in the range from 10 to 1000 cm^3/coulomb is immediately available for many device applications.

Any feasible high purity alloy or compound consisting of Pb, Bi, Tl, Tn, As, Sn, Sb, Se or Te with selective doping can be manufactured and supplied on request.

High purity zone refined ingots of most of the above elements used in our electronically characterized compounds can be delivered on request.

THERMOELECTRIC COOLED IR DETECTOR ASSEMBLIES



Complete IR detector assemblies include mounting base, thermoelectric cooler, cold plates, thermistor, IR detector, window and/or filter. Assemblies may be bare (as shown), sealed or vacuum encapsulated. Customer engineering service is provided to accommodate specified IR detector and filter types. Applications include surveillance, security, instrumentation and industrial process control.

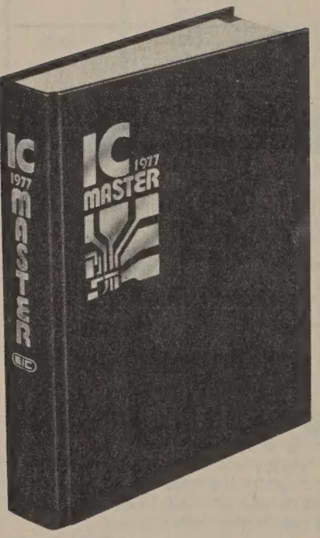
PIONEER IN SOLID STATE TECHNOLOGY FOR ENERGY CONVERSION AND POWER MONITORING

WHEN THE CHIPS ARE DOWN...

THE NEW 1977 IC MASTER PAYS OFF!



The new IC MASTER is the ultimate IC source book.

It lists virtually every IC device manufactured in the United States.

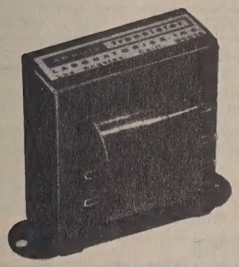
The IC MASTER is the easy, sensible means of narrowing down your IC choices quickly, accurately and systematically. All information is cross-referenced and indexed for rapid problem solving and device selection. And, additionally, the MASTER is updated three times yearly by accumulative supplements.

THE FORMAT OUTLINED:

- **FIVE MASTER SELECTION GUIDES** — 84 companies' IC's organized by type, function, key parameters
- **OVER 1,000 PAGES OF TECHNICAL INFORMATION** — Provided directly by manufacturers covering 17,000 IC's
- **ALTERNATE SOURCE DIRECTORY** — The only industry-wide, pin-for-pin version available
- **MILITARY PARTS INDEX AND CROSS REFERENCE CHART** — Identifies all IC's with JAN qualification
- **MILITARY DEVICE TESTING TABLE** — List companies that screen to Mil. Std. 883
- **MILITARY PARTS INDEX** — The first functional guide to JAN qualified parts
- **PART NUMBER INDEX** — Parts from 84 manufacturers, in numerical sequence
- **APPLICATION NOTE DIRECTORY** — Digest of currently active application note material
- **PRODUCT INDEX** — Provides alphanumeric listing of 84 manufacturers' lines
- **PART NUMBER GUIDE** — Instantly decodes each company's part numbering system
- **MANUFACTURERS AND DISTRIBUTORS DIRECTORY**

United Technical Publications, 645 Stewart Ave., Garden City, NY 11530

abbott 60 ∿ industrial power transformers



specifications

INPUT PRIMARY: 115 VAC (50 to 65 Hz), 1 phase

REGULATION: 15% max. from no load to full load

SECONDARY VOLTAGE TOLERANCE: Within 5% of listed output voltage when measured at full load and 115 VAC input

INSULATION TEST: 1500 VAC

OPERATING TEMP.: 80°C maximum ambient

APPROXIMATE EFFICIENCY: Ranges from 80% to 90%

CONSTRUCTION: Commercial grade using Grain Oriented Silicon Iron for core and heavy insulated synthetic film magnet wire with class "B" rating. Vacuum impregnated with a high quality insulating varnish having a class "H" rating

For 230 VAC input (at no additional cost) add suffix "A" to standard model number. Example: 6B5-10A. Other outputs and/or inputs available on request.

The miniature power transformers listed on this page are specifically designed for mounting on printed circuit boards. Two lines are available: the 6PC Series for 60 Hz application, and the 4PC Series for 400 Hz. Small size, reliability and sensible prices are major features of these OEM transformers. Take a good look at these Models. If you don't find what you want, call us for a special quotation.

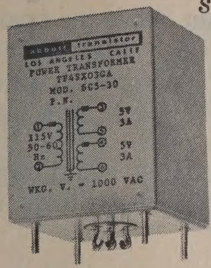
abbott 60 ∿/400 ∿ MIL-T-27D power transformers



specifications

Specifications	6C Series	4A Series
INPUT PRIMARY:	115 VAC, 50 to 65 Hz, 1 Phase	115V , 400 Hz ±20 Hz, 1 Phase
REGULATION:	10% no load to full load	10% no load to full load
SECONDARY VOLTAGE TOLERANCE:	Within 3% when measured at full load and 115 VAC input	Within 5% when measured at full load and 115 VAC input
INSULATION TEST:	1500 VAC	1500 VAC
OPERATING TEMP.:	90°C maximum ambient	105°C maximum ambient
CONSTRUCTION:	To MIL-T-27D, grade 4, class "S" life "X", (10,000 hrs.)	To MIL-T-27D, grade 5, class "S", life "X", (10,000 hrs.)
EFFICIENCY:	From 80% to 90%	From 90% to 93%
ENVIRONMENT:	Encapsulated to meet MIL-STD-810B for vibration, shock, sand, dust, humidity, salt spray, fungus, sunshine, rain, explosion, and altitude (to a vacuum). NOTE: for high altitude operation, encapsulate terminals.	
OPTIONS AVAILABLE:	Other output voltages and 230 VAC input are available. Please consult our nearest office for complete information.

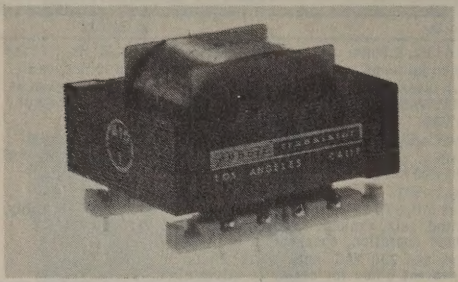
abbott low profile transformers



These miniature power transformers are specifically designed for use in PC board card racks where height above the board is critical. These low profile transformers have a height of only 1.03 inches for 1.2 watts output, 1.17 inches for 3.25 watts output, and 1.31 inches for 6.0 watts output.

If the exact unit you require is not listed as a standard item, please contact our nearest office and we will be happy to quote on your exact requirements.

features

- Low Profile PC Mounting
- 85°C Operation
- Hi-Reliability

specifications

INPUT PRIMARY: 115 VAC (50 to 400 Hz) 1 phase.

REGULATION: 20% or less from no load to full load.

SECONDARY VOLTAGE TOLERANCE: Within 5% of listed output voltage when measured at full load and 115 VAC input.

INSULATION TEST: 1000 VAC.

OPERATING TEMPERATURE: 85°C maximum ambient.

CONSTRUCTION: Printed circuit pin plug in.

APPROXIMATE EFFICIENCY: Ranges from 72% to 76%.

For 230 VAC input (at no additional cost) add suffix "A" to standard model number. Example: 6LP5-1A.

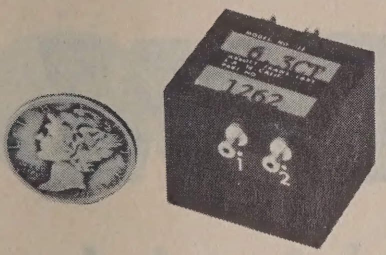
abbott 400 ∿ transformers



features

- Hermetically sealed
- 105°C operation
- To meet MIL-T-27D
- Designed exclusively for 400 Hz
- For aerospace application
- Molded diallyl phthalate

DELIVERY IS FROM STOCK

specifications

Input Primary
115V, 400 Hz ±20 Hz, 1 phase

Regulation
10% no load to full load

Secondary Voltage Tolerance
Within 5% when measured at full load and 115 VAC input

Insulation Test
2500 VDC or 150% of secondary voltage (whichever is higher)

Construction
To MIL-T-27D, grade: 5, class: "S", life: "X" (10,000 hrs.) case: smaller

Environment
Encapsulated to meet MIL-STD-810B, including vibration to Proc. XII, temperature to 105°C, shock, sand, dust, humidity, saltspray, fungus, sunshine, rain, explosion, and altitude (to a vacuum)

Output Secondary
See voltage and current of specific models listed

Standard models with outputs from 350 to 5,000 VAC are also available from stock. Contact our nearest office for your free copy of our complete brochure.

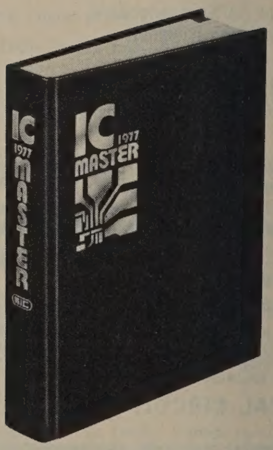
eem/ELECTRONIC ENGINEERS MASTER CATALOG —

The "blue-ribbon" catalog/directory that has become "the standard of the industry" for electronic engineers, buyers and specifiers.

ELECTRONIC ENGINEERS CATALOGUE
CATALOGUE DE L'ELECTRONIQUE POUR LES INGENIEURS

ELECTRONIC ENGINEERS CATALOGUE —

The new catalogue/directory of electronic products available to and from Western Europe and the United Kingdom. Designed especially for the European electronics engineer.



IC 1977 MASTER
IC 1977 MASTER

IC MASTER AND THE UPDATES —

The only complete single-source directory including all IC devices manufactured in the United States. Updated three times yearly with accumulative supplements.

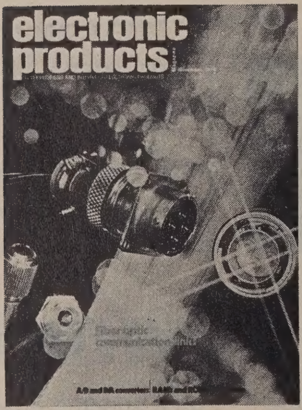
THE MASTER CATALOG



electronic products

ELECTRONIC DISTRIBUTORS MASTER CATALOG —

(Formerly O-T-S Catalog) The only national catalog designed exclusively for distributors and their customers featuring electronic parts, instruments and equipment.

ELECTRONIC PRODUCTS MAGAZINE —

The products magazine . . . A 100% product-oriented magazine including hundreds of new products and special features every month.

eem FILE SYSTEM —

The only filing system designed specially for the electronics engineer. Instant retrieval and organization of data sheets and catalogs.

UNITED COST AND PRICING SERVICES —

The electronic distributors' proven method of being up to the minute on his cost and selling prices.

UTP CUSTOM CATALOGS —

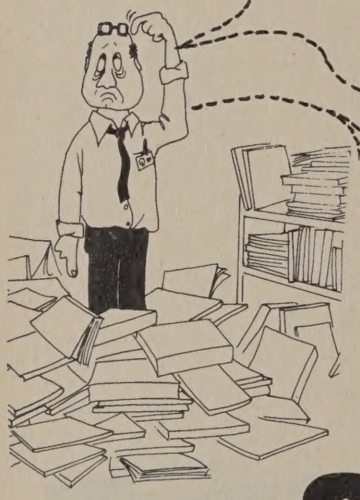
The Cadillac of individualized catalogs for the electronic parts distributor, featuring solely his lines and services.

United Technical Publications, Inc., Div. of Cox Broadcasting Corp. 645 Stewart Avenue, Garden City, New York 11530 / 516 222-2500

What can I use to keep all the manufacturers' product data I receive in order?

What system makes filing or retrieving manufacturers' catalogs fast and easy?

Which file system have thousands of engineers purchased because they know it works?



eem FILE SYSTEM

THE ONLY FILE SYSTEM DESIGNED SPECIALLY FOR THE ELECTRONIC ENGINEER!

The publishers of **eem** have put together a unique filing system for electronic product information. The complete system includes: a product index booklet which classifies electronic products into 3,000 listings both alphabetically and by product group, and 45 file folders imprinted with the **eem** product sections (extra gummed labels included for expanding the system.)

As you receive manufacturers' catalog data sheets, technical bulletins, or clip magazine articles, jot down the proper Product Section Numbers from the **eem** PRODUCT-TO-SECTION INDEX. Then simply file in order. When you require information on a specific product, refer to PRODUCT-TO-SECTION INDEX again to locate the correct file folder. It's simple, and you'll always have the necessary data to compare, specify and buy, right at your fingertips.

Here's how to order your eem FILE SYSTEM:

For the complete system send $10 (plus tax; N.Y., 8%, CA, 6½%) in check or money order to:

United Technical Publications, Inc.,
645 Stewart Avenue, Garden City, N.Y. 11530
Att: Circulation dept.

For an **eem FILE SYSTEM** without file folders send $7.50 (plus tax; N.Y. 8%; CA, 6½%).

United Technical Publications, Inc., Div. of Cox Broadcasting Corp. • 645 Stewart Ave., Garden City, N.Y. 11530

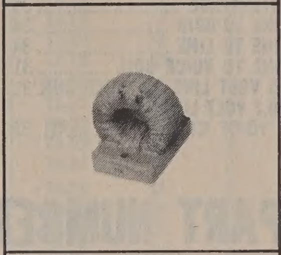
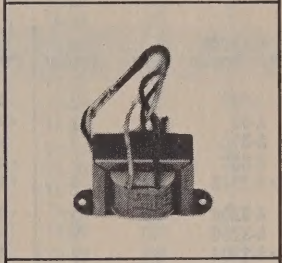
TRANSFORMERS AND COILS

TYPES:

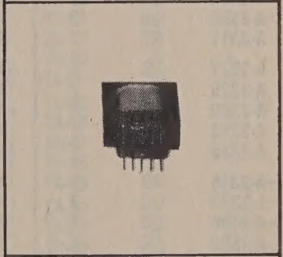
AIRCRAFT
AUDIO
AUTO
BUCK-BOOST
CHOPPER
CONSTANT VOLTAGE
CONTROL
CONVERTER
CURRENT
FERRITE/POT CORE
FERRO-RESONANT
FILAMENT
IMPEDANCE
INPUT
INSTRUMENT
ISOLATION
LOW VOLTAGE
LUMINOUS TUBE
MATRIX
MEDICAL EQUIPMENT
PLATE
POTENTIAL
POWER
PRINTED CIRCUIT
PULSE
R.F. & I.F.
RECTIFIER
SATURABLE
SPLIT CORE
THREE PHASE
TOROIDAL
WALL PLUG IN

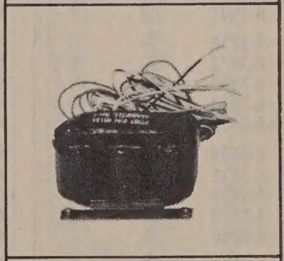




CAPABILITIES:

- POWER — LESS THAN 20 VA to 20 KVA
- FREQUENCY — LESS THAN 20 Hz to HIGH
- HERMETIC SEALING
- VACUUM IMPREGNATION
- EPOXY ENCAPSULATION
- PROTOTYPE — SHORT-LONG RUN PRODUCTION
- HIGH VOLTAGE
- OIL AND AIR COOLED
- MIL-T-27 AND U.L. 544 COMPLIANCE
- LOW AND HIGH REGULATION
- QUICK QUOTATIONS
- FULL COIL WINDING FACILITIES





OTHER COIL CO. PRODUCTS:

"ELECTRO-GRIP" - ELECTRO MAGNETS
CHOKES
DEMAGNETIZERS
MAGNETIC AMPLIFIERS
REACTORS
SATURABLE REACTORS
SOLENOIDS
VIBRATORS

ESSEX STANCOR

RECTIFIER, CONTROL AND FILAMENT TRANSFORMERS

WITH SINGLE SECONDARY: ALL PRIMARIES 50/60 HZ.§

To continue to provide you with the most complete selection of low voltage transformers in the industry, Stancor has added 40 new items to its line. These new transformers, noted with a check mark (√), are listed here along with all the rectifier, control and filament transformers in the Stancor line. Other general information and ordering instructions are provided on inside front cover of this catalog.

POWER SUPPLY TRANSFORMERS

(FOR PERIPHERAL COMPUTER ACCESSORIES — "PCA SERIES")

Designed for use in power supplies delivering regulated positive and negative D.C. voltage for Op-Amps and separate 5 to 6 Volt regulated D.C. voltage for Logic circuits. All transformer ratings are for continuous duty with a 105°C. maximum operating temperature limit. All primaries for 120 volts, 50-60 Hertz. All have electrostatic shield grounded to core internally.

D.C. POWER SUPPLY TRANSFORMERS

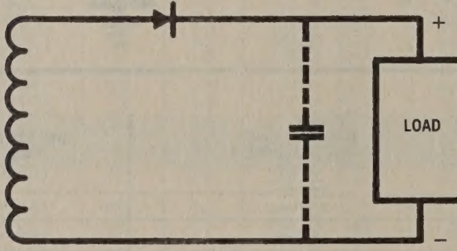
HOW TO DETERMINE SECONDARY AC (RMS) CURRENT RATINGS

The tabular data for the various Rectifier, Control and Filament types of transformers listed in this catalog shows A.C. (R.M.S) secondary current, unless otherwise indicated, as in the "RT" and "TP" series listings.

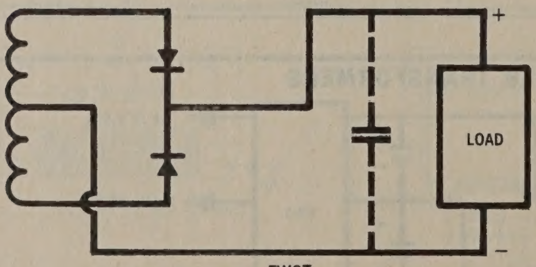
When used in various rectifier circuits, with the possibility of different types of loads, the RMS secondary current will be different for each specific condition. To assist the user, the following information is given so that the proper transformer may be selected.

The rectifier circuits as related to these transformers are:

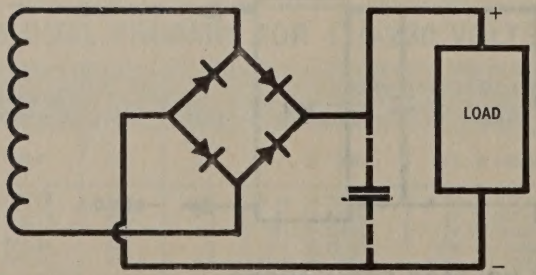
HW = Half-Wave
FWCT = Full-Wave Center Tap
FWB = Full-Wave Bridge
FWD = Full-Wave Doubler



HW



FWCT



FWB

The formula for the relation between secondary RMS current (I_{AC}) which the transformer has to deliver and the D.C. output current taken from the rectifier (I_{DC}) is:

$$I_{AC} = K_{FF} \times I_{DC}$$

where K_{FF} is the form factor. The factor for each circuit and type of load is as follows:

REACTOR LOAD

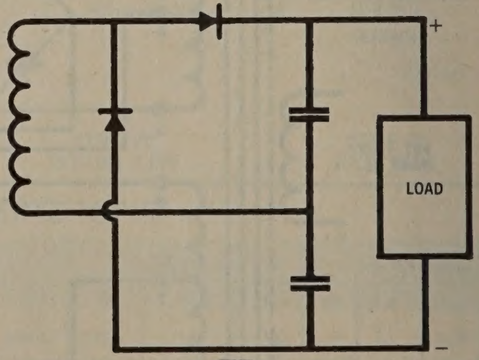
Rectifier Circuit	Form Factor
HW	1.25
FWCT	0.7
FWB	1.0

CAPACITOR LOAD

Rectifier Circuit	Form Factor
HW	2.3
FWCT	1.2
FWB	1.8
FWD	4.0 (approx.)

Only transformers with a CT connection are usable in the FWCT circuit and the FWD circuit will have only a capacity load. The size and type of capacitors used in the FWD circuit will affect the form factor. The factor shown is an approximate maximum for the full-wave symmetrical voltage doubler circuit using two similar electrolytic capacitors.

The transformer selected for a specific D.C. output voltage and current rating, with known type of load after the rectifier, should deliver sufficient RMS voltage to make up for the voltage drop in each rectifier junction plus any drop in a filter or regulator that is used.



FWD

RECTIFIER CIRCUIT POWER TRANSFORMERS

Each transformer has the winding arrangement and terminal numbering shown in the schematic diagrams above. The primary winding is connected to terminals 1, 2, 3 & 4. A separate winding is connected to terminals 5, 6 & 7 that may be used in series with the primary to raise or lower the secondary voltage output. A variety of combinations is possible using the taps on both windings, plus the "Aiding" or "Bucking" action of the extra winding.

Designed for 117 V. 50/60 cycle operation; may also be satisfactorily operated at 400 cycles.

The secondary winding of each transformer consists of two identical windings connected to terminals 8 & 9 and to 10 & 11 respectively. Use the tables showing the various output voltages for specific terminal connections as your guide. Many combinations are possible other than those listed in the tables. All ratings shown are for normal convection air cooled applications. Select only rectifiers capable of handling the output voltages and currents described.

When operating these transformers continuously at maximum rated output voltage and current and because of certain other conditions, it is sometimes necessary to derate the rectified output current (DC) as much as 20%, in order to stay within the recommended operating temperature limit of 105 degrees Centigrade. The type of rectifier circuit and load (capacitive, inductive or resistive) determines the relative amount of current (RMS) in the transformer secondary winding. The relationship of AC to DC (secondary RMS current to rectified DC output) for typical circuits and loads is given in the Technical Data on Page 9 of this catalog. Operating duty cycle, type of cooling (natural convection in free air or otherwise) and the power line input voltage and frequency also have an effect on the transformer temperature. These things should all be properly related to the results in any specific application.

The "RT-Series" of transformers may also be used in other rectifier circuits than the Full-wave C.T. and Full-wave Bridge shown above. In circuits such as the Half-wave or Full-wave Voltage Doubler (symmetrical) and Full-wave Bridge, where a C.T. connection is not required, both secondary windings may be connected in parallel, to double the RMS current that is available from each secondary separately. The RMS voltage will, of course, be half of the amount available as that obtained with the secondaries connected in series. Please refer to the adjacent data to obtain the secondary RMS current as related to each rectifier circuit and type of load.

NOTE: Filtering shown permits maximum output ripple voltage of 3% or less. § May be operated from a 400 Hz. source with no change in output ratings.

† Quantity Shown is Total Number used in a given circuit. Rectifiers should be equivalent to Sarkes Tarzian numbers shown.

* Surge protection resistors are recommended when capacitor input filters are used. Allow 3.3 ohms per 70 volts R.M.S. applied voltage. Transformers secondary winding DC resistance may be used as part or all of the amount required.

• Available until stock is depleted.

ESSEX STANCOR

ISOLATION/AUTO TRANSFORMERS

GISD, GSD SERIES

Available in 9 sizes to handle continuous duty power requirements from 75 VA. to 1.5 KVA., 230 volts 50/60 Hz. to 115 volts, single phase.
All units built in type "C" mounting style semi-shielded construction. Case and core are connected internally to third wire in line cord and output receptacle, to comply with modern safety standards.

STEP-DOWN AUTO-TRANSFORMERS: (Three Conductor Line Cord and Receptacle)

§ May be operated from a 400 Hz. source with no change in output ratings.

WHY & WHERE AUTO TRANSFORMERS & ISOLATION TRANSFORMERS ARE USED

AUTO TRANSFORMERS

Stancor stock Auto Transformers are normally connected for either step-down or step-up applications involving line voltages of 115 or 230 Volts, 50-60 Hertz. Where it is not necessary to have isolation between the primary and secondary circuits, and a direct connection between them is permissible, the Auto Transformer offers the advantages of smaller size and less weight plus lower cost.

This type of unit is generally used in applications involving American appliances used abroad where our standard 115 Volt equipment must operate from a 230 Volt source. It is also used for foreign appliances designed for 230 Volt operation, which are to be used on our 115 Volt circuits. Our catalog items are designed for continuous rated output on either 50 or 60 Hertz. It is important to bear in mind that the Auto Transformer or Isolation type changes only the voltage levels and does not change the frequency from 50 to 60 Hertz or vice versa. In appliances using synchronous motors, such as clocks or phonograph record changers and players, the speed will be different when using them on a frequency which differs from the frequency they were originally designed for. In these cases the manufacturer of the appliance should be consulted to obtain the proper motor.

The V-A rating is equivalent to a Wattage rating where a resistive load and/or unity power factor exists. When inductive loads such as motors are used (as in a motor driven appliance) the power factor is not unity and to be accurate the output is expressed in V-A, which is the product of the output voltage and the output current (R.M.S.)

When selecting one of these items for use with an appliance which includes a motor, allowance should be made for the starting current of the motor which is somewhat higher than the running current. This information is generally available from the appliance manufacturer. Information pertaining to the AC Wattage or current required by an appliance is generally marked on the item by the manufacturer and should be observed. It is much better to buy a transformer with a larger V.A. rating than you will actually need because of larger motor starting currents and variations in the line voltage and/or frequency in some locations, which could cause overheating.

When using Auto Transformers of the two-conductor termination type it is necessary that the power line polarity be observed since one side of the 115 Volt circuit is normally at ground potential. Use of polarized plugs and receptacles is an aid in observing proper polarity. The case of the transformer is not connected to any part of the electrical winding for two conductor terminations but it is a good safety precaution to ground the case, if possible. Where there are three-conductor termination plugs and receptacles the third or grounding conductor is connected to the case internally and therefore the case is automatically connected to the conduit or ground system of the electrical power line wiring.

ISOLATION TRANSFORMERS

Isolation Transformers are used where a direct connection between primary and secondary circuits is not desired and the circuits must be isolated. This results in a larger, heavier and more costly item for a given power rating. However, in addition to the isolating advantages an electrostatic shield is generally added to minimize capacitive coupling between primary and secondary circuits. This helps to minimize the transfer of unwanted power line transients and interference from other sources connected to the power line by capacitive coupling to the secondary circuit. The standard insulation test voltage rating between windings and between each winding and the core is 1,500 Volts R.M.S. This is normally sufficient for 115 and 230 Volt operation.

The V-A rating should be selected for each specific application, with allowance for any abnormal load or environmental conditions. All catalog items have an operating temperature limit of 105 Degrees C. (Designed for a 65 Degrees C. maximum temperature rise above a maximum ambient temperature of 40 Degrees C., with unrestricted free air ventilation.) V-A output ratings are for continuous operation from the specified input voltage and frequency.

GENERAL INFORMATION

All of these items have Class "A" insulation and are rated to have a maximum operating temperature limit of 105 Degrees C. These units may be used with rectifiers but the form factor as explained elsewhere in this catalog should be observed for various combinations of rectifier circuits and types of load following the rectifier.

These items are made with our standard N.E.M.A. plugs and receptacles, primarily for use in this country. However, when used overseas where different types of plugs are necessary an adaptor can be used or our plug can be removed and a foreign plug attached to the end of the line cord.

The Stancor line of "Smoothing" and "Swinging" types of Filter Chokes has been designed for use with the various Power and Plate Transformers listed in this catalog. The range of electrical ratings available covers requirements for practically all of the Filter Chokes used in Home Radio and Television Receivers, Audio Amplifiers and low power Radio Transmitters. In addition, a myriad of other electronic apparatus applications for these items exists.

Inductance values shown are measured at the full amount of D.C. listed and at the specified values of RMS Voltage and Frequency. All of these items are made with Class "A" insulating materials and will withstand operation up to a limit of 105°C., continuously.

• Available until stock is depleted.

The above listed "HIGH CURRENT CHOKES" are normally used in low voltage, high current D.C. power supply filter applications, where low voltage drop across the filter and good voltage regulation is required, without any type of voltage regulator.

The "MINIATURIZED HIGH CURRENT CHOKES" are primarily for use with the "Miniaturized Control/Rectifier Transformers" listed elsewhere in this catalog. When used in small D.C. power supplies with these transformers, a combination of small physical size and adequate voltage regulation for many applications is possible, without a solid state voltage regulator.

These chokes are made with Class "A" insulating materials and may be operated up to a maximum limit of 105°C., continuously.

ESSEX STANCOR

POWER TRANSFORMERS

PLATE AND FILAMENT TYPE

Stancor's broad line of commercial grade power transformers offers a choice of standard mounting styles. Listings are in ascending order of plate-supply voltage for ease of selection.

All units are designed and built to meet the exacting requirements for EIA for electrical tolerances, dielectric strength, temperature rise and construction. All are insulated with class A materials (105°C max. operating temperature). Transformers designed for full-wave C.T. rectification with capacitor input filter may be used with choke input filter allowing an increase in D.C. current of 30%.

Transformers designed for full-wave C.T. rectification with choke input filter may be used with capacitor input filter requiring a decrease in D.C. current of 25%.

All "C" style have Leads; "SC" style have Lugs; "FS" have Terminals.
§ May be operated from a 400 Hz. source with no change in output ratings.
• Available until stock is depleted.

‡ Secondary C.T. must be grounded.
* Secondary C.T. does not have to be grounded.
# Maximum output current rating will be reduced according to form factor for rectifier circuit and type of load used.

ALL SECONDARY A.C. VOLTAGES ±3%.

ESSEX STANCOR

AUDIO TRANSFORMERS TECHNICAL NOTES

Audio Transformers operate on the same electro-magnetic induction principle as Power Transformers but generally over a fairly broad range of frequencies; instead of at a single power frequency, such as 60 Hertz. In common applications they may carry D.C. in one or more windings, transform Voltage and Current levels, act as an Impedance matching and coupling device or as a form of filter; passing only a limited range of frequencies (voice communication). Usually they perform more than just one of these functions simultaneously in a specific type of usage.

In some applications the frequency response, amount of magnetic shielding, maximum operating level, percentage of waveform distortion and insertion loss of the transformer are important.

The most commonly required electrical information pertaining to Audio Transformers is listed in this catalog wherever it applies, along with the physical mounting style, weight and dimensions. Information not shown is often available upon request if it pertains to the normal intended type of usage for a specific item.

The Impedance values listed for each Audio Transformer are the Reflected Impedance (Primary) for the rated value of Load Impedance (Secondary), into which the transformer is designed to operate. The Impedance Ratio between Primary and Secondary is fixed; since it is equal to the square of the turns ratio, which remains the same for different operating conditions. Turns Ratios listed are for Total Primary to Secondary, with the exception of the Driver Transformers for use with tubes. These are listed for Primary to ½ Secondary operation and are typically used in Class "B" Amplifier applications.

Accuracy of turns ratios is maintained within plus or minus 3 percent. Center taps are accurate within plus or minus 1 percent. Values of Primary D.C. listed are maximum and, in the case of push-pull operation with a center-tapped winding, are the maximum amount for each half of the winding, unless otherwise indicated.

HANDY METHOD FOR APPROXIMATING THE PRIMARY TO SECONDARY RATIO REQUIRED OF A DRIVER TRANSFORMER IN CLASS B OR AB$_2$ SERVICE

$$\text{Transformer ratio, primary: } \tfrac{1}{2} \text{ secondary} = \frac{\sqrt{PZ_L}}{0.35E_s}.$$

Where: P = Driving power in watts required for tubes to be driven.

Z_L = Plate load impedance of driver tube(s) selected.

E_s = Peak grid-to-grid signal voltage required for tubes to be driven.

Factor values for this formula are data commonly found in tube manuals. Select driver tubes capable under typical operation of delivering 1.5 times the grid driving power requirements of the stage to be driven. Pentode or tetrode drivers should be operated with inverse feedback.

TURNS/IMPEDANCE RATIOS

Turns Ratio "NR" may be expressed as the ratio of turns between the Primary and Secondary windings. It is also the Voltage Ratio between them and may be expressed as:

$$NR = \frac{N\,\text{sec.}}{N\,\text{pri.}} = \frac{E\ \text{sec.}}{E\ \text{pri.}}.$$

Since the Impedance Ratio is equal to the square of the Turns Ratio:

$$(NR)^2 = ZR \text{ or } NR = \sqrt{\frac{Z\,\text{sec.}}{Z\,\text{pri.}}}.$$

Where: N sec. = Number of Secondary Turns.
N pri. = Number of Primary Turns.
E sec. = Secondary Voltage.
E pri. = Primary Voltage.
NR = Turns Ratio between windings.
Z = Impedance in Ohms.
ZR = Impedance Ratio between windings.

INSERTION LOSS

Insertion loss is expressed in Decibels (db) as a measure of efficiency, thusly:

$$\text{Insertion loss in db} = 10 \log \frac{P\,\text{input}}{P\,\text{output}}.$$

Where P = power (in Watts).

If it is measured at mid-band Frequency it is a simple expression of the transformer efficiency. At other frequencies it includes the Frequency Response characteristics of the transformer for specific conditions.

TECHNICAL DATA FOR CONSTANT VOLTAGE TYPES

The Constant Voltage Line Sound Distribution Systems have become the most widely accepted systems in use today. They offer the Sound Engineer an easy means of establishing the volume level of each speaker in a system without the use of potentiometers or similar devices. The proven simplicity and versatility of these systems minimize the problem of speaker impedance mismatching thereby insuring high quality sound reproduction and minimum power losses. The use of higher power driving the constant voltage lines also helps to lower power losses over longer distances.

Most of the newer P. A. amplifiers have a designated 25 volt, 70.7 volt or 140 volt outlet on the output transformer, but almost any older amplifier has an impedance tap which may be used for the desired voltage output.

To insure a steady maintenance of the desired line voltage, it is recommended that the amplifier should be capable of producing 1½ times the total power of the various speakers connected. Hence, if the sum of the speakers equals 25 watts, the driving amplifier should be capable of producing 37½ watts. The power and impedance figures shown here with the formulas are based on the total power actually supplied to the speakers and not on the maximum capability of the amplifier.

The following table lists various amplifier power ouputs with the corresponding impedance tap on the output transformer which will supply these three basic line voltages:

Watts Power Output	Impedance For 140 Volt Line	Impedance For 70.7 Volt Line	Impedance For 25 Volt Line
5	4,000	1,000	125
10	2,000	500	62.5
15	3,333	333	41.7
20	1,000	250	31.2
25	800	200	25
30	666	166	21
40	500	125	15.6
50	400	100	12.5
60	333	83	10.5
80	250	62.5	7.8
100	200	50	6.3

For power ratings not shown in this table, use the following formula:

$Z = E^2/W$
Z = Ohms
E = Volts
W = Watts Output

Impedance Tap for: 140 volt line = 20,000/W
70.7 volt line = 5,000/W
25 volt line = 625/W

To establish the volume level of the various speakers in the system, it is necessary to know the power output of the amplifier and the power desired at each speaker. To choose the correct line transformers, match the power to be delivered to each speaker with the power tap on the line transformer. Then connect the primaries of the line transformers in parallel to the proper voltage tap on the output transformer of the amplifier. When the sum of the power ratings shown on each line transformer is equal to the power rating of the amplifier, and the speakers are connected to the appropriate secondary taps, the system is correctly matched.

To determine the proper tap on the primary of the line transformer for a given wattage input to the speaker, use the formula:

$Z = E^2/W$

EXAMPLE: In a 70.7 volt system assume that the speaker requires 5 watts. What is the impedance of the tap required to produce this wattage?

$Z = E^2/W = 70.7 \times 70.7/5 = 5{,}000/5 = 1{,}000$ ohms

To determine the wattage input to the speaker when the tap is already connected, use the formula:

$W = E^2/Z$

EXAMPLE: In a 70.7 volt system, assume a speaker connected to the 500 Ohm tap of the primary of the line transformer. What wattage is produced by the use of this tap?

$W = E^2/Z = 70.7 \times 70.7/500 = 5{,}000/500 = 10$ Watts

REMEMBER: Each speaker must have its own line-matching transformer and all of the line-matching transformers are connected in parallel to the proper voltage tap on the output transformer of the amplifier.

EWC for fast service. Efficient and speedy response to customer needs is what EWC is all about. In addition to our standard line, we welcome inquiries about problems calling for custom designs. Cutting through red tape with person-to-person discussions has established EWC as an ideal supplier of quality products for quality-conscious companies.

EWC INC.
Dept. EM / 725 Federal Ave. / Kenilworth, NJ 07033 / (201) 245-3200 / TWX 710-996-5993

FREED TRANSFORMER CO., INC.

MIL-T-27 COMPONENTS

TRANSISTOR SUPPLY TRANSFORMERS
TST SERIES

Manufactured and Guaranteed to Specifications MIL-T-27

TST-6 — Frequency 57 Hz to 63 Hz — Primary 115 volts units with * primary 115 and/or 230 volts

TST-4 — Frequency 380 Hz to 1000 Hz — Primary 115 volts

TST units can be supplied in commercial type construction (channel or shell type with leads).

**When ordering specify (6) for 57 to 63 Hz and (4) for 380 to 1000 Hz

D.C. to RMS Conversion Chart

Resistive or Inductive Loads		Capacitive Loads	
Full Wave Center Tapped	Full Wave Bridge	Full Wave Center Tapped	Full Wave Bridge
E_{RMS} = 2.22 Edc	E_{RMS} = 1.11 Edc	E_{RMS} = 1.6 Edc	E_{RMS} = .8 Edc
I_{RMS} = .75 Idc	I_{RMS} = 1.05 Idc	I_{RMS} = 1.1 Idc	I_{RMS} = 1.55 Idc
Edc – should include voltage drop across reactor and voltage drop across one diode for F.W.C.T. and voltage drop across two diodes for F.W. Bridge.

FREED TRANSFORMER CO., INC.

HERMETICALLY SEALED MINIATURE AND SUB-MINIATURE FILTERS TO MIL-F-18327

Freed Standard Filters are **Hermetically Sealed Miniature and Sub-Miniature** high performance components designed for both production and laboratory applications in the Communications and Electronic industry. In order to achieve attenuation requirements not obtainable with one single filter, one can combine several standard filters of different transmission characteristics. Wide Band Pass characteristics are obtainable by combining low and high Pass Units. The astatic construction of inductive components together with special shielding reduces the hum pick-up of the standard filters.

Low Pass Filters: The attenuation characteristics of Low Pass Filters are 6db or less at cut-off frequency • **ILP-ILM Interstage Low Pass Filter.** Characteristic impedance 10,000 ohms, in and out • **LLP-LLM Line Low Pass Filter.** Characteristic Impedance 500 to 600 ohms, in and out • **High Pass Filters:** The attenuation characteristics of High Pass Filters are 6db or less at cut-off frequency • **IHP-IHM Interstage High Pass Filter.** Characteristic Impedance 10,000 ohms, in and out. • **LHP-LHM Line High Pass Filter.** Characteristic Impedance 500 to 600 ohms, in and out • **Band Pass Filters:** The attenuation characteristics of Band Pass Filters are 2db or less at plus or minus 3% of center frequency • **IBP-IBM Interstage Band Pass Filter.** Normal input impedance — 10,000 ohms. Output impedance .5 megohms. Effective voltage step-up 2:1. (Output voltage to source voltage.) • **LBP-LBM Line Band Pass Filter.** Nominal input impedance 500 to 600 ohms. Output impedance .5 megohms. Effective voltage step-up 5:1. (Output voltage to source voltage.)

Special filters in all six types are available upon request.

NULL "T" FILTERS
SERIES 1950

Standard models are available for 30, 60 and 120 cycles in a wide range of impedances. Each network will give a minimum of 50 db attenuation at the null frequency.

The null frequency is adjusted to a tolerance of ±2%.

All Null T Filters are hermetically sealed.

Prices on request.

FREED TRANSFORMER COMPANY. INC. 1795 WEIRFIELD ST. (Ridgewood) Brooklyn, N. Y. 11227

FREED TRANSFORMER CO., INC.

TOROIDAL INDUCTORS

Using the latest developments in the field of magnetic materials and new impregnation and molding techniques the Freed Transformer Co. makes available to the industry the most extensive line of toroidal inductors.

Freed toroids are available in three types of constructions. Open units coated with a special high temperature extremely low loss compound, hermetically sealed in metal cases or molded in special **Freed Epoxy Resin.** Both hermetically sealed and molded units meet the latest military specification MIL-T-27A(graded 1 or 4 and 2 or 5 respectively.)Freed toroidal inductors are supplied with either molypermalloy or carbonyl iron powder cores

1. Temperature Stabilization:

The molypermalloy and carbonyl iron powder cores have a temperature coefficient of inductance. Depending on the degree of temperature stabilization the cores have different temperature coefficients. The degree of stabilization is denoted by a two-letter code.

SF	Non-stabilized cores, ±2½% inductance variations from —55°C to +85°C.
SN	Non-stabilized cores, +2% inductance variations from —55°C to +85°C.
SE	Temperature stabilized cores, +0.1% to —0.4% inductance variations from —1.5°C to +54°C.
SB	Temperature stabilized cores, ±0.1% inductance variations from +13°C to +35°C.
SD	Temperature stabilized cores, ±0.1% inductance variations from —1.5°C to +54°C.
SW	Temperature stabilized cores, ±0.25% inductance variations from —54°C to +85°C.
SM	Temperature stabilized cores, ±.25% —65°C to +125°C.
SP	Temperature stable carbonyl iron cores, ±0.3% inductance variations from —55°C to +85°C.

The temperature (stabilization) coefficient of an inductor will depend upon the nominal inductance value, operating frequency and A.C. voltage across the coil. Under some unfavorable working conditions the temperature coefficient of inductance corresponding to a given stability characteristic may be exceeded.

Toroids with special requirements such as tapped toroids, toroidal transformers, molded and cased units with dimensions other than standard sizes and high temperature toroids can be supplied on request. Our engineering and laboratory facilities are available for consultation, research and development.

TI-38	100	4	9.5	0.06	OS-1	MR-1, MS-1	DST-1	100Hz–10KHz

*TI-20 through TI-23 have a very low voltage coefficient and inductance will change very little with voltage. Because of high frequency application, the maximum voltage is limited rather by breakdown than by saturation.

$$\text{Normalized } V_{AC} = \frac{V}{F}\,\frac{1}{\sqrt{L_H}}$$

$$\text{Normalized } I_{AC} = I_{AC}\sqrt{L_H}$$

$$\text{Normalized } I_{DC} = I_{DC}\sqrt{L_H}$$

where F —operating frequency in Hz
L_H —inductance in henries
Iac—A.C. current in MA
Idc—D.C. current in MA
V —A.C. voltage across the core

FREED TRANSFORMER COMPANY. INC.

FREED TRANSFORMER CO., INC.

COMMERCIAL GRADE COMPONENTS

These components are designed to meet the demand for low-cost replacement parts for commercial electronic equipment.

The best commercially available materials have been utilized in the design of these units, to insure reliability and excellent performance characteristics. Vacuum impregnation with a non-hygroscopic varnish to prevent penetration of humidity are employed to give these units long life and trouble-free performance.

230-115 V, 50-60 C.P.S. Stepdown Transformers rated from 25 V A up to 5,000 V A Rating and line booster transformers are included in this series.

All units, with only a few exceptions, are uncased or of shell-type construction.

Isolation transformers and Stepdown transformers are equipped with line cord and receptacle.

MCV – CONSTANT VOLTAGE TRANSFORMERS – MCV

(FERRO-RESONANT TRANSFORMERS)

The MCV line of constant voltage transformers provides accurate regulation against line and/or load variations, without the use of tubes or moving parts.

Input Voltage Range 95 to 130

Rated output within ± 2% of nominal value. Regulation automatically maintained within ± 1%. Regulation from 25% to full load ± 2%.

Variac® Adjustable Autotransformers

VARIAC® MANUALLY OPERATED AUTOTRANSFORMERS

The GenRad Variac autotransformer is a continuously variable unit used to control AC voltage. Features the Duratrak® contact surface, a uniform silver-alloy coating to prevent injurious high-temperature oxidation and resultant brush-track deterioration — track will show no significant wear after 1,000,000 cycles of brush operation. Variac autotransformers are highly efficient, have high thermal capacity, can withstand very high short-term overloads, and do not affect waveform or power factor. Other features: Good regulation; smooth control; long life; linear output voltage; low maintenance; easy installation. All necessary mounting hardware is included with each unit. Portable types, indicated by T in Model No., have an overload protection reset switch, line switch, convenience outlet, and a 6-ft. two- or three-wire line cord. Manually operated and motor-driven Variacs are available in a wide variety of voltage and current ratings, with or without cases. All except portable units can be equipped with ball bearings at slightly higher prices; ball bearings, indicated by BB in Model No. of manually operated units, are included with 4- and 6-gang types. **Angle of Rotation:** 320°. **Line Frequency:** 50 and/or 60 Hz unless otherwise specified. **Input Voltages:** 120, 208, 240 or 280 volts. **Output Voltages:** 0-120/140, 0-208, 0-240/280, 0-480 or 0-560 volts, continuously adjustable. **Current Ratings:** 2 to 300 amps.

*kVA ratings — normal input line voltage times maximum current: maximum current can be drawn at maximum voltage for line voltage connection only. †CSA Approved. ††Listed ratings are for metal panel mountings, ratings in air, 2.0 and 2.5 amps respectively. §Listed under Re-examination Service of UL. ¶For 60 Hz only; no overvoltage connection supplied. • Series-connected windings; do not use with grounded load. ▲ Parallel-connected windings; one or more W50-P1 chokes required (see below). ■Also can be used at 120-volt input with 2x the output ratings shown. ↓Depth behind panel except cased types (excluding knobs).

MODEL W50-P1 CHOKE FOR PARALLEL COMBINATIONS

When windings of identical Variacs are paralleled to obtain higher load ratings, it is recommended to use one or more chokes to limit excess circulating current in the event that brushes accidentally get out of line. Use 1 choke for 2 Variacs in parallel; 3 chokes for 3 Variacs; 4 chokes for 5 Variacs; 6 chokes for 6 Variacs. Parallel operation of units smaller than Model W30 is not recommended since the next larger unit is more economical. For W50 Series Variacs, the choke can be mounted directly on the terminal plates.

SINGLE-PHASE PORTABLE VARIACS

Portable, metered, cased Variacs with 2-wire or 3-wire cord and receptacle, and convenient carrying handle. Meter accuracy is 3% of full scale except 5% for ammetered Model W20HMT3A. Power switch disconnects both sides of line. Meters are switchable under load. Types MT and MT3 have overvoltage connections and corresponding dial scales; line-voltage connections and dial scales on special order.

120-VOLT INPUT
All units have max, output voltage range of 0-140 volts except W5LMT3 which has 0-120 volts. Models W5MT and W10MT come in 2-wire version; all others in 3-wire version.

Variac® Adjustable Autotransformers

VARIAC® MANUAL AND MOTOR-DRIVEN AUTOTRANSFORMERS

M-TYPE MANUAL MODELS FOR 350-1200 Hz OPERATION

For use at line frequencies between 350 and 1200 Hz. Equivalent to their Type-W counterparts, but smaller and lighter, and provide better regulation at 400 Hz than 60 Hz models. Conform to most military specifications for shock, vibration, salt spray, tropicalization, altitude, humidity and temperature.

SINGLE-PHASE 120-VOLT INPUT UNITS

Line voltage connection output, 0-120 volts; overvoltage connection output, 0-140 volts.

Model No.	Output Amps		kVA*	Description	Shpg. Wt. Lbs.
	Rated	Max.

M20G3	20.0	26.0	10.80	3-Gang M20	48

MOTOR DRIVEN MODELS

All W- and M-type Variac autotransformers, both single and ganged, can be supplied with motor drives. Motors are fully enclosed, two-phase gear-reduction servo types having very low moments of inertia; the motor mounting plate is attached to the base end of the autotransformer by means of four heavy corner posts. Gear coupling is used to facilitate precise alignment, eliminate phase shift problems, and permit a number of drive speeds by simple change of gears. Three basic internal-geared motor speeds are available which, with a selection of standard coupling gears, makes possible the assembly of units having nominal full-traverse (320°) speeds of 2, 4, 8, 16, 32, 64 or 128 seconds at 60 Hz (approximately 20% slower at 50 Hz). The 2- and 4-second units are intended for high-speed servo applications; slower speed models are primarily for remote positioning. Cases are available for most models as indicated. **All motor-driven Variacs are furnished complete with ball bearings, a 120-volt phase-shift capacitor, and an adjustable microswitch for setting traverse limits.**

HOW TO ORDER

```
W 5 H G 3      D 8 C K      M
A ——┘          B ——┘        C┘
```

A **Basic Unit Prefix:** Select from table below the desired basic Variac unit, as described elsewhere in these pages.

B **Motor Indicator Suffix:** Add appropriate suffix for each Variac as indicated by an X in columns below. Suffix indicates seconds for 320° traverse.

C **Case Suffix:** Add final suffix M if case available and desired. Case fully encloses both motor and Variac.

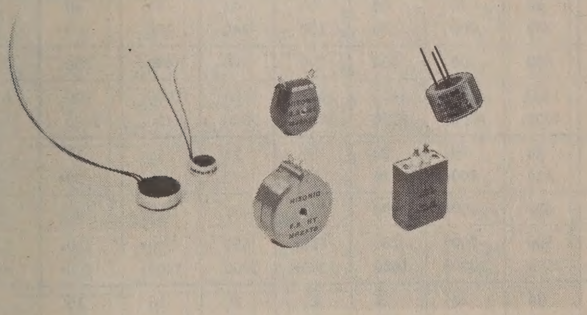
INDUCTORS

Hisonic has long been a leader in the custom development and manufacture of high Q precision inductors. Originally confined to MPP and PI toroidal types, capabilities have been expanded to include ferrite pot core and laminated alloy core types and cover virtually every known construction that applications may require.

Although Hisonic stocks several series (primarily toroidal) most are custom made to specific requirements which results in less compromise in your applications and usually lower cost.

STANDARD
UNCASED MOLDED METAL CASED



*Toroidal Series	Ind. Range	Max Q	Freq Range	DC R Ohms/MH	Uncased Size

TRANSFORMERS

Hisonic has recognized capabilities in the design and manufacture of transformers, particularly for technically sophisticated custom applications. Thousands of Hisonic converter transformers are "flying" over the world, powering aircraft com/nav equipment. Special signal and matching transformers for both voice and wide video ranges are in use in communication systems.

Constructions include toroidal, pot core and laminated core to commercial and MIL specifications.

There are few "stock" items, but hundreds of designs and our engineering staff are ready to solve your transformer problems quickly.

REGULATION AND TEMPERATURE RISE

To determine the actual voltage output (E) of any transformer (listed in the chart above) when the required load current (I) is other than rated (I_L), refer to the graphs shown. Use of these curves enables the designer to predict, with useful accuracy, the actual voltage output and expected temperature rise of the transformer under consideration as a function of load current. All data shown represents operation at nominal voltage input, (115 or 230V) 60 Hz sine wave, with free convection cooling in still air at 25°C. ambient.

To use the curves, first determine the ratio of the required load current (I) to the rated load current (I_L). Enter the graphs at the extreme left vertical axis (I/I_L) at the appropriate ratio and read ratio of E/E_O and ΔT°C.

The following example is illustrated in dotted lines on the graphs:
Transformer model selected — U32-012-X-X
From above chart — $E_O = 12$ volts at $I_L = 360$ MA.
Required load current — $I = 450$ MA.
$I/I_L = 450/360 = 1.25 \therefore E/E_O = .95$ or $E = .95 \times E_O$
$E_O = .95 \times 12 \approx 11.4$ volts and $\Delta T \approx 37$°C.

To summarize, A **U32-012-X-X** transformer will deliver approximately 11.4 volts at a load current of 450 MA and will exhibit a temperature rise of approximately 37°C above ambient at that load.

Series U transformers are rated for continuous operation at 105°C. Therefore, the maximum permissible ambient temperature in which the U-32-012-X-X transformer can be operated when delivering 450 MA load current is 105° - 37° = 68°C (154°F).

All Series U transformers **(except style -E)** are varnish impregnated and finished with a special black polyurethane overcoat for added moisture resistance. All models are tested for primary to secondary and winding to core dielectric strength of **1500** VRMS.

For operation at 400 Hz, the rated load current (I_L) shown in the chart above can be increased **by as much as 1.8 times. Contact factory for specific data.**

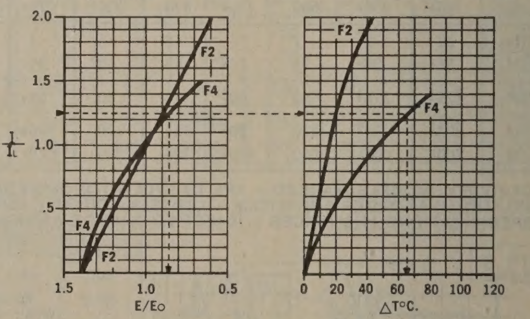
REGULATION AND TEMPERATURE RISE



To determine the actual voltage output (E) of any listed transformer when the load current (I) is other than rated (I_L), first determine the ratio of required load current (I) to the rated current (I_L). Enter the graphs at the extreme left vertical axis (I/I_L) at the ratio determined above and read ratio of E/E_O and ΔT°C.

The dotted lines illustrate the following example:

Transformer model selected — F44-020-X-X
From chart (to left) — $E_O = 20$ volts at $I_L = 175$ MA (per secondary)
Required load current (per secondary) — 220 MA
$I/I_L = 220/175 = 1.26 \therefore E/E_O = .86$ or $E = .86 \times E_O$
$E = .86 \times 20 \approx 17.2$ volts and $\Delta T \approx 65°C$.

To summarize, an F44-020-X-X transformer will deliver ≈ 17.2 volts at a load current of 220 MA (per secondary) and will exhibit a temperature rise of ≈ 65°C above ambient.

Series F transformers are rated for continuous operation at 130°C. Thus, the maximum permissible ambient temperature in which the F44-020-X-X unit can be operated when delivering 220 MA (per secondary) is 130°-65°=65°C (149°F). For operation at 400/500 Hz the load current shown can be increased by ≈ 1.5; consult factory for specific data.

■ CONSTRUCTION: ALL MODELS VACUUM VARNISHED AND FURNISHED WITH SPECIAL BLACK POLYURETHANE OVERCOAT. ■ RATINGS: E_O AND I_L GIVEN FOR 115V 50/60 HZ SINE WAVE INPUT. ■ HI-POT: 1500V RMS WINDING TO WINDING & WINDING TO CORE. ■ DELIVERY: MODELS MARKED • FOLLOWING I_L RATING ARE AVAILABLE FROM STOCK (STYLE F-N). OTHER MODELS — STOCK TO ONE WEEK. ■ CONSULT CURRENT PRICE LIST, REP OR FACTORY FOR NET PRICES & QUANTITY DISCOUNTS. ■ NO MINIMUM ORDER FOR STOCK • UNITS. ■ SPECIFICATIONS AND PRICES SUBJECT TO CHANGE WITHOUT NOTICE.

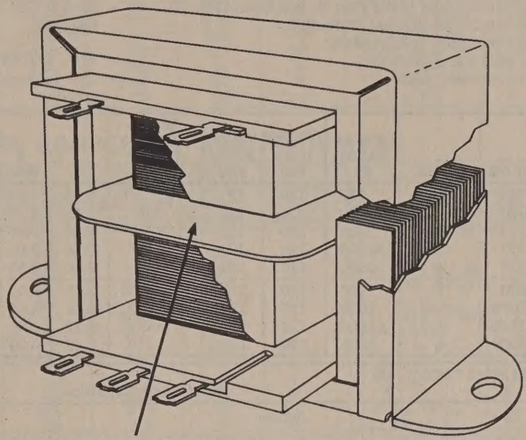
TRANSFORMERS

From less than 1 VA to 1000 VA
Available with secondary voltages up to 500 V
Available with secondary current ratings to 20 Amps

PROTOTYPES AVAILABLE WITHIN ONE WEEK — OFTEN SAME DAY SERVICE

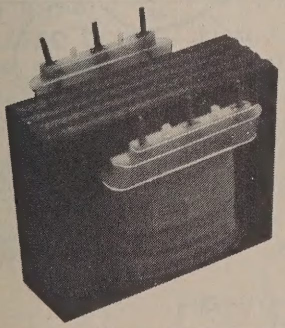
No set-up charges on any special order

CHECK OUR LOW PRICES!



SPLIT BOBBIN POWER TRANSFORMERS

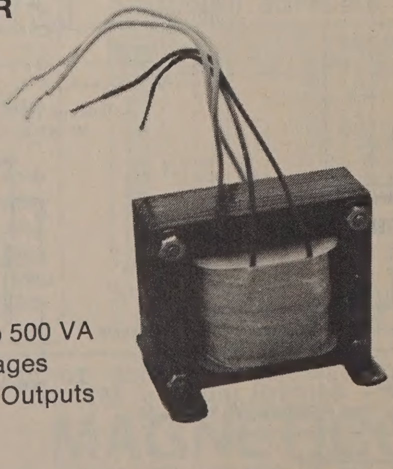
- 50/60 Hz
- Power Ratings to 200 VA
- 115 V and 230 V Primaries
- Terminals and Flexible Leads Available
- Non-Concentric Winding — Lower Capacitance — Better Insulation — 2500 V Hipot, No need for Electro-static Shield
- Also Useful for UL Medical Applications



MINIATURE PLUG-IN POWER TRANSFORMERS PC APPLICATION

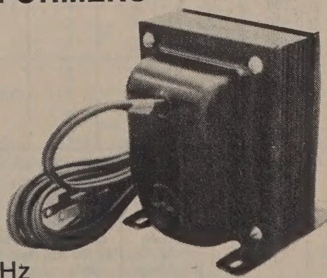
- 50/500 Hz
- Power Ratings up to 24 VA
- Single and Dual Primaries
- Single and Dual Secondaries

RECTIFIER POWER TRANSFORMERS WITH FLEXIBLE LEADS



- 50/500 Hz
- Power Ratings up to 500 VA
- Wide Range of Voltages
- Single and Multiple Outputs

STEP DOWN AUTO TRANSFORMERS



- 50/60 Hz
- 230/115 V
- 100 VA-1000 VA
- Also available with open frame construction

ISOLATION TRANSFORMERS (UL LISTED FOR USE IN MEDICAL AND DENTAL EQUIPMENT)

FEATURES:

★ **CASED UNITS:**

- ▲UL-544 Listed Model IT-1500
- Low Leakage Current.
- Built-In Hospital Grade Plug (1) and Receptacle (2).
- Built-In Circuit Breaker Protection.
- Built-In Output Voltage Meter.
- Portable and High Power.
- Built-In Power Cord.

★ **UNCASED UNITS:**

- ■UL-544 Recognized Model 1275T
- Open Frame Constructed Per MIL-T-27D (Grade 6).
- Low Temperature Rise (Class R).
- Used In The Cased Units.
- Shielded.

★ **APPLICATION:**

- Low Leakage Current 120 VAC, 60 Hz Line Isolation.

CUSTOM DESIGNS TO MEET YOUR NEEDS!

400 Hz TOROIDAL PC POWER TRANSFORMERS (Fig. W)

Ideal for applications requiring minimum size and weight. Feature epoxy molded case and printed circuit pins which can be bent for chassis mounting. Toroidal cores provide greater efficiency and low phase shift. All have 115V primary windings and center .170" clearance hole for #8 screw. MIL Type TF5SX01ZZ.

INDUSTRIAL AND HERMETICALLY SEALED POWER TRANSFORMERS AND CHOKES

For low voltage, high current applications such as filament supplies, silicon rectifiers, etc. Primary 105/115/125 VAC. DC output for resistive or inductive load based on 1V drop per rectifier. Isolation Transformers have electrostatic shielding and CT for use in either FW bridge or FW CT.

♦Full-wave and CT loads may be simultaneously drawn, but for continuous duty, total V.A. output should not be exceeded.
■For positive and negative voltage supply as utilized in op-amp and similar circuitry.

**Based on approximately 1 volt drop per rectifier.
†Frequency depends on load and bias conditions.
▲M8050, M8051, M8073, M8074 are blocking oscillator types.

★Quantity pricing schedule is as follows: 1-9 net, 10-49 less 10%, 50-99 less 16⅔%, 100-249 less 33⅓%. Contact factory for prices over 249.

†+8.5 and ±20 DC output volts are for inputs to +5V and ±15V IC Voltage Regulators.

TRANSFORMERS SUPPLIED WITH ENGINEERING BULLETIN PROVIDING SCHEMATICS AND SUGGESTED COMPONENTS. Latest 3-terminal IC regulators permit manufacture of power supplies, using only 5 components, with typical regulation of 0.1% load and line, and 1 mV ripple.

TELEPHONE COUPLING TRANSFORMERS

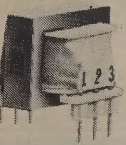

FIG. U

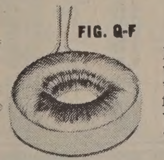

FIG. Q-F

DESIGNED TO MEET FCC PART 68

For interconnect of voice/data modem terminals to telephone lines. Permits optimum use of voice-grade telephone lines for broadband computer modems over a wide dynamic signal range with minimum distortion. PC construction.

- **Frequency Response:** 300-3500 Hz ±0.5 dB.
- **Level:** −45 dBm to +7 dBm.
- **Return Loss:** 26 dB min.
- **Impedance Matching:** ±10% over entire frequency range.
- **Distortion:** 0.5% max.
- **Long Balance:** Per FCC 68.310.

MINIATURE TRANSISTOR AND AUDIO TRANSFORMERS — M AND MT SERIES

M-M (Fig. O): Molded, for P.C. use. Cast epoxy resin provides highest resistance to temperature extremes. MIL Types TF5RX—ZZ. Max. Size, 1$\frac{5}{32}$" x ⅞" x ⅞". Wt., 1¾ oz. **M-AG (Fig. Q):** Enclosed in modified MIL-T-27 AG case with compression sealed ceramic terminals. MIL Type TF4RX—YY. Max. Size, 1" x 1" x 1⅜". Wt., 2⅜ oz. **M-H (Fig. R):** Hermetically sealed with high compression glass terminals, gray enamel finish. Available on special order with .120" holes. MIL Type TF4RX—YY. Size, $\frac{15}{16}$" dia. x 1$\frac{7}{16}$" max. Wt., 1¼ oz. **M-A (Fig. S):** Aluminum case with 2-56 screws. MIL Type TF3RX—YY. Size, .875" dia. x 1$\frac{3}{16}$". Wt., 1.25 oz. **M-FB (Fig. L):** Open frame with channel. Available with plug-in tab channel or without channel on special order. MIL Type TF6RX—ZZ. Size, 1$\frac{3}{64}$" x 1$\frac{3}{16}$" x $\frac{27}{32}$" max., plus tabs. Wt., 1.13 oz. **M-P (Fig. T):** Octal plug-in type in sealed plastic housing. MIL Type TF6RX—ZZ. Size, 1$\frac{3}{32}$" dia. x 1$\frac{15}{32}$". Wt., 2 oz. **M90 Shield (Fig. E):** 25 db magnetic shield for Type M-A. Two clearance holes on $\frac{11}{16}$" centers. **M-PC (Fig. U):** Open frame PC with terminals molded into bobbin to maintain accurate dimensions for PC board. MIL Type TF6RX—ZZ. Size, ⅞" x 1$\frac{1}{32}$" x 1"; terminals $\frac{3}{16}$" below bobbin. Wt., 1.2 oz. See PC4400 Series for dimensions.

Fig. -SP PRINTED CIRCUIT MOUNTED
Double Mu-metal Shielded. ¾″ D x 1⅙″ H. 7-.040 pins ⅛″ H.

MICROTRAN
S101-S

Fig. -S SINGLE THREADED STUD MOUNTING
Double Mu-metal shielding. 3″ color coded leads. ⅝″ D x 1³⁄₁₆″ H. ⁵⁄₁₆″ D stud.

Wide bandwidth — Broad frequency response — Hi efficiency. Extremely low distortion. Power level range up to +0 dBm. Negligible hum pick-up due to nested Mu-metal shields and unique gapless core construction. Ease of mounting and orientation for minimum hum pick-up. Polarizing voltage connection for condenser microphones. Subminiature size permits close spacing to adjacent circuitry. Low microphonics.

PICO MINIATURE TRANSFORMERS — PM SERIES

PM-M (Fig. A): Epoxy molded finish; gold plated leads, 0.020″ x ¾″. Frequency Response, ±2 db, 300 Hz to 100 kHz (PM3 and PM5, to 45 kHz). Power level given for 15% max. distortion, except PM35, 20% and PM37, 25%. Size, .410″ x .465″ x .310″ max. Wt., 0.1 oz. MIL Type TF5RZ—ZZ. **PM-F (Fig. B).** Open frame, resin impregnated, 4″ #30 plastic leads. Size, .250″ x .375″ x .406″ max. Wt., .05 oz. MIL Type TF6RX—ZZ.

DECI-MINIATURE PC AUDIO TRANSFORMERS AND CHOKES

Primary and secondary windings may be interchanged to obtain varied matching requirements such as input, interstage, output and isolation. Designed for printed circuits. Frequency Response, ±2 db, 200-15,000 Hz. Size, ¹³⁄₁₆″W x ¹⁹⁄₃₂″D x ¾″H. Open frame — plug-in design. Fig. U. See PC4300 Series for dimensions.

NTC

CONSTANT VOLTAGE TRANSFORMERS

STATIC-MAGNETIC VOLTAGE REGULATING TRANSFORMERS

NORMAL HARMONIC TYPES

- Output capacity from 0.5 to 3,000 VA
- Instantaneous, continuous voltage regulation
- No tubes or manual adjustments
- Ratings made to order at low cost
- Compact, single-unit design
- Low-cost open types for component applications
- Heavy-duty, enclosed types for accessory uses
- Single or multiple secondaries

NTC constant voltage transformers maintain output voltages within one percent with input voltage fluctuations up to 15 percent. Regulation is instantaneous, continuous and completely automatic. Operating on principles of ferroresonance, the transformers have no tubes, moving parts or separate saturable reactors.

Most important, the design of NTC constant voltage transformers enables their outputs to be made exactly to your specifications — and at decidedly low cost even in small quantities. With only a few basic lamination configurations and windings, virtually any output voltage/current combination can be obtained. *Since the transformers are designed to your specific requirements they often eliminate costly circuitry and expensive components.*

POWER SUPPLIES, too . . . Neshaminy's engineering skills are at your service for the design and quantity production of complete, regulated power supplies in any capacity and rating. Let us discuss your next requirement.

Model	Regulated Output Voltage	Input Voltage Range (60 cycles)	VA Output	Nominal Mounting Centers	Approx. Overall Dimensions, Inches A B C	Approx. Net Wt., lbs.	Style

TYPICAL STANDARD MODELS

1% output regulation. Closer regulation to order. Output contains approx 14% total rms harmonic content. SPECIAL MODELS can be made quickly to exact requirements in any step-up or step-down ratio of voltage to current within the desired VA rating and with single or multiple secondaries, with or without centertaps. CV models also available for 50 cycles, and MCV models for 50 or 400 cycles.

NOTES

1. Cord/Receptacle kits, similar to that shown in illustration are available on all "C" style transformers of 118 VAC output rating.
2. Specify required input voltage range on CV transformers from 250 to 1000 VA.
3. To specify output voltage required (6.3 or 118 VAC) add voltage to model number (Example — 15 VA cased transformer with 118 VAC output would be model #CV15-118).
4. "C" style units have built-in capacitors. Styles "E" and "O" have external capacitors.

Send us your requirements for a prompt quotation.

NESHAMINY TRANSFORMER COMPANY

Furlong, Pa. 18925
(215) 794-7411

NTC is a division of the Neshaminy Electronic Corporation

Prices and specifications subject to change without notice

WIDEBAND TRANSFORMERS

North Hills

UNBALANCED TO BALANCED TRANSFORMERS

Balanced secondaries center-tapped and dc-isolated from primaries. Mid-band insertion loss less than 0.5 dB. Bandwidth defined at low frequency end by 3 dB drop from mid-band response, at high end by max. VSWR of 1.25.

MANY VARIATIONS AND CUSTOM DESIGNS TO 1 GHz ALSO AVAILABLE

ISOLATION TRANSFORMERS UNBALANCED TO UNBALANCED

Ground Isolation in 50 and 75Ω Coaxial Systems

CC, PA

CD

- Flat frequency, linear phase response.
- Insulated BNC connectors.
- 140 dB isolation at power frequencies.

Type No.	Impedance Unb/Unb(Ω)	Bandwidth
0005-CC	50:50	1 kHz - 25 MHz
1103-CC	75:75	1 kHz - 25 MHz
0112-CC	50:75	1 kHz - 25 MHz
0017-CC	50:50	10 Hz - 5 MHz
1117-CC	75:75	10 Hz - 5 MHz
1116-PA	75:75	20 Hz - 20 MHz

10 KV Isolation for Public Utility Data Transmission

6 kHz to 2.5 MHz bandwidths.

1115-CD: 75Ω coax to 75Ω coax.
1313-CD: 75Ω coax to 124Ω balanced line.

HUMBUCKING CHOKES

75:75 ohms, Insulated BNC connectors

Type	Bandwidth	Rejection at 60 Hz
1119-PA	DC to 15 MHz	50 dB min.
1120-CC	DC to 20 MHz	40 dB min.

ULTRA-WIDE COAXIAL MATCHING TRANSFORMERS

Unbalanced to unbalanced transformers. BNC input and output connectors. Low VSWR. 0.1-300 MHz. Available in JA case only.

0003-JA	50:50	Phase Reversing
1106-JA	75:75	Phase Reversing
0102-JA	50:75	Impedance Adapters
0201-JA	50:90	Impedance Adapters
1203-JA	75:90	Impedance Adapters

SUBMINIATURE SERIES

NA molded case. 0.1-300 MHz bandwidth.

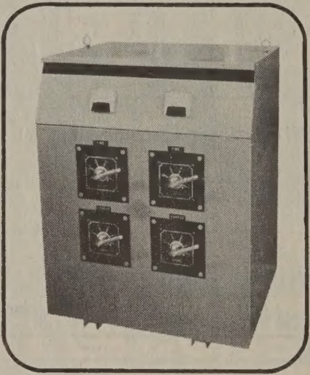
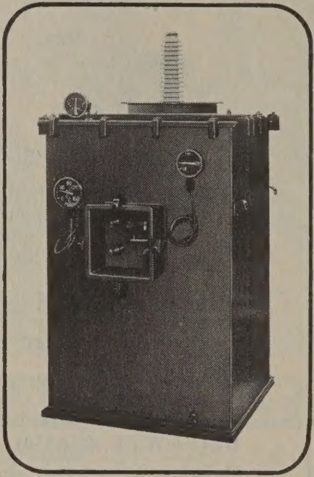
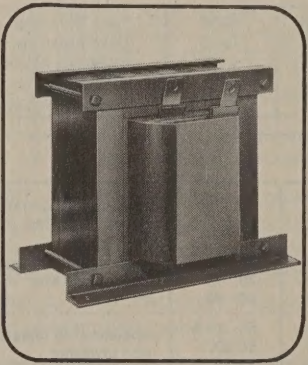
NWL ...the source for industrial and electronic transformers



Heating transformers for resistance and induction furnaces

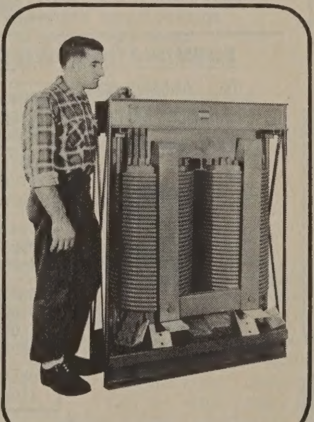


Oil filled high voltage transformers

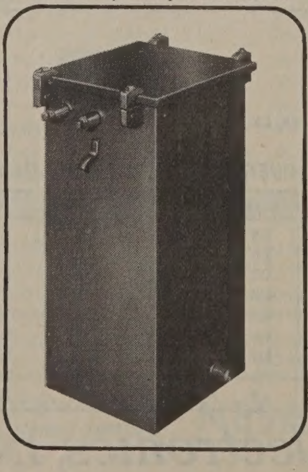


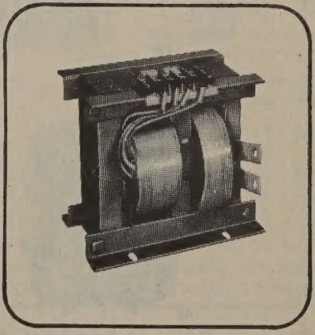
Current limiting reactors

High power and high current water cooled transformers



Oil filled specialty transformers





High impedance transformers

Since 1929, NWL has consistently been in the forefront of transformer design and manufacture.

High voltage, high frequency and high current transformers are particular strengths at NWL — whether for prototype, standard or special applications.

There's another reason you should look to NWL for solutions to your specific transformer problems. We've never hesitated to tackle the tough design problems head-on. In fact, NWL's technological superiority is a recognized fact in the precipitator, furnace, desalting, nuclear, and other fields requiring high technology.

NWL ...the source for:

TRANSFORMERS ● Furnace ● Filament ● Heating ● Lighting ● SCR Controls ● Plate ● High Frequency ● Instrument ● Phase Changing ● Welding ● High Voltage ● Testing ● High Reactance ● Output

PLUS ● Saturable Core Reactors ● Chokes ● Packaged Controls ● AC Reactors ● Air Core Reactors

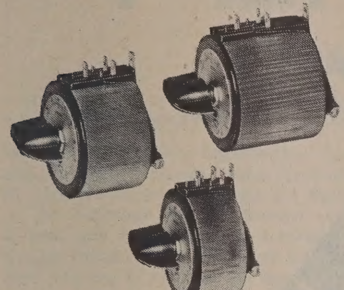
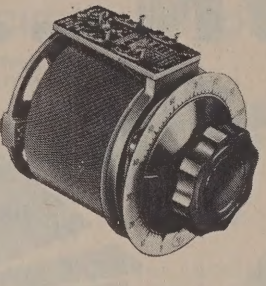
Call us for quote or specs

NWL also designs and manufactures custom built AC/DC power supplies, laboratory and industrial types. See our ad under DC POWER SOURCES.

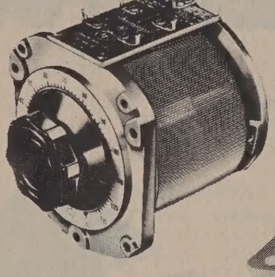
OHMITE® variable transformers



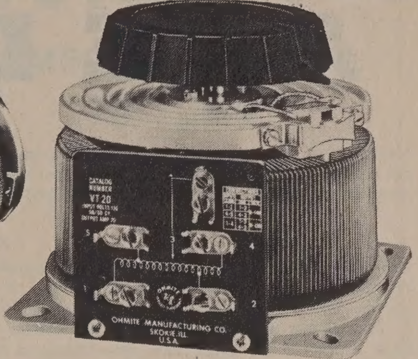
VT1, VT02, VT3 SERIES, SINGLE UNCASED
The VT1, rated 1 ampere, is the smallest commercial variable transformer available.



VT5 SERIES, SINGLE, UNCASED



VT10 SERIES, SINGLE, UNCASED



VT25 SERIES, UNCASED

Unique for the design innovations they incorporate, Ohmite "OHMITRAN" v.t.® variable transformers include exclusive field-proven features. They offer long, low maintenance operation with excellent regulation at any voltage setting within the rated load plus an output free of waveform distortion. (Ratings shown at right are for use in free air.) Enclosed units, units with meters, 2 & 3 in tandem and 3 phase models are available in most models in the basic series.

FEATURES

- Positive current transfer — specially designed brushes are connected through high conductivity contact arms to large slip ring which contacts a wide area of the collector ring.
- Adjustable shaft extends from either side.
- Mounts interchangeable with virtually all other comparable types.
- Direct reading, two scale dial — calibrated for overvoltage connection on front, line voltage connection on reverse side.
- Overvoltage options available.
- UL and CSA listings available in certain models.
- Easily replaceable brushes
- Clockwise or counter-clockwise operation on Series VT5, VT10 and VT25

ENCLOSURES

Type	Available for:	Features
B	VT25	EXPOSES TRANSFORMER'S TERMINAL RANGE & MOUNTING BASE

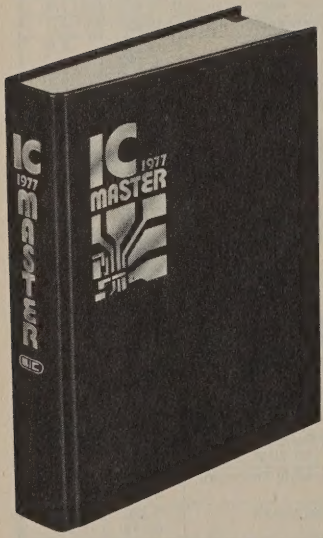
WHEN THE CHIPS ARE DOWN...

THE NEW 1977 IC MASTER PAYS OFF!



The new IC MASTER is the ultimate IC source book.

It lists virtually every IC device manufactured in the United States.

The IC MASTER is the easy, sensible means of narrowing down your IC choices quickly, accurately and systematically. All information is cross-referenced and indexed for rapid problem solving and device selection. And, additionally, the MASTER is updated three times yearly by accumulative supplements.

THE FORMAT OUTLINED:

- **FIVE MASTER SELECTION GUIDES** — 84 companies' IC's organized by type, function, key parameters
- **OVER 1,000 PAGES OF TECHNICAL INFORMATION** — Provided directly by manufacturers covering 17,000 IC's
- **ALTERNATE SOURCE DIRECTORY** — The only industry-wide, pin-for-pin version available
- **MILITARY PARTS INDEX AND CROSS REFERENCE CHART** — Identifies all IC's with JAN qualification
- **MILITARY DEVICE TESTING TABLE** — List companies that screen to Mil. Std. 883
- **MILITARY PARTS INDEX** — The first functional guide to JAN qualified parts
- **PART NUMBER INDEX** — Parts from 84 manufacturers, in numerical sequence
- **APPLICATION NOTE DIRECTORY** — Digest of currently active application note material
- **PRODUCT INDEX** — Provides alphanumeric listing of 84 manufacturers' lines
- **PART NUMBER GUIDE** — Instantly decodes each company's part numbering system
- **MANUFACTURERS AND DISTRIBUTORS DIRECTORY**

PRECISION TOROIDAL TRANSFORMERS

- **INPUT SCOTT T**
- **REFERENCE ISOLATION**
- **OUTPUT SCOTT T**
- **DIGITALLY TAPPED**
- **COMBINATION**
- **PRECISION RATIO**
- **RESOLVER ISOLATION**
- **CUSTOM DESIGNS**

The Electronic Products Department of the Perkin-Elmer Corporation is in a unique position to provide Custom Precision Signal Transformers as a result of 20 years of experience designing and manufacturing very special transformers for the Vernistat® a.c. potentiometer and allied products. **High Performance in small size has always been a successful objective.** Our State of The Art Winding Equipment and Techniques enable close control of turns and taps for close matching of windings and repeatibility of product.

Perkin-Elmer can provide Custom Signal Transformers with high accuracies over the full MIL temperature range. For example, exponential function units with 80 taps to an accuracy of ±0.003% can be provided. SCOTT T Transformers have been built to an accuracy of 5 seconds of arc with a null of 0.1 millivolt. The transformers are fully encapsulated toroidal units and are available with contact pins for PC board mounting. They are manufactured in accordance with MIL-T-27C Grade 5. High input impedance and low output impedance can be matched to specifications. Operating frequency can also be per specifications.

SCOTT T TRANSFORMERS

The SCOTT T input transformers converts 3 wire synchro inputs to 4 wire resolver outputs (sin θ and cos θ) with high transformation accuracy and minimum quadrature. SCOTT T Transformers for converting 4 wire resolver inputs to 3 wire synchro outputs can also be supplied. Our output SCOTT T Transformers maintain high accuracies even under heavy load conditions. These units are useful in solid state synchro to digital and digital to synchro converter applications and are particularly applicable in multiplexed conversion systems.

Dimensions are in inches (MM)

SPECIFICATIONS

- MIL-T-27 . . . .
  All **MILITARY** Units Are Designed to MIL-T-27 and Are Hermetically Sealed in a Metal Case
  Transformers are Type TF5R21ZZ.
  Inductors are TF5R20ZZ.
- FREQUENCY RESPONSE:. . . . .
  ±3 db, 300 Hz - 100 KHz At 1.0 Milliwatt
- MAXIMUM DISTORTION: . . . . .
  5% With Rated Power Level at 1 KHz
- DIELECTRIC STRENGTH: . . . .
  All Units Tested at 200 V RMS
- INSULATION RESISTANCE:. . . .
  Greater than 10,000 Megohms at 300 V DC
- WEIGHT: . . . .
  1/10 Ounce
- OPERATING TEMPERATURE: . .
  -55° c to 105° c (All Units Can Be Supplied to Class S Requirements 130° c maximum)
  Commercial Units have maximum operating temperature of +85°C
- TERMINALS: . . . .
  Solid .016 Diameter Conductor.
  Conductor is Gold Plated, Nickel-Iron Core Wire (Dumet) in Accordance with MIL-STD-1276 Type D
- THERMAL SHOCK:. . . . . . .
  25 Cycles, Method 107C, MIL-STD-202D, Test Condition A-1

PICO's ultra-miniature transformers

A SERIES
Military Insulated Leads

D SERIES Military Plug-In

X SERIES
Commercial Insulated Leads

FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED
- VARIATION OF STANDARD DESIGNS AVAILABLE
- PRIMARY AND SECONDARY WINDINGS CAN BE USED EITHER AS INPUT OR OUTPUT
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS

INDUCTORS

TWO VALUES OF INDUCTANCE, EACH AT A PARTICULAR VALUE OF DC CURRENT, ARE LISTED FOR EACH INDUCTOR. ALL INDUCTORS WITH SPLIT WINDINGS HAVE MEASUREMENTS LISTED FOR BOTH SERIES CONNECTIONS AND PARALLEL CONNECTIONS.

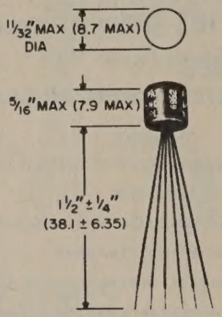
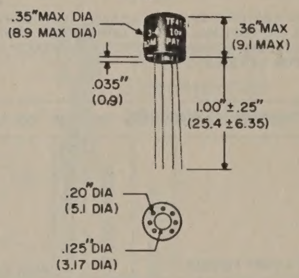
PICO's ultra-miniature transformers

B SERIES
Insulated Leads



C SERIES
Plug-In



Dimensions are in inches (MM)

SPECIFICATIONS

- MIL-T-27: . . . .
  All Units Are Designed to MIL-T-27 and Are Hermetically Sealed in a Metal Case
  Transformers are Type TF5R21ZZ.
  Inductors are TF5R20ZZ.
- FREQUENCY RESPONSE: . .
  ±3 db, 400 Hz - 100 KHz At 1.0 Milliwatt
- MAXIMUM DISTORTION: . .
  5% With Rated Power Level at 1 KHz
- DIELECTRIC STRENGTH:. .
  All Units Tested at 200 V RMS
- INSULATION RESISTANCE .
  Greater than 10,000 Megohms at 300 V DC
- WEIGHT: . . . .
  1/15 Ounce
- OPERATING TEMPERATURE:
  -55° c to 105° c (All Units Can Be Supplied to Class S Requirements 130° c maximum)
- TERMINALS: . . . .
  Solid .016 Diameter Conductor. Conductor is Gold Plated, Nickel-Iron Core Wire (Dumet) in Accordance with MIL-STD-1276 Type D
- THERMAL SHOCK: . . . . . .
  25 Cycles, Method 107C, MIL-STD-202D, Test Condition A-1

PICO's ultra-miniature transformers

B SERIES
Insulated Leads

C SERIES
Plug-In

FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED
- VARIATION OF STANDARD DESIGNS AVAILABLE
- PRIMARY AND SECONDARY WINDINGS CAN BE USED EITHER AS INPUT OR OUTPUT
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS

(All PICO Products are patented)

Send for new 68 page Pico Catalog

INDUCTORS

TWO VALUES OF INDUCTANCE, EACH AT A PARTICULAR VALUE OF DC CURRENT, ARE LISTED FOR EACH INDUCTOR. ALL INDUCTORS WITH SPLIT WINDINGS HAVE MEASUREMENTS LISTED FOR BOTH SERIES CONNECTIONS AND PARALLEL CONNECTIONS.

SINGLE WINDINGS

PICO's ultra-miniature AUDIO: transformers

1/4"x1/4"

FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- 5 MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED
- VARIATION OF STANDARD DESIGNS AVAILABLE
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.

SPECIFICATIONS

- MIL-T-27:
  All Units Are Designed to MIL-T-27 and Are Hermetically Sealed in a Metal Case
  Transformers are Type TF5R21ZZ.
  Inductors are TF5R20ZZ.
- FREQUENCY RESPONSE:
  ±3 db, 400 Hz - 250 KHz At 1.0 milliwatt
- MAXIMUM DISTORTION:
  5% With Rated Power Level at 1 KHz
- DIELECTRIC STRENGTH:
  All Units Tested at 200 V RMS
- INSULATION RESISTANCE:
  Greater than 10,000 Megohms at 300 V DC
- WEIGHT:
  1.1 GRAMS
- OPERATING TEMPERATURE:
  -55° c to 105° c (All Units Can Be Supplied to Class S Requirements 130° c maximum)
- TERMINALS:
  Solid .012 Diameter Conductor. Conductor is Gold Plated, Nickel-Iron Core Wire (Dumet) in Accordance with MIL-STD-1276 Type D.
- THERMAL SHOCK:
  25 Cycles, Method 107C, MIL-STD-202D, Test Condition A-1

PICO's ultra-miniature PULSE transformers

FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- BUILT TO MIL-T-21038
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED
- VARIATION OF STANDARD DESIGNS AVAILABLE
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.

SPECIFICATIONS

- MIL-T-21038:
  All Units Are Designed to MIL-T-21038 and Are Hermetically Sealed in a Metal Case
- DIELECTRIC STRENGTH:
  All Units Tested at 200 V RMS
- INSULATION RESISTANCE:
  Greater than 10,000 Megohms at 300 V DC
- WEIGHT:
  1.1 GRAMS
- OPERATING TEMPERATURE:
  -55° c to 105° c (All Units Can Be Supplied to Class S Requirements 130° c maximum)
- TERMINALS:
  Solid .012 Diameter Conductor. Conductor is Gold Plated, Nickel-Iron Core Wire (Dumet) in Accordance with MIL-STD-1276 Type D.
- THERMAL SHOCK:
  25 Cycles, Method 107C, MIL-STD-202D, Test Condition A-1

Delivery: Stock to one week

* Discount Prices: 1-9 Net; 10-24 less 10%; 25-49 less 16%; 50-99 less 23%; 100-499 less 30%

*INCLUDES ELECTROSTATIC SHIELD

Ordering Instructions: No minimum. Net 30 days F.O.B. Mt. Vernon, New York. P.O. Box 1206

SPECIFICATIONS

- **MIL-T-27** . . . .
All Units are Designed to MIL-T-27 and are Hermetically Sealed in a Metal Case. Audio Transformers are Type TF5R21ZZ.
- **FREQUENCY RESPONSE:** . . . .
±3db, 300 Hz - 75 KHz At 1.0 Milliwatt
- **MAXIMUM DISTORTION:** . . . . .
5% With Rated Power Level at 1 KHz, 400 Hz and 300 Hz
- **DIELECTRIC STRENGTH:** . . . .
All Units Tested at 200 V RMS
- **INSULATION RESISTANCE:** . . .
Greater than 10.000 Megohms at 300 V DC
- **WEIGHT:** . . . .
5 Grams
- **OPERATING TEMPERATURE:** . .
-55°c to 105°c (All Units Can Be Supplied to Class S Requirements 130°c maximum)
- **TERMINALS:** . . . .
Solid .016 Diameter Conductor. Conductor is Gold Plated, Nickel-Iron Core Wire (Dumet) in Accordance with MIL-STD-1276 Type D
- **THERMAL SHOCK:** . . . .
25 Cycles, Method 107C, MIL-STD-202D, Test Condition A-1

(All PICO Products are patented)

PICO's ultra-miniature transformers

L SERIES
Plug-In

P SERIES
Insulated Leads

FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED
- VARIATION OF STANDARD DESIGNS AVAILABLE
- PRIMARY AND SECONDARY WINDINGS CAN BE USED EITHER AS INPUT OR OUTPUT
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.
- ALL POSSIBLE LEAD SPACINGS AVAILABLE - CONTACT FACTORY FOR PIN LAYOUT SAME AS DUAL IN-LINE INTEGRATED CIRCUITS ("DIP" PACKAGE).

(All PICO Products are patented)

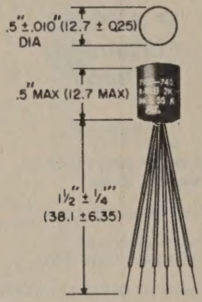
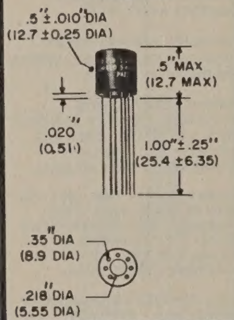
PICO's ultra-miniature transformers

K SERIES
Insulated Leads



N SERIES
Plug-In



Dimensions are in inches (MM)

SPECIFICATIONS

- **MIL-T-27** . . . .
All Units Are Designed to MIL-T-27 and Are Hermetically Sealed in a Metal Case, Audio Transformers Are Type TF5R21ZZ.
- **FREQUENCY RESPONSE:** . . .
±3 db, 150 Hz - 75 KHz at 1.0 Milliwatt (When Primary Impedance ≧ 50K Ohms, ±3 db 150 Hz to 20 KHz)
- **MAXIMUM DISTORTION:** . . . .
5% With Rated Power Level at 1 KHz, 400 Hz and 150 Hz
- **DIELECTRIC STRENGTH:** . . . .
All Units Tested at 200 V RMS
- **INSULATION RESISTANCE:** . . .
Greater Than 10,000 Megohms at 300 V DC
- **WEIGHT:** . . . .
7.5 Grams
- **OPERATING TEMPERATURE:** . .
-55°c to 105°c (All Units Can Be Supplied to Class S Requirements 130°c maximum)
- **TERMINALS:** . . . .
Solid .016 Diameter Conductor Conductor is Gold Plated, Nickel-Iron Core Wire (Dumet) in Accordance with MIL-STD-1276 Type D
- **THERMAL SHOCK:** . . . .
25 Cycles, Method 107C, MIL-STD-202D, Test Condition A-1

(All PICO Products are patented)

PICO-N-SHIELD MU-METAL SHIELD .53" d X .56" h (13.46 mm d X 14.22 mm h)															1.20

PICO's ultra-miniature transformers

K SERIES
Insulated Leads

N SERIES
Plug-In

FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED
- VARIATION OF STANDARD DESIGNS AVAILABLE
- PRIMARY AND SECONDARY WINDINGS CAN BE USED EITHER AS INPUT OR OUTPUT
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.

(All PICO Products are patented)

Send for new 68 page Pico Catalog

* INCLUDES ELECTROSTATIC SHIELD

*Discount Prices: 1-9 Net; 10-24 less 10%; 25-49 less 16%; 50-99 less 23%; 100-499 less 30%

FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED
- VARIATION OF STANDARD DESIGNS AVAILABLE
- PRIMARY AND SECONDARY WINDINGS CAN BE USED EITHER AS INPUT OR OUTPUT
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.

SPECIFICATIONS

- MIL-T-27 (MILITARY DESIGNATION): . . . . . All Units Are Designed to MIL-T-27 and Are Hermetically Sealed in a Metal Case. Power Transformers TF5S03ZZ, Inductors TF5R20ZZ
- DIELECTRIC STRENGTH: . . . . . . All Units Tested at 200 V RMS
- INSULATION RESISTANCE: . . . . . Greater than 10,000 Megohms at 300 V DC
- WEIGHT: . . . . 5 Grams
- OPERATING TEMPERATURE: . . . . -55°c to 105°c For Class R, 130°c For Class S.
- TERMINALS: . . . . Solid .016 Diameter Conductor Conductor is Gold Plated, Nickel-Iron Core Wire (Dumet) in Accordance with MIL-STD-1276 Type D
- THERMAL SHOCK: . . . . 25 Cycles, Method 107C, MIL-STD-202D, Test Condition A-1

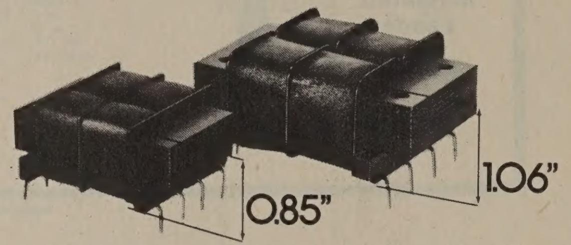
flathead® plug in power transformers

FOR PRINTED CIRCUIT APPLICATIONS
2 SIZES — 6VA — 0.850 inches high
12VA — 1.065 inches high



LOW PROFILE: Allows 1 inch card spacing for 6va units or 1¼ inch card spacing for 12va units.

DUAL PRIMARIES: 115/230v, 50/60 Hz.

NON-CONCENTRIC WINDING: Where secondary is wound alongside primary rather than directly over it. This added isolation reduces inter-winding capacitance and **eliminates the need for an electro-static shield.**

1500V. RMS HIPOT: Is standard because of the advantage of non-concentric windings.

HUM-BUCKING CONSTRUCTION: (Semi-toroidal) results in reduced radiated magnetic field and balanced windings.

The LP line of transformers is ideal for low height, critical pc board power applications in semi-conductor control and instrumentation. They are used extensively in single or dual output dc supplies and isolated control circuit and reference supplies.

* Available from Signal: Part No. ST-MS (Screw) & Part No. ST-MN (Nut).

"Split-Tran" transformers combine the best features of our "2-4-1" Series and Signal's pioneering line of pc board miniature transformers.

The use of a "split bobbin" allows the primaries and secondaries to be wound non-concentrically, i.e., side by side rather than one over the other. This results in cost savings and superior performance, namely:

- High isolation — 2500V hipot is standard.
- Low capacitive coupling — no electro-static shield necessary.
- Less manufacturing time — no cross-overs of primary and secondary leads.
- PC pins — allow direct insertion in PC boards.

Each transformer is available with single 115V or dual 115/230V primaries. In addition, secondaries are split so that they can be series or parallel connected.

Special variations will be quoted and shipped promptly.

for printed circuits applications

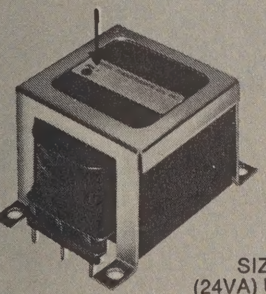
Signal has the most complete and diversified selection of miniature plug-in power transformers. **All items are stocked in depth for immediate off-the-shelf delivery.**

Primary ratings of 115V (Style PC - 6 Pin) or Dual 115/230V (Style DPC - 8 Pin) are standard for the entire line. 1000V. Hipot is standard.

Size 1.0 is used extensively where height is a limiting factor since its height of 0.83 inches allows 1 inch spacing of PC boards. Size 24 is unusual since 24 watt PC transformers are not readily available, especially with a height of 1⅜ inches.

The RMS current ratings are based on a load regulation of 15-20% and not on temperature rise (except for the largest item, size 24). Therefore, these ratings may be exceeded without overheating, if the additional drop in full load voltage is acceptable. There is, of course, a limit and it would be best to check with our engineering department on specific units.

BLACK DOT ON LABEL INDICATES POSITION OF TERMINAL #1.



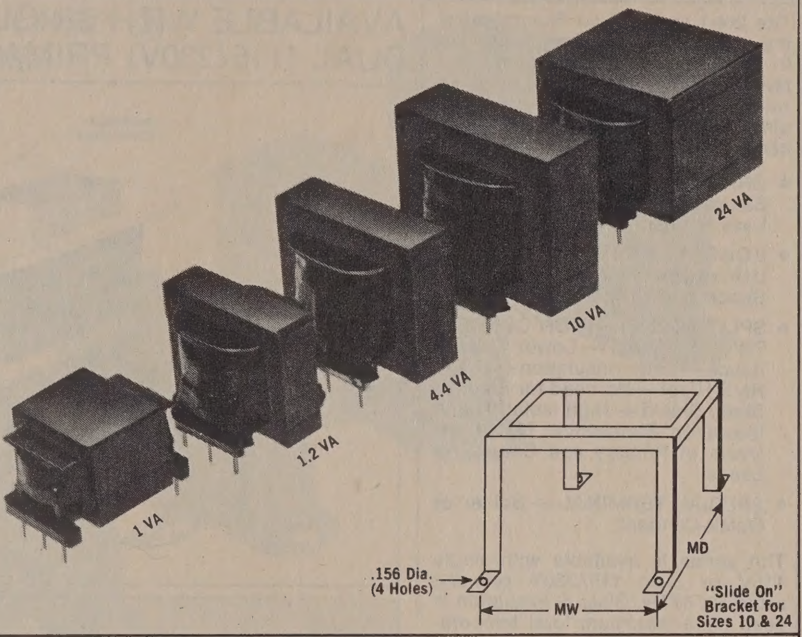
SIZE 24 (24VA) UNIT WITH 24-BR SLIDE-ON MOUNTING BRACKET

METHOD OF DETERMINING SECONDARY CURRENT RATINGS

The secondary currents shown in the tables are RMS ratings. Depending upon rectifier circuit configurations, the RMS secondary current is different than the DC output current. This is indicated in the chart below:

Rectifier Type	Filter Type	RMS Secondary Current Is
Full Wave Center-Tap	Choke Input	= 0.7 x DC Amps
Full Wave Center-Tap	Capacitor Input	= 1 to 1.2 x DC Amps
Full Wave Bridge	Choke Input	= DC Amps
Full Wave Bridge	Capacitor Input	= 1.6 to 1.8 x DC Amps

For example, in a F.W. Bridge circuit with a capacitive filter, if the load is 1 Amp DC, the RMS Secondary current is 1.6 to 1.8 Amp RMS.



DIMENSIONS

Size (VA)	L	W	H	A-6 (6 Pin)	A-8 (8 Pin)	B	WT. (oz.)	OPTIONAL BRACKET* No.	MW	MD
1.0	1	1⅜	0.83	0.250	0.200	1.200	2.5	—	—	—
1.2	1⅜	1⅛	1³⁄₁₆	0.312	0.200	1.000	3	—	—	—
4.4	1⅝	1¼	1⅜	0.400	0.250	1.100	5	—	—	—
10	1⅞	1⁷⁄₁₆	1⅝	0.400	0.250	1.300	9	10-BR	1⁴¹⁄₆₄	1⅛
24	1⅝	2¼	1⅜	0.400	0.250	2.100	12	24-BR	1⅜	2

* An optional "Slide On" Mounting Bracket is available for sizes 10 and 24. The brackets do not use up any extra "Floor Space" but add 1⁄32" to the height of the transformer.

cut size and weight with "2-4-1"

The 2-4-1 series is an illustration of the use of creative design applied to small power transformers. The result is a line where, for a given va rating, size and weight are reduced almost 50%. Hence the name "241" series.

- GRAIN ORIENTED CORE — High Saturation Density — Lower Core Loss — Less Steel and Copper.
- BOBBIN WOUND — Maximum Utilization of Winding Area — Space and Size Reduced.
- SPLIT BOBBIN — NON-CONCENTRIC WINDING — Lower Capacitance — Better Insulation — 2500V RMS Hipot — No need for Electro-Static Shield — High Isolation and Insulation Resistance. No Cross-Overs of Primary and Secondary Leads.
- SPECIAL TERMINAL — Solder or Quick-Connect.

The series is available with single 115V or dual 115/230V primary, rated 50/60 Hz. Class S insulation is used for a maximum total temperature rating of 125°C continuous.

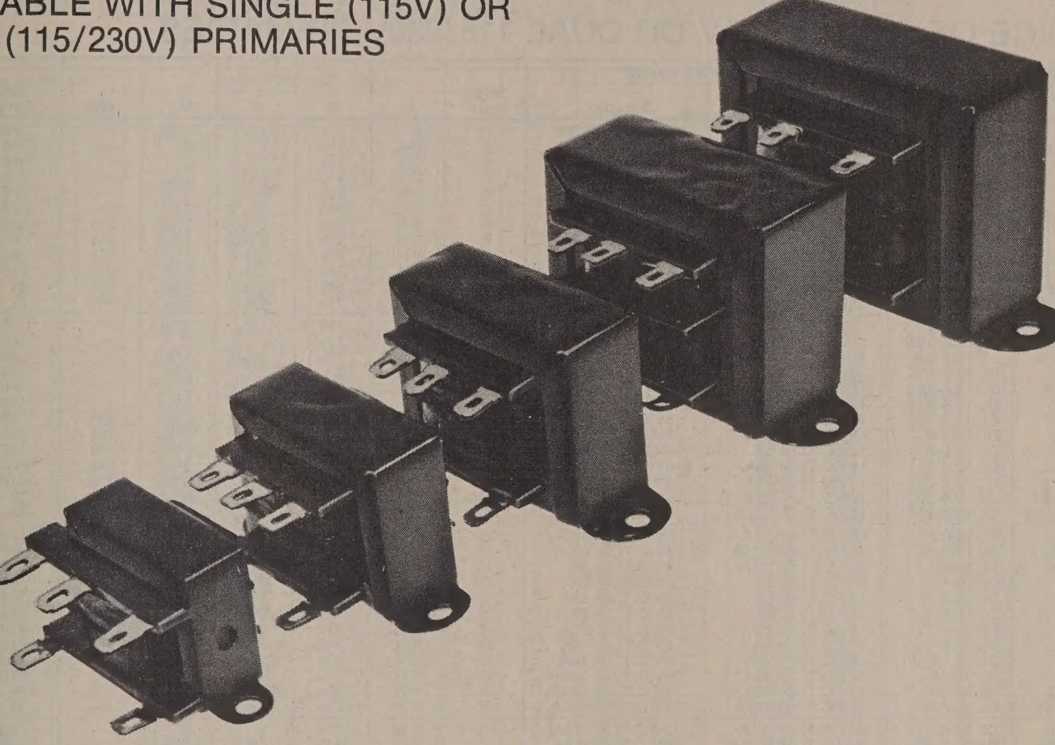
series of small power transformers

AVAILABLE WITH SINGLE (115V) OR DUAL (115/230V) PRIMARIES



METHOD OF DETERMINING
SECONDARY CURRENT RATINGS

The secondary currents shown in the tables are RMS ratings. Depending upon rectifier circuit configurations, the RMS secondary current is different than the DC output current. This is indicated in the chart below:

Rectifier Type	Filter Type	RMS Secondary Current Is
Full Wave Center-Tap	Choke Input	= 0.7 x DC Amps
Full Wave Center-Tap	Capacitor Input	= 1 to 1.2 x DC Amps
Full Wave Bridge	Choke Input	= DC Amps
Full Wave Bridge	Capacitor Input	= 1.6 to 1.8 x DC Amps

For example, in a F. W. Bridge circuit with a capacitive filter, if the load is 1 Amp DC, the RMS Secondary current is 1.6 to 1.8 Amp RMS.

CUSTOM VARIATIONS

Signal is equipped to quite on Custom Variations of "241" types. The secondary combinations are restricted by the number of secondary terminals available, as follows:

Size	Maximum Number of Secondary Terminals	VA Rating
3	3	2.4
4	4	6
5	4	12
6	5	30
7	3	56
8	5	100

We answer requests promptly and can deliver prototypes in one to three weeks. Production lead times can be scheduled with very reasonable lead times.

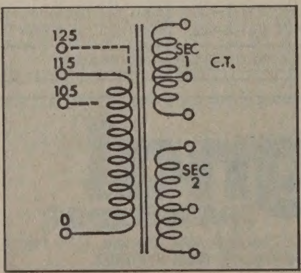
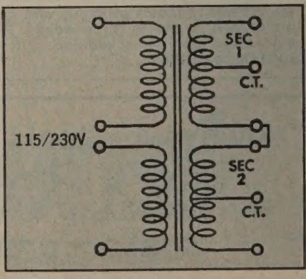
△Available with dual primary only. Therefore, prefix "DL" is not required.
‡ Nominal 115V primary has added taps, I.E., 105/115/125V, Dual (DL) version is 115/230V only.



All transformers are designed conservatively for a max of 45°C rise above ambient and are rated for 50/60 Hz. Only prime raw materials are used. Units are thoroughly impregnated and baked with Signal's own high gloss black baking varnish. The transformers and chokes are rugged in construction, well insulated, and have a consistently uniform appearance. All ratings are at full load current continuous operation. Hipot rating of 1500V RMS is standard.

Electrical ratings have been chosen to cover a wide range of applications. All transformers have two center-tapped secondary windings, which may be series or parallel connected as indicated in rating chart.



rectifier power transformers

IDEAL FOR USE IN SINGLE OR DUAL DC POWER SUPPLIES

△Available with dual primary only. Therefore, prefix "DL" is not required.
‡ Nominal 115V primary has added taps, I.E., 105/115/125V, Dual (DL) version is 115/230V only.

*The secondary currents shown in the tables are RMS ratings. Depending upon rectifier circuit configurations, the RMS secondary current is different than the DC output current. This is indicated in the chart below:

Rectifier Type	Filter Type	RMS Secondary Current Is
Full Wave Center-Tap	Choke Input	= 0.7 x DC Amps
Full Wave Center-Tap	Capacitor Input	= 1 to 1.2 x DC Amps
Full Wave Bridge	Choke Input	= DC Amps
Full Wave Bridge	Capacitor Input	= 1.6 to 1.8 x DC Amps

For example, in a F.W. Bridge circuit with a capacitive filter, if the load is 1 Amp DC, the RMS Secondary current is 1.6 to 1.8 Amp RMS.

filter chokes

0.5 TO 1000 AMPS

Signal's line of filter chokes is the most extensive available. It is designed to complement the selection of Rectifier Power Transformers so that a set may be specified for power supplies using inductive filters.

The inductance ratings given are minimum values guaranteed at full DC current. All resistance ratings are maximum values. Special variations or intermediate values of inductance, current, or resistance can be supplied promptly and accurately.

Signal's Dual Chokes are supplied with 2 windings which may be series or parallel connected with rating shown on chart. This line is basically designed for applications requiring lower inductance values at high currents, such as low voltage, DC supplies or SCR filters.

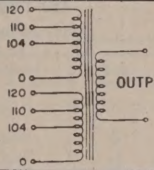
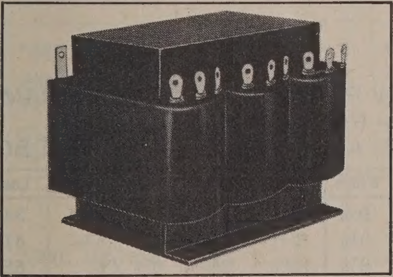
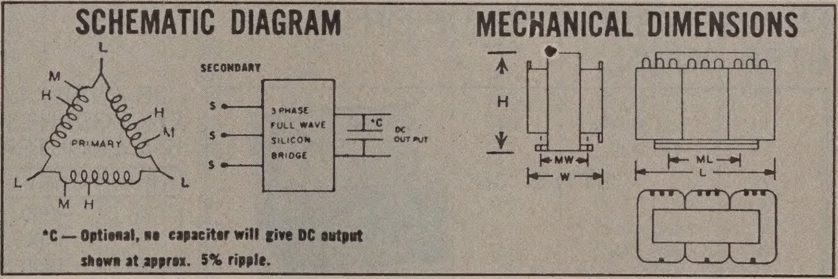
As shown on the schematic diagram dual primaries are provided. This permits parallel connection for 104, 110, or 120 volts or series connection for 208, 214, 220, 230, and 240 volts. Frequency range is 50 to 500 cps.

It is important to note that primary taps may be used to adjust the secondary voltages. Line voltages up to 125V (parallel) or 250V (series) may be used on the lowest primary tap. Nickel plated screw terminals are provided on a heavy phenolic board for easy primary connections.



3 phase high current rectifier transformers





*C — Optional, no capacitor will give DC output shown at approx. 5% ripple.

At higher power loads (above 2-3 KVA) it becomes inefficient to use single phase 115 or 230 volt standard lines. With this in mind, our engineering staff has developed a line of 3 phase transformers for use off 208 or 220V 3 phase power lines. These offer the significantly higher conversion efficiency and lighter power line drain of 3 phase systems. Since the principal applicaiton of these items is in high power dc power supplies, output ratings are given in dc voltage and current assuming the use of a 3 phase full wave rectifier.

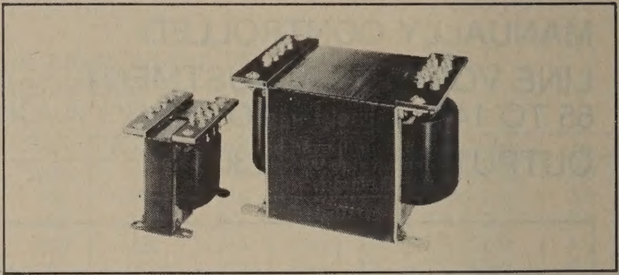
power isolation transformers

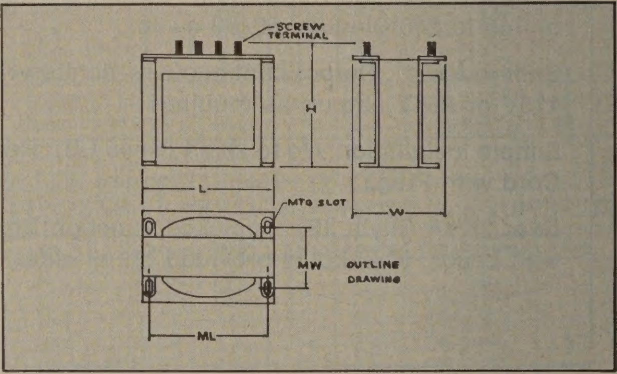
INDUSTRIAL GRADE/STEP-UP OR STEP-DOWN. MANY POSSIBLE VOLTAGE RATINGS.



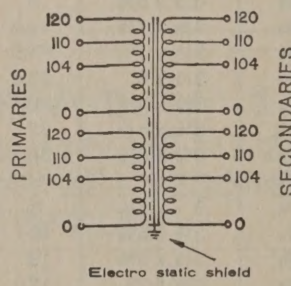
AVAILABLE FROM STOCK FOR IMMEDIATE SHIPMENT

The "DU" and "SU" lines are designed for a maximum of 55°C rise above ambient for use on standard power lines from 50 to 500 Cps. Only prime raw materials are used. Units are thoroughly impregnated and baked with Signal's own high gloss black baking varnish. The transformers are rugged in construction, well-insulated and have a consistently uniform appearance. All ratings are at full load current, continuous operation. 2500V. RMS Hipot is standard.

Heavy ¼ inch phenolic terminal boards are provided with plated brass screws and flat washers (10-32 on ¼ and ½ KVA, ¼-20 on larger sizes). Connections can be easily made with a nut driver. It is also simple to alter the interconnections to change transformer ratings. **Electro static shields are provided grounded to the core.** The connection is made with a lug to ground and may be opened if an ungrounded shield is desired.



DU SERIES 110/220 Dual Primary to 110/220V. Dual Sec. (Primary & Secondary may be reversed)



As shown on the schematic diagram the "DU" line is designed with dual primaries and secondaries. All four windings are identically rated at 0/104/110/120 volts. This permits series or parallel connections on either primary or secondary. Therefore, a nominal 110 to 110 volt, 220 to 220 volt, 110 to 220 volt, or 220 to 110 volt transformer can be set up. The winding taps permit intermediate series ratings such as 208, 214, or 230 volts. It is also possible to make auto-transformer connections by connecting a primary group in series with a secondary group. Such nominal ratings as 440 to 220 volts or 220 to 440 volts can be set-up, in addition to the standard ratings described above. A further advantage to auto-transformer connection is the fact that the KVA rating of a particular type is doubled.

SPRAGUE PULSE TRANSFORMERS

TYPE 11Z TRIGATE® PULSE TRANSFORMERS

- Specifically designed for commercial and industrial SCR triggering applications where low cost and excellent performance are required.
- Single-ended pulse transformers are designed with leads especially intended for mounting on printed wiring boards; these units are self supporting.
- Balanced pulse characteristics and energy transfer between windings.
- Minimum saturation effect to allow operation where increased pulse widths are required.
- Fast pulse rise time and increased current capability to prevent SCR di dt failure.
- Operating temperature range of —10 C to +70 C.
- For complete technical data, see latest issue of Sprague Engineering Bulletin 40,003.

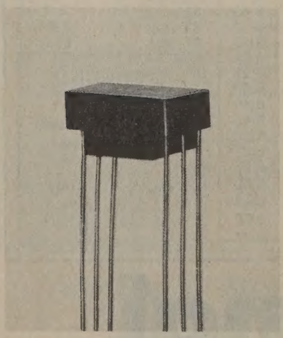
TYPE 66Z SCR TRIGGER TRANSFORMERS



- Pre-molded construction permits slightly lower cost than fully-molded units without sacrifice in humidity resistance.
- Small size for use on pc boards and in encapsulated modular packages. Case measures .400″ W. x .785″ L. x .312″ H.
- For complete technical data, refer to latest issue of Sprague Engineering Bulletin 40,004.

Note 1 —
SM Series are two hole mounting with holes on center line. #4-40 Pem nuts are fastened to the bracket.

Note 2 —
#6-32 Pem nuts on bracket are standard.

Note 3 —
#8-32 Pem nuts on bracket are standard.

- All primaries 380-1000 cps
- Dielectric test voltages:

  PRIMARIES 1500 Volts RMS
  SECONDARIES 1500 Volts RMS
- Epoxy resin used as encapsulant
- Prices subject to change without notice

STACO variable transformers

The most versatile and reliable voltage controls available today are variable transformers. They are widely used as basic components in the control of voltage, current, power, heat, speed, light and electro-mechanical force in many industrial and laboratory applications.

Staco variable transformers deliver continuously adjustable output voltage from AC power lines without introducing any wave form distortion or SCR generated noise. All STACO variables offer precious metal-plated commutators, excellent regulation, high efficiency, conservative ratings and are extremely rugged.

Models are available in various configurations from 1.75 to 600 ampere rating. Choose from panel mounted units, cord and plug types, ganged and/or motor-driven, metered models and fully portable power supplies with or without metering.

Your STACO distributor is capable of assisting you in selecting the particular transformer best suited for your application. Should you require a special or non-standard product for your particular need, STACO's Engineering staff will respond quickly with solutions to your requirements. Often it just requires minor revisions to standard components enabling STACO to keep your costs at a minimum.

Prices shown are List Prices. Contact your STACO distributor or representative for quantity discount schedule.

120 VOLT INPUT SINGLE PHASE PORTABLE TYPES

All models feature a protective housing for coil and terminal board and have line cord, matching receptacle, switch, pilot light, fuse and are connected for clockwise knob rotation. Models available with 2 conductor line cord and receptacle (2PF) or a 3-conductor grounded line cord and receptacle (3PN)

120 VOLT & 240 VOLT INPUT METERED PORTABLE TYPES

Staco's new series of Metered Cord & Plug type variable transformers eliminate the need for separate metering. Featuring an accurate, high quality pivot and jewel meter conveniently located atop the enclosure for easy, accurate readout. 120V models have 0-150V meter, 240V models have 0-300V meter.

120 VOLT INPUT VARIABLE ISOLATION TRANSFORMERS

An exclusive by STACO, for use where the safety of isolation is required. The output voltage is completely isolated from the power line (input voltage). Additional outputs are available on uncased models. These outputs include voltage doubler, series and non-isolated when hooked to the proper terminal supplied.

AC POWER SUPPLIES

Portable AC Power Supplies, ideal for labs or test bench use. Housed in a ventilated steel and aluminum enclosure with carrying handle. Each model is complete with a three-conductor line cord, plug & matching receptacle, pilot light, switch and circuit breaker. Metered models are available with Voltmeter, Ammeter or a Wattmeter (or a combination of meters).

ISOLATED AC/DC POWER SUPPLIES

The isolated variable transformer used in these AC/DC Power Supplies have a separate primary winding which is electrically isolated from the secondary or output winding. There is no common connection between the input and output of the transformers; either side of the output can be grounded independently of the supply line. Each unit has all of the features of the AC Power Supplies plus a 0-150V direct rating output voltmeter. EJ201V, EJ401V, EJ901V have 0-140V AC and 0-120V DC isolated outputs at full rated current available from banana jacks.

POWERSTAT® *Variable Transformers now*

New epoxy-coated POWERKOTE Coils make the POWERSTAT line the most outstanding value in variable transformers today. *Without increase in price, size or weight,* only POWERSTAT Variable Transformers give an average of 20% higher current ratings, 10:1 greater overload capability, longer life, greater resistance to fungus, salt spray and other contaminating atmospheres. POWERKOTE Coil commutator bars are embedded in place preventing steady-state operating temperature and severe overloads from distorting the commutator.

POWERSTAT Variable Transformers are designed to deliver continuously adjustable voltage from a-c power lines. They introduce no waveform distortion and feature rugged construction, precious metal plated commutators, excellent regulation, high efficiency and conservative ratings. All manually operated types listed in the charts except the 10B-12, EN116B-EN216B and EN117B-EN217B Series are available with motor drives if desired. Motor-driven speeds are 5, 15, 30 or 60 seconds for full range travel on all except types having -4, -5, or -6 suffixes which do not offer the 5-second speed. Single types in the 116B-216B, 117B-217B, 126-226 and 136B-236B Series are also offered with 2- or 3-wire cord-plug sets. 1156D-1256D Series types are available in ratings to 244 kva.

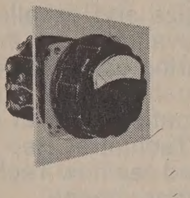
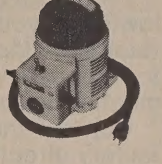
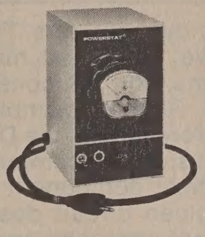
STATIONARY METERED KNOB TYPES





ENCLOSED LABORATORY TYPES

TYPE N116B



TYPE N116BK

Single units (those listed in charts without -2 or -3 suffixes) in the 116B-216B, 117B-217B, 126-226, 136B-236B and 146-246 series are also available with metered knobs. Stationary voltmeter does not turn with knob. Voltmeter accurate within ±3% of full scale and insensitive to stray magnetic fields. When ordering, add VS prefix to type number. *Back-of-panel* mounted types in the 21-22 through 146-246 series can be combined with Metered Knob Assemblies. Existing models can be retrofitted also. Assembly type VS150 has a 0-150 volt scale and type VS300 has 0-300. Types VS116B, VS3PN116B and VS3PN136B are available off-the-shelf from distributor stock.

Portable 120 volt, single-phase units having grounded NEMA cord-plug assembly, on-off switch, output receptacle, pilot light and fuse, recessed panel controls and integral handle. Slot at rear for wall hanger brackets. Type N10B rated 0-132 volts, 1.75 amp; type N21 rated 0-140 volts, 4.5 amp; type N116B and N116BK rated 0-140 volts, 10 amp. Type N116BK has knob with nonturning voltmeter to conveniently measure load voltage without necessity of providing separate units. All available off-the-shelf from distributor stock.

Technitrol -TOTAL TRANSFORMER CAPABILITIES

For over 30 years, Technitrol and its merged groups have originated many advanced transformer designs, and are constantly pushing the state-of-the-art. Recent examples of this are the **three-phase ferroresonant,** the DIP concept and inhouse original transformer computer design programs. When a critical component means the difference between a clean circuit design and a compromised functional approach, you'll welcome the Technitrol engineering ability on your team.

Technitrol's size and excellence means the following to you: availability of the latest technology, total manufacturing capability and that can-do factor that gets you the component you need, on time, meeting specifications and at a competitive price.

Contact the Technitrol Rep nearest you or the factory direct and see how Technitrol can best supply your transformer needs.

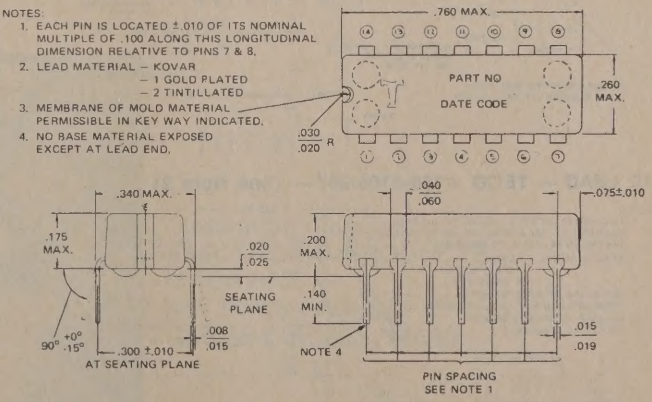
PARYLENE COATING FACILITIES AVAILABLE

DUAL-IN-LINE PACKAGING

Up to four pulse transformers can be mounted on a common lead frame and encapsulated by transfer moulding. This new concept is compatible with the "DIL" packaging of the Integrated Circuit Industry. The lead frame has no exposed base metal. Optimum pin arrangements and elevated seating plane of the case allow maximum clearance above pad area to enhance board cleaning after assembly and to accommodate other circuits without danger of shorting to the case pins. Controlled manufacturing processes and automatic selection and grading of cores provides maximum reliability. Improved features of the new DIL packages include automated handling for test and insertion, increased PC board packing density, uniform and repetitive PC board hole layout, and minimum ultimate cost.

Specialists in pulse transformers and completely transfer molded, welded DIP delay lines under 3/16" high.

14 LEAD — TECO #166-2100-245 — (See Note 2)



NOTES:
1. EACH PIN IS LOCATED ±.010 OF ITS NOMINAL MULTIPLE OF .100 ALONG THIS LONGITUDINAL DIMENSION RELATIVE TO PINS 7 & 8.
2. LEAD MATERIAL – KOVAR
   – 1 GOLD PLATED
   – 2 TINTILLATED
3. MEMBRANE OF MOLD MATERIAL PERMISSIBLE IN KEY WAY INDICATED.
4. NO BASE MATERIAL EXPOSED EXCEPT AT LEAD END.

NOTES:
1. EACH PIN IS LOCATED ±.010 OF ITS NOMINAL MULTIPLE OF .100 ALONG THIS LONGITUDINAL DIMENSION RELATIVE TO PINS 8 & 9.
2. LEAD MATERIAL – KOVAR
   – 1 GOLD PLATED
   – 2 TINTILLATED
3. MEMBRANE OF MOLD MATERIAL PERMISSIBLE IN KEY WAY INDICATED.
4. NO BASE MATERIAL EXPOSED EXCEPT AT LEAD END.

DUAL-IN-LINE PACKAGING

Contact Local Representative or Factory Direct With Specific Application or Requirements.

ELECTRICAL CHARACTERISTICS

L_m — UP to 2.0 mh maximum for 1:1 turns ratio.
UP to 8.0 mh maximum for inductors.
"Special Dip"
UP to 5.0 mh maximum for 1:1 turns ratio.
UP to 20.0 mh maximum for inductors.

L_L — As low as 0.02% of L_m for the highest permeability cores when C_I is not critical.

C_I — As low as 3.0 pfd for the highest permeability cores when L_L is not critical.

$L_L \times C_I$ — Lowest $L_L \times C_I$ product available in the industry.

POWER

"ET" ratings up to 7.0 volt μsec. for an L_M = 1.0 mh.

"Special Dip" "ET" ratings up to 15 volt μsec. for an L_M = 2.0 mh.

Specialists in pulse transformers and completely transfer molded, welded DIP delay lines under 3/16" high — see our page in Section 2350.

TO TELL YOU SOMETHING IMPORTANT!

STAY UP-TO-DATE ON NEW PRODUCTS
GET A FREE SUBSCRIPTION TO ELECTRONIC PRODUCTS MAGAZINE...

Every month over 92,000 buyers and specifiers like yourself receive **ELECTRONIC PRODUCTS MAGAZINE.** They know they'll be getting the type of information they can put to use immediately.

ELECTRONIC PRODUCTS MAGAZINE'S editorial is 100% product oriented. And it's a balanced editorial package. Every month hundreds of new products are featured. Plus — Special Reports on specific products — Round-ups on other product groups — The popular and informative Forums — The all-new "Test your IQ" series — Wall charts on various types of products — Outlook — And the newly expanded EP/IC Update monthly report.

If you're not getting ELECTRONIC PRODUCTS MAGAZINE, write to the address below for a qualification card.

SILICON RECTIFIER — 117V 50/60 Hz PRIMARY

These transformers have been designed to fill the gap between the electronic tube — high voltage, low current — type of transformer and the transistor — low voltage, high current — type unit. The two 6.3 volt windings may be connected in series or in parallel to provide either 6.3 volts or 12.6 volts C.T. They may also be used with suitable rectifiers to supply a low voltage DC source.

REPLACEMENT PARTS

THORDARSON maintains the most complete line of replacement transformers in the industry. Television flybacks, yokes, vertical output and power transformers are stocked in-depth plus thousands of other hard-to-get transformers and chokes for consumer, commercial, industrial, medical, and military applications. Your THORDARSON distributor has up-to-date TV replacement info.

TODD SYSTEMS "HIGH CURRENT TRANSFORMERS & CHOKES" are designed for use in high power rectifier circuits, and high current A.C. applications. "TODD ENGINEERED" designs feature a nominal temperature rise of 45°C., at full load, thus providing outstanding overload capacity. All designs utilize extremely low regulation, varying from 10% in the smallest to 1% in the larger units.

Four styles . . . select the type best suited for your lab, test rigs, OEM or production equipment

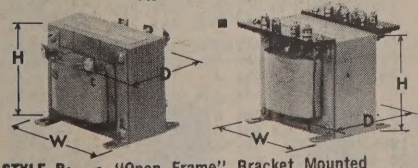
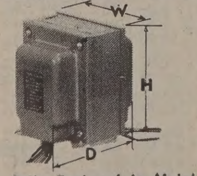
Add 3/16 to H W D for Style BE

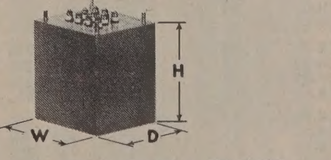


STYLE B:
- "Open Frame" Bracket Mounted
- Double Vacuum Varnish Impregnated

STYLE BE:
- Conforms to MIL-T-27B
- Epoxy Encapsulation added to Style B



STYLE V:
- Fully Enclosed in Metal Shells
- Ease of "Wiring with Leads"
- Attractive Appearance
- Dbl Vacuum Varnish Impregnated



STYLE CM:
- Hermetically Sealed to MIL-T-27B
- Environment Proof
- Attractive Gray Finish
- Permanent Name Plate

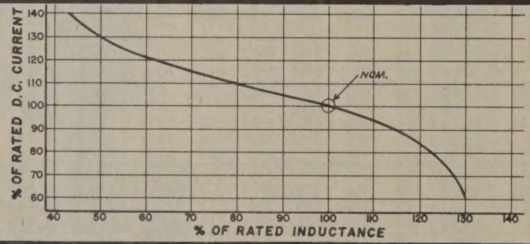
HIGH CURRENT CHOKES

50/500 HERTZ | DIMENSIONS REFER TO HIGH CURRENT XFMR SKETCHES



- **Matching styles complement high current transformers**
- **Wide variety of compatible current ratings**

INDUCTANCE VARIATION

Graph indicates typical variation of inductance (%) when used at D.C. currents (%) other than the rated values.

Chokes operated at D. C. currents higher than rated value must be run on an intermittent basis to avoid overheating.

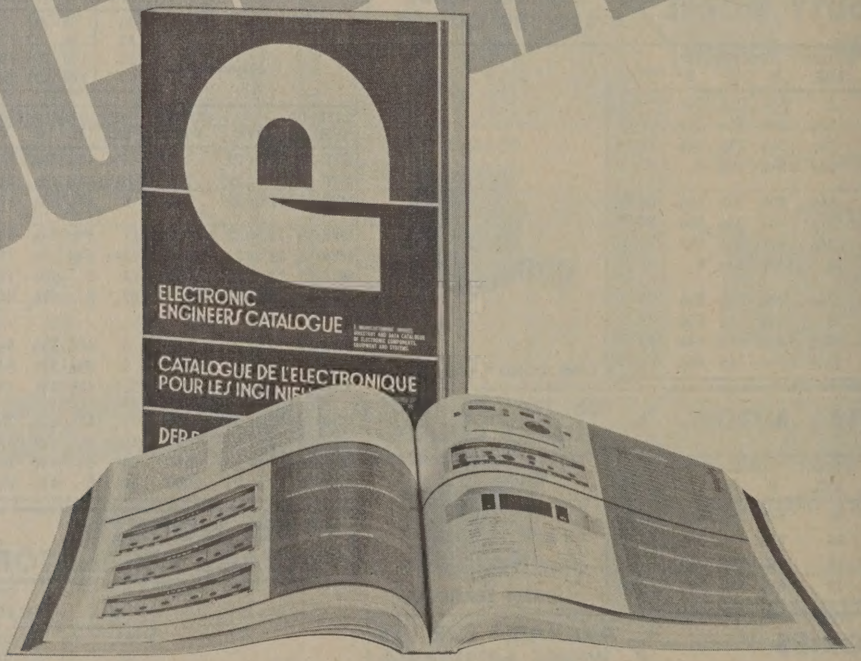
ELECTRONIC ENGINEERS CATALOGUE
CATALOGUE DE L'ELECTRONIQUE POUR LES INGENIEURS
DER PRODUKTKALOG FÜR ELEKTRONIKER

The book is out...and the response is in...

IMMEDIATE AND OVERWHELMING

ACCEPTANCE



The ELECTRONIC ENGINEERS CATALOGUE is the only comprehensive, trilingual catalogue/source-directory of electronic products available to - and from - Western Europe and the United Kingdom.

It is divided into three distinct sections: 1. **The Product Index and Directory,** which lists more than 3,000 products alphabetically in English with their French and German equivalents. 2. **The Manufacturers' Catalogue Section,** which is a compilation of Manufacturers' Catalogues in alphabetical order. 3. **The Manufacturers' Sales Offices and Trade Marks Directory,** which alphabetically includes country, address, telex or TWX numbers of the Manufacturers' main and local sales offices and/or agents.

The ELECTRONIC ENGINEERS CATALOGUE offers U.S. manufacturers the most cost-efficient method of distributing their catalogue data to **25,000** electronic engineers and buyers throughout Western Europe and the United Kingdom. It represents the carefully conceived application of the time-proven **eem** "cataloging" concept to the elusive European marketplace.

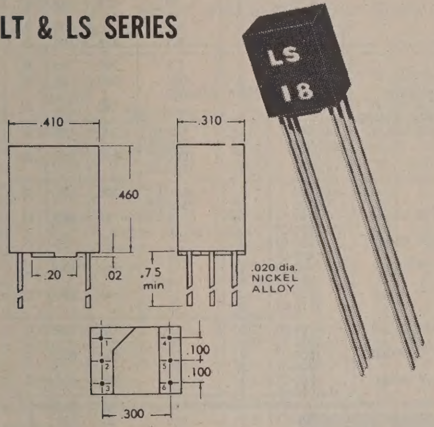
SUBMINIATURE AUDIO TRANSFORMERS

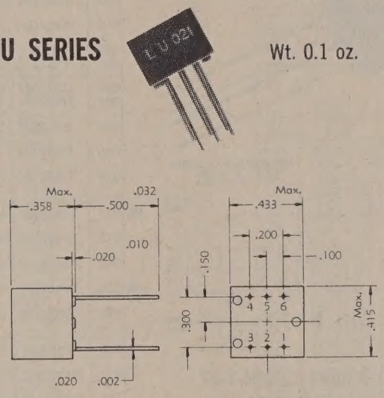
PROTOTYPES IN 48 HOURS UPON REQUEST

LT & LS SERIES



LU SERIES

Wt. 0.1 oz.



The LS Series is electrically and mechanically the same as the LT Series except for phase relationships between terminals.

LS, LT, and LU Series transformers have successfully passed the rigid requirements of MIL-T-27, Class R, Grade 5.

Subminiature in size, weighing less than 0.1 ounce, these transformers have tenth inch grid spacing between terminals and are ideally suited for transistor circuit applications which utilize printed circuit board design. All three series have risers on mounting surfaces to facilitate inspection and board cleaning, and also to prevent moisture traps.

A wide range of standard designs are available which meet the requirements of most common applications and allow for rapid delivery of prototype quantities. Special designs are also available in all three types.

The new LU Series exhibits the same electrical characteristics as the LS and LT Series but has been packaged in a "thin line" configuration to allow for closer board spacing for "card cage" applications or where height dimensions are critical.

MAGNETIC SHIELDING

LS and LT Series transformers are available with magnetic shields when required. Overall dimensions of transformers with the magnetic shield added are .365 max. x .465 max. x .531 max.

To order transformers with shields installed add 500 to dash numbers shown in the table below. For example: to order an LS-22 with shield, specify LS-522.

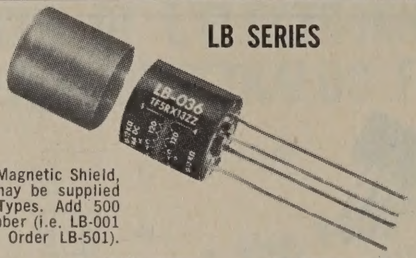
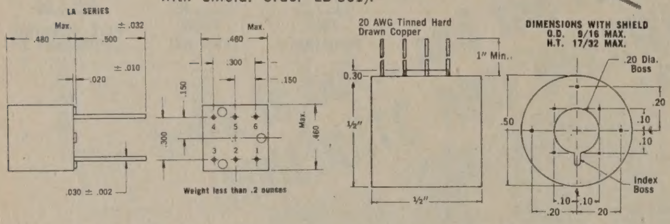
LA SERIES

LB SERIES



The LB-500 Magnetic Shield, as shown, may be supplied for all LB Types. Add 500 to Dash Number (i.e. LB-001 with Shield. Order LB-501).



Torotel LA and LB Series Transformers are manufactured to MIL-T-27, Grade 5, Class S specification. These series have 0.1 grid spaced terminals for printed circuit application. Both types have risers on mounting surfaces to prevent the formation of moisture traps and to facilitate cleaning of board assemblies.

The LA Series is electrically the same as the LB Series, but is packaged in a .460 inch cube with smaller outline dimensions for application where this configuration is more suitable.

Leads are made of 20 AWG Tinned Hard Drawn Copper. Units utilizing Dumet Wire are available on special request.

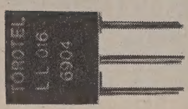
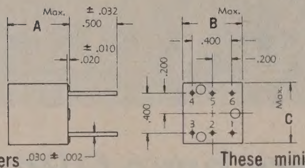
AUDIO TRANSFORMERS LL & LR SERIES





Series	A	B	C
LL	.600	.590	.590
LR	.925	.800	.710

These tiny, versatile "LL" transformers are provided with .020 risers and 0.1 grid spacing for printed circuit board applications and are manufactured to MIL-T-27, Grade 5, Class S specifications.

RESPONSE: ±1 db 200 to 50,000 Hz
DISTORTION: 10% Max. at rated power, 200 to 50,000 HZ
WEIGHT: 0.4 OZ

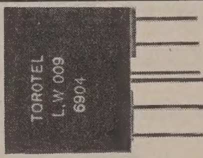
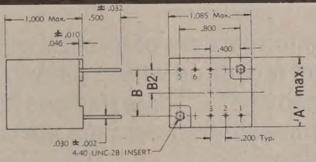
AUDIO TRANSFORMERS LW & LY SERIES





Series	A	B	B_2
LW	.900	.600	.300
LY	1.125	.800	.400

"LW" series transformers are manufactured to MIL-T-27, Grade 5, Class S specifications. Riser areas and 0.1 grid spacing make these units ideal for printed circuit board applications.

RESPONSE: ±1 db 100 to 10,000 Hz
DISTORTION: 1.5% Max. at 60 MW, 200 to 10,000 Hz
WEIGHT: 2.0 OZ.

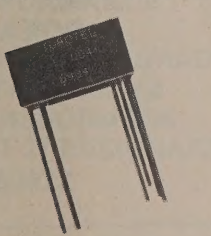
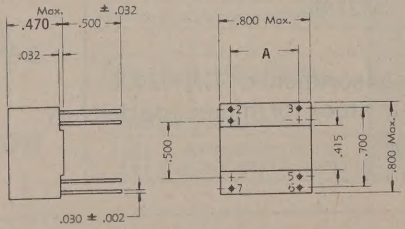
AUDIO TRANSFORMERS — LH & LK SERIES





"LK/LH" Series transformers are the ultimate in compactness and their .470 HT and 0.1 grid spacing provide a most efficient .5" board spacing unit. Designed to meet MIL-T-27C, Grade 5, Class S.

RESPONSE: ±1 db 200 to 10,000 Hz
DISTORTION: 10% Max. at rated power, 200 to 10,000 Hz
WEIGHT: 0.75 OZ

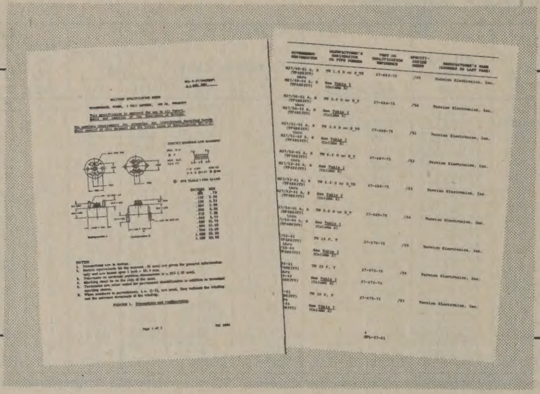
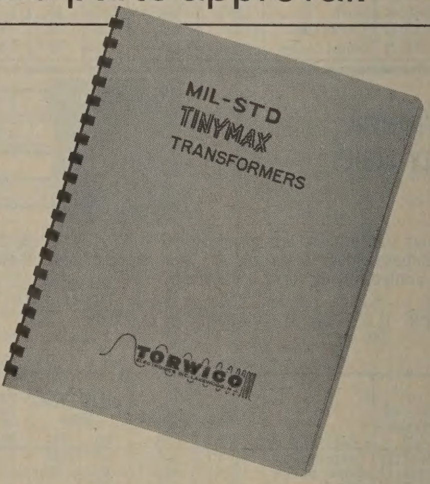
TORWICO ELECTRONICS INC. LEADER IN MAGNETIC COMPONENTS

TINYMAX Transformers have QPL Status on Qualified Product List 27.



Now you can specify Military Standard Transformers without the need for Qualification Testing or requests for non-standard parts approval.



These miniature transformers are of toroidal construction and offer a size and weight reduction when compared to conventional laminated and "C" core designs. Yet, the prices on these custom engineered transformers are competitive with off-the-shelf stock items.

So, when you need a 115V, 400 Hz transformer having a specific secondary voltage don't settle for an off-the-shelf item that may only approximate your requirement. Torwico has over 2,000 MIL/STD units and an almost infinite selection of STD TINYMAX.

What's more, Torwico offers fast delivery and competitive pricing. Selection, delivery and price--Torwico has it all.

STD TINYMAX -- MIL-T-27, Grade 4 and Grade 5, Class S, 115 volt, 400 Hz transformers available in power ratings ranging from 1.5 VA through 250 VA, with an almost infinite combination of secondary voltages of 6V through 300V.

MIL-STD TINYMAX -- Grade 4 and Grade 5, Class S, 115 Volt, 400 Hz transformers. Reference M27/37 through M27/66. Over 2,000 choices of secondary voltages.

EXTENSION OF APPROVAL -- Any design selected directly from, or based, on our MIL/STD TINYMAX transformer may be qualified to MIL-T-27 by similarity.

PROCUREMENT NOTE -- Catalog information and cross referenced sheets may be obtained from the factory or for MIL-STD units, refer directly to specification sheets M27/37 through M27/66.

PROTOTYPE DELIVERIES -- A large assortment of TINYMAX transformers is always maintained in stock for immediate delivery. Others can be shipped within 10 days.

For a copy of Towico's MIL-STD TINYMAX catalog, contact your local Torwico representative. He'll show you why Torwico is the easy way to deal with military standards.

ELECTRONIC DISTRIBUTORS MASTER CATALOG

Known as O-T-S, OFF-THE-SHELF CATALOG until this edition, the MASTER CATALOG encompasses the following product areas: audio and communications equipment; electromechanical components; electronic circuit components and subassemblies; panel components and hardware; production equipment and tools; test instrumentation; power sources; wire and cable; and related materials and chemicals.

The MASTER CATALOG is broken down into four basic sections. **A GENERAL INDEX** which lists manufacturers and products alphabetically. **A MANUFACTURERS' CATALOG SECTION** which displays their respective product pages and lists their addresses and phone numbers. **A MANUFACTURERS' DIRECTORY,** where participating manufacturers, again listed alphabetically with addresses and phone numbers, highlight their distributors. And a **GEOGRAPHIC DISTRIBUTORS' DIRECTORY** which includes the names, addresses and phone numbers of the local distributors nationwide which stock the products of manufacturers whose data appears in the "Manufacturers' Catalog Section."

RED SPEC TRANSISTOR TRANSFORMERS

All Red Spec transformers are designed and constructed to conform to the rigid requirements of Specification MIL-T-27B. Features are: solid epoxy molded case . . . legible, permanent circuit data on every unit . . . base mounting pad for ready inspection of all solder joints . . . high-strength .020-diameter nickel alloy leads . . . no stripping or tinning required . . . operating voltage: 150 volts DC . . . exceptional operation from 100 to 100,000 cycles . . . base dimensions of only .310 by .410 inch . . . total height of just .465 inch . . . weight: 1/10 ounce . . . lowest possible fatigue factor . . . dry hydrogen-annealed Trialloy, deep-drawn .020-inch case (SP-310) available for providing as much as 20 to 45 db magnetic shielding.

What can I use to keep all the manufacturers' product data I receive in order?
What system makes filing or retrieving manufacturers' catalogs fast and easy?
Which file system have thousands of engineers purchased because they know it works?

eem FILE SYSTEM

THE ONLY FILE SYSTEM DESIGNED SPECIALLY FOR THE ELECTRONIC ENGINEER!

The publishers of **eem** have put together a unique filing system for electronic product information. The complete system includes: a product index booklet which classifies electronic products into 3,000 listings both alphabetically and by product group, and 45 file folders imprinted with the **eem** product sections (extra gummed labels included for expanding the system.)

As you receive manufacturers' catalog data sheets, technical bulletins, or clip magazine articles, jot down the proper Product Section Numbers from the **eem** PRODUCT-TO-SECTION INDEX. Then simply file in order. When you require information on a specific product, refer to PRODUCT-TO-SECTION INDEX again to locate the correct file folder. It's simple, and you'll always have the necessary data to compare, specify and buy, right at your fingertips.

Here's how to order your eem FILE SYSTEM:

For the complete system send $10 (plus tax; N.Y., 8%, CA, 6½%) in check or money order to:

United Technical Publications, Inc.,
645 Stewart Avenue, Garden City, N.Y. 11530
Att: Circulation dept.

For an **eem FILE SYSTEM** without file folders send $7.50 (plus tax; N.Y. 8%; CA, 6½%).

United Technical Publications, Inc., Div. of Cox Broadcasting Corp. • 645 Stewart Ave., Garden City, N.Y. 11530

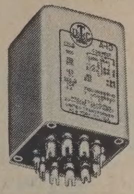
*For 120 V input, use −6% tap.

PACKAGING High lustre black enamel.

APPLICATION Industrial type. Primary 117 V 50/60 Hz.

CONSTRUCTION Designed for low temp. rise. Vacuum sealed against humidity. Special impregnation prevents corrosion and electrolysis.

ULTRA-COMPACT AUDIO UNITS



TYPE A CASE

Length	1½″
Width	1½″
Height	2″
Mounting	1⁵⁄₃₂″ sq.
Screws	4-40
Cutout	1⅜″ dia.
Unit Weight	½ lb.

PACKAGING High quality rugged die cast zinc alloy case with both top and bottom mounting facilities. Asterisked items (see Type No.) have multiple alloy shield.

APPLICATIONS Compact amplifiers and equipments.

APPLICATION NOTE Included in line are filament/transistor supply units.

NOTE All units except those carrying DC in primary employ a true hum bucking coil structure, which provides electrical balance and effects good inductive shielding.

DI-T36

DO-T DI-T
(Actual Size)

Revolutionary transistor transformers hermetically sealed to MIL-T-27C specs. Plastic insulated solderable leads, firmly anchored to withstand 10 pound pull. Ideal for printed circuits. DO-T: 5/16″ dia. x 13/32″ long, wt., 1/10 oz. DI-T: 5/16″ dia. x ¼″ long, wt., 1/15 oz. These compact units provide frequency response, high efficiency and low distortion. U.S. Pat. No. 2,949,591.

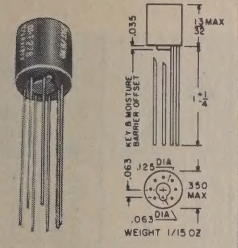
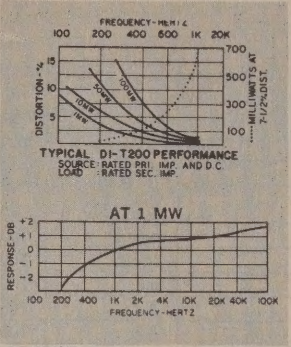
DO-T200 AND DI-T200 SERIES TRANSFORMERS AND INDUCTORS

HEIGHT 9/16 FOR DO-T



WEIGHT: 1/15 OZ. DI-T
1/8 OZ. DO-T



PACKAGING Metal encased. DO-T family unit. See page 10.

MIL SPECS To complete MIL-T-27D Specs. Ruggedized, metal encased to MIL Grade 5, Class R. See pages 80, 81.

FREQUENCY RESPONSE At 1 mw ±3 db, 300 Hz to 20 kHz, DO Type; ±3 db, 400 Hz to 100 kHz, DI Type.

TERMINALS Leads are .016 Dumet wire, gold plated, and may be either welded or soldered. They are uninsulated and are spaced on a .1″ radius circle, conforming to the termination pattern of the "TO-76" cased semiconductors and micrologic elements.

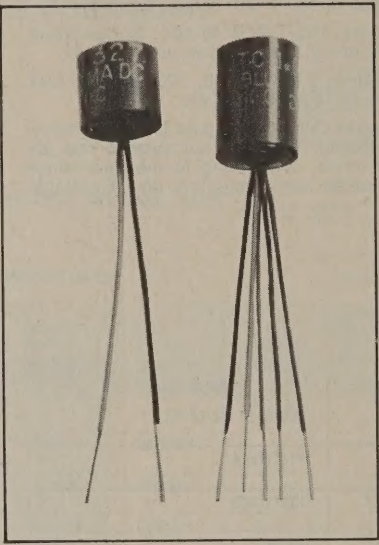
* For 5% maximum distortion @ 1 kHz.

‡ ma DC shown is for single ended usage. For push-pull, ma DC can be any balanced value taken by .5W transistors. Where windings are listed as split, 1/4 of the listed impedance is available by paralleling the winding.

TRW UTC TRANSFORMERS

I-DOT™ AND I-DIT™ TRANSFORMERS AND INDUCTORS



PACKAGING TRW/UTC's plastic casing is designed for protection to 85°C. The bobbin is completely rigid and the wire turns are circular to reduce turn corner stress and assure uniform wire lay. External leads are rigidly anchored internally. No tapes are used. Insulated leads are .016" diameter tinned copper. Units mount vertically or on side and can be wave soldered.

I-DO-T and **I-DI-T** transformers are industrial quality counterparts of TRW/UTC's DO-T and DI-T line of MIL-Spec transformers. Environmental specifications, such as hermetic sealing, have been relaxed to reduce the cost. Electrical performance is identical. See pages 11 and 12.

WORKING VOLTAGE All units = 50 V.

FREQUENCY RESPONSE Frequency response is ±3 db, 300 Hz to 20 kHz (I-DO-T). Frequency response is ±3 db, 400 Hz to 100 kHz (I-DI-T).

TEMPERATURE RANGE Maximum operating temperature is +85°C.

SHIELDING Hipermalloy electromagnetic shield is available from stock for all I-DO-T and I-DI-T units.

PERFORMANCE In power handling capability and reliability coupled with small size, I-DO-T and I-DI-T transformers are unprecedented for industrial use. Electrical parameters and areas of application exceed conventional transformer capabilities.

PIP* SERIES TRANSISTOR PULSE TRANSFORMERS

UTC's PIP series of subminiature transistor type pulse transformers is designed to give a maximum of component density in equipments, their configuration being especially compatible with transistors. The design is based on the UTC DO-T and DI-T series to impart exceptional reliability. PIP-1 through PIP-9 have a ratio of 4:4:1, PIP-10 through PIP-12 have a ratio of 5:3:1. All units are checked and adjusted in a transistor test circuit to give the required pulse width.

Hermetically sealed, manufactured and guaranteed to MIL-T-20138B by full environmental testing . . . all units, completely METAL CASED, MIL Type TP6RX4410CZ. See UTC page 3015 for other miniature pulse transformers.

U.S. Pat. No. 2,949,591 5/16" Dia. x 3/16" high. Weight 1/20 oz.

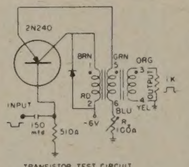
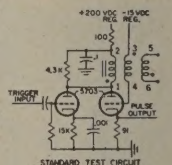
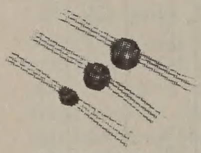
PRECISION MINIATURE WIDE APPLICATION PULSE TRANSFORMERS



TRANSISTOR TEST CIRCUIT



STANDARD TEST CIRCUIT



Size and weight of these units same as H-45.

MANUFACTURED AND GUARANTEED TO COMPLETE MIL-T-21038B

UTC miniature, wound core, pulse transformers are indvidually precision adjusted in standard test circuits to close tolerances. They are high reliability units, hermetically sealed by vacuum molding and suited for service from −70°C to +130°C. Wound core structure provides excellent temperature stability (unlike ferrite). Designs are high inductance type to provide minimum of droop and assure true pulse width. H-45 thru H-57 ratio 1:1:1. Others ratio 4:4:1 and 5:3:1.

UNIVERSAL TRANSISTOR SUPPLY TRANSFORMERS

PACKAGING Hermetically sealed. Drawn metal case to Mil Grade 4.

MIL SPECS. To complete MIL-T-27 Specs. Mil Type: TF4SX02 plus two letter case code.

NOTES Chart, below, shows the secondary AC voltages available, and the approximate DC voltages resulting, in typical capacitive filter silicon rectifier circuits (at the indicated currents). Since the capacitor following the rectifier affects the DC, voltage values used (in 1000 mfd) are shown in parenthesis ( ) after each current rating.

Primary taps can modify nominal AC voltages by −6%, +6%, and +12%.

PRIMARY WINDING ARRANGEMENT

Terminals 1, 2, 3 and 4 are the primary winding. Terminals 5, 6 and 7 are a separate winding that may be used in series bucking or aiding with the primary to raise or lower the secondary output voltage.

SECONDARY WINDING ARRANGEMENT

Terminals 8 & 9 and 10 & 11 represent two identical secondary windings. Table 2 gives the output voltages for specific terminal connections, many other combinations are possible.

RATINGS

URT transformers are designed to operate to 105°C maximum winding temperature. Many factors affect the operating temperature, such as: duty cycle, cooling (natural connection or forced air), input voltage, frequency, type of load (AC, DC capacitor or inductive), etc. These factors must be related in the specific application.

Table 1 relates approximate form factors for rectifier loads to the AC RMS current rating.

TABLE 1

RECTIFIER CIRCUIT	FORM FACTOR	
	Inductor Resistor Input	Capacitor Input

Amperex Instrument Cathode Ray Tubes

MONO-ACCELERATOR TYPES

Flat-faced, mono-accelerator CRT's intended primarily for use in inexpensive oscilloscopes, read-outs, and monitors for industrial and medical instrumentation.

Amperex CRT's are ruggedly constructed and are designed to be mounted in any position; thus they are suitable for use in portable and mobile instruments as well as in fixed equipment. Special low-wattage heaters are available in most types to reduce power consumption of portable equipment.

These are electrostatic deflection tubes, electrostatically focussed and with symmetrical X and Y deflection plates. Orthogonality between X and Y plates is 90° ±1°. Deflection linearity from 25% to 75% of full deflection is better than 1%.

No external astigmatism control is needed for equipment in which these CRT's are used; initial adjustment at the time of manufacture is all that is required if mean X and Y plate potentials are correctly set.

Each tube is supplied with an Amperex 55566 14-pin socket.

Amperex Instrument Cathode Ray Tubes

POST-DEFLECTION ACCELERATOR TYPES

A complete range of flat faced rectangular and round post-deflection accelerator tubes for use in laboratory and portable instrumentations at bandwidths of 25 MHz and higher.

Main Features:
- High deflection sensitivity
- Excellent center to edge resolution
- Short overall length
- State-of-the-art glass techniques
- Availability of low power heaters
- Availability of trace rotation coils
- All tubes are supplied with sockets

Type E14-100GH offers a split-beam display with horizontal axes perfectly parallel and with 100% overlap between both vertical and horizontal systems. Traces strike the screen at nearly 90° to minimize image distortion. A special Amperex circuit is available to completely eliminate the shift that normally occurs when the intensity or focus of a dual trace CRT is adjusted. The circuit also provides automatic focussing of the tube.

TYPE	DIAGONAL (In.)	DISPLAY AREA (cm)	PHOSPHOR	DEFLECTION COEFFICIENT (V/cm)		LINE WIDTH (mm)	ACCELERATOR VOLTAGE	POST-DEFLECTION VOLTAGE	LENGTH (In.)
				HOR.	VERT.

84D14GH	5.5	8 x 10	P31	14	7	0.45	2000	10,000	13.03

Notes: 1) Side connections to deflection plates reduce plate capacitance, allow operation up to 50 MHz.
2) Complete with coils for image rotation/orthogonality correction. Suitable for applications to 80 MHz. Edge-lit graticule.
3) Split beam; 100% overlap of the two systems.

BRIMAR

high quality MONITOR TUBES/RADAR TUBES/ INSTRUMENT TUBES

NINETEEN DIFFERENT PHOSPHORS / INTERNAL & EXTERNAL GRATICULES / FLASHOVER PROTECTION / IMPLOSION PROTECTION (5 Different Constructions)

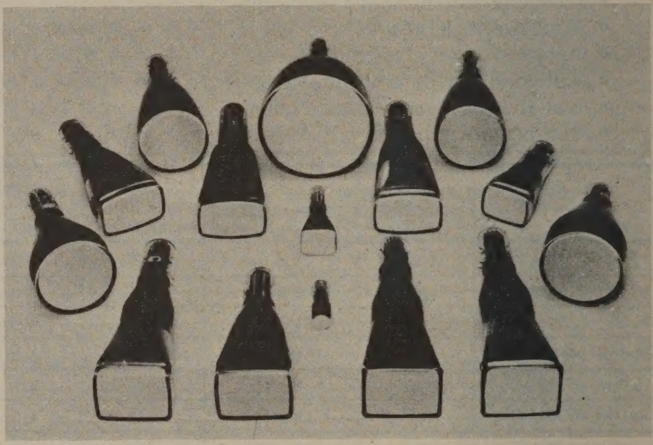
Accessories offered for Brimar cathode ray tubes include sockets, connectors, yokes, focusing coils and twist coils. Substantial savings can be offered when Magnetic Shields and Tubes are purchased as assemblies.

PARTIAL LISTING OF AVAILABLE TYPES

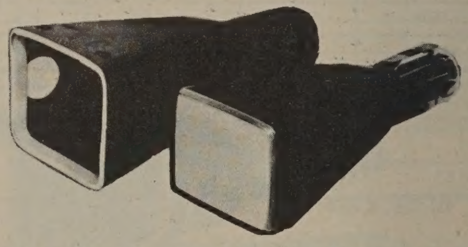
Selected Types	Application and Description	Face Shape & Dia. (Min.)	Useful Min. Screen Area (inch)
FLYING SPOT SCANNER TUBES			
Q7-100GU	Electrostatic focus. High resolution.	3 ●	4.7
Q13-202GS	Electrostatic focus. Document readers or telecine EHT connection by CT8 socket	5 ●	3.5x2.7
SMALL ELECTROSTATIC DISPLAY TUBES			
D3-130	General purpose indicating device	1 ●	1.1
D7-200	Indicators. Oscilloscopes. CCTV. Alpha-numerical readout.	3 ■	2x1.6
D7-201	Low power, 8 to 10 mil spot. Inexpensive. For portable scopes.	3 ■	2x1.6
D9-110	Low power, letter box format	3½ ■	2.6x1.6
INSTRUMENT TUBES—SINGLE GUN			
D10-230	Low cost, high quality, flat face. Short (10.25″), low X deflection voltage requirement.	4 ●	3.15x2.5
D10-240	Low power, short (10.25″), spiral p.d.a., good line width and deflection coefficients, deflection blanking.	4 ■	2.75x2
D10-291	High bandwidth. Portable small compact size	4 ■	2.75x2
D13-47	Medium bandwidth. For transistor scan circuits. Spiral p.d.a.	5 ■	4x2.4
D13-600	General purpose. Short length. Large screen area.	5 ●	4x3.1
D13-610	Medium bandwidth for transistor scan circuits. Spiral p.d.a.	5 ●	4x3.1
D13-630	Short length monoaccelerator.	5 ●	4x3.1
D14-172	General purpose. Short length.	5½ ■	4x3.1
D14-180	Medium bandwidth for transistor scan circuits.	5½ ■	4x3.1
D14-210	75 MHz for very high writing speed. Aluminized mesh p.d.a.	5½ ■	4x3.1
D14-270	Short, low cost monoaccelerator	5½ ■	4x3.1
D16-100	X-Y plotter. Square faced tube.	5½ ■	4x4
D18-130	Short (12.2″), large screen, spiral p.d.a. General purpose applications.	7 ■	4.7x3.9
RADAR TUBES			**Defl. Angle**
F10-100	Small boat radar.	4 ●	30
F15-101	Low cost small boat radar, light weight (0.3 lbs.). Short (9.5″). High brightness.	6 ●	53
F21-10	General marine use. Aluminized.	8½ ●	41
F28-130	Rimguard III 'push-through' protection. Private yacht radar.	11 ■	90
F31-10	General marine use.	12 ●	40
F41-120	Major radars for ships, port and aircraft control.	16 ●	50
DISPLAY AND PICTURE MONITOR TUBES			
M14-100	Medical and camera viewfinder applications.	5½ ■	70
M17-10	Medical waveform display. Television camera view finder.	7 ■	70
M21-13	Medical waveform data display. Industrial monitors.	8½ ■	90
M24-120	Rimguard reinforced envelope, integral mounting lugs. Data display.	9 ■	90
M31-184	Industrial monitor, rimband, integral mounting lugs.	12 ■	90
M38-100	Industrial monitors. Data displays.	15 ■	90
M38-111	High resolution position and write data display, anti-reflection face plate.	15 ■	90
M38-140	High voltage focus, high resolution data display. Fine line width (8 mil—shrinking raster). Short (12.6″).	15 ■	110
M44-120	Data displays. Ind. picture monitors.	17 ■	110
M61-120	Industrial monitors. Data displays.	24 ■	110

Thorn Radio Valves and Tubes Limited is one of Britain's largest manufacturers of industrial cathode ray tubes. Examine a BRIMAR catalog and you will find about the widest range of tubes, one of which is likely to be a perfect fit for your requirement. But if you have something unusual in mind it is probable that BRIMAR can make it.

INSTRUMENT TUBES



D14-172/D18-130 SHORT RECTANGULAR TUBES



Short overall lengths (12 and 12.2 inches) / Rectangular 3.9 x 3.15- and 4.7 x 3.9-inch displays (10 x 8- and 12 x 10-cm / Spiral p.d.a. for bright trace / Internal graticules available / For general purpose applications/Shown above with TELFORM shield.

MAGNETIC SHIELDS UP TO 30″ DIAMETER FOR CATHODE RAY TUBES & TRANSFORMERS by Telcon Metals Ltd.

Telcon Metals, Ltd., has its own in-plant facilities to handle every phase of the magnetic shield manufacturing process from start to finish. This means 100% Telcon supervision all the way — from the melting and rolling of the raw material to the fabrication and annealing of the magnetic shield. Telcon's total production method is based on a century of experience in the manufacture of alloys. All these factors are your assurance that you get a sensibly priced, high quality product.

A NEW CONCEPT IN MAGNETIC SHIELD CONSTRUCTION

Specially developed for quantity production of high efficiency complex shields, new TELFORM construction utilizes precision drawn segments to drastically reduce welded seams. The result is extra close fitting shields with improved shielding characteristics. This new technique is applicable for CRT tubes up to approximately 20″ long. No premium charge even though dimensions, finish and appearance are far more uniform throughout batches than conventionally fabricated shields. Rapid delivery after initial tooling. Available in 80%, 50% and 36% nickel-iron alloys.

Extremely Competitive Prices on Custom Shields.

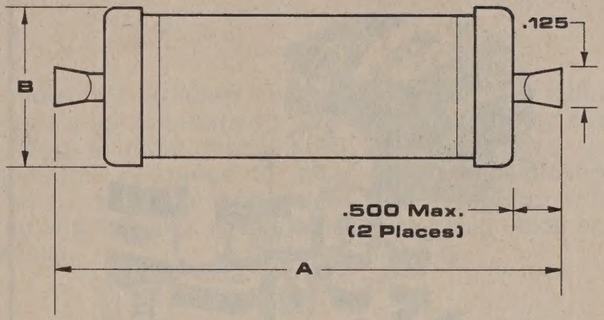
VICTOREEN SPARK GAPS

CERAMIC SERIES

VICTOREEN High Energy Ceramic Spark Gaps are designed for applications in the areas of over-voltage protection in high voltage circuits (1000 volts and up), and repetitive energy discharge capability of this type Gap is up to 70% better than a similar glass enclosed Spark Gap, resulting in a significant improvement in operating life. With questions or a specific application contact VICTOREEN Application Engineering Department.



CERAMIC SERIES SPECIFICATIONS

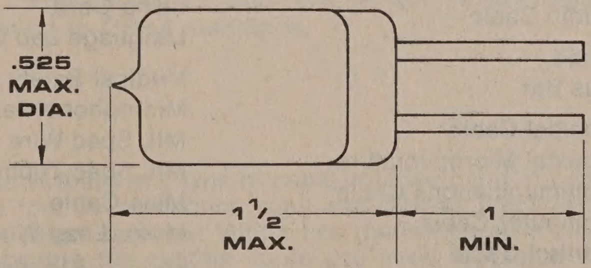
Type	[1]DC Firing Voltage	Tolerance	[2]Max. Energy/Pulse	"A"	"B"
SGCA	1000 - 12,000	±10%	100 Joules	1.930 Ref.	.562 Ref.
SGCB	12,000 - 20,000	±10%	100 Joules	2.180 Ref.	.562 Ref.
SGCC	20,000 - 35,000	±10%	100 Joules	2.680 Ref.	.562 Ref.

[1] DC is defined as a ramp rate less than 5 volts/microsecond. A firing time of typically 1 microsecond or less will result in some overshoot depending on the ramp rate of the pulse.

[2] This is maximum energy in single shot applications. For maximum energies/pulse during various repetition rates contact VICTOREEN Applications Engineering Department.

GLASS SERIES

The SGSP Series of Spark Gaps is a rugged glass encapsulated series of protective devices, capable of handling as much as 10 times the energy of the familiar "button" gaps. Their construction lends them to either circuit board mounting or insertion in a suitable socket. This type Spark Gap is available in any firing voltage from 150 to 5000 volts. Parameters on some of the more common types are listed below.



GLASS SERIES SPECIFICATIONS

Type	Nominal DC Firing Volt. ±10%	Firing Voltage At		Extinguishing Voltage	Energy Dissipation Capability*
		100 v/u Sec. Rise	10 kv/u Sec. Rise		
SGSP - 150	150	360	550	15	60 Joules
SGL	215	470	730	15	60 Joules
SGSP - 350	350	680	1050	15	60 Joules
SGSP - 470	470	920	1400	15	60 Joules
SGSP - 600	600	1150	1750	20	60 Joules
SGSP - 800	800	1530	2350	40	60 Joules

*Maximum energy capable of being dissipated in a single pulse.

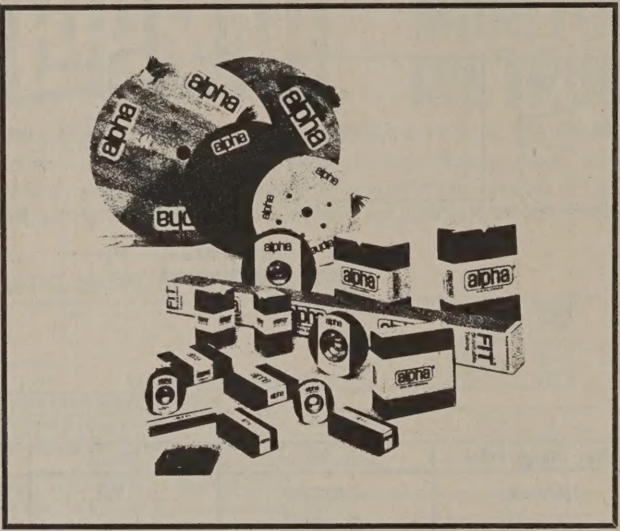
alpha your source for 4,000 products



Alpha is your one-stop source for your requirements in communications, control, military, aerospace, installation, maintenance and repair. The widest selection of wire, cable, tubing and flat cable and connectors in the electronics industry. From audio cables to vinyl hook-up wire, Alpha can fill your requirements. Among the newest Alpha products are two styles of flat cables — both bonded and laminated — and matching connectors for mass termination, in over 60 styles; a new line of over 400 cables that are UL listed, CSA certified, and OSHA acceptable, over 1000 types of instrumentation cables and the revolutionary plastic-blade wire stripper. Alpha has the widest selection of sizes, packages, spools and colors making it easy for you to select not only the exact item to suit your requirement, but the most economical package as well. We have the necessary MIL, UL, CSA and OSHA approvals to meet your most stringent requirements.

TUBING CATALOG

alpha
TUBING & INSULATION CATALOG
T-2

Alpha can supply you with all your tubing needs. Our catalog contains the industry's largest selection of tubing. You'll find shrinkable and non-shrinkable tubings of polyolefin, PVC, Kynar, Teflon, FEP Teflon and neoprene, as well as caps, boots, seals and markers. Also included is a full range of heating devices to fit all application requirements. An estimator chart for cut tubing pieces lets you determine how many feet you will need of any tubing to produce the required number of tubing pieces.

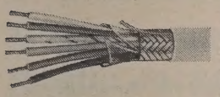
UL/CSA/OSHA CABLES

MULTICONDUCTOR SHIELDED CABLE



Wiring cable suitable for industrial control equipment, business machines and many other uses. Conductor is stranded, annealed, tinned copper; insulation is PVC rated at 80°C (105°C for Type 2501) and 300 volts (600V for Type 2501); tape wrap is 0.001″ clear mylar; nylon rip cord; jacket is gray PVC thickness as listed and marked at one foot intervals.

UL STYLE 2464, 300V, 80°C

alpha **UNSHIELDED INTERCOM CABLES**

UNSHIELDED INTERCOM CABLE

Paired Conductors — Plastic Jacket

Passes FR-1 Vertical Flame Test

DESCRIPTION: Each conductor tinned copper, color coded polyvinylchloride insulation, conductors twisted into pairs, gray polyvinylchloride jacket overall.

APPLICATIONS: Balanced Intercom Systems, Annunciators, Telephones, Nurses Call Systems, Control Circuit Cable, Electronic Computer Cable, Multiple Speaker Cable, Signal Systems, Alarm Systems.

CHARACTERISTICS: Suggested Operating Temperature:
−20°C to +80°C.

UNSHIELDED AUDIO CABLE
Multi-Conductor — Plastic Jacket

Passes FR-1 Vertical Flame Test — 80°C, 300 Volts

DESCRIPTION: Each conductor tinned copper, color coded polyvinylchloride insulation, conductors twisted, gray polyvinylchloride jacket overall. Suitable for outdoor installations.

APPLICATIONS: Intercoms, Interconnecting Cables, Remote Control Circuits, Telephones, Telemetering Connecting Cable, "Baby Sitter" Intercom.

CHARACTERISTICS: Suggested Operating Temperature: −20°C to +80°C.

FOIL SHIELDED CABLES

FOIL SHIELDED JACKETED CABLE

UL STYLE 2092, 2093 & 2094*

MYLAR SUPPORTED ALUMINUM FOIL SHIELD

DESCRIPTION: Each conductor stranded tinned copper, color coded polyethylene insulation, conductors cabled, wrapped mylar supported aluminum foil shield, 100% coverage with drain wire laid parallel, aluminum foil facing outward to provide maximum ground, gray PVC jacket overall.

CHARACTERISTICS: Operating Temperature: −20°C to +60°C. Operating Voltage: 300 volts. Lightweight, reduces cable diameter, and provides 100% shield coverage.

MINIATURE FOIL SHIELDED CABLE

TWO 22 GAUGE CONDUCTORS

DESCRIPTION: Each conductor tinned solid or stranded copper, color coded polypropolene insulation, aluminum/Mylar foil shield, drain wire, gray vinyl jacket overall.

APPLICATIONS: Designed for space-saving in miniature and subminiature instrumentation and audio applications.

200 VOLTS, −55°C, +105°C

FOIL SHIELDED AUDIO AND DATA CABLE

INDIVIDUALLY SHIELDED MULTIPLE PAIRS — PLASTIC JACKET

DESCRIPTION: Each conductor, tinned copper, color coded, high density polypropolene conductors twisted into pairs, tinned copper drain wire. Mylar supported aluminum foil shield, aluminum facing inward. Chrome gray PVC jacket overall.

CHARACTERISTICS: Mutual capacitance between conductors of a pair, 25 pf/ft. Capacitance of a single conductor to shield, 45 pf/ft.

APPLICATIONS: For audio, R.F. and pulse applications requiring superior circuit isolation.

SPIRAL—BRAIDED SHIELDED CABLES

SPIRAL SHIELDED PLASTIC JACKETED CABLE

Passes FR-1 Vertical Flame Test

DESCRIPTION: Each conductor stranded or solid tinned copper, color coded polyvinylchloride insulation, conductors twisted, spiral wrapped copper shield, gray polyvinylchloride jacket. Nominal Jacket Thickness: .020.

CHARACTERISTICS: Use of spiral pigtailing off extremely simple and fast. Excellent for production line work. Provides 95% shielded coverage for audio and RF frequencies. Suggested Operating Temperature: −20°C to +80°C.

BRAIDED SHIELDED JACKETED CABLE

Passes FR-1 Vertical Flame Test

DESCRIPTION: Each conductor tinned copper, color coded polyvinylchloride insulation, conductors twisted, braided copper shield, gray polyvinylchloride jacket overall. Suitable for outdoor installations.

CHARACTERISTICS: A conventional type of braided shield providing approximately 75% coverage is particularly desirable where flexibility is required. The copper shield allows ease of pigtail soldering. Shield construction provides additional cable strength. Operating Temperature: −20°C to +80°C. Nominal Jacket Thickness: .020.

RIBBON CABLES

BONDED RIBBON CABLE

DESCRIPTION: 22, 24, 26, 28 and 30 AWG stranded tinned copper conductors insulated with either .010″ or .016″ of PVC, insulated conductors are bonded into a flat configuration to form a ribbon cable. This configuration allows easy termination, ease of location and simplifies routing, while saving space over typical round cable.

- 22 AWG 19/34; 22 AWG 7/30; 24 AWG 19/36; 26 AWG 7/34; 28 AWG 7/36; and 30 AWG 7/38 stranded tinned copper conductors.
- 22 AWG 7/30 insulated with .016″ of PVC.
- 22 AWG 19/34; 24 AWG 19/36; 26 AWG 7/34; 28 AWG 7/36; and 30 AWG 7/38 insulated with .010″ of PVC.
- 10, 15, 20 and 30 conductor size.

CHARACTERISTICS:

- Temperature Rating: −55°C to 105°C
- Voltage Rating: .010 (MIL-W-16878 Type B) 600V
  .016 (MIL-W-16878 Type C) 1000V
- Passes FR-1 Vertical Flame Test
- Color Code: Brown, Red, Orange, Yellow, Green, Blue, Violet, Gray, Black (repeat)

TWISTED PAIR LAMINATED RIBBON CABLE

DESCRIPTION: 26 AWG stranded tinned copper conductors insulated with .010″ of PVC, twisted into pairs and intermittently laminated between layers of .005″ clear PVC film. The intermittent laminations allow easy access to the pairs while maintaining the shape and integrity of the cable.

- 26 AWG (7/34) stranded tinned copper conductor
- Conductors insulated with 0.010″ (.13mm) PVC rated FR-1
- Conductors twisted into pairs
- Pairs are laminated between two .005″ strips of clear PVC film
- Laminating interval .750″ (19mm) nominal
- Conductors pairs are .100″ apart (2.54mm)

CHARACTERISTICS:

- Temperature Rating: 80°C
- Voltage Rating: 300 Volts
- Capacitance: 21 pf/ft (69 pf/m)
- Propagation Delay: 1.7 ns/ft (5.6 ns/m)
- Impedance: 95 ohms nominal
- Cross Talk: 10 ft. (30.48cm) with two adjacent lines driven and a 1.3 ns rise time, 12% near end, 13% far end
- Color Code: Brown, Red, Orange, Yellow, Green, Blue, Violet, Gray, White, Black (repeat). First conductor, common conductor is tan.

APPLICATIONS: Used in situations where reduced cross-talk is necessary, such as high speed data transmission in computers and communications equipment, but where easy mass termination is not necessary.

FCC* FLAT CABLES

alpha

FCC* COLOR-CODED FLAT CABLE

*Flat Cable and Connectors

Termination flexibility is the unique property of Alpha's FCC Color-Coded Flat Cable. Precise conductor spacing allows you to terminate this cable to any major brand of insulation displacement connectors on .050 in. (1.27mm) centers, including Alpha's. Color-coded insulation and excellent teardown characteristics permit you to terminate it like conventional hookup wire. Or take the best of both worlds and use both techniques on the same cable. Alpha FCC Color-Coded Flat Cable lets you expand your design capabilities.

DESCRIPTION: Alpha Color-Coded Laminated Ribbon Cable consists of PVC insulated round conductors on .050 in. (1.27mm) centers laminated between two sheets of clear PVC film. The lamination process results in controlled electrical characteristics with the advantage of color-coding, ease of separation and mass termination. Cable can be terminated with any major brand of IDC (insulation displacement connectors) on .050 in. (1.27mm) centers.

- 28 AWG (7/36) stranded tinned copper conductor
- .010 in. (.25mm) nom. wall PVC
- Conductors laminated to a sheet of .005 in. (0.13mm) nom. clear PVC film
- Color Code: Brown, Red, Orange, Yellow, Green, Blue, Violet, Gray, White, Black. Color code repeats beyond 10 conductors.
- UL listed
- Passes FR-1 Vertical Flame Test

CHARACTERISTICS:

- Temperature Rating: 80°C
- Voltage Rating: 300 volts
- Capacitance: 14 pf/ft. nom.
- Propagation Delay: 1.4 ns/ft.
- Impedance: 103 ohms nom.
- Cross Talk: Nom. between two adjacent signal lines @ 5 ns rise time over 10 ft. (3.05m) length; near end 5.2%, far end 7.3%
- Environmental: Resists acids, alkalis, oils, moisture, solvents, ozone and fungus

APPLICATIONS: Ideal for applications in digital data and signal transmission system where termination speed and termination flexibility are required.

SPECIAL CONSTRUCTIONS:

- Other color combinations available

FCC* COLOR-CODED TWISTED PAIR FLAT CABLE

*Flat Cable and Connectors

Alpha has flat cable with a new twist. Take Alpha's FCC Color-Coded Flat Cable, twist the conductors into pairs and you've got Color-Coded Twisted Pair Flat Cable. Putting a twist in the cable gives you reduced cross talk. A flat 2 inch section every 18 inches allows you to terminate it to any major brand of insulation displacement connectors including Alpha's. Or terminate it like any twisted pair wire. Or do both on the same cable. You get the electrical advantages of ground plane flat cable with the added benefits of lower cost and easier termination. FCC Color-Coded Twisted Pair Flat Cable gives you the ultimate in design flexibility and signal response.

DESCRIPTION: Color-Coded Flat Cable consisting of 18 in. (457mm) sections of twisted pairs laminated on .100 in. (2.54mm) centers alternating with 2 in. (50.8mm) straight sections with conductors parallel on .050 in. (1.27mm) centers. Alpha, or any brand of IDC (insulation displacement connectors) on .050 in. (1.27mm) centers, can be used with this cable. The termination is made in the 2 in. (50.8mm) flat section.

- 28 AWG (7/36) stranded tinned copper conductor
- .010 in. (.25mm) nom. wall PVC
- Conductors laminated between layers of PVC film
- Color Code: Pairs have common Tan lead with Brown, Red, Orange, Yellow, Green, Blue, Violet, Gray, White, Black. Color code repeats beyond 10 pairs.
- UL listed
- Passes FR-1 Vertical Flame Test

CHARACTERISTICS:

- Temperature Rating: 80°C
- Voltage Rating: 300 volts
- Capacitance: 22.4 pf/ft. nom.
- Impedance: 100 ohms nom.
- Cross Talk: Nom. between two adjacent signal lines @ 5 ns rise time over 10 ft. (3.05m) length; near end 6.0%, far end 5.3%
- Environmental: Resists acids, alkalis, oil, moisture, solvents, ozone and fungus

APPLICATIONS: Exceptionally well-suited for applications in which minimum cross talk and fast termination is required. Well-suited for switching and data transmission by high speed computers and communication equipment.

SPECIAL CONSTRUCTIONS:

- Other color combinations available
- Twisted pair sections other than 18" long available

FCC* GRAY LAMINATED FLAT CABLE

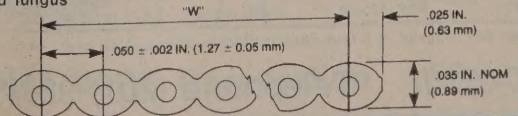
*Flat Cable and Connectors

DESCRIPTION: Laminated Gray Flat Cable consisting of stranded conductors laminated between layers of gray PVC film to form a flat ribbon. The laminate is formed precisely around the conductors so that wires, each surrounded by insulation film, may be easily and quickly separated or terminated with any major brand of IDC (insulation displacement connectors) on .050 in. (1.27mm) centers.

- 28 AWG (7/36) stranded tinned copper conductor
- Conductors laminated between layers of PVC film
- Gray PVC with Red stripe on leading edge
- UL listed
- Passes FR-1 Vertical Flame Test

CHARACTERISTICS:

- Temperature Rating: 105°C
- Voltage Rating: 300 volts
- Capacitance: 14 pf/ft. nom.
- Propagation Delay: 1.4 ns/ft.
- Impedance: 105 ohms nom.
- Cross Talk: Nom. between two adjacent signal lines @ 5 ns rise time over 10 ft. (3.05mm) length; near end 5.2%, far end 6.5%
- Environmental: Resists acids, alkalis, oil, moisture, solvents, ozone and fungus



APPLICATIONS: A general purpose flat cable designed for use in electronic products such as computers and business machines where speed of termination and economy is required.

SPECIAL CONSTRUCTIONS:

- 30 AWG solid tinnd copper available

Here's the cable that started the whole system of flat cable design for mass termination. Alpha's Gray Laminated Flat Cable is designed for general purpose interconnections. It combines low-cost with consistently reliable performance. It features excellent tear-down characteristics with high flexibility for applications requiring intricate cable routing. Mirror image profile permits reverse plane termination ability on same cable length. Alpha's Gray Laminated Flat Cable fits your all-around design requirements.

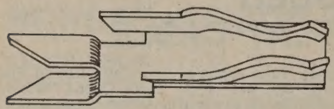
FLAT CABLE CONNECTORS



OFF-SET TINES
Patented off-set tines place forces on the conductor in opposite directions in two different planes, keeping the conductor under constant tension, ensuring a gas-tight connection.

DUAL CANTILEVERED CONTACTS
The Female Socket Connectors feature dual cantilevered contacts insuring good electrical contact when inserted into a header. The design provides two surfaces for wiping action which will remove any oxides or dirt that may have built up on the contacts.

FAST Alpha Connectors simultaneously terminate up to 50 conductors in seconds.

LOW COST Simultaneous termination reduces labor cost and error by eliminating the need for individual crimping and stripping conductors.

RELIABLE Alpha's patented off-set tine design pieces, separates, strips the insulation from the conductor and holds it under tension, assuring a gas-tight connection. Each tine is micro-etched to remove any burrs or rough edges which could sever strands of the conductors.

UNIQUE PACKAGING Alpha DIP, PCB and Female Socket Connectors are packaged in specially designed clear plastic tubes to protect them in transit and storage. Your connector inventory is easy to check and always in perfect condition. Four connectors are packed in each tube. Header connectors and Card Edge connectors are individually protected in extra-thick airtight clear polyethylene. All connector tubes and bags are then packed in shipping containers for added protection.

DIP CONNECTORS

DIP (Dual-In Line-Package) Connectors are compatible with standard IC component spacing and will mate with standard 14 and 16 pin IC sockets. A low cost hand tool or bench press can be used for assembly. DIP Connectors will accept 28-30 AWG stranded or solid conductors.

SPECIFICATIONS:

Contacts: Phosphor Bronze

Plating: 10μ in. Gold over 50μ in. Nickel

Material: UL 94 V-O flame retardant thermoplastic

Color: Blue

Temperature: −55°C to +105°C

Current Rating: 1 Amp (maximum)

Dielectric Withstand Voltage: Greater than 500 Volts DC at sea level

Insulation Resistance: 5 x 10⁶ Ohms

No. of Pins	Part No.
14	FCC-130-14
16	FCC-130-16

Put-Up: 20 connectors per box, packed in 5 four-pack protective tubes. Also available in bulk pack.

PCB CONNECTORS

The PCB (Printed Circuit Board) Connector is designed to make a permanent connection. It is used where the application calls for the cable to be directly terminated to the Printed Circuit Board. After the cable is crimped onto the connector, the connector is soldered to the PC Board. A detailed hole pattern is shown on the following page. The PCB Connectors will accept 28-30 AWG stranded or solid conductors.

SPECIFICATIONS:

Contacts: 725 Nickel Silver alloy

Material: UL 94 V-O flame retardant plastic

Color: Blue

Temperature: −55°C to +105°C

Current Rating: 1 Amp (maximum)

Dielectric Withstand Voltage: Greater than 500 Volts DC at sea level

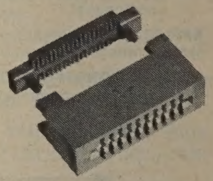
40	FCC-140-40
50	FCC-140-50

Put-Up: 20 conductors per box, packed in 5 four-pack protective tubes.
Also available in bulk pack.

CARD EDGE CONNECTORS



Alpha card edge connectors are mateable with stranded .062″ (1.57mm) printed circuit boards and will mate with boards ranging in thickness from .032″ (.81mm) to .075″ (1.91mm). The connectors will accept 28 or 30 AWG solid or stranded conductors on .050″ (1.27mm) centers providing a direct, reliable access to PCB pads on .100″ (2.54mm) centers. Alpha card edge connectors are available with and without mounting flanges.

Designed for use with female socket connectors with strain relief. (F.C.C. — 110 Series)

Put-Up: 10 per box, individually packaged. Also available in bulk pack.

ASSEMBLY TOOLS

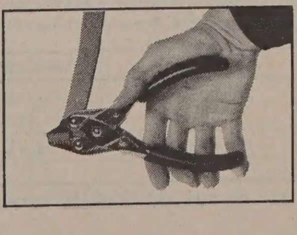
Alpha has designed the easiest to use assembly system available. One universal adaptor accepts **all** connectors without additional components or adjustments. Any Alpha connector of any size can be inserted and crimped in seconds. The Alpha flat cable system offers you this feature. It will save valuable time, particularly in the operations where a variety of short run or complex harnesses are used.

A low cost hand tool designed to accept DIP Connectors is also available. Ideal for field replacement.

FCT-10 Bench Press complete with Universal Adapter, designed to accept all Alpha Connectors.

Part No. FCT-60 Universal Adapter adapts other bench presses to the Alpha System without modification.

Part No. FCT-30 designed to accept Alpha 14 and 16 pin DIP Connectors.



DESIGNER KIT

The designer kits make it easy to have available all the components needed to make a wide range of flat cable assemblies. It is ideal for use in schools, research labs and design groups for prototype applications.

alpha
FLAT CABLE

The Alpha System Designer Kit, FCT-80, includes an assortment of 57 styles of connectors, flat cable and a bench press with universal adapter. You get 248 connectors, representing Alpha's complete line of DIP, PCB, Card Edge, Female Socket and Header Connectors; 100 feet of 50 conductor flat cable; and a bench press with Alpha's exclusive universal adapter. The Designer Kit is packaged in its own storage cabinet, made with a gray baked enamel finish and heavy-duty welded steel frame. The molded styrene drawers are virtually unbreakable and will not crack, break or dent.

alpha SHRINKABLE TUBING

IRRADIATED POLYOLEFIN SHRINKABLE TUBING

MIL-I-23053/5
UL RECOGNIZED COMPONENT*
AMS-3636B, 3637B

The single most widely used type of FIT Shrinkable Tubing, FIT-221 is manufactured from irradiated cross-linked polyolefin. FIT-221 is an all-purpose tubing with excellent physical, chemical and electrical properties. It meets the most stringent military and industrial requirements for a highly reliable, thin wall insulation.

CHARACTERISTICS: High resistance to fungus and chemicals. Self-extinguishing. Will not crack or peel.

APPLICATIONS: General purpose insulation, strain relief, jacketing material and as component insulation. Material is easily and permanently marked.

SPECIFICATIONS: Operating Temperature: −55°C to +135°C. Shrinkage Temperature: 135°C. Tensile Strength: 2500 psi. Ultimate Elongation: 400%. Longitudinal Shrinkage: 5% maximum. Dielectric Strength: 1300 volts/mil. Non-flammable — self-extinguishing. Specific Gravity: 1.3 maximum.

IRRADIATED VINYL SHRINKABLE TUBING

MINIMAL LONGITUDINAL SHRINKAGE
MIL-I-23053/2, AMS-3582

A specially formulated polyvinylchloride tubing, that is mechanically strong, extremely flexible and significantly different from non-irradiated heat shrinkable tubing. Unlike non-irradiated PVC tubing, FIT-105 shrinks evenly and will not split when shrunk. Non-irradiated tubing has a much greater waste factor, with longitudinal shrinkage approximately 20%. FIT-105 will shrink less than 10% of its original length.

CHARACTERISTICS: Extremely flexible. Will not cold flow or melt. Easily marked.

SHRINKAGE RATIO: To 50% of original size (2:1) when temperature of 175°C (347°F) is applied.

Controlled shrinkage within seven seconds at 166°C (325°F).

LONGITUDINAL SHRINKAGE: Less than 10%.

APPLICATIONS: Jacketing of cable harnesses, insulation and covering of components, bus bar insulation, tab disconnects, jacketing of cable cores with many of the qualities of the finest extruded plastic jackets.

SPECIFICATIONS: Temperature Operating Range: −35°C to +105°C. Minimum Shrink Temperature: 175°C. Tensile Strength: 2600 PSI. Elongation: 250%. Dielectric Strength: 750 volts/mil. Flame Resistance: Non-burning. Fungus Resistant; Fluid Resistant To: Hydrocarbons, solvents, aqueous solutions, acids, bases.

PVC AND TFE TUBING

alpha

PVC-105 POLYVINYLCHLORIDE PLASTIC TUBING

UL LISTED, ASTMD-876, D-9222
MIL-I-6310 TYPE F, FORM U, GRADE C, CLASS 1, CATEGORY 1

DESCRIPTION: The superior mechanical, thermal, and electrical properties of Alpha PVC-105, coupled with its economical cost have led to an ever increasing use of this all-purpose insulating material. Another major advantage of Alpha PVC-105 is its high degree of flexibility, which is maintained even under severe environmental conditions.

Rated for temperatures as high as 105°C, PVC-105 has a high dielectric strength that remains unaffected by increasing temperature throughout its range. PVC-105 maintains a high resistance to the agents of heat, oil, chemical corrosion and fungi with no loss in tensile strength, or flexibility. Other features include an exceptional resistance to abrasion and indefinite shelf life.

Alpha PVC-105 is compounded with first quality, non-migratory resinous type plasticizers. Carefully selected stabilizers and modifiers added in the manufacturing process, counteract chemical and environmental degradation. Under adverse conditions Alpha PVC-105 retains its flexibility which permits it to cling to and protect irregular shapes. An unusually simple to handle insulating material, PVC-105 "snakes" well under all environmental conditions.

APPLICATIONS: Designed and manufactured for general electronic, aircraft and electrical applications involving temperatures as high as 105°C. Especially useful to protect wires and cables subject to abrasion or where a flexible tubing with a high degree of resistivity to oil, chemicals or solvents is necessary.

CUT-PIECES

Pre-cut, ready to use tubing pieces in ½″ and 1″ lengths are available from stock. Cut pieces are available from stock in packages of 100, 500, 1000 pieces. When ordering specify Alpha No., add suffix CP, lgth. of cut piece, ½″ or 1″ and quantity (100, 500, 1000).

TFT 200-250-300-400 EXTRUDED TEFLON TUBING (TFE)

MIL-I-22129C, AMS-3651B, 3655, 3653 — FED. SPEC. P-403A
OPERATING TEMPERATURE: −65°C TO +260°C

Alpha Teflon Tubing offers all the unique thermal, electrical and mechanical properties of Teflon. Teflon Tubing is rated for continuous operation at 260°C and retains an exceptional toughness and flexibility throughout its range. At high frequencies, the dielectric strength of Teflon is many times that of other insulating materials. Teflon Tubing is completely inert and has zero moisture absorbtion. Standard wall Teflon (TFT-250) has the same characteristics as thin wall tubing (TFT-200) but is used where higher dielectric values and additional mechanical strength is required.

CHARACTERISTICS: Operating Temperature: −65°C to +260°C. High dielectric strength. Chemically inert. Zero moisture absorbtion.

APPLICATIONS: Insulation of components, connectors, all electrical and electronic apparatus requiring high thermal insulation and superior dielectric qualities.

SPECIFICATIONS: Tensile Strength: 5000-75000 PSI. Completely non-flammable. Min. Vol. Res.: 10^{17} Ohm-cm. Ultimate Elongation: 300-500%. Dielectric Strength: 1400V/Mil. Dielectric Constant: 2.2. Abrasion Resistance: Fair.

alpha ZIPPER TUBING

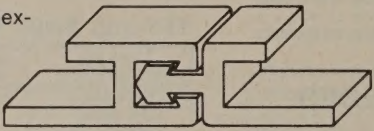
ALPHA ZIPPER TUBING

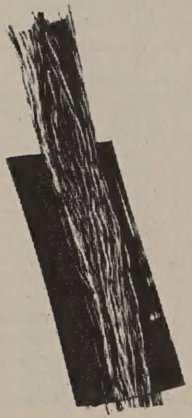
UL Recognized Component — Easy to Use
Ideal for Prototypes — Short Run Cables
Adds Extra Mechanical Protection
Eliminates Tape-Wrapping or Other "Make-Do" Jacketing Material

Alpha Zipper Tubing allows you to jacket any group of wires or cables in just seconds. It is the ideal jacketing material for all short run and prototype cable applications. Zipper tubing is ideal for use in the plant, on the job, in the field or anywhere extra protection or a short run or prototype cable jacket is needed. needed.

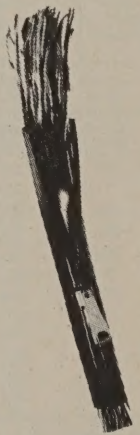
Zipper Tubing is supplied on a spool and consists of a plastic jacket with matching tracks on each side. When the zipper tubing is formed into a circular shape, the two tracks at each end interlock to form a continuous and circling cable jacket. Closure of zipper tubing is simplified by use of a slide that matches the track and will lock continuously as it is pulled. The end result is a permanent jacket or protective cover.

Alpha Loc-Trac® provides a permanent, flex-resistant seal. This track will not pop open even when the jacketed material is bent in a U-shape. It requires no sealant or any adhesive to hold together.

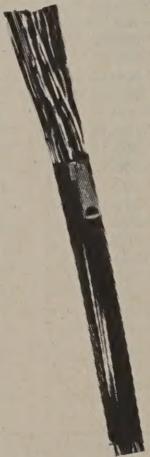




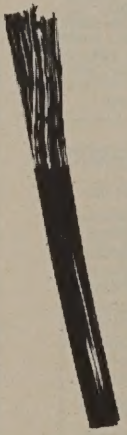
Place wire to be covered as flat tubing.



Wrap tubing around wires.



Zip up with slider provided.



Wires are now jacketed.

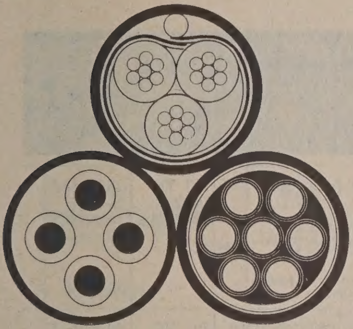
QUICK CUSTOM CABLE

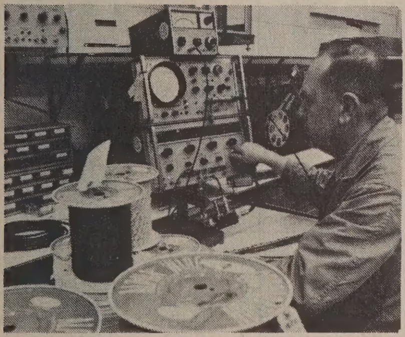
alpha

The special or prototype cable you need — From one foot to production requirements — Manufactured and delivered faster than you ever thought possible.



QCC IS

- THE AVAILABILITY OF THE THOUSANDS OF IN-STOCK ITEMS IN THIS CATALOG TO CONSTRUCT THE CABLE YOU NEED.
- THE KNOW-HOW THAT COMES FROM 51 YEARS IN MANUFACTURING
- THE ESSENTIAL MILITARY, COMMERCIAL AND UL APPROVALS.
- THE SPECIALIZED EQUIPMENT TO MANUFACTURE CUSTOM CABLE OF THE HIGHEST QUALITY.
- THE EXPERIENCED PERSONNEL TO HELP YOU IN DESIGNING YOUR CABLE.



A specially prepared customer cable specification sheet may be obtained from Alpha. We can also work from your sketch or blueprint.

Our QCC design department is anxious to work with you in designing cable for maximum efficiency at minimum cost.

QUICK — Alpha can manufacture and deliver special cable constructions faster than you ever thought possible — overnight in some instances. CUSTOM — we can make virtually any type of cable you need — and in quantities from one foot to thousands of feet. And the QC part of QCC means just what it says — **QUALITY.** All cable is thoroughly tested for all electrical, mechanical and appearance parameters by our fully equipped quality control laboratory.

Alpha offers you more in-stock military specification and UL wire and cable conductors than any other source in the world. Combine this with our cable engineering manufacturing and test facilities, and you have the answer to all your special, prototype and custom cable needs.

BELDEN | shielded instrumentation cables

INSTRUMENTATION CABLES

Instrumentation cable provides the vital communications link between sensing devices and read-out equipment. Because of the many and diverse conditions of environment and stress under which instrumentation cables must transmit information—in usable form, without distortion or change—cable characteristics should always be carefully matched with the specific requirements of the particular application.

The scientific medical and industrial uses of instrumentation cable are vast and ever growing. Some of the common uses for instrumentation cable are in the measurement of pressure, speed, resistance and temperature.

Belden manufactures a wide variety of precision instrumentation wire using several types of insulating materials, conductors and shields to meet a wide variety of electrical, physical and thermal requirements.

Many Belden Instrumentation Cables are unique in the field and have been engineered for specific application problems.

22 AWG Tinned copper, vinyl insulated, twisted pairs, each pair and its drain wire under BELDFOIL aluminum-polyester shield, overall chrome vinyl jacket. 300 Volts suggested working voltage.

Insulation resistance between shields. 100 megohms/M'nom. Capacitance between adjacent shields. 115 pF/ft. nom. Voltage breakdown between adjacent shields. 1500 volts nom. Working voltage between adjacent shields. 50 volts max.

Vinyl insulation is used for ease of stripping and soldering. Recommended for audio frequency applications requiring excellent circuit isolation.

Stranded tinned copper, vinyl insulated, clear nylon jacket, conductors cabled, tinned copper braid shield, white vinyl jacket.

Suggested working voltage—600 volts

SHIELDED CONTROL CABLE

Recommended for applications where remote switching of video camera function is required.

MULTIPLE PAIR UNSHIELDED SOUND AND CONTROL CABLES

TYPICAL APPLICATION: Balanced line sound systems. Made with 80°C vinyl plastic compounds for high dielectric strength and the best physical properties, such as free stripping, small diameter and tear resistance. It also resists the effects of water, sun, oil, grease and ozone. The conductors are paired with a short-lay twist for conductor balance, providing a quiet circuit, minimizing cross talk

SPECIAL DATA, INSTRUMENTATION, P.O.S. AND COMPUTER CABLES

These cables are intended for those applications with special requirements such as miniature size, low capacitance for minimum signal distortion or good electrical characteristics. They are recommended for both analog and digital systems. Special cable designs are available to satisfy unique physical and electrical requirements.

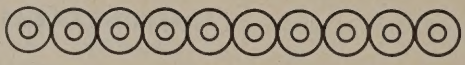
Tinned copper, polypropylene insulated, conductors cabled, BELDFOIL aluminum-polyester shield overall, 22 AWG stranded tinned copper drain wire, black High Density Polyethylene jacket.

★*New Item.*
Manufactured to current Government specifications and subsequent revisions.

**Capacitance between conductors.*
***Capacitance between 1 conductor and other conductor connected to shield.*
•Belden U.S. Patent 3,032,604.

BELDEN | flat cable

BELDEN BONDED FLAT CABLE



UL LISTED 2697

Belden Bonded Flat Cable meets Underwriter Laboratories, Inc. Listed Style No. 2697.
Passes FR-1 Vertical Flame Test.

Conductors:
Available in stranded tinned copper conductors. 10 to 30 conductors per cable.
22 AWG STRANDED
24 AWG STRANDED
26 AWG STRANDED

Temperature Rating: 80°C.

Voltage Rating: 300V.

Conductor Insulation:
.010" (.25mm).

Color Code:
Brown / Red / Orange / Yellow / Green / Blue / Violet / Grey / White / Black. Colors repeat.

Lengths:
Standard 100' put-ups. Other lengths available on a special order basis.

BELDEN LAMINATED FLAT CABLE

UL LISTED 2651

Vinyl jacket 300V-105°C. Underwriters Laboratories Inc. Listed Style No. 2651. Passes FR-1 Vertical Flame Test.

Conductors:
Available in tinned copper stranded conductors. 10 to 60 conductors per cable.
28 AWG STRANDED

Temperature Rating: 105°C

Voltage Rating: 300V

Color Code:
Blue line on edge of cable indicates "polarity."

Lengths:
Standard 100' put-ups. Other lengths available on a special order basis.

retractile cables and cords | BELDEN

RETRACTILE CORDS

Retractile cords keep telephone and microphone cables from tangling and cluttering desk tops, communications consoles and the front seats of motor vehicles. Belden manufactures a full line of high quality retractile coiled cord products for a wide number of applications.

Belden retractile cables and cords are used for telephone equipment; ham and citizen band radios; hand and desktop microphones; language lab equipment; musical instruments; mobile controls and mobile communications equipment and for a variety of assorted industrial applications.

The specially designed conductors and shields of Belden retractile cords are constructed to withstand rugged use and to minimize replacement frequency.

Belden's full line of retractile cords shown in this catalog will meet most of your requirements. For any custom or unusual cord and cable application contact Belden's Special Custom Design Center (317) 966-6681.

BELDEN | microphone and shielded power supply cables

MICROPHONE CABLES

Belden Microphone Cables are designed for flexible service at audio frequencies. They are used not only for microphones, but also for home entertainment equipment, instruments, tape recorders and shielded power supplies.

Shielded single conductor cables are used in high impedance systems, while multiple conductor cables are used in low impedance applications.

All cables are precision-engineered and manufactured to transmit clear signals and to cancel out hum pick-up and cross-talk interference. They are designed to withstand the flexing and normal abuse of studio, laboratory and home usage.

CONDUCTOR COLOR CODING: (1) Clear, (2) Black, (3) Red, (4) Green, (5) Blue.

Tinned copper, polyethylene insulated, conductors cabled, rayon braid, tinned copper braid shield, chrome vinyl jacket.

PLASTIC CABLES RECOMMENDED FOR: Lower capacitance, lower loss, greater ozone and oil resistance, lighter weight, smaller diameter.
RUBBER CABLES RECOMMENDED FOR: Greater abrasion and impact resistance and extra limpness so cable will lie flat on stage or studio floor.
NEOPRENE AND HYPALON CABLES RECOMMENDED FOR: Outside use, cold weather applications. Resistant to effects of sun, oil and ozone.

**Capacitance between conductors. **Capacitance between 1 conductor and remaining conductors (if any) connected to shield.*

†Passes the FR-1 vertical flame test.

BELDEN

multiple conductor unshielded cables and fire alarm cables

ELECTRICAL POWER AND CONTROL CABLES—MIL-C-3432

Electrical power and control cables intended for use in electrical and electronic applications. These cables are intended for military applications to transmit power and control signals. These medium duty cables are suitable for small portable tools, sound equipment, radio receivers and motor leads. The tough flexible jacket is resistant to the mechanical abuse and extreme humidity and temperature conditions normally encountered in the intended applications.

Tinned copper conductors, rubber insulated, cabled with fillers, cotton serve, black rubber jacket.
Conductor color coding: (1) White, (2) Black, (3) Green.
Manufactured to current Government specifications and subsequent revisions.
For Underwriters Laboratories Inc. Listed power cables see pages 32-33.

FIRE ALARM CABLES

These cables meet the physical and dimensional requirements of UL subject 13, low energy circuit cable. These designs are rated at 105°C and marked as "Limited Energy Circuit Cables" in the **low energy circuit cable category.** They are suitable for fire protection alarm circuit wiring.

power cords | **BELDEN**

Power Cords Meet Applicable O.S.H.A. Requirements

Belden Power Cords are designed to meet the special electrical needs and environmental requirements of a broad range of specific light and heavy duty applications in home and industry. All cords are built to withstand rugged everyday wear under predictable conditions of use.

TYPE SV RUBBER AND SVT VINYL

Three conductor SV and SVT cords may now be used on some small tools, business machines and instruments.

BREEZE
ILLINOIS INC.

the wire protectors

BREEZE-ILLINOIS, INCORPORATED
Designs and Manufactures
Interconnector assemblies
that are Shielded Against
EMI, EMP, RFI, Nuclear
Radiation, Compromising
Eminations (TEMPEST),
Mechanical Stressing,
Chemical Environments,
Weather and Temperature

Breeze-Illinois has developed a complete line of shielded interconnectors that assure wiring integrity in every situation. Trade marked **BI-PRO** (for **B**reeze-**I**llinois **PRO**tected) our products meet and exceed all applicable Government, Military and NASA specifications. Some are super tough to withstand the punishment of continuous flexing and heavy work. Others are light weight to be compatible with aerospace requirements. High temperature Bi-Pro cable withstands hostile environments of over 1000°. And, all Bi-Pro interconnectors feature superior shielding against the complete spectrum of electromagnetic interference, radiation and Tempest.

The numbered suffix to the Bi-Pro name indicates the material, construction and capability of the interconnector, for example:

Bi-PRO 175, a metallic convoluted tubing of Brass with a Bronze braid provides EMI protection for electrical wiring on communication and navigation systems. Bi-Pro 175 is also used as a protected interconnection between computers and machine tools. Bi-Pro 175 and 223 shields ignition systems on jet and industrial engines against interference and for fire protection.

Bi-PRO 223 consists of a 50/50 nickel-iron inner core and a stainless steel braid. It provides TEMPEST and EMI protection against low frequency fields.

Bi-PRO 237, manufactured of 80/20 nickel-iron alloy is used on submarines to prevent interference between the power system and super-sensitive gyros and/or sonar detection equipment.

Bi-PRO 811 is a non-metallic Teflon, helically convoluted tubing with stainless steel over-braid. It provides protection for wiring systems on landing gear assemblies for commercial and military aircraft.

Bi-PRO 827 is a non-metallic Teflon annular corrugated tubing with tinned copper braid to provide an ultra-flexible EMI protected interconnection or umbilical between moving devices.

The name Breeze-Illinois is synonymous with wiring protection.

Our 40 years experience in manufacturing our own hardware such as coupling nuts, backshell assemblies, junction boxes, branches and connectors has established the name Breeze as the standard in the protected cable assembly field. We are highly competitive and best qualified to construct custom designed assemblies for our customers - from one assembly to thousands of copies. If you wish to assemble your own interconnectors, we manufacture individual components and can supply many off-the-shelf items for your interconnector needs. We also braid textiles such as Nylon and Dacron to wire bundles from your simplest design to your most complicated system.

We have a nationwide network of sales representatives anxious to serve you - Call or write us today.

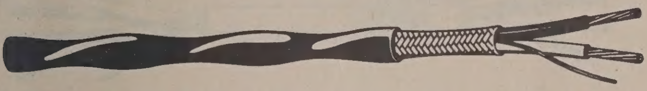
SHIELDED AUDIO CABLE

BRAID SHIELD, PVC JACKET, DRAIN WIRE



Stock Color: Black jacket.

Construction: Tinned copper conductors, color-coded PVC insulation, conductors cabled, tinned copper braid shield, tinned copper drain wire, PVC jacket overall.

Specifications: −20°C to +60°C. Entire cable passes FR-1 vertical flame test.

Color Code: Black, Red.

Applications: Shielded cable for recording studios, radio transmitters, sound systems, broadcast use.

Put-up: 100′, 500′ and 1000′ spools (other Put-ups also available).

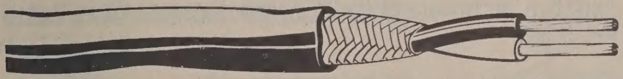
BRAID SHIELD, PVC JACKET



Stock Color: Chrome gray jacket.

Construction: Tinned copper conductors, color-coded PVC insulation, conductors cabled, tinned copper braid shield, PVC jacket overall.

Specifications: −20°C to +60°C. Entire cable passes FR-1 vertical flame test.

Color Code: Black, Red, White, Green.

Applications: Shielded cable for recording studios, radio transmitters, sound systems and electronic circuits where shielding is required.

Put-up: 100′, 500′ and 1000′ spools (other Put-ups also available).

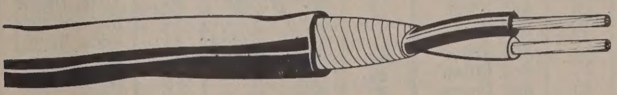
SPIRAL SHIELD, PVC JACKET



Stock Color: Chrome gray jacket.

Construction: Tinned copper conductors, color-coded PVC insulation, conductors cabled, tinned copper spiral wrapped shield, PVC jacket overall.

SPIRAL SHIELD, PVC JACKET (CONT'D)

Specifications: −20°C to +60°C. Entire cable passes FR-1 vertical flame test.

Color Code: Black, Red, White, Green, Yellow, Blue.

Applications: Cable for recording studios, radio transmitters, sound systems and electronic circuits where shielding is required. Spiral shield allows ease of pigtail soldering.

Put-up: 100′, 500′ and 1000′ spools (other Put-ups also available).

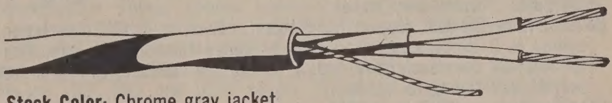
MYLAR/ALUMINUM FOIL SHIELDED AUDIO CABLE



Stock Color: Chrome gray jacket.

Construction: Tinned copper conductors, color-coded polyethylene insulation, conductors cabled, wrapped with Flexfoil® mylar supported aluminum foil shield with foil facing to outside, stranded tinned copper drain wire, PVC jacket overall.

Specifications: −20°C to +60°C. Jacket only passes FR-1 vertical flame test.

Color Code: Black, Clear, Red, Green.

Applications: 100% shielded cable for recording studios, broadcast sound systems and electronic circuits where RF shielding is required.

Put-up: 100′, 500′ and 1000′ spools (other Put-ups also available).

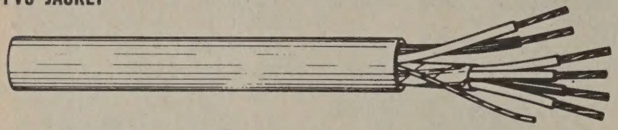
SPECIAL SHIELDED AUDIO & COMMUNICATION CABLE
PVC JACKET



Stock Color: Chrome gray jacket.

Construction: Tinned copper conductors, color-coded PVC insulation, 4 conductors cabled, Flexfoil® aluminum/polyester shield over 4 cabled conductors, 22 gauge TC drain wire, 2 conductors unshielded, PVC jacket overall.

Specifications: −20°C to +60°C.

Color Code: Shielded — Black, Green, Red, Yellow.
Unshielded — Blue, White.

Applications: Special cable for audio and communications use.

Put-up: 100′, 500′ and 1000′ spools. (Other put-ups also available.)

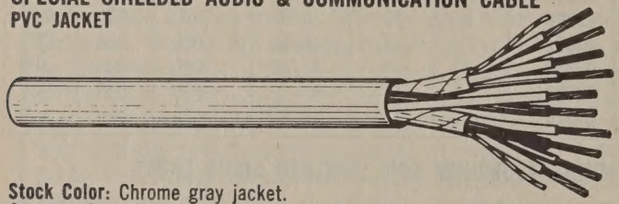
SPECIAL SHIELDED AUDIO & COMMUNICATION CABLE
PVC JACKET



Stock Color: Chrome gray jacket.

Construction: Tinned copper conductors, color-coded PVC insulation, cabled in 2 quads, each quad with 24 gauge tinned drain wire, Flexfoil® shield over each quad, plus 2 unshielded conductors, PVC jacket overall. Foil facing to inside.

Specifications: −20°C to +60°C.

Color Code: 1st Quad — Gray, White, Blue, Green.
2nd Quad — Red, Brown, Yellow, Orange.
Unshielded — White, Blue.

Applications: Special cable for audio and communications use.

Put-up: 100′ and 500′ spools. (Other put-ups also available.)

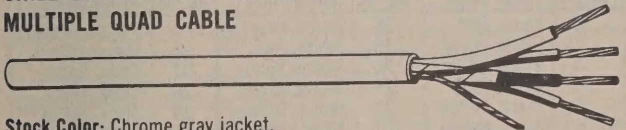
Color Code: Black, white, red, green.

SHIELDED INSTRUMENTATION/COMMUNICATION MULTIPLE QUAD CABLE



Stock Color: Chrome gray jacket.
Construction: Tinned copper conductors. Cat. No. 1340 color-coded polypropylene insulation. Cat. No. 1331 color coded PVC insulation. Cat. No. 1343 color coded polyethylene insulation. Flexfoil® aluminum foil/polyester shield (foil facing to outside) over 2 conductors, stranded tinned copper drain wire (Cat. No. 1340 - 24 gauge, Cat. No. 1331 and 1343 - 22 gauge), one shielded pair and 2 singles cabled on common axis to reduce O.D., PVC jacket overall.
Specifications: −20°C to +60°C. Suggested working voltage: Cat. No. 1340 — 200V, Cat. No. 1331 and 1343 — 350V, Cat. No. 1331 entire cable passes FR-1, Cat. Nos. 1340 and 1343 jacket only passes FR-1.
Color Code: Shielded – Black Red; Unshielded – Green White.
Applications: Special cable for audio, communications and instrumentation use.
Put-up: 100′, 250′, 500′ and 1000′ spools (other Put-ups also available).

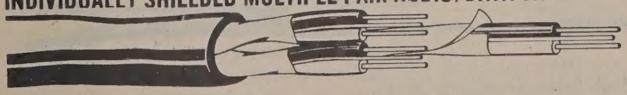
INDIVIDUALLY SHIELDED MULTIPLE PAIR AUDIO/DATA CABLE



Stock Color: Chrome gray jacket.
Construction: Tinned copper conductors, color-coded polypropylene insulation, cabled in pairs, each pair and its drain wire under Flexfoil® aluminum foil/polyester shield, PVC jacket overall.
Jacket: +60°C. Conductors: +105°C. Suggested working voltage: 22 gauge — 300V; 20 gauge — 350V: 18 gauge — 400V. 100 Megohms/M insulation resistance between shields. 115PF/FT. capacitance between adjacent shields. 1500V voltage breakdowns between adjacent shields. 50V working voltage between adjacent shields. 22 gauge and 20 gauge series — 22 gauge drain wire; 18 gauge series — 20 gauge drain wire. JACKET ONLY PASSES FR-1 VERTICAL FLAME TEST.
Color Code: Chart I, Page 197.
Applications: For audio RF and pulse applications requiring superior circuit isolation. The use of polypropylene insulation results in excellent high frequency properties and mechanical durability.
Put-up: 100′, 500′ and 1000′ spools.**

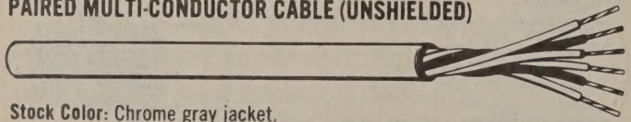
PAIRED MULTI-CONDUCTOR CABLE (UNSHIELDED)



Stock Color: Chrome gray jacket.

Construction: Tinned copper conductors, color-coded PVC insulation, conductors paired with a short lay twist for conductor balance providing a circuit free from cross talk, pairs cabled, PVC jacket overall.

Specifications: −20°C to +60°C. Entire cable passes FR-1 vertical flame test.

Color Code: See Chart II, this page.

Applications: Heavy-duty intercom and audio cable for intercom systems, signal systems, annunciators, nurse's call systems, multiple speaker systems, control circuit cables.

Put-up: 100′, 500′ and 1000′ spools.**

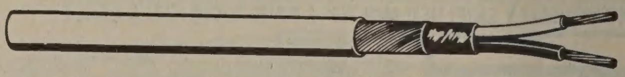
TWO-CONDUCTOR MICROPHONE CABLE

SPIRAL SHIELD



Stock Color: Silver gray jacket.

Construction: Tinned copper conductors, color-coded polyethylene insulation, cabled with fillers, textile wrap, spiral tinned copper shield, high gloss Flexlife® jacket.

Specifications: −20°C to +60°C.

Color Code: White, Black.

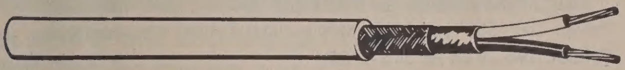
Applications: For use with low impedance microphones. Flexlife jacket provides extreme flexibility, high abrasion resistance and outstanding appearance.

Put-up: 100′, 250′, 500′ and 1000′spools (other Put-ups also available).

Columbia No.	Impedance	AWG (Stranding)	Nom. Insul. Thick. In.	Jkt. Thick. In.	Nom. O.D. In.
01323	Low	22 (16/34)	.025	.025	.225
01328	Min. Low	24 (10/34)	.016	.030	.190

COLUMBIA ELECTRONIC CABLES • Dept. EM, 11 Cove St., New Bedford, Mass. 02744 • Phone: (617) 999-4451 • Telex: 92-9411

BRAIDED SHIELD



Stock Color: Silver gray jacket.

Construction: Tinned copper conductors, color-coded polyethylene insulation, cabled with fillers, textile wrap, braided tinned copper shield, high gloss Flexlife jacket.

Specifications: −20°C to +60°C.

Color Code: White, Black.

Applications: For use with low impedance microphones. Flexlife jacket provides extreme flexibility, high abrasion resistance and outstanding appearance.

Put-up: 100′, 250′, 500′ and 1000′ spools (other Put-ups also available).

Columbia No.	Impedance	AWG (Stranding)	Nom. Insul. Thick. In.	Jkt. Thick. In.	Nom. O.D. In.
01322	Low	22 (16/34)	.025	.025	.235

ONE-CONDUCTOR MICROPHONE CABLE
SPIRAL SHIELD

Stock Color: Silver gray jacket. (Cat. No. 01359 available in black jacket.)

Construction: Single conductor 3/33 strands tinned copper, 4/33 strands tinned copperweld, white foam polyethylene dielectric, spiral tinned copper shield, high gloss Flexlife® jacket.

Specifications: −20°C to +60°C.

Applications: For use with high impedance microphones and hi-fi interconnecting cables. Flexfoam dielectric (foam polyethylene) provides as much as 35% lower capacitance than the best standard solid polyethylene dielectric microphone cables. Flexfoam cables are the most flexible plastic microphone cable available, with limpness almost equal to rubber and with better abrasion resistance.

Put-up: 100′, 250′, 500′ and 1000′ spools (other Put-ups also available).

Columbia No.	Microphone Type	Thick. In.		Nom. Cap. MMF/Ft.	Nom. O.D. In.

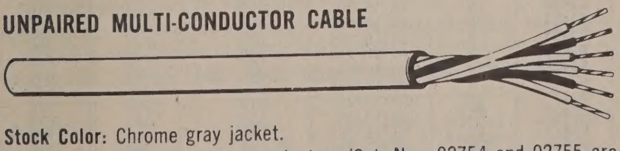
01395	Crystal	.075	.030	13	.245
01314*	Crystal	.040	.020	25	.155

* Solid polyethylene dielectric.

UNPAIRED MULTI-CONDUCTOR CABLE



Stock Color: Chrome gray jacket.

Construction: Tinned copper conductors (Cat. Nos. 02754 and 02755 are bare copper), color-coded PVC insulation, PVC jacket overall, conductors cabled.

Specifications: −20°C to +60°C. All items pass FR-1 vertical flame test.

Color Code: Chart III.

Applications: PA systems, unbalanced intercom systems, interconnecting cables, remote control circuits, telephones, low-voltage relay control cables.

Put-up: 100′, 500′ and 1000′ spools (other Put-ups also available).

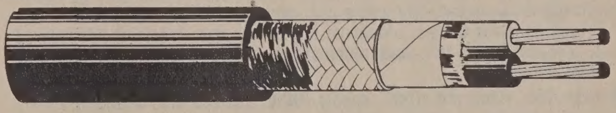
6	Blue	15	Red/Black	24	White/Violet
7	Brown	16	White/Black	25	White/Black/Red
8	Yellow	17	White/Red		
9	Purple	18	White/Green		

SHIELDED CONTROL CABLE



Stock Color: Black jacket.

Construction: Tinned copper conductors, color-coded rubber insulation, cabled, filled where required, clear mylar wrap, tinned copper braided shield, cotton wrap, neoprene jacket or rubber jacket.

Specifications: −20°C to +60°C. Suggested working voltage 350V.

Color Code: Chart IV.

Applications: Control circuits, video and audio interconnecting cables, broadcast and studio use. Precision engineered to prevent cross-talk and eliminate hum pick-up. Neoprene and rubber jackets are resistant to impact and abrasion and have extra limpness. For outside installations, neoprene is recommended being resistant to oil, ozone, moisture and sunlight.

Put-up: 100′, 500′ and 1000′ spools (other Put-ups also available).

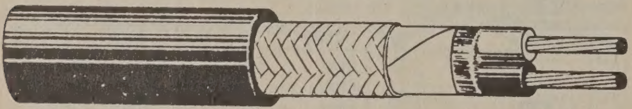
POLYETHYLENE INSULATION AND PVC JACKET



Stock Color: Chrome gray jacket.

Construction: Tinned copper conductors, color-coded polyethylene insulation, cabled, filled where required, clear mylar wrap, tinned copper braid shield, PVC jacket overall.

Specifications: −20°C to +60°C. Suggested working voltage 600V. Jacket only passes FR-1 vertical flame test.

Color Code: Chart IV.

Applications: Low capacity cable for control circuits, video and audio interconnecting cables, broadcast and studio use. Precision engineered to prevent cross-talk and eliminate hum pick-up. Low capacitance, light weight.

Put-up: 100′, 500′ and 1000′ spools. (Other put-ups also available.)

UL HOOK UP WIRE STYLE 1015, CSA TYPE TEW

Stock Colors: See table below.
Construction: Tinned copper conductor, color-coded PVC insulation.
Specifications: —40°C to +105°C, 600V. Resistant to acids, oil, alkalis, flame, moisture and fungus. Entire cable passes FR-1 vertical flame test.
Color Code: Chart VI.
Applications: Internal wiring of electronic and electrical equipment.
Put-up: 100′ and 1000′ spools (other Put-ups also available).

UL HOOK UP WIRE UL STYLE 1007 CSA TR-64

Stock Colors: See table below.
Construction: Tinned copper conductor, color-coded PVC insulation.
Specifications: —40°C to +80°C, 300V. Resistant to acids, oil, alkalis, flame, moisture and fungus.
Applications: Internal wiring of electronic and electrical equipment.
Color Code: Chart VI.
Put-up: 100′ and 1000′ spools (other Put-ups also available).

RUBBER TEST LEAD WIRE

Stock Colors: See table below.
Stock Color: Black or Red. (Other colors available on special order.)
Construction: Extra flexible stranded tinned soft annealed copper conductor, color-coded rubber insulation.
Specifications: —20°C to +60°C. All breakdown voltages and suggested working voltages are AC RMS values.
Applications: Test lead wire for use in multimeters, analyzers, oscillators and other applications requiring extra flexible insulated wire.
Put-up: 250′, 500′ and 1000′ spools (other Put-ups also available).

Columbia No.	Color*	AWG (Stranding)	Nom. Insul. Thick. In.	Sug. Working Voltage	Nom. O.D. In.

* Available in red or black; please specify.

PLASTIC TEST LEAD WIRE

Stock Color: Black or red. (Other colors available on special order.)
Construction: Extra flexible stranded tinned soft annealed copper conductor, color-coded extra flexible, high gloss Flexlife® plastic insulation.
Specifications: —20°C to +60°C, 5000V. Insulation resistant to acids, oil, alkalis, flame, moisture and fungus. All breakdown voltages and suggested working are AC RMS values.

Applications: Test lead wire for use in multimeters, analyzers, oscillators, and other applications requiring extra flexible insulated wire. Flexlife plastic insulation is durable and has a high-gloss finish.

PLASTIC TEST LEAD WIRE (CONT'D)

Put-up: 250′ and 500′ spools (other Put-ups also available).

Columbia No.	Color*	AWG (Stranding)	Nom. Insul. Thick. In.	Sug. Working Voltage	Nom. O.D. In.

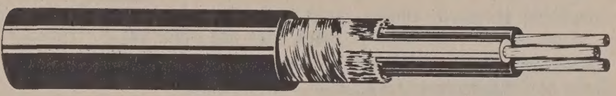
PORTABLE SERVICE AND POWER CORD



Copper: Bare soft annealed. Stranding per ASTM-B-174 and ASTM-B-173.
Insulation of inner conductors: Synthetic Rubber (SBR) per IPCEA Pub. No. S-19-81 (4th Edition) Part 3.7.1 (SBR); N.E.M.A. Publication No. WC-3-1964; and UL Subject 62, Class 3.
Temperature Range: 60°C (140°F) to —37°C (—35°F).
Color Code Conductors: 2 conductor — Black, White; 3 conductor — Black, White, Green; 4 conductor — Black, White, Green, Red.
Foundation: Conductors twisted together with fillers to make a round core: separator over core.
Neoprene Jacket: Black Neoprene: 60°C (140°F to —37°C (—35°F) per IPCEA Pub. No. S-19-81 (4th Edition) Part 7.7.5.1; NEMA Pub. No. WC-3-1964; ASTM D-752; and UL Subject 62, Class 15.
Rubber Jacket: Black Synthetic Rubber (SBR) 60°C (140°F) to —37°C (—35°F) per IPCEA Pub. No. S-19-81 (4th Edition) Part 7.7.5.1; NEMA Pub. No. WC-3-1964; and UL Subject 62, Class 6.
Jacket Marking: All sizes surface printed* showing gauge, number of conductors, voltage and type.
Neoprene Use: For heavy (SO) and light (SJO) service such as tools, power extensions, motor and welding leads, portable machinery, floor polishers and sanders, battery chargers, portable stage light, garage portable lights, sound equipment, washing machines, refrigerators, sewing machines, and other electrical equipment. Type SVO — for vacuum cleaners, home food mixers, office equipment, and other light duty requirements.
Rubber Use: For heavy (S) and light (SJ) service such as tools, power extensions, motor and welding leads, portable machinery, floor polishers and sanders, battery chargers, portable stage lights, garage portable lights, sound equipment, washing machines, refrigerators, sewing machines, and other electrical equipment. Type SV — For vacuum cleaners, home food mixers, office equipment, and other light duty requirements.
Neoprene Environment: For use in areas where exposed to oil, ozone, grease, chemicals or solvents.
Rubber Environment: Useful cord life is reduced where exposed to oil, ozone, grease, chemicals or solvents. Cords to be used in such environments are Neoprene SO.

PLASTIC JACKET CONSTRUCTION

Copper: Bare soft drawn annealed, Class K stranding per ASTM-B-174 and ASTM-B-173.

Insulation: Polyvinyl chloride, resistant to oils, water, acids, alkalies and ozone. 60°C — UL Class II. Black, gray and white SVT.

Temperature Range: 60°C (140°F) to −20°C (−4°F).

Color Code Conductors: 2 conductor — black, white.
3 conductor — black, white, green.

Foundation: Conductors twisted together with fillers to make a round core; separator over core.

Jacket: 60°C. Black, gray or white (SVT) or black (SJT) UL Class II, non marking 60°C (140°F) to −20°C (−4°F) polyvinyl chloride, resistant to oil, water, acid, alkali, ozone and abrasion. Jacket meets specifications per ASTM-D-1047. SVT jacket ribbed to help cord remain clean.

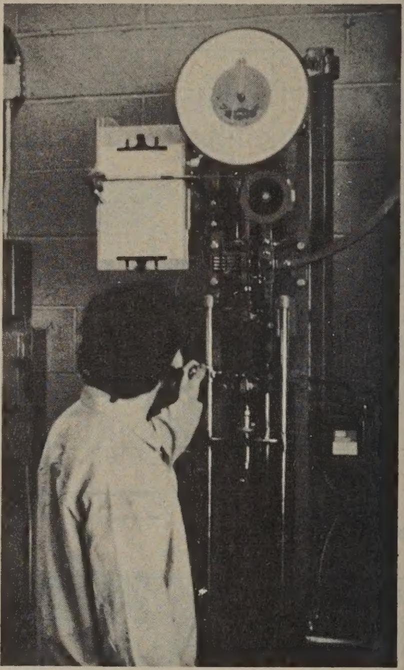
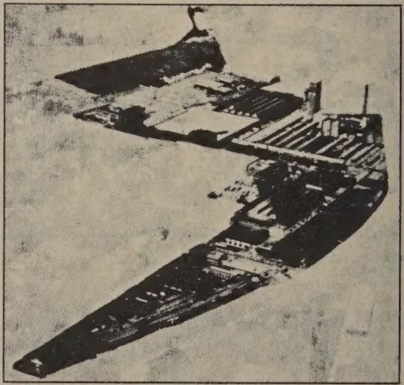
RESEARCH AND DEVELOPMENT... PRODUCTION...





Consolidated's recognized reputation for high-quality merchandise and its own engineering and testing facilities are supported by the modern research and development laboratories at Cyprus' R&D Center. Here metallurgists, electrical engineers, chemists and scientists of many disciplines combine their talents to develop better products for you.

The never-ending search for new and better materials for Consolidated Wire products is a way of life at Cyprus' R&D Laboratories. This is where the quality control we're so proud of begins.

Supporting this program of research and development at the laboratory level, every foot of wire that leaves the plant must pass rigid inspections. These products meet or exceed all relevant Underwriters Laboratories, IPCEA, NEMA and other standards.

UL LISTED DATA, INSTRUMENTATION AND SOUND SYSTEM CABLES

STANDARD SPOOL PUT-UP: 100 FT., 250 FT., 500 FT. and 1000 FT.

	Catalog Number	Type	Size & Stranding	Specifications and General Applications	Insul. Thickness (Inches)	Nom. Dia. (Inches)
 EXTENSION WIRING SHIELDED — PLASTIC JACKET	5511	2 Condr.	22 Solid	Tinned copper vinyl plastic insulation, wires twisted together — 1 condr. red — 1 condr. black — and a spiral tinned copper shield with .020″ tubed gray vinyl plastic jacket. UL Style 2095	.015	.170
 PAIRED CABLE SHIELDED — PLASTIC JACKET	5516	2 Pair 4 Condr.	22 7x30	Stranded tinned copper vinyl plastic insulation. 2 pair cabled (4 conductors — 1 pair black & white with braided tinned copper shield mylar tape — 1 pair black & brown unshielded — both pair bunched and .020″ gray vinyl plastic jacket overall. UL Style 2095	.015	.168x .276
 EXTENSION SPEAKERS SHIELDED — PLASTIC JACKET	5568	2 Condr.	22 7x30	Tinned copper vinyl plastic insulation, 2 condrs. — cabled black and red — tinned copper spiral wrapped shield .023″ chrome vinyl plastic jacket. UL Style 2552	.015	.166
	5569	3 Condr.	22 7x30	Tinned copper vinyl plastic insulation, 3 condrs. — cabled black, red, white — tinned copper spiral shield — chrome vinyl plastic jacket. UL Style 2096	.015	.193
	5538	2 Condr.	18 16x30	Stranded tinned copper vinyl plastic insulation, wires twisted together, 1 condr. red, 1 condr. white. Spiral tinned copper shield and .020″ gray vinyl plastic jacket overall. UL Style 2552	.020	.225
	5543	2 Condr.	20 10x30	Same as 5538 1 condr. red — 1 condr. black. UL Style 2552	.020	.185
	5541	2 Condr.	18 16x30	Stranded tinned copper vinyl plastic insulation, wires twisted together. 1 condr. red — 1 condr. white, closely woven braided tinned copper shield and .020″ gray vinyl plastic jacket overall. UL Style 2095	.020	.225
 JUKE BOX SPEAKER CABLE	5547	2 Condr.	24 7x32	Stranded 1 condr. bare copper — 1 condr. tinned copper. 2 condrs. parallel vinyl plastic insulation. Colors: gray, white, brown, clear.	.015	.058x .115
 DUAL CHANNEL AUDIO CABLE FOR STEREO & LANGUAGE LABORATORIES	5587	2 Condr.	24 7x32	Tinned copper conductor. Spiral tinned copper individual shield, .020″ gray vinyl jacket.	.018	.130x .260
 ELECTRIC GUITARS — HIGH IMPEDANCE LAPEL MICROPHONES	5551	1 Condr.	22 16x34	Stranded tinned copper polyethylene insulation closely spiral tinned copper shield with .020″ gray vinyl jacket. UL Style 1107	.020	.135
 INTERCOMMUNICATING SOUND SYSTEM	5556	2 Condr.	19 Solid	Bare copper vinyl plastic insulation, wires twisted together — 1 condr. brown — 1 condr. tan.	.015	.115
	5561	3 Condr.	19 Solid	Same as 5556 — 1 condr. brown — 1 condr. tan — 1 condr. gray.	.015	.132
 INTERCOMMUNICATING SOUND SYSTEM	5557	2 Condr.	19 Solid	Same as 5556 except .025″ outer gray PVC jacket. UL Style 1095	.015	.162
 SHIELDED PAIRED CONTROL CABLE	5901	38 Pair	22 Solid	Tin copper polypropylene insulation. Color coded twisted pairs. Overall mylar aluminum foil shield. 22 AWG (7x30) T.C. drain. .045″ gray plastic jacket.	.008	.600
	5902	51 Pair	22 Solid	Tin copper vinyl insulation. Color coded. Same as 5901 except .050″ gray plastic jacket.	.010	.700

Color Coding For Paired Intercom Cables

PAIRED INTERCOMMUNICATING CABLES COLOR CODING
Identification is simple with Consolidated Intercom Cables because they are all color coded. See chart below.

1. Black paired with Red
2. Black paired with White
3. Black paired with Green
4. Black paired with Blue
5. Black paired with Yellow
6. Black paired with Brown
7. Black paired with Orange
8. Red paired with White
9. Red paired with Green
10. Red paired with Blue
11. Red paired with Yellow
12. Red paired with Brown
13. Red paired with Orange
14. Green paired with White
15. Green paired with Blue
16. Green paired with Yellow
17. Green paired with Brown
18. Green paired with Orange
19. White paired with Blue
20. White paired with Yellow
21. White paired with Brown
22. White paired with Orange
23. Blue paired with Yellow
24. Blue paired with Brown
25. Blue paired with Orange
26. Brown paired with Yellow
27. Brown paired with Orange

TELEMETERING AND DATA SHIELDED CONTROL CABLE

DESCRIPTION: Each conductor bare solid copper, high molecular weight polyethylene insulation, color coded, twisted into pairs, cabled with a non-hygroscopic binder tape .008″ aluminum shield, black polyethylene jacket overall. Operating voltage 300 volts.

Double jacketed types (8306-8420 below), same except for additional inner black polyethylene jacket over binder, and .005″ copper shield, or .010″ aluminum shield.

APPLICATIONS: Remote control of rocket recording data and test-firing control, transmission of signals which telemeter temperature, voltage pressure, etc. control of multiple circuits, measuring devices, quality control equipment, radar antenna. For aerial, duct and conduit installations.

Double jacketed types have higher dielectric strength and suited for direct burial installations.

TELEPHONE AND COMMUNICATION CABLE

AERIAL AND DUCT INSTALLATION — MEETS REA-PE-22

DESCRIPTION: Each conductor bare solid copper, color coded polyethylene insulation, insulated conductors paired, pairs cabled with non-hygroscopic tape wrap, .008″ corrugated aluminum shield, black polyethylene jacket overall.

CHARACTERISTICS: Average mutual capacitance — .083 microfarads/mile. Minimal cross talk.

APPLICATIONS: A tough, long lasting communication cable that can withstand moisture, ultra-violet and weathering.

DESCRIPTION: Each conductor, stranded bare copper, .020″ polyethylene insulation, .010″ polyvinylchloride jacket, over each conductor, color coded, cabled with fillers where necessary, moisture resistant tape, black polyvinylchloride jacket overall. 600 volt operating voltage. Approved per IPCEA-NEMA standards.

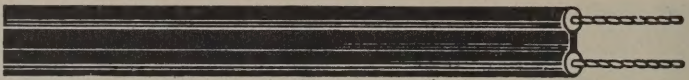
SHIELDED AND UNSHIELDED—"CONCO-FOAM" (Low Loss Foam Polyethylene All Channel Color TV Cable)



Conco-Foam assures excellent VHF, UHF, Color and B/W TV reception in uncongested and fringe regions. Will provide far greater signal than any other unshielded twin lead cable. Assures highest efficiency even when exposed to weathering and atmospheric conditions.

Conco-Foam assures excellent VHF, UHF, Color and B/W TV reception in crowded areas where reception is critical. Mylar-aluminum shielding provides strong and clean signals, eliminating electrical noise and ghost signals. Conco-Foam can be attached to mast, installed in gutters, conduit, or underground.

AWG and Stranding	Color	Nom. O.D. (Inches)	Nom. Velocity of Propagation	Nom. Cap. (Mmf/Ft.)	Nom. Attenuation Per 100′	Spool Put-Up*

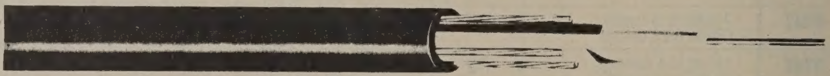
Copperweld, 2 conductors, white Conco-Foam insulation, mylar aluminum foil shield, stranded tin copper drain wire, outer Black polyethylene jacket.

* Spade terminals available with Catalog 4535.

** Furnished individually packed coils.

MATV - CATV COAXIAL CABLE — 75 ohm 82 channel



100% Sweep Tested to provide quality free operation.

Conco-Color—AX is manufactured for distribution systems carrying both UHF and VHF. Cable loss is about half of ordinary RG59/U coax and less than twin lead. Ideal for homes and stores.

KYNAR INSULATED HOOKUP WIRE FOR WIRE WRAP APPLICATIONS

Especially suited for computer, business machine usage and other areas where space is limited. (For automatic point to point application.)

The conductor is OFHC (Oxygen Free High Conductivity) Annealed Copper, Silver Plated.

The insulation is Kynar, a Vinylidene Fluoride Plastic with unique characteristics.

Mechanically Tough; Operating Temperature Up to 125°C Continuous, Assigned U.L. Rating 105°C.

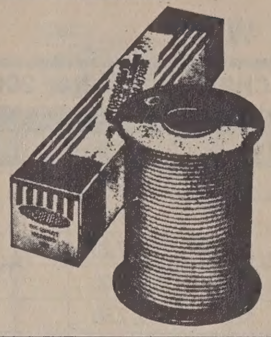
PROTECTA-METAL SPOOLS



Popular, profitable specialty wire packaged for easy selling in radio-electrical, scientific, specialty and hardware.

Wide variety of sizes and insulations.

Keeps stock in perfect order, always saleable.

Supplied on spools as shown and in heavier weights.

Here is a handy and convenient way to stock small quantities of wire. It prevents wire from matting or tangling.

MAGNET WIRE No. 2000

The correct wire for practically any application. Magnet wire is indispensible in the manufacture and repair of both radio and audio frequency coils, transformers, chokes, speaker field coils, short wave coils, tuners, transmitters, etc. Also widely used in the construction and repair of motors, generators, dynamos, etc.

Larger Quantities At Same Per Pound List

SPECIAL MAGNET WIRES

In addition to the standard listing shown here, we maintain an extensive stock of all other sizes in round rectangular and square magnet wire.

ANNUNCIATOR (BELL) WIRE

Consolidated Corporation

SUPPLIED IN ASSORTED COLORS

An all around utility wire consisting of a single and two conductors of No. 18 wire, plastic insulation.

Catalog Number	Type
1450	Single Conductor
1445	Two Conductor Twisted

STANDARD SPOOL PUT-UP:
¼ LB., ½ LB., 1 LB., 7 LB.

PHOSPHOR BRONZE DIAL CABLE

BRAIDED phosphor bronze over a pure black linen, lubricated core for exceptional strength and wearing qualities.

Cat. No.	Size (Ins.)	Stranding	Dia. (Ins.)
1436	⅛	16x36	.125

STRANDED phosphor bronze over a concealed white nylon core for exceptional flexibility. Manufactured to highest precision standards, insuring utmost accuracy.

Cat. No.	Size (Ins.)	Stranding	Dia. (Ins.)
1440	⅛	42x35	.125

STANDARD SPOOL PUT-UP:
25 FT., 100 FT., 500 FT., 1000 FT.

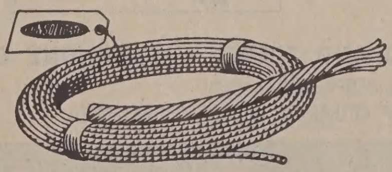
PHOSPHOR BRONZE



Recommended for short wave and transmitting aerials.

Tested and used by Army and Navy.

Amazing improvement for reception and transmission.

Phosphor bronze is recognized as the most efficient, practical wire obtainable for short wave and transmitting aerials. It will not stretch or sag and is superinductive.

HEAT SHRINKABLE TEFLON* TUBING • FEP • TFE • DUAL WALL

DUAL-WALL TEFLON* ENCAPSULATING SHRINKABLE TUBING

NEW DAFLON SM-450 is a new dual wall shrink and melt Teflon tubing which gives a tight, moisture-proof seal. It is made from two types of Teflon. The outer wall is TFE Teflon and the inner lining is FEP Teflon. When heated to 400°F the FEP melts and at 621°F the TFE shrinks tightly. The FEP is squeezed into a solid or near solid mechanical encapsulation. DAFLEX SM-450 tubing protects against most environmental hazards involving pull, vibration, moisture, chemicals, etc. It may be used over wires, terminals, splices, connectors and as a strain relief and end cap.
Operating Temperature: 450°F.

**Will fully close off.

DAFLON SH-400 (FEP)

Made with Modified TEFLON‡ FEP will shrink over inserted objects upon exposure to moderate heat. Heretofore, many joints, parts, components, devices could not be protected because of hi temperature required for shrinkage. FEP TEFLON‡, which has a continuous service temperature of 400°F., will shrink at 300°F. Supplied in natural (transparent) color. Complete shrinkage at 350°F. Now, many heat sensitive products can use the permanent protection of TEFLON.* Will not burn or support flame, long lengths available. Will not split or melt. Extruded. Meets MIL-I-23053/11.

STANDARD PACKAGE: 100 Feet. Additional Sizes and Colors to Order.
STANDARD PUT-UP: 36″ Straight Lengths — One Foot Minimums Size 13 thru ½″; Size 26-14 3′ Min. Length.
WALL TOLERANCES: 26 thru 22 ± .002; 20 thru 10 ± .003; 9 thru 0 ± .004.

DAFLEX 4:1 SHRINKABLE PTFE TUBING

DAFLON SH-421 Shrinkable Teflon Tubing recovers to approximately 25% of its expanded size when heated to the gel point (621°F). Thus it is now possible to use shrinkable Teflon tubing, with its excellent chemical and physical properties, over objects which require more than the standard 2:1 shrinkdown ratio (see SH-621).

NOTE: Tubing should be allowed to recover **at least 50%.**
Conforms to MIL-I-23053/12 and AMS-3584. **Operating Temp.:** −85°F to +500°F.

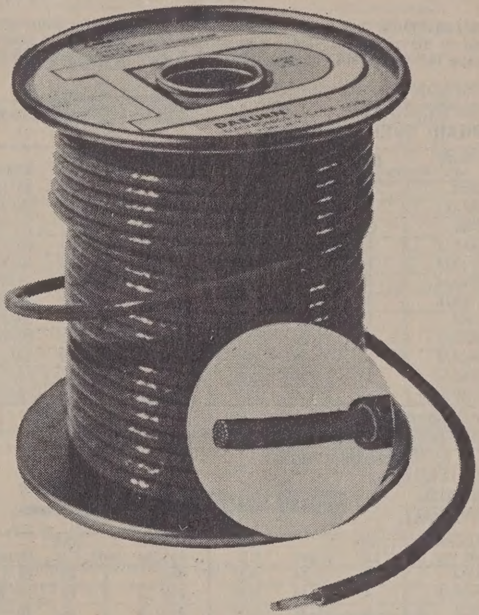
DABURN electronics & cable corp.

WIRE • CABLE • TUBING • MIL/COMM • SWITCHES • ELECTRONIC HARDWARE

HI-VOLT CORONA RESISTANT TEFLON* CABLE©

Voltage Rating at Sea Level • Voltage Rating at 80,000 feet, approximately 1/3 lower

• Minimum life expectancy: 10,000 hours.



SMALL SIZE:
You do not need bulky, thick, insulation jacketing as used with silicone rubber and polyethylene insulations to get your hi-voltage requirements. Wire used is MIL-SPEC QQ-W-343 and MIL-W-16878D. Insulation used conforms to and surpasses MIL-SPEC-W-16878D

AVOID CORONA PROBLEMS:
Corona Resistant Teflon construction is specifically designed to retard and prevent corona penetration.
Temperature variations from −60° to +300°C have no life effect on the corona resistant Teflon. In addition, there is no stress or crack failure under severe, adverse conditions including mechanical strain, moisture, corona or chemical conditions.

DESCRIPTION:
Single Conductor, Stranded Silver Plated Copper, Corona Resistant Teflon* Insulation.

TEMPERATURE RATING:
−90°C to +250°C.

VOLTAGE RATING:
Based on insulation thickness.

AVAILABLE COLORS:
White, Black, Red, Green, Yellow, Lt. Blue, Brown, Orange, Gray, Violet. (Also available in tracer colors)

PUT-UP: 250′, 500′, 1000′

* DUPONT

WIRE • CABLE • TUBING • MIL/COMM • SWITCHES • ELECTRONIC HARDWARE

TFE • FEP TEFLON* CABLES • H FILM KAPTON* WIRE

MIL-W-16878D INSTRUMENTATION — SHIELDED • UNSHIELDED

DESCRIPTION: One or more conductors, each conductor silver plated concentrically stranded copper wire, Type E Extruded TFE .010″ insulation. When shielded, braided silver plated copper shield over conductor(s), 90% shield coverage. When covered, either a TEFLON* impregnated fiberglass braid or a .010″ TEFLON* fused, double tape jacket overall. Fungus, solvent, moisture, flame, acid, alkali and oil resistant. Multiconductors are twisted. **TEMP. RATING:** −65°C to +260°C. **VOLT. RATING:** 600V.

H FILM KAPTON* WIRE — DALITE™

HIGH TEMPERATURE HOOK-UP AND AIRFRAME WIRE 200°C CONTINUOUS TEMPERATURE RATING (a)

INSULATED WITH DUPONT KAPTON* POLYIMIDE FILM WITH TEFLON* — FEP HEAT SEALED COATING CONFORMS TO MIL-W-60904 & MIL-W-81381.
CHARACTERISTICS: Dalite™ insulated wire provides high temperature stability, low temperature flexibility, high radiation resistance, resistance to cold flow, impervious to most chemicals, high dielectric strength, low dielectric constant, smaller diameters and lighter weight than any other comparable wire used for continuous operation up to 200°C. This hook-up wire meets the test requirements of MIL-W-16878 for 300 V, 600 V and 1000 V with **smaller wall thicknesses, weight and dimensions.**
(a) Temperature based on lowest temperature rating of materials in the insulation — FEP 200°C. Will pass 96 hour heat age tests at 250°C per MIL-W-16878.
DESCRIPTION: Single conductor, silver plated annealed copper conductors, Type H* Polyimide film with Teflon* FEP coating tape wrapped.

DABURN

DABURN electronics & cable corp.

WIRE • CABLE • TUBING • MIL/COMM • SWITCHES • ELECTRONIC HARDWARE

RETRACTILE POWER & COMMUNICATION CORDS — UL & CSA

Long Lasting Service — useful wherever cords must change length or position. Extend to approximately six times its retracted length. Returns to its original shape or length when released. Eliminates tangling, twisting or knots. Cords are UL and CSA approved.

POWER CORDS

RETRACTED LENGTHS: 1, 2, 3 & 4 FT. EXTENDED LENGTHS: 6, 12, 18 & 25 FT.

UL APPROVED — NEOPRENE JACKETED CORD

Operating Temperature: −20°C to +60°C

RETRACTILE COMMUNICATION CORDS

Retracted Lengths 2, 3 & 4 Ft. — Extended Lengths 12, 18 & 25 Ft.

Multi-conductors stranded extra flexible #23 AWG 21/36 tinned soft copper for long flex life. Neoprene or "Danyon" plastic jacketed cable for long life. 120 volt working, current carrying capacity 1 amp. Nom. cond. resist. .022 ohms per linear foot, .185 ohms per retracted foot. For communication equipment such as ham operations, telephone car carriers, radio equipment, head sets, etc.
Operating Temp: −20°C to +60°C
Maximum Voltage: 100V

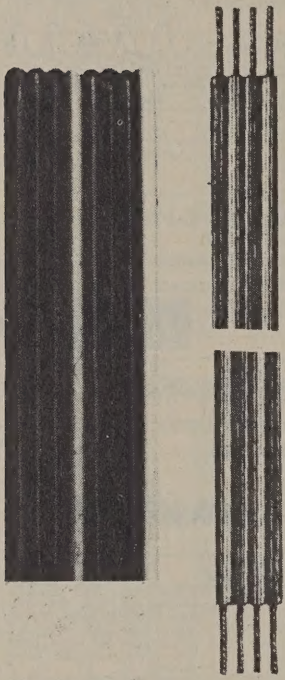
DABURN

DABURN electronics & cable corp.

WIRE • CABLE • TUBING • MIL/COMM • SWITCHES • ELECTRONIC HARDWARE

NEW FLAT RIBBON CABLE • TYPES B & C PER MIL-W-16878D•UL FR-1

SOLID COLORS



DESCRIPTION: Each conductor is stranded T.C. with extruded PVC insulation, bonded together to form a flat ribbon cable. Conductors separate easily for clean terminations with standard wire connectors, jacks and pins. Ribbon cable saves space and time on circuit interconnecting assemblies, wiring harnesses, sliding drawers and drop assemblies and simplifies identification. Resists acid, alkalis, flame, moisture, oil, solvents and fungus.

TEMPERATURE RATING: −55°C to +105°C. Insulation meets or exceeds UL FR1 vertical flame test.

Per MIL-W-16878D — TYPE B — 600 V

DESCRIPTION: Each conductor stranded tinned copper, polyvinyl-chloride insulation, bonded to form flat ribbon cable. Conductors are color coded and separate easily for clean terminations. Saves space, time on circuit and interconnecting assemblies, wiring harnesses, sliding drawers and drop assemblies.
Rated: −55°C to +105°C
INSULATION PASSES U/L FR-1 FLAME TEST

DEARBORN WIRE AND CABLE

We Stock one of the most comprehensive inventories of wire, cable and insulation in the United States. In most cases we can ship your needs within 24 hours.

Dearborn will also custom fabricate to your specifications. Our services include Special Cables, Neoprene Jacketing, Striping, Marking, Numbering, Lettering, Cutting and Stripping, Terminating, Harness Assemblies, Molded Plugs and Cord Sets, and Cabling. Any combination of conductors with special braids or shields can be made into a cable to your exact requirements by our special order department.
We will be pleased to quote on your blueprints, sketches, or job specifications.

Yes. We Have It! The vast selection of merchandise listed on the following pages represents only a partial amount of the thousands of wire, cable and insulation items stocked by Dearborn.
Our 52 page catalog will give you full details on the complete Dearborn line. Send for it, or call us for information on stock or special constructions.

Remember, Dearborn Offers Immediate Delivery From One of the Industry's Most Complete Wire & Cable Inventories.

MIL-SPEC, U.L. AND CSA APPROVED

- Aircraft Wire
- Appliance Wire
- Audio Cable
- Automotive Wire
- Coaxial Cable
- Computer Cable
- Control Cable
- Foil Shielded Cable
- Hookup Wire

DEARBORN WIRE AND CABLE COMPANY

Multi-conductor Shielded and Unshielded Control Cables

• RUBBER • NEOPRENE • PLASTIC

RUBBER — UNSHIELDED

Stranded tinned copper conductors, color coded rubber insulation. Cabled with fillers; cotton wrapped; tough rubber jacket overall. These cables are extremely flexible and are suitable for heavy duty usage. **Temperature rating:** −20°C to +60°C. Insulation thickness on individual conductors is .020″.

RUBBER — SHIELDED

RUBBER JACKETED. Conductors of stranded tinned copper, with color coded .020″ rubber insulation*. Cabled with fillers; cotton wrapped; braided tinned copper shield. Cotton wrap and tough black rubber jacket overall. Used for control circuit, studios, audio circuits, etc., where shielded cable is necessary. **Temperature rating:** −20° to +60°C.

* .040 on single conductor.

PLASTIC SHIELDED

PLASTIC JACKETED. Conductors of stranded tinned copper, with color coded .014″ thick Polythylene insulation. Cabled with fillers; wrapped with rayon; shielded with braided tinned copper shield. Covered with chrome grey Polyvinylchloride jacket overall. **Temperature rating:** −20°C to +60°C. **Operating voltage:** 600 volts.

NEOPRENE — SHIELDED

NEOPRENE JACKETED. Stranded tinned copper conductors, with color coded .020″ rubber insulation*. Cabled with fillers; cotton wrapped; braided tinned copper shield. Cotton wrap and tough black neoprene jacket overall. Used for control circuits, studios, audio circuits, etc., where shielded cable is necessary. **Temperature rating:** −20°C to +60°C

* .040 on single conductor.

Computer Type Control Cables Miniature Styles 2343 and 2344

The cables listed below, either cabled pairs or multiconductor (not paired), with or without shield are suited for computer use.

The individual conductors are stranded tinned copper. Numbers 22, 24 are 7 strand, No. 20 is 19 strand. Insulated with .010″ wall of PVC to MIL-W-16878D Type B. On this usage, conductors are rated 105°C and 600 V. working voltage. The conductors also meet UL Style 1061, rated 80°C, 300 V. working voltage.

Conductors are cabled by the planetary method and laid contrahelically for best flexibility, with a Mylar tape barrier placed under shields. All shielded cables are of tinned copper braid overall of 85% - 90% coverage per MIL-C-7078.

The jacket over the shield is black 105°C Vinyl per MIL-I-631 Type F. All materials are fungus resistant and self extinguishing.

All items approved under UL STYLE 2343 or 2344* for computer usage: +80°C, 300 volts. On non-UL service can be used at 40°C to +105°C, 600 volts.

MIL-SPEC MIL-W-16878D Hookup Wire Types B & C

Single conductor, stranded tinned copper

TYPE B
Insulation PVC .010″ wall thickness, color coded. **Temperature rating:** −55°C to +105°C. **Voltage rating:** 600 volts.

TYPE B — NYLON
Same as above but with clear nylon jacket (.003″ wall) over PVC insulation increasing temperature rating to +115°C.

TYPE B — PREBONDED
Double tinned strands are heated which fuses the individual strands together in order to prevent fraying. Allows easy stripping and insertion in holes in lugs, circuit boards, etc. Color coded .010″ PVC insulation to MIL-W-16878D. **Temperature rating:** −55°C to +105°C. **Voltage rating:** 600 volts.

TYPE C
Insulation PVC .017″ wall thickness. **Temperature rating:** −55°C to +105°C. **Voltage rating:** 1000 volts.

TYPE C — NYLON
Same as above but with clear nylon jacket which increases temperature rating to +115°C.

TYPE C — SHIELD AND NYLON JACKET
Basic type C with 90% coverage braided tinned copper shield and clear nylon .005″ jacket overall.

COLOR CODE ON HOOKUP WIRE: 0—Black • 1—Brown • 2—Red • 3—Orange • 4—Yellow • 5—Green • 6—Blue • 7—Violet • 8—Grey • 9—White • 90—White/Black • 91—White/Brown • 92—White/Red • 93—White/Orange • 94—White/Yellow • 95—White/Green • 96—White/Blue • 97—White/Violet • 98—White/Gray

THE XLV IS ESPECIALLY SUITABLE FOR AEROSPACE, MILITARY AND INDUSTRIAL ELECTRONIC EQUIPMENT

Dual service hook-up wire insulated with a polyvinyl chloride which has been cross-linked by an irradiation process. This process changes the linear molecular configuration of the PVC and connects molecules through a network of chemical bonds. This specially processed insulation "XLV" becomes extremely burn-thru and heat resistant. The shrinkback or heat flow normally encountered when applying a hot soldering iron does not occur when using "XLV" hook-up wire.

This resistance to heat also prevents distortion of the insulation when the wire is subjected to temporary overloads and high temperatures.

Cross linking the PVC by irradiation also increases the abrasion resistance and makes it much superior to regular vinyl insulations.

The table below lists both the UL and military specifications to which "XLV" wire is manufactured.

Note that since the military and U.L. specifications vary, the temperature and voltage ratings assigned differ for the same wire as per the chart.

SPECIFICATIONS	MAX. OPER. TEMPS.	MAXIMUM VOLTAGE
MIL-W-16878/1 TYPE B	105°C	600 V. RMS
U.L. AWM STYLE 1429	80°C	Voltage not specified for general appliance hook-up usage. 300 volt peak for electronic use only.
MIL-W-16878/2 TYPE C	105°C	1000 V. RMS.
U.L. AWM STYLE 1430	105°C	300 VOLT RMS 600 VOLT PEAK For electronic use only.

STOCK PUT UP: 100 FT., 1000 FT., AND BULK

**Not MIL Spec.

TYPE E, 600 VOLT
Single conductor, stranded or solid silver plated copper, extruded TFE Teflon insulation. **Voltage rating:** 600 volts. **Temperature rating:** −65°C to +200°C.

TYPE EE, 1000 VOLT
Same as Type E, except for insulation thickness and voltage rating of 1000 volts.

TYPE EE, 1000 VOLT

STOCK PUT UP: 100 FT., 1000 FT., AND BULK

TYPE E, SPIRAL WRAPPED FUSED TEFLON
Same as Type E — 600 volt but with spiral wrapped fused Teflon insulation.

TYPE EE, SPIRAL WRAPPED FUSED TEFLON
Same as Type EE, but with spiral wrapped fused Teflon insulation.

ALSO AVAILABLE:

TYPE ET, 250 VOLT
Same as Type E except for insulation thickness of .006 and voltage rating of 250 volts.

CORONA RESISTANT HIGH VOLTAGE WIRE

- High Dielectric Strength
- Flame Retardant
- Abrasion Resistant
- Easy to Strip

CONSTRUCTION

Conductors: All conductors are tinned copper, flexible stranding. Also available on special order with: silver plated copper conductors, nickel plated copper conductors and pure nickel conductors. Pure nickel increases rating to 260°C (500°F). **Insulation:** High temperature, high voltage silicone rubber for easy stripping. High dielectric strength, flame retardant.

APPLICATIONS

Recommended for stoves, heaters, furnaces, dryers, motors, therapeutic devices, signs, lighting fixtures and special electronic devices where high temperatures are incurred. Military applications include use on jet aircraft, atomic submarines and related equipment.

COLOR: Natural.

OTHER COLORS AND STRIPE COMBINATIONS AVAILABLE UPON REQUEST

MIL-W-16878D Shielded Teflon* Cables

- **TEFLON IMPREGNATED BRAID OVER SHIELD**
  Braided natural or white Teflon impregnated fiberglass braid overall.
- **FEP EXTRUDED JACKET OVER SHIELD**
  Tough abrasion resistant extruded white FEP Teflon jacket overall.
- **TEFLON TAPE WRAP JACKET OVER SHIELD**
  Sintered wrapped white Teflon tape jacketed overall.

Each conductor stranded silver plated copper, Type E extruded TFE Teflon .010″ color coded insulation. **Braided silver plated copper** shield, 90% coverage. **Voltage rating:** 600 volts. **Temperature rating:** −65°C to +200°C. Resistant to acids, alkalis, oil, flame, moisture, solvents and fungus.

*Dupont T.M.

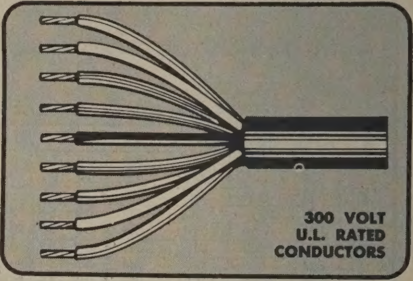
DEARBORN WIRE AND CABLE COMPANY

Unshielded Audio Cable



MULTICONDUCTOR PLASTIC JACKETED

Stranded or solid tinned copper conductors. Color coded polyvinylchloride insulation. Conductors cabled and covered with a gray PVC jacket overall. Suitable for outdoor usage. Recommended for P.A. systems, intercom connecting cables, remote control circuits, relay circuits, telephones, and telemetering circuits.

All inner conductors are U.L. styles as follows: No. 22 - Style 1061, Nos. 20, 18 and 16 are Style 1007, No. 14 and No. 12 are Styles 1335 and 1336.

Temperature ratings
On Style 1061 and 1007 are −10°C to +80°C; on Styles 1335 and 1336 ratings are −10°C to +90°C.

Unshielded Paired Conductors Intercom Cables

PAIRED CONDUCTOR, PLASTIC JACKETED CABLES

Stranded or solid tinned copper conductors. Color coded polyvinylchloride .010″ insulation. Conductors are twisted into pairs, cabled and jacketed overall with a gray PVC jacket. Temperature rating: −20°C to +80°C. Conductors are **U.L. Style 1061.**
Suitable for outdoor usage. Recommended for remote control circuits, relay circuits, balanced intercom systems, multiple speaker cable, telephones, call systems, etc. **Suggested operating voltage:** 300 volts maximum.

KYNAR

Insulated Hookup Wire for Wire Wrap Applications

Especially suited for computer, business machine usage and other areas where space is limited. (For automatic point to point application.)

The miniaturization of computers and business machines has created special problems in the wiring of components and associated programming equipment. Essentially there is a need for wire with a tough insulation that is resistant to abrasion and cold flow. It should function at operating temperatures up to 125°C. The Wire-Wrap type of termination requires a high conductivity low corrosive surface on the conductor. Dearborn Kynar insulated wire fulfills these needs.

Service, Power and Replacement Cords and Cordage

U.L. PARALLEL LAMP CORD

Stranded extra-flexible bare copper, parallel conductors, insulated with Rubber, (SP-1), or Polyvinyl (SPT-1 -SPT-2) or Neoprene (HPN). JACKET OVERALL. Slit in jacket between conductors for ease in separation. Applications: Small appliances, radios, clocks; the HPN is suitable for coffeemakers, fry pans, soldering irons, etc. **Temperature Rating:** 20°C to +60°C. **Suggested Operating Voltage:** 300 V.

EXTENSION CORD SETS

Flexible, 2 or 3 conductor, high quality black rubber cords. Black molded plastic male plug on one end, molded plastic female plug on other end. Will fit conventional sockets and plugs. **Voltage rating:** 300 volts. The 3 conductor cord is used where 1 conductor requires grounding, such as for hand tools, garden edgers, etc.

* This item supplied in grey.

REPLACEMENT CORDS

Flexible high quality black Rubber, Plastic and Neoprene Cords. Types SV and SJ are rubber insulated and jacketed. Types SVT and SJT are plastic insulated and jacketed. Type SJO is rubber insulated and neoprene jacketed. One end has molded black plastic straight plug (either 2 prong or 3 prong depending on 2 or 3 conductor cable). The other end of the jacket is stripped back 1½" with ⅝" of the conductors stripped. **Voltage rating:** 300 volts. The 3 conductor cord is used where 1 conductor is required for grounding.

* This item supplied in grey.

AIR CONDITIONER EXTENSION CORDS

Flat, parallel 3 conductor SPT-3, grey plastic cord with a molded 3 blade right angle plug on one end and a female 3 wire U ground connector molded on the other end. **Rating:** 125 volts, 15 Amps.

Shielded Microphone, Sound and Intercom Cables

SOUND AND INTERCOM CABLES

Each conductor is solid or stranded tinned copper (See Chart), insulated with color coded polyvinylchloride. Conductors are twisted and shielded with either a spiral wrapped tinned copper shield or a tinned copper braided shield −20°C to +60°C. Ideal for all types of public address or sound work, recording studios, and other types of audio circuits requiring shielding. Sizes 16 thru 22 rated at 350 V working voltage. Sizes 14 and 12 are rated at 450 Volts working voltage. **.020" nom. jacket,** thk. of chrome PVC.

Multi-Conductor Unshielded Control Cable

Neoprene or Plastic

PLASTIC JACKETED 15/5 CONTROL CABLES, 600 VOLT, VN20, 90°C

Stranded bare copper conductors, insulated with .015″* PVC color coded insulation and .005″ Nylon jacket over each conductor; cabled with fillers. Moisture resistant tape, and a black Polyvinyl-chloride jacket overall. Used for controlling temperature, voltage, pressure and relay circuits and many other electronic and electrical circuits. **All conductors color coded to IPCEA Standards (see bottom, this page).**

* .020″ on sizes 14 and 12; .015″ on size 16.

RUBBER INSULATED CONDUCTORS, NEOPRENE JACKETED

Stranded bare copper conductors, with color coded rubber insulation; cabled with fillers; cotton wrapped; tough Neoprene jacket overall. Used for remote control circuits. Flexible stranding and heavy duty Neoprene jacket combined, make this cable suitable for outdoor usage under extreme conditions. Neoprene jacket resists sunlight, oil, moisture, ozone, abrasion and impact.

Data and Audio Cable Miniature Sound Cable

INDIVIDUALLY SHIELDED MULTIPLE PAIRS

Tinned copper conductors, either stranded or solid (see tables), insulated with high density color coded *.010″ Polyethylene, conductors twisted into pairs. Along with a †22 gauge stranded tinned copper drain wire, each pair is shielded with a Mylar supported aluminum foil shield. Covered with a Grey PVC jacket overall. Used for all circuits requiring isolation between pairs. Especially suitable for multiple audio and data control circuits. Mylar Wrap between shields and jacket.

* .016″ on #18 gauge † #20 on #18 gauge

FOIL SHIELDED, PLASTIC JACKETED, MULTI-CONDUCTOR CABLE

Stranded tinned copper conductors, insulated with .015″‡ thick color coded Polyethylene insulation. Conductors are cabled and, along a No. 22§ tinned copper stranded drain wire laid parallel, are shielded with aluminum foil Mylar backed shield. Gray PVC jacket overall. This type of shielding provides 100% effective shielding and is suitable for audio and data work where cross talk must be reduced to a minimum. **Temperature rating:** −20°C to +60°C. **Operating voltage rating:** 400 volts.

§ No. 20 on No. 18, No. 16, No. 14.
‡.025″ on No. 16, .032″ on No. 14.

2 PAIR MINIATURE AUDIO AND SOUND CABLE

Tinned copper, .009″¶ Polypropylene insulation on 970001. 1 pair of black and red shielded with Mylar aluminum shield. Other pair of white and green twisted, not shielded. Both pairs twisted with #22 stranded T.C. drain wire and chrome vinyl jacket overall.

¶ .015″ PVC on 970002

■ **POLYVINYL CHLORIDE "SM" 105°C U.L./MIL** This is a high temperature tubing meeting both U.L. and MIL-I-631C, Type F, Form U, Grade C, Class 1, (FUNGUS RESISTANT), Category 1 requirements. **Temperature rating:** −20°C to +105°C. **Specs:** MIL-I-631C, ASTM D-922 Grade C. U.L. File number on request.

■ **TFE TEFLON TUBING** Extruded TFE Teflon in three Wall Thicknesses. Lightwall: (.006″ to .012″), Thinwall: (.009″ to .015″), Standard: (.010″ to .020″).
Operating Temperature Range: −65°C to +250°C. Unaffected by soldering iron temperatures. Dearborn extruded Teflon tubing is chemically inert, has zero moisture absorption and its dielectric strength at high frequencies surpasses other types of insulation even at maximum operating temperatures.
These three wall thicknesses offer an excellent choice for use in miniaturization and compactness of design, especially where high heat, and a chemical solvent and corrosion resistant material is desired.
Meets requirements of— MIL-I-22129B, MIL-P-14077, MIL-P-14078, AMS-3651, AMS-3653.
COLOR CODE: 1—Clear or Natural • 2—Black • 3—Red • Other colors available on Special Order.

* Du Pont Trademark.

STYLE ST-301 POLYOLEFIN HEAT SHRINKABLE TUBING TO MIL-I-23053B/5, U.L. APPROVED

Dearborn Style ST-301 Heat Shrinkable Tubing is an irradiated, thermally stabilized, polyolefin product which meets or exceeds MIL-I-23053B/5, AMS 3636B and AMS 3637B. ST-301 shrinks to 50% of diameter at 121°C (250°F) in 7 seconds, and has an operating temperature range of −55°C (−67°F) to +135°C (+275°F).
MIL-I-23053/5 — CLASS I (COLORED INSULATION)
MIL-I-23053/5 — CLASS II (CLEAR INSULATION)

All sizes are shown and supplied in expanded inside diameters. Stock Colors: Black, Red, White and Clear. Clear is Non-Flame Retardant. All other colors are Flame Retardant under MIL-I-23053B/5. Additional colors available on special order. Supplied in either 4 Ft. or 6 Inch lengths, and 6 Inch Assortments. Suitable for all military applications as well as industrial and commercial uses.

ST-301 Kit Assortments Available in 6″ lengths, Assorted colors AST-301-1-6 — 3/64″ thru 3/16″ (30) Lengths. AST-301-2-6 — 1/4″ thru 3/4″ (16) Lengths.

Detects Faulty Circuits Instantly!

CIRCUIT MONITOR

HELPS PREVENT FIRE DAMAGE, AND LOSS!

The Circuit Monitor detects whether or not proper ground and AC polarity are available from 115 Volt 3 wire power outlets for safe operation of power tools, appliances, office machines, lab and other electrical equipment. It does the job instantly anc accurately without the inconvenience of handling probes and meters.

Dearborn No.	Description
5102B	Circuit Monitor in Box.
5012C	Circuit Monitor on Card for Display Rack.

EASY TO USE. Simply plug into 3 wire receptacle and lights on Circuit Monitor will indicate the following:

▲	**O & K**	Circuit Okay
▲	**O only**	Improper Ground
▲	**K only**	Improper Neutral
▲	**O & X**	Reversed Polarity
▲	**K & X**	Reversed Ground
▲	**None**	Power is OFF

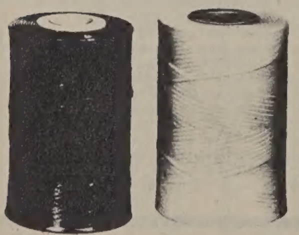
Lacing Tapes and Twine Meeting and Exceeding Military and Commercial Specifications

NYLON LACING TAPE
MIL-T-43435 TYPE I



- **INDUSTRIAL PRICING!**
- **SAME DAY SHIPMENT!**

Designed to Meet and Exceed MIL-T-713D, Type P, and MIL-T-43435 Types I, II, and IV, also AMS 3815, AMS 3816, AMS 3817.

FINISHES AND COATINGS

- **W — WAX, MIL SPEC "B"**

A microcrystalline fungicidal wax which exceeds military specifications, provides excellent knot retention and is suitable for either lacing or spot ties.

- **G — SYNTHETIC RUBBER, MIL SPEC "C"**

A special continuous coating of fungicidal synthetic elastomer (rubber) which exceeds Mil Spec requirements, ties easily and exhibits outstanding knot holding characteristics.

- **A — SYNTHETIC RESIN, MIL SPEC "E"**

A synthetic rubber-like resin formulated with fungicidal ingredients. Handling characteristics are excellent, knot retention is outstanding; meets or exceeds Mil Spec requirements. Operational Temperature Ranges: −67°F to +250°F on all items.

NYLON LACING TWINE MIL-T-713D TYPE P

Round twisted nylon fiber impregnated with microcrystalline fungicidal wax.

POLYESTER LACING TAPE MIL-T-43335 TYPE II

Flat braided polyester yarn impregnated with special finishes to military specifications. **Available in 500-yard spools.**

NYLON LACING TAPE MIL-T-43435 TYPE I

Flat braided high-tenacity nylon yarn impregnated with microcrystalline fungicidal wax or impregnations to meet military specifications. **Available in 500-yard spools.**

NYLON LACING TAPE MIL-T-43435 TYPE I

Flat braided high-tenacity nylon yarn impregnated with microcrystalline fungicidal wax or impregnations to meet military specifications. Available in 500-yard spools.

DEARBORN WIRE AND CABLE COMPANY

Teflon* Insulated Aircraft, Missile and Electronic Wire and Cable

MIL-W-16878D, TYPE ET
Voltage Rating: 250 volts. **Temperature Rating:** −65°C to +200°C. Single conductor stranded silver plated copper, extruded TFE Teflon insulation.

MIL-W-7139B, CLASS I WIRE
Voltage Rating: 600 volts. **Temperature Rating:** −65°C to +200°C. Silver plated copper, insulated with layers of TFE Teflon, interspersed with layers of Teflon impregnated fiberglass. Color is white with blue tracer. Teflon impregnated fiberglass braid overall.

MIL-W-7139B, CLASS II WIRE
Voltage Rating: 600 volts. **Temperature Rating:** −65°C to +260°C. Nickel coated copper, insulated with layers of TFE Teflon, interspersed with layers of Teflon impregnated fiberglass. Color is white with orange tracer. Teflon impregnated fiberglass braid overall.

MIL-W-5086A Unshielded Aircraft Wire

For use as airframe wire at temperatures within the range of −55°C to +105°C. Voltage rating is 600 volts. Both types are resistant to water, aircraft fuels, hydraulic fluid, oils, skydral, ethyleneglycol, dilute acids, alcohol, alkalis, fungus and abrasion.

TYPE I — AN-22 THRU AN-12
Single conductor stranded tinned copper with white PVC insulation and a clear (polyamide) nylon jacket overall.

TYPE II — AN-22 THRU AN-12
Single conductor stranded tinned copper with white PVC insulation, white glass braid and a clear nylon jacket overall.

TYPE II — AN-10 THRU AN-0000
Single conductor stranded tinned copper with white PVC insulation, white glass braid, flame retardant nylon lacquered nylon braid overall.

MIL-W-8777B - MS 25471
SILICONE AIRCRAFT WIRE

These wires are intended for installation in aircraft electrical systems where potential does not exceed 600 volts (RMS). Temperature limits are −55°C to +200°C. Single conductor silver plated copper, silicone rubber insulation, glass and dacron braid impregnated with high temperature lacquer and a white dacron braid and high temperature lacquer overall. Resistant to aircraft fuels, hydraulic fluid, oils, water, skydral, ethyleneglycol, dilute acids, alcohol, alkalis, fungus and abrasion.

TYPE VII	Teflon (PTFE)	−55°C to +250°C
TYPE VIII	Synthetic Rubber	−55°C to +75°C
TYPE IX	Teflon (FEP)	−55°C to +200°C

EXPLANATION OF NOMENCLATURE

CENTER CABLE CONDUCTORS

Center cable conductors may be solid or stranded wires, or in some cases, a tube. Selection is made on the mechanical and electrical properties desired. Solid wires result in lowest cable attentuation. Stranding permits increased cable flexibility but also increases attenuation. Bare, tinned, or silver plated copper wire is usually used for center conductors. Other materials are Copperweld, Cadmium Bronze, Aluminum, Nichrome and Karma.

DIELECTRICS (CABLE)

EXTRUDED POLYETHYLENE

Low cost, flexibility, ease of application, high dielectric strength and low dielectric constant make it well suited for RF applications. It is the most commonly used low temperature cable dielectric.

FOAM CORE (CELLULAR POLYETHYLENE)

An excellent low temperature dielectric formed by expanding polyethylene with millions of bubbles of an inert gas. Its low dielectric constant of 1.5 for Foam Core compared to 2.26 for solid polyethylene permits the design of lower attenuation and low capacity cables.

TEFLON

Teflon will withstand high temperature applications. It has high dielectric strength and a very low dielectric constant. Its ability to withstand exposure to gases and liquids makes it the dielectric selected where other materials would be inadequate.

CABLE OUTER CONDUCTORS

SHIELDS† OR BRAID

The outer conductor is usually made of a metal braid but it can be a solid tube. The braid is used where flexibility is a vital factor; the tubular construction is used where a high degree of shielding is required. Tubular construction also provides lower cable attenuation. Two adjacent braids offer better shielding action than one braid. Generally speaking braids are either copper, tinned copper or silver plated copper.

Cable Jacket Types

TYPE I (MIL-C-17)—Description: Black Polyvinylchloride. **Characteristics:** Excellent weathering and abrasion properties, but is of the contaminating type and will cause cable attenuation to increase with age. Can be used for direct burial.

TYPE II (JAN-C-17A)—Description: Grey Polyvinylchloride. **Characteristics:** A semi-noncontaminating jacket.

TYPE IIA (MIL-C-17)—Description: Black or Grey Polyvinylchloride. **Characteristics:** Noncontaminating. Good weathering and abrasion resistant properties. Can be used for direct burial.

TYPE IIIA (MIL-C-17)—Description: Black Polyethylene. **Characteristics:** Moisture resistant, abrasion resistant, defies ultra violet damage. Noncontaminating; recommended for direct burial.

TYPE IV (MIL-C-17)—Description: Black Synthetic Rubber. **Characteristics:** This jacket material is used only on high voltage pulse cables. The basic material is polymerized chloroprene.

TYPE V (MIL-C-17)—Description: Fiberglas Braid. **Characteristics:** Impregnated with silicone varnish to provide abrasion resistance and a moisture seal.

TYPE VI (MIL-C-17—Description: Silicone Rubber Dacron Braid. **Characteristics:** Two wraps of silicone rubber impregnated fiberglass tape which is fused into a homogeneous layer. A dacron braid is applied, followed by a high temperature fluorocarbon lacquer.

TYPE VII (MIL-C-17)—Description: Teflon (Polytetrafluordethyene). **Characteristics:** Either extruded or tape wrapped. Withstands high temperatures; chemically inert; insoluble in liquids and gases.

TYPE VIII (MIL-C-17)—Description:: Synthetic Rubber. **Characteristics:** This material is a polychloroprene compound and is used with only a few pulse cables. Its primary use is as a jacket material for multiconductor cables.

TYPE IX (MIL-C-17)—Description: Teflon (Fluorinated Ethylene Propylene). **Characteristics:** Excellent weathering properties and chemically inert. Maximum operating temperature of 200°C.

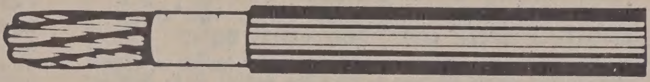
Welding Cable



INDUSTRO-FLEX NEOPRENE WELDING CABLE
The Industro-Flex Neoprene Series is a new development which utilizes No. 30 stranding. It has a smaller O.D. and still retains flexibility at lower prices than the standard Neoprene welding cable.

NEOPRENE AND RUBBER WELDING CABLES
These cables are constructed of stranded bare copper conductors, with a tape wrap and either a neoprene or rubber jacket overall as specified in tables at right. All have extra fine stranding, are extremely flexible and have high resistance to abrasion, impact, flexing and twisting.

Service and Power Cords — Rubber Neoprene and Plastic

GENERAL CHARACTERISTICS

Temperature Rating: −20°C to +60°C.

Voltage Rating: Types SV, SVT, SJ, SJT, and SJO are 300 V rated; Type S and SO are 600 V rated. On SJO two types are listed: Stationary and Constant Service. Constant Service has more flexible stranding.

TYPES SV, SJ AND S/RUBBER CORD CONSTRUCTION
Conductors are stranded bare copper. Separator, color coded rubber insulation, cabled with fillers. Separator and tough rubber jacket overall.

TYPES SVT AND SJT PLASTIC CORDS
Types SVT and SJT are plastic insulated and plastic jacketed. Construction is same as SV and SJ. Jacket is black.

TYPES SJO AND SO/NEOPRENE CORD CONSTRUCTION
Conductors are stranded bare copper. Separator, color coded rubber insulation cabled with fillers. Separator and black neoprene jacket overall. Resistant to oil, grease, ozone, acid and moisture.

Voltage rating: 300 Volts. **Temperature rating:** −10°C to +80°C. .009" Polyvinylchloride insulation over solid or stranded tinned copper.

"TEW" FLAME RETARDANT, FR-1 STYLES 1015, 1028, 1283, 1284 600 VOLT, 105°C AND FR-1 STYLE 1007, 300 VOLT, 80°C

The polyvinylchloride insulation used on this series has the necessary additives that enable the wire to pass the Vertical Flame Test as prescribed by the Underwriter Laboratories for this UL style. All this wire is imprinted with the symbol FR-1 indicating it is covered by the above specifications. See page 22 for high voltage Flame Resistant wire.

Thermoplastic Insulated Hookup Wire

U.L. AND C.S.A. APPROVED

X-L POLYETHYLENE, U.L. STYLES 3173, 3199, 125°C — 600 VOLT, 105°C — 300 VOLT

The Polyethylene insulation used on this series of lead wire is chemically cross-linked, which increases the moisture resistance, solvent resistance and aging characteristics. When momentary high temperatures caused by overloads or shorts occur, the insulation does not deform as quickly as if not cross-linked. Typical applications include small motors, control panels, dry transformers, etc. **Recommended maximum baking cycles:** 300°F for 24 hrs. — 325°F for 12 hrs. — 350°F for 8 hours.

DEARBORN WIRE AND CABLE COMPANY

U.L. Listed
High Temperature Teflon* Wire

Dearborn supplies a variety of high temperature insulated wires that are listed by the Underwriters Laboratories. The types shown here fall into the category of appliance wiring material (AWM) and are covered by the Flexible Cord and Fixture Wire Standard and UL Standard 758.1 for insulated single conductor appliance wiring material. Among a variety of requirements, the latter document assigns ratings regarding the duty group, flame retardance, temperature rating, voltage rating, service flexibility, resistance to abnormal temperature, oil resistance, water resistance and gasoline resistance where applicable. All of the following Underwriters styles are flame retardant and will satisfy the FR-1 designation of UL.

This section lists only the most commonly used conductors. In many instances, the Underwriter's Laboratories allow the use of other materials. Consult factory for further details.

CONDUCTOR: Silver plated copper. On special order nickel plated copper conductors are available. **INSULATION:** Extruded "Teflon" TFE, .013″ min. (average) wall. **TEMPERATURE RATING:** UL 1180-200°C. **VOLTAGE RATING:** 300 volts rms. **USE:** For internal wiring of appliances, also suitable for immersion in gasoline, gasoline vapor and 80°C oil. **TEMPERATURE IDENTIFICATION MARKER:** UL 1164-Brown, UL 1180-Black. Dearborn standard temperature identification is a longitudinally applied stripe in size 18 AWG and larger. Sizes 20 AWG and smaller do not require temperature identification. Upon request and at an additional charge, surface printing can be provided.

UL STYLES 1330 AND 1331

CONDUCTOR: Tin plated copper. **INSULATION:** Extruded "Teflon" FEP, .020″ min. (average) wall, sizes 26-10 AWG, .030″ min. (average) wall, sizes 8-2 AWG. **TEMPERATURE RATING:** UL 1330-200°C, may be used with tin plated copper conductors only where the individual strand diameter is .015″ (26 AWG) or larger. UL 1331-150°C. **VOLTAGE RATING:** 600 volts rms. **USE:** For general appliance wiring where not subjected to temperatures exceeding 200°C for style 1330 (see above limiting note), or 150°C for style 1331. Suitable for immersion in gasoline, gasoline vapor and 80°C oil. Constructions with silver plated copper are available on request; this version has an unrestricted 200°C temperature rating for style 1330. For sizes 18 AWG and larger, temperature identification is indicated by a black marker thread for style 1330 and a brown marker thread for style 1331, located under the insulation. Sizes 20 AWG and smaller do not require temperature identification.

SILICONE RUBBER TYPES

HIGH TEMPERATURE BRAIDLESS SILICONE RUBBER WIRE

Braidless silicone is easy stripping, and has excellent physical strength and mechanical properties. Recommended for stoves, dryers, motors and electronic devices where high temperatures are incurred. All conductors are of stranded tinned copper. U.L. Style 3212 — Sizes 10 thru 22; U.L. Style 3213 — Sizes 2 thru 8; Style 3214 — Sizes 00 thru 1.

HIGH TEMPERATURE SILICONE RUBBER WIRE WITH GLASS BRAID

High temperature silicone rubber insulation for easy stripping. Lacquered glass braid overall gives additional abrasion resistance. Lacquer prevents fraying of braid. Used for appliance and hookup wire. U.L. Style 3071 on AWG Sizes: Nos. 18, 16, 14, and 12. U.L. Style 3075 on AWG Size No. 10.

ASBESTOS INSULATED TYPES

TYPE AA

U.L. Style C-2130, 150°C; 300 Volts. Designed for wiring of electric ranges, grills, space heaters and other types of electrical heating devices where heat but not moisture is present. Maximum copper temperature is 200°C (392°F).

TYPE AF

U.L. Style AF 3200, 150°C; 300 Volts. Stranded copper conductor; tape, felted asbestos insulation — flame, heat and moisture resistant. Approved for all types of interior illumination, particularly fluorescent devices, and all high wattage units, especially where socket temperatures exceed 90°C (194°F).

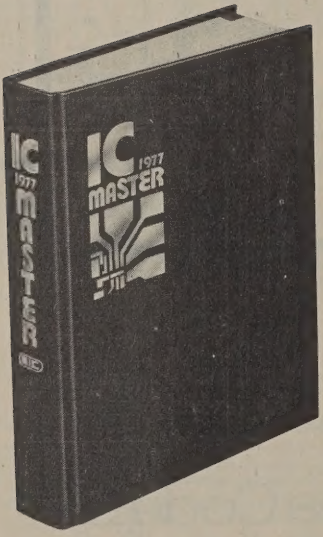
WHEN THE CHIPS ARE DOWN...

THE NEW 1977 IC MASTER PAYS OFF!



The new IC MASTER is the ultimate IC source book.

It lists virtually every IC device manufactured in the United States.

The IC MASTER is the easy, sensible means of narrowing down your IC choices quickly, accurately and systematically. All information is cross-referenced and indexed for rapid problem solving and device selection. And, additionally, the MASTER is updated three times yearly by accumulative supplements.

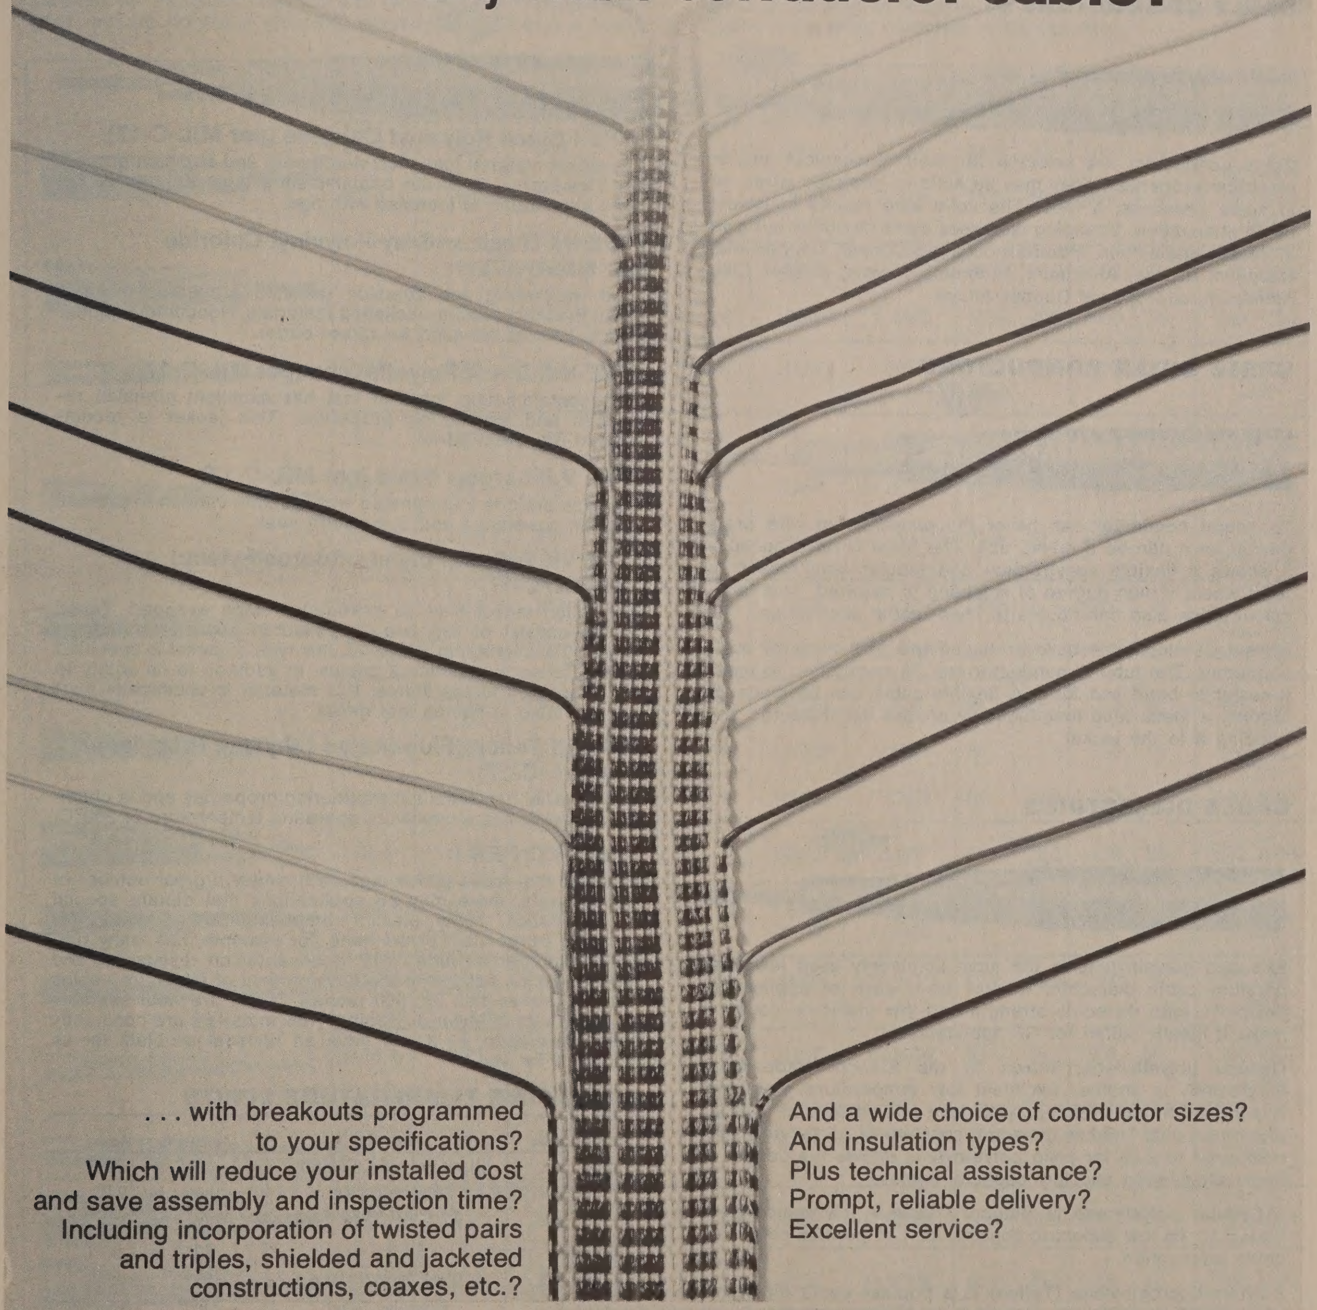
THE FORMAT OUTLINED:

- **FIVE MASTER SELECTION GUIDES** — 84 companies' IC's organized by type, function, key parameters
- **OVER 1,000 PAGES OF TECHNICAL INFORMATION** — Provided directly by manufacturers covering 17,000 IC's
- **ALTERNATE SOURCE DIRECTORY** — The only industry-wide, pin-for-pin version available
- **MILITARY PARTS INDEX AND CROSS REFERENCE CHART** — Identifies all IC's with JAN qualification
- **MILITARY DEVICE TESTING TABLE** — List companies that screen to Mil. Std. 883
- **MILITARY PARTS INDEX** — The first functional guide to JAN qualified parts
- **PART NUMBER INDEX** — Parts from 84 manufacturers, in numerical sequence
- **APPLICATION NOTE DIRECTORY** — Digest of currently active application note material
- **PRODUCT INDEX** — Provides alphanumeric listing of 84 manufacturers' lines
- **PART NUMBER GUIDE** — Instantly decodes each company's part numbering system
- **MANUFACTURERS AND DISTRIBUTORS DIRECTORY**

United Technical Publications, 645 Stewart Ave., Garden City, NY 11530

are you looking for

Flat-woven, multi-conductor cable?



. . . with breakouts programmed to your specifications?
Which will reduce your installed cost and save assembly and inspection time?
Including incorporation of twisted pairs and triples, shielded and jacketed constructions, coaxes, etc.?

And a wide choice of conductor sizes?
And insulation types?
Plus technical assistance?
Prompt, reliable delivery?
Excellent service?

You've got our number!

401-724-3000

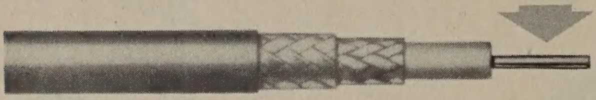
COAXIAL CABLES

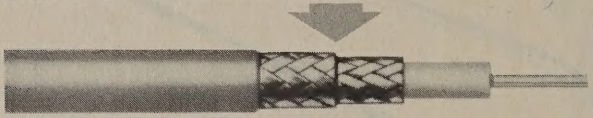
ESSEX STANCOR

CABLE CONDUCTORS



Cable conductors are selected for their mechanical and/or electrical properties. They may be solid or stranded wires, or in some instances, a tube. The solid wire results in lowest cable attenuation. Stranding increases cable flexibility but also increases attenuation. Materials used are Copper, Copperweld, Cadmium Bronze, Aluminum, Nichrome, Karma, Copper Clad Aluminum, and Special Copper Alloys.

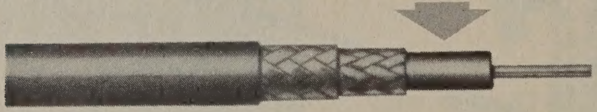
CABLE OUTER CONDUCTORS



The outer conductor can be of the conventional wire braid design, or it can be a metal tube. The braid is used because it allows a flexible construction and tubular construction is used where a high degree of shielding is required. This latter construction also contributes to lower cable attenuation.

Recent developments have produced two new types of outer conductor. The tubular conductor can be corrugated to make it easier to bend and form. A flexible cable can be made by forming a metal tape longitudinally around the dielectric and bonding it to the jacket.

CABLE DIELECTRICS



Extruded polyethylene is the most commonly used low temperature cable dielectric. Its low cost, ease of application, flexibility, high dielectric strength and low dielectric constant make it ideally suited for RF applications.

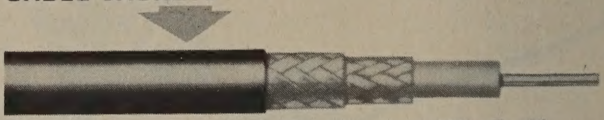
Cellular polyethylene, known by the Stancor trade mark Polyfoam®, is another excellent low temperature dielectric. It is formed by expanding polyethylene with millions of bubbles of an inert gas. The low dielectric constant of 1.5 for polyfoam compared to 2.26 for solid polyethylene allows the design of lower attenuation and low capacity cables.

Cellular polystyrene is Stancor's newest low temperature dielectric. Its low dielectric constant of 1.18 permits still lower cable attenuation.

Polytetrafluoroethylene (Teflon) is a popular cable dielectric, because of its ability to withstand high temperatures. It too has high dielectric strength and a very low dielectric constant. In addition, its ability to withstand exposure to gases and liquids makes it the dielectric choice where other materials would be inadequate.

Micro-porous Teflon is Stancor's newest high temperature dielectric. In addition to the standard Teflon properties, its 1.3 dielectric constant means lower cable attenuation.

CABLE JACKETS



TYPE I Black Polyvinyl Chloride (per MIL-C-17)

This jacket material has good weathering and abrasion properties. However, it is of the contaminating type and will cause cable attenuation to increase with age.

TYPE IIA Black or Grey Polyvinyl Chloride (per MIL-C-17)

Good weathering and abrasion resistant properties make it one of the most popular jacketing materials. Noncontaminating. This jacket can be used for direct burial.

TYPE IIIA Black Polyethylene (per MIL-C-17)

A noncontaminating material that has excellent abrasion resistance and weathering properties. This jacket is recommended for direct burial.

TYPE V Fiberglas Braid (per MIL-C-17)

Fiberglas braid is impregnated with silicone varnish to provide abrasion resistance and a moisture seal.

TYPE VII Teflon (Polytetrafluoroethylene) (per MIL-C-17)

The Teflon jacket may be extruded or tape wrapped. Taped jackets consist of two wraps applied in opposite directions with a 50% overlap. In MIL-C-17, this type of jacket is specified for the Teflon subminiature cables. In addition to its ability to withstand high temperatures, this material is chemically inert and insoluble in liquids and gases.

TYPE IX Teflon (Fluorinated Ethylene Propylene) (per MIL-C-17)

This material has excellent weathering properties and is chemically inert. It has a maximum operating temperature of 200°C.

OTHER TYPES

Although the above jacket types will satisfy a great number of requirements, there may be applications that dictate special characteristics. Many plastic compounds are available for jacketing purposes. Polyurethane, for example, has many rubber like properties along with good abrasion resistance, and miniaturization has led to the development of miniature cables with jackets as thin as .003 inches. These are heat sealable taped jackets of Mylar or Kapton. New materials are constantly being developed — if you have an unusual problem let us resolve it for you.

OPERATING TEMPERATURE LIMITS

Military Designation	Jacket Type	Temperature Limits
TYPE I	Black Polyvinyl Chloride	−40°C to +80°C
TYPE IIa	Black or Grey Polyvinyl Chloride	Under ¼″ O.D. −55°C to +90°C Over ¼″ O.D. −40°C to +90°C
TYPE IIIa	Black Polyethylene	−55°C to +85°C
TYPE V	Fiberglas Braid	−55°C to +250°C
TYPE VII	Teflon (PTFE)	−55°C to +250°C
TYPE IX	Teflon (FEP)	−55°C to +200°C

NOTE: C-Copper; S-Silvered Copper; CW-Copperweld; TC-Tinned Copper; P-Polyethylene; CCP-Conductive Coated Polyethylene; T-Teflon; TT-Teflon Tape; SCW-Silvered Copperweld; SST-Semi-Solid Teflon; SSP-Semi-Solid Polyethylene; CAL-Corrugated Aluminum.

Type I, Black Polyvinyl Chloride; Type IIa, Black or Grey Polyvinyl Chloride; Type IIIa, Black Polyethylene; Type V, Fiberglas Braid; Type VII, Teflon (PTFE); Type IX, Teflon (FEP).

CABLE AND WIRE PRODUCTS
RG/U COAXIAL CABLE

ESSEX STANCOR

Stancor RG/U Coaxial Cables are designed to provide superior low capacitance and low attenuation. The various insulations available assure you of constant electrical characteristics regardless of changes in frequency or temperature. These insulations include polyvinyl chloride, polyethylene, fiberglas braid and teflon (FEP). Operating temperatures for this cable range from −40°C to +250°C and the shieldings available are copper, tinned copper or silvered copper. With these features, plus versatile packaging lengths, the Stancor line of RG/U Coaxial Cable is the most complete in the industry.

ESSEX STANCOR

RG SUBMINIATURE

Stancor's line of subminiature coaxial cable was created for use in any miniaturized electronic application where high temperature and extreme flexibility is a consideration. This Teflon dielectric subminiature cable is able to withstand continuous operating temperatures up to 250°C. Teflon jacket is weatherproof, chemically inert, insoluble in liquids and gases — provides the greatest flexibility and lowest attenuation. Stancor subminiature cables have been laboratory tested at −55°C and retained all their flexible properties.

The polyethylene dielectric miniature coaxial cable is intended for use in any miniaturized electronic application where extremely high temperature is not a consideration.

TRIAXIAL CABLE

Stancor Triaxial Cables are especially designed to satisfy the need for a high degree of shielding in a flexible transmission line. This is achieved by adding a high coverage braid over the cable jacket and then applying a second or outer jacket. This type of construction provides more effective shielding action than two adjacent braids. Aside from applications requiring maximum attenuation of radiated signals or minimum pickup of external interference, this cable can also be used to carry two separate signals.

SUBMINAX® CABLE

A combination of trends toward both miniaturization and high temperature applications in the electronics industry has created the need for the Stancor line of SUBMINAX® Cable. These high temperature, miniaturized cables with Teflon extruded jackets are weatherproof, chemically inert, insoluble in liquids and gasses, and are extremely flexible. SUBMINAX® cables will withstand continuous operating temperatures up to 200°C. The polyethylene dielectric miniature coaxial cable is intended for use in any miniaturized electronic application where extremely high temperature is not a consideration.

Intended for use in airborne instrumentation, computers, circuitry controls, monitoring equipment are a few applications.

CHROMAFOIL 100% SHIELDED CABLE

Stancor Chromafoil cables are especially designed, high quality cables which meet or exceed all electrical, environmental and performance specifications of RG/59U. Stancor Chromafoil cables offer the advantages of lower attenuation than Mil. Spec. RG 59/U. In addition, they are extremely flexible, provide easy termination, offer superior shielding effectiveness and have a temperature range of −40°C to 80°C. Chromafoil cables are designed for CATV, closed circuit TV or pay TV applications.

COLORFOIL 100% SHIELDED CABLE

Stancor Colorfoil® is a high reliability, low loss, 100% shielded cable especially designed for inside use. Mechanically fough — yet flexible. Colorfoil also offers superior electrical performance providing you 82 UHF/VHF channels of perfect color or black and white TV reception. Colorfoil's 80 db isolation is approximately 30 db higher than braided coaxial cables. Colorfoil's 4 drain wires provide mechanical strength and shielding continuity.

Once installed, Stancor Colorfoil will provide years of maintenance-free performance.

ESSEX STANCOR

TEFLON INSULATED WIRE

MIL-W-16878D

Teflon has been solving critical electronic wire insulation problems for over 25 years.

Capable of withstanding severe temperature extremes, Stancor Teflon wires and cables are also unaffected by oil, heat, water, solvents, acids or alkalies, have excellent solder iron resistance and have passed the FR-1 vertical flame test.

Stancor Teflon-insulated electronic wires and cables are produced in the largest, most modern electronic wire plant in the country, with the latest in wire processing equipment, including extruding machines to handle both Teflon T.F.P. (temp. rating −100°C to +260°C) and Teflon T.E.P. (temp. rating −100°C to +200°C). Silver or nickel plated conductors can be supplied with either fuse-wrapped or extruded Teflon insulation.

Because of their excellent thermal and electrical characteristics, Stancor Teflon-insulated wires and cables are recommended for critical high temperature and electronic applications where space and weight factors are paramount.

TYPE-E
TEFLON INSULATION

Description: Thin wall hookup wire has high temperature insulation, is light weight, provides space savings, has excellent solder iron resistance and is unaffected by most chemicals.

Mil. Spec. No.: Mil-W-16878D

Conductor: Solid or Stranded Silver Plated Copper. Solid conductors are not covered by Mil-W-16878D

Insulation: Extruded Teflon

Temperature: Silver Plated +200°C

Rating: 600 Volts R.M.S.

ESSEX STANCOR

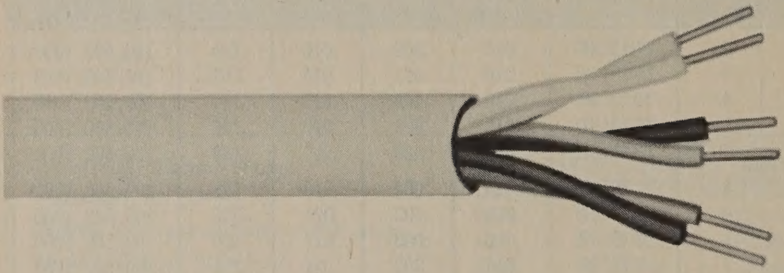
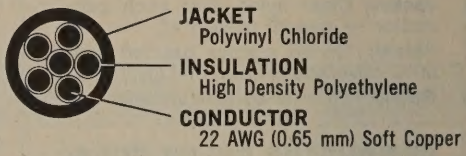
MULTI-PAIR INSIDE-OUTSIDE STATION AND INTERCOM WIRE





APPLICATION

For outside use or inside runs from station protectors to telephone terminal blocks, intercoms and for distribution of low-voltage power when up to four pairs are required.

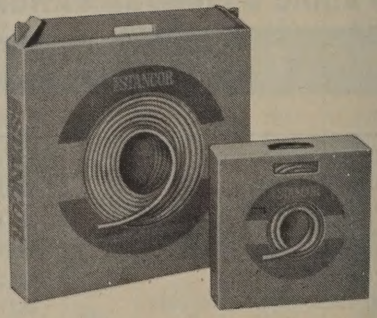
CONSTRUCTION

Conductor: 22 AWG (0.65 mm) bare, soft copper, solid.

Insulation: High density polyethylene.

Wire Assembly: Available in two, three and four pairs. Conductors are twisted into pairs with all different lengths of pair twist, cabled together, then jacketed.

Jacket: Special weather-resistant compound of polyvinyl chloride to resist the deteriorating effects of sunlight and extremes of temperature. Available in beige.



250, 500 and 1000 Foot
Put Ups In S-Pak

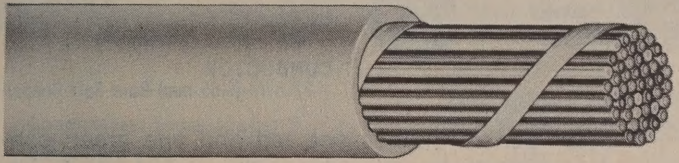
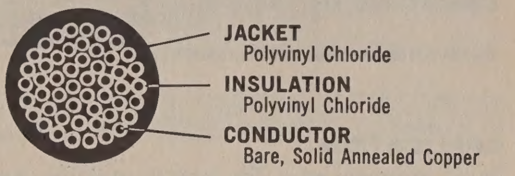
TELEPHONE/INTERCOM/ CONTROL CABLES-UNSHIELDED

ESSEX STANCOR





All cable dimensions and weights are subject to manufacturing tolerances.

APPLICATION

Designed for use with interior communications systems, such as sound systems and inside telephone PBX systems, where flexibility, crush resistance and Positive Identification are essential to obtain quick, easy and economical installations.

CONSTRUCTION

Conductor: Solid bare copper, 24 and 22 AWG (0.5 and 0.65 mm).

Insulation: Semi-rigid polyvinyl chloride colored to the standard telephone industry color code with Positive Identification bands at 1″ intervals on each conductor. Positive Identification bands match the insulation color of the mating conductor of a pair.

Core Assembly: Individual conductors are paired and pairs are cabled into a cylindrical core.

Jacket: Tough flame and abrasion resistant polyvinyl chloride. For ease of jacket removal a nylon slitting cord is placed under the jacket. Jacket available in beige.

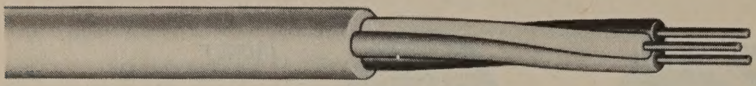
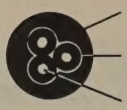
ESSEX STANCOR

INSIDE-OUTSIDE STATION AND INTERCOM WIRE





APPLICATION

Dual purpose wire for use in outside exposed or inside protected conditions, as are encountered from the station protector to the telephone terminal block. Installation can be accomplished by the use of a standard stapling gun.

CONSTRUCTION

Conductor: 22 AWG (0.65 mm) soft copper, solid.

Insulation: Heat and color stabilized high density virgin polyethylene.

Color Code: Pair has one red and one green conductor, triple has third leg yellow, quad has fourth conductor black.

Wire Assembly: Insulated conductors are twisted together in 2, 3 or 4 conductor configuration and then jacketed.

Jacket: Tough weather and flame resistant polyvinyl chloride jacket provides protection against exposure to outside weather conditions and inside house cleaning detergents, waxes, moisture, oil and most solvents.

ESSEX STANCOR

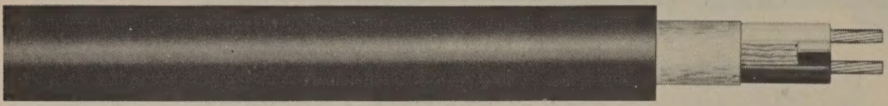
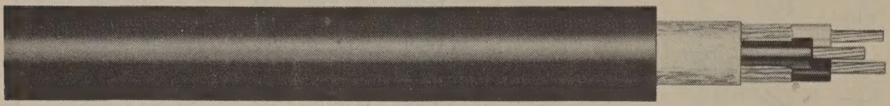
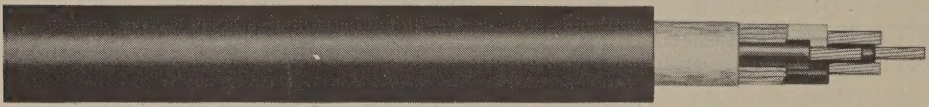
FLEXIBLE POWER SUPPLY CORDS



2-CONDUCTOR CORDS



3-CONDUCTOR CORDS



4-CONDUCTOR CORDS

These 60°C Stancor cords are covered by U.L. File reference E-6112 and C.S.A. File reference LR-12817. Cords can be made available for higher temperature ratings when required.

Cords are generally classified under one of the following service requirements, and the common types of cord according to U.L. type designation are shown opposite them:

1. **APPLIANCE CORD** — Types SV, SVO, SVT, SP, SPT, HPD, HSJ and HPN
2. **LIGHT DUTY** — Types SJ, SJO and SJT
3. **HEAVY DUTY** — Types S, SO and ST

All types except SP, SPT and HPN have separately insulated conductors, twisted, with an overall jacket. SP, SPT and HPN are parallel types with integral insulation.

The type designations further indicate the kind of insulation and jacket:

S, SJ, SV, SP — RUBBER — Recommended where cords will not be exposed to any appreciable amount of oils, grease, acids, alkalies or sunlight.

SO, SJO, SVO, HPN — NEOPRENE — Recommended where cords are repeatedly exposed to oils, grease, acids, alkalies or sunlight.

ST, SJT, SVT, SPT — POLYVINYLCHLORIDE (PVC) — Recommended where cords will be exposed to oils, grease, acids, alkalies or sunlight, and where a glossy finish with bright colors is desired. These types are also highly flame-resistant.

COLOR CODE OF CONDUCTORS: 1 - White, 2 - Black, 3 - Green, 4 - Red. (Doesn't apply to parallel appliance cords.)

APPLIANCE CORD

ESSEX STANCOR

A lightweight round cord for use on vacuum cleaners, sewing machines, electric mixers, office machines, electronic equipment, and other light duty applications. This cord features an extra-flexible copper conductor, bare, paper serve (omitted with PVC), rubber or PVC insulation, conductors cabled with filler, paper binder, rubber, neoprene or PVC jacket.

FLEXIBLE LIGHT DUTY CORD

This type of cord is used with refrigerators, freezers, washing machines, and other appliances, plus portable lighting and motion picture equipment, sound equipment, small motors, blowers, fans, electronic equipment and hand tools. The cord itself features a flexible or an extra-flexible copper conductor, bare, paper serve (omitted with PVC), rubber or PVC insulation, conductors cabled with filler, paper binder, rubber, neoprene or PVC jacket.

ESSEX STANCOR

FLEXIBLE HEAVY DUTY CORD

This type of cord, with its heavier and more rugged jacket, is best qualified for use on floor sanders, grinders, vending machines, battery chargers, shop equipment, and other heavy duty tools and equipment which will be subjected to hard usage. The cord itself features a flexible or an extra-flexible copper conductor, bare, paper serve (omitted with PVC), rubber or PVC insulation, conductors cabled with filler, paper binder, rubber, neoprene or PVC jacket.

2-CONDUCTOR, ROUND, 600 VOLTS

STANCOR Part No.	AWG Size	Conductor Stranding	Type	Insulation & Jacket	Approx. Dia. (In.)	Color	Standard Spool Length in Feet

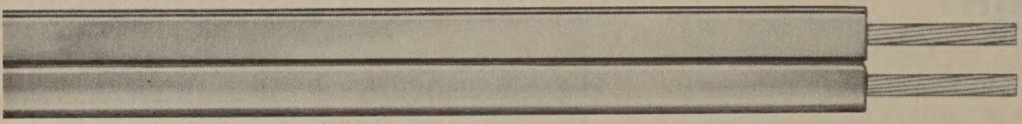
7022	16	65/34	SO	Neoprene	.400	Black	50, 100, 250
7023	14	41/30	S	Rubber	.527	Black	50, 100, 250

PARALLEL APPLIANCE CORD



These parallel flat cords provide easy slitting and stripping. SP-1 and SPT-1 are used for items such as lamps, clocks, radios, speaker hook-up, household fans, display signs and innumerable low power applications not subject to hard usage. SP-2 and SPT-2 are recommended where heavier insulation is desired. HPN is a heater cord for use where higher temperatures are required as on toasters, waffle irons, grills, coffeemakers, roasters, heat lamps, radiant heaters, soldering irons, industrial heating pots, etc. SP and SPT cords are normally rated for 60°C. HPN cord is rated at 90°C.

The cord itself features a flexible conductor, #34 AWG bare copper strands for SP and SPT, #34 AWG tinned copper strands for HPN, and rubber, PVC or neoprene integral insulation.

ESSEX CORD SET SELECTION GUIDE

ESSEX STANCOR

Various types of electrical products use different types of cord construction. To help guide you, here is a listing of typical appliances and the types of cords used on them.

	Wire Type
Air Conditioners	SPT-3, SP-3, SJT, SJ
Blankets	SPT-1, SP-1, SPT-3
Calculators (Desk Type)	SPT-2, SP-2, SVT, SV, SJT, SJ
Can Openers	SP-2, SPT-2
Cash Registers	SJT, SJ
Clothes Dryers	SRD, HPN, HSJ
Dehumidifiers	SJ, SJT
Dictating Machines	SP-2, SPT-2, SV, SVT, SJ, SJT
Dishwashers	SJ, SJT
Fans	SP-1, SPT-1, SP-2, SPT-2, SJT, SJ
Floor Sanders, Scrubbers	SV, SVT, S, ST
Food Mixers and Slicers	SP-2, SPT-2, SV, SVT, SJ, SJO, SJT, S, SO, ST
Hair Dryers and Curlers	SP-2, SPT-2, HPN, HPD, SJ, SJT, HSJ

	Wire Type
Household Appliances	HPN, HPD, HSJ, HS
Lamps — Indoor/Outdoor	SPT-1, SP-1, SJ, SJT, SJO
Medical and Dental Equipment	SJ, SJT, S, SO, ST
Phonographs	SP-1, SPT-1, SJ, SJT
Photographic Viewers and Projectors	SP-2, SPT-2, SJ, SJT
Radios	SPT-1, SP-1, SPT-2, SP-2
Ranges	SRD, SRDT
Refrigerators	SPT-3, SP-3, SJT, SJ
Sewing Machines	SP-1, SPT-1, SP-2, SPT-2, SJ, SJT
Tape Recorders	SP-2, SPT-2, SJ, SJT
Television Receivers	SPT-1, SP-1
Tools — Portable Drills, Grinders, Lawn Mowers	SJ, SJT, S, ST
Vacuum Cleaners	SV, SVT, SJ, SJT, SPT-3, SJ, SJO, SJT
Washing Machines	S, SO, ST

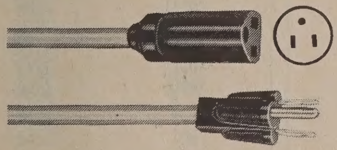
Type SJ, Rubber, Round

STANCOR Part No.	Cord Length (Ft.)	AWG Stranding	Nom. O.D. (In.)	Rating	Type of Cord	Color	APPLICATIONS:
8042	8	18 (16x30)	.30	1250 Watts 10A-125V	SJ Rubber	Black	**TYPE SJ, RUBBER, ROUND** For small appliances using fractional horsepower motors not requiring a three conductor grounding cord. U/L tan flag label, CSA listed.
8028	8	16 (26x30)	.325	1625 Watts 13A-125V	SJ Rubber	Black	

*105°C Parallel Appliance Cord

3-CONDUCTOR LONG EXTENSION CORDS
OUTDOOR/INDOOR USE



Type SJT, Vinyl, Round

STANCOR Part No.	Cord Length (Ft.)	AWG Stranding	Nom. O.D. (In.)	Rating	Type of Cord	Color	
8200	25	18 (16x30)	.330	1250 Watts 10A-125V	SJT Vinyl	Orange	**TYPE SJT, VINYL, ROUND** For outdoor use to power lawn mowers, hedge clippers, electric saws, etc. The bright orange jacket provides high visibility to minimize cutting the cord. U/L blue flag label.
8201	50	18 (16x30)	.330	1250 Watts 10A-125V	SJT Vinyl	Orange	
8202	25	16 (26x30)	.355	1625 Watts 13A-125V	SJT Vinyl	Orange	
8203	50	16 (26x30)	.355	1625 Watts 13A-125V	SJT Vinyl	Orange	
8204	100	16 (26x30)	.355	1250 Watts 10A-125V	SJT Vinyl	Orange

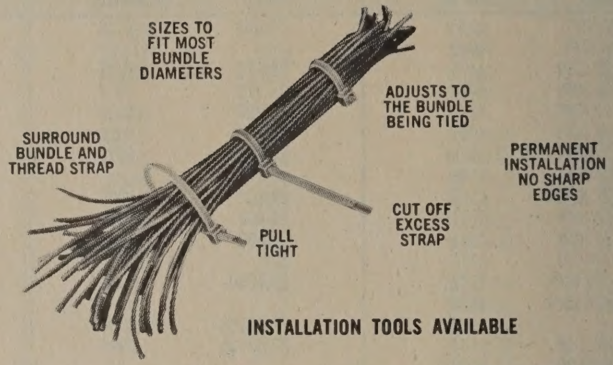
FASTRAPS™ CABLE TIES AND CLAMPS

PERMANENT WIRE AND CABLE TIES A QPL TIE AT A LOWER COST

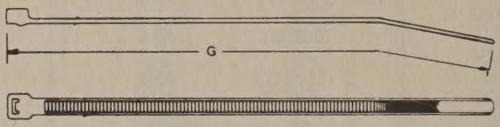
- HIGH DIELECTRIC STRENGTH, HIGH TENSILE STRENGTH AND OUTSTANDING RESILIENCE
- RESISTANCE TO ABSORPTION AND ABRASION, AND CHEMICAL DETERIORATION FROM SOLVENTS, OIL, GREASE
- MOLDED FROM NYLON — WHITE (NATURAL) IS STANDARD COLOR — OTHER COLORS AVAILABLE
- MEETS MS-3367 AND MIL-S-23190



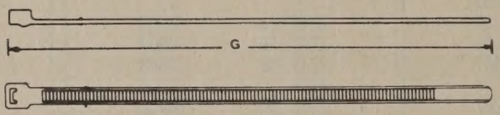
SIZES TO FIT MOST BUNDLE DIAMETERS
ADJUSTS TO THE BUNDLE BEING TIED
SURROUND BUNDLE AND THREAD STRAP
PERMANENT INSTALLATION NO SHARP EDGES
CUT OFF EXCESS STRAP
PULL TIGHT

INSTALLATION TOOLS AVAILABLE

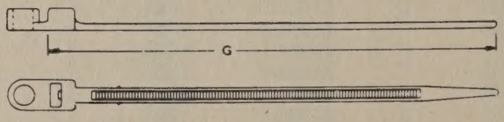
FASTRAPS Bent Tip Cable Tie Designed for Easy Threading
Standard Duty (Model 6005)



FASTRAPS Straight Tip Cable Tie . . . Provides Maximum Strength
Heavy Duty (Model 6006)



FASTRAPS Cable Tie with Mounting Hole
Heavy Duty, Straight Tip (Model 6007) .250″ mounting hole
Standard Duty, Bent Tip (Model 6008) .205″ mounting hole



Part No.	Prices In packages of 100 or 1000, except 11 and 14″ lengths, which are packages of 100 or 500

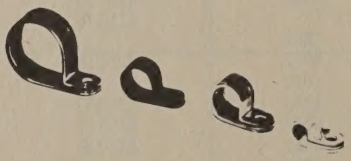
SCREW-DOWN CABLE CLAMPS



HOW TO ORDER:

Stem # — From Chart Determines Material, Width, Thickness, Hole Size.
Bundle Dia. Dash No. — From Nom. Bundle Dia. Dash No. Chart. (Note Limitations by Stem #.)
Color — (Note Limitations In Stem # Chart.) Nat. = Natural, Blk. = Black, Amb. = Amber.

Example: 6021-08-NAT Orders A Natural Color Nylon Clamp, ⅜″ Wide, With A .203″ Hole Size Which Will Accommodate A Bundle of Wires ½″ In Diameter.

Bundle Dia. (Inch.)	Width of Clamp (Inch.)	Nom. Thick. (Inch.)	Screw Hole Size (Inch.)	Part No.	Price/100 1C	1M To 10M
⅛	⅜	.050	.203	6021-02 NAT or BLK	$1.72	$8.00

1. STRAIN RELIEF BUSHINGS
Inexpensive way to securely anchor, insulate and protect cable at point of entry into chassis. Completely absorb push, pull and twist on wire. Approved for use in elevated temperatures. 52 sizes—for chassis holes from 3/8″ through 1-3/16″. Available for straight through, right angle or spring applications.

4. CABLE CLAMPS
Anchor, insulate and direct cable, wiring, tubing and piping. Open ended for easy assembly. Fully radiused edges. 26 sizes—available in both standard and heavy duty types with inside diameters ranging from 1/8″ to 1-1/2″.

2. HOLE PLUGS
For neat, low-cost closures of factory adjustment holes, wiring outlets and unnecessary openings. Snap-lock installation by finger pressure provides the quickest hole-closing method for assembly lines. Unaffected by elevated temperatures. 20 sizes—for panels up to 1/8″ thickness, holes from 3/16″ through 2″ diameter. Also 2 sizes available with perforated head for ventilation.

5. WIRE TIES
Nytye® self-locking wire ties for standard and heavy duty, regular and mountable applications. 19 sizes for bundling and holding cables, wires, hoses, etc. of 1/16″ to 8-1/8″ in diameter. Mounting platforms also available.

3. INSULATING BUSHINGS
Convert sharp-edged metal holes to smooth, neat insulated holes. Quick, snap assembly with finger-tip pressure. Will withstand 35 pound pushback test. Meets specifications for insulation and mechanical protection of tubing, cables, etc.

Available in 58 sizes for 3/16″ to 2-1/2″ diameter holes with various I.D.'s. 5 sizes also available with split side.

6. TERMINAL BUSHINGS***
Provide low cost, fully insulated, quick connecting and disconnecting of wires through panels or housing. Six sizes with 1, 2 or 3 terminals, in 8 colors for color coding. Choice of solder, double-male or crimp terminals which mate with 3/16″ or 1/4″ standard female quick-connect terminals.

NOTE: While PFA is not specifically called out in MIL-W-16878 or MIL-W-22759, it will meet all the requirements of the specification where TFE is indicated. In addition, melt-extrudable PFA can be extruded in long, continuous fault-free lengths.

FLEXLEAD Fused Twisted Pair. This unique Teflon-insulated twisted pair construction finds wide application in computers and similar circuitry. The fusing, which will withstand predetermined pulls to separate the individual wires, keeps the wires evenly twisted for easier assembly and uniform capacitance and inductance. Ask for a test sample and prices.

FLEXLEAD Wire for Wire-Wrap Applications. Markel stocks Tefzel-insulated, silver-coated, solid copper conductor wire in these sizes:

NOTE: Sizes #18 and larger must be temperature and/or manufacturer marked. Some UL styles and all CSA types require marking of all sizes.

FLEXLEAD MB Bondable Teflon. The Markel MB process can be factory-applied to any of the FLEXLEAD Teflon wires, extruded or tape-wrapped, and renders the surface bondable with commonly used elastomeric and epoxy-base potting and encapsulating compounds. Without affecting the color or electrical properties of the insulation, the MB treatment provides a bond with up to 150 psi pull-out strength, and a surface that is receptive to marking and printing. For more data, request MB brochure.

FLEXLEAD Coaxial Cables. Markel manufactures a complete line of both standard and special RG/U coaxial cables. In accordance with specifications, types are available with silver-plated copper, plated or unplated copper-covered steel, or bare copper-center conductor; one or two braided shields; tape-wrapped Teflon shield guards; and outer jacketing of impregnated fiberglass braid or Teflon (extruded or tape-wrapped). For complete data, ask for a FLEXLEAD Coaxial Cable Specifications folder.

FLEXLEAD Special Constructions. Because wiring problems cannot always be solved with standard materials, Markel's capacity for engineering high-temperature wire and cable construction to meet particular needs has grown steadily with the demand. We can combine insulations—Teflon, silicone rubber, fiberglass, nylon-shielding, fillers, liners, and jacket materials—with single, twisted-pair or multiple conductors—to provide a special cable construction for any temperature range from —90° to 260°C. For more data ask for a FLEXLEAD Wire and Cable Selector.

Ask for data sheets, prices, and samples of FLEXLEAD wire constructions

NATIONAL WIRE AND CABLE CORP.

As a manufacturer of wire and cable products . . . with warehouses on both East and West coasts, National Wire & Cable is ready to fill your immediate needs. Choose from our standard lines of wire or cable . . . OR let us design and custom manufacture exactly what you require for your application.

Our wire inventory is now over 160 million feet, and our 500 different standard multi-conductor cables total in excess of 1.3 million feet!

When you call National Wire, you'll find we are especially well equipped to handle your large as well as minimal requirements. If our "standard" items won't meet your application, we have the wire inventory, the machinery, the expertise to come up with exactly what you need. 86,000 square feet of manufacturing area and our expert engineering staff are at your disposal!!! All cable components are produced within our own facility in order to assure complete quality control.

Review the following catalog pages. If you need some assistance with your specific requirement, call our factory direct, or call our representative nearest you. See Manufacturers and Sales Office Directory Yellow Pages,

U/L Listed Wire

CSA Listed Wire

- Wires listed by the Underwriter's Laboratories, Inc. for operation in an air or an oil environment. U.L. File #E35793.
- Wires listed by the Canadian Standards Association for radio or electronic uses. CSA File #LR-20482 & LR-32511.

U/L Style 1061

Appliance wiring material available as FR-1 rated 80-degree C Service. .009″ semi-rigid vinyl insulation U/L rated: 300-volt service. Meets Mil-W-16878D Type B, and CSA S-R PVC. Also available with solid conductors.

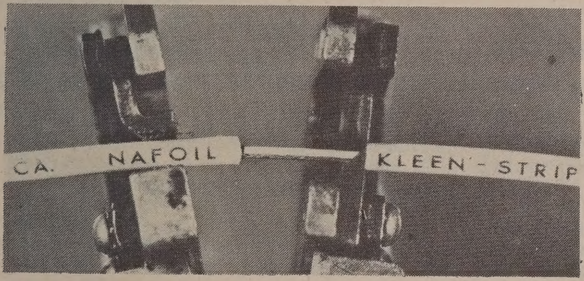
Nafoil Kleen-Strip® Foil-Shielded Audio & Instrumentation Cables (NKS Series)

NATIONAL WIRE
AND CABLE CORPORATION

Dept. EM, 136 San Fernando Rd., Los Angeles, Calif. 90031
Phone (213) 225-5611, TWX: 910-321-4155, Fed. Stock Code H4-04569



National Wire and Cable Corporation manufactures a full line of small shielded instrumentation cables using our "NAFOIL KLEEN-STRIP" self stripping foil shield construction, plus non-fraying NABOND bonded stranded conductors.

Since the foil shield of "NAFOIL KLEEN-STRIP" is integrally fusion-bonded to the cable jacket, stripping the jacket from the end of the cable automatically removes the foil shield in the same operation.

This eliminates hand untwisting and trimming of foil shields. Excellent for automatic machine stripping.

Insulated conductor and "drain" wire use National's "NABOND" bonded stranded wire which eliminates frayed wire ends. The "NABOND" process lightly bonds the tinning of all strands. "NABOND" wire acts like a solid wire during stripping and wiring operations. Subsequent flexure breaks the bonding and the wire returns to its flexible condition. Offers the convenience of solid wire during manufacture, with the reliability of stranded wire for normal use.

All wires are stranded, bonded, tinned copper with .010" vinyl insulation for use up to +80.C @ 300 volts (U.L. Style 1061). Also rated 105.C @ 600 volts per MIL-W-16878/1.

Foil shield is ½ MIL Mylar with .00035" Aluminum, 50% overlap. Bare drain wire is the same as used in insulated conductors.

Overall jacket is 105 C. polyvinyl chloride thermoplastic per MIL-I-631 Class B and exceeds U.L. requirements. Jacket wall thickness .031". For extra flexible applications, these cables are also available with .022" jacket wall.

COMPUTER GRADE U.L. LISTED SELF-STRIPPING FOIL SHIELD

Self stripping feature saves preparation time . . . increases production.

TECHNICAL DATA

U.L. Voltage Rating:	300. Volts RMS AC (U.L. Style 1061)
Military Rating:	600. Volts RMS AC (Mil-W-16878/1)
Breakdown Voltage:	Greater than 3000. Volts RMS AC
Insulation Leakage Resistance:	Higher than 200. Megohms per 1000 ft at 500. V.D.C. from any conductor to all else.
Jacket Leakage Resistance:	Higher than 10 Megohms per 1000 ft at 500. V.D.C. from shield through Jacket to water bath.
Capacitance:	See Table Below.
Shield Leakage Capacitance:	Nominal "Look-Through" capacitance from conductor group through the shield to water bath is less than 2.pf/1000 ft. Reinforcing action of bonded jacket reduces "Window" effects caused by flexure.
Usable Temp. Range:	U.L. +80° Military: −40° to +105°C
Cold Bend:	All cables are suitable for flexing to a circle diameter of approx. 6 cable diameters from +80°C to −40°C.

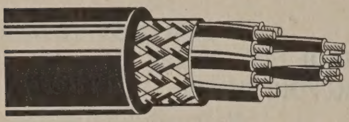
Miniature Signal & Control Cables Single Conductors (NX Series)



(NX1922SJ shown)

National Wire & Cable Corporation manufactures a complete line of MINIATURE low voltage signal and control cable. Available as cabled pairs or cabled singles, with optional overall shield. Conductors are stranded tinned copper with .010″ wall of vinyl primary insulation for use up to 105°C per MIL-W-16878 Type B. Insulated for 600 volts working voltage. (Also meets U.L. AWM Type 1061; 300 volt, 80°C.) All are coded using 10 standard colors plus stripes on white per MIL-STD-681.

All conductors are planetary cabled and contra-helically laid for optimum flexibility, with a Mylar tape barrier under shields. Shielded cables have a tinned copper braid overall, of 85-90% coverage per MIL-C-7078; and braid angles below 40° for easy pushback.

The outer jacket is black abrasion-resistant 105°C. vinyl meeting MIL-I-631 Type F. All materials are self-extinguishing and fungus resistant. All items are U.L. LISTED STYLE 2343 COMPUTER CABLE; rated 80°C. (Higher temp. ratings apply for any non-U.L. service.)

Standard Putups: 500 and 1000 ft. No-deposit reels. For shorter quantities or specific lengths, consult factory.

IN STOCK

MIL-SPEC U.L. LISTED COMPUTER GRADE STYLE 2343

For light duty, gray jacketed version of these cables in the U.L. Style 2464, see Pages 4680-4683 NQ Series.

TECHNICAL DATA (all cables)

Insulation Breakdown Voltage:	Greater than 5000 volts AC RMS, 60 cps.
Capacitance:	Nominal capacitance from a wire to all else in a cable ranges from 45. to 70. pf/ft. at 1. kc, depending on gauge and position.
Insulation Leakage:	200. megohms/1000 ft. min. @ 500. VDC from any conductor to all else in cable.
Sheath Leakage:	10. megohms/1000 ft. min. @ 500 VDC from shield or conductor group through sheath to ground.
Temperature Range:	Suitable for continuous use from −40°C. to +105°C. (U.L. Service limited to +80°C.)
Bending Characteristics:	All cables are suitable for flexing to a circle diameter of 6. cable diameters from +105°C. to −20°C. Recommended flex diameter should be greater than 20 cable diameters for flexing at −40°C.

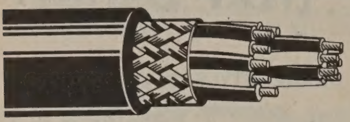
Heavy Duty Signal & Control Cables Single Conductors (NW Series)

IN STOCK

MIL-SPEC U.L. LISTED — STYLE 2343 & 2344



(NW1918SJ shown)

National Wire & Cable Corporation manufactures a complete line of multiple conductor control cable. Conductors are stranded tinned copper with 1/64″ wall of vinyl primary insulation for use up to 105°C per MIL-W-16878 Type C.* Insulated for 1000 volts working voltage. Color coded using 10 standard colors plus stripes on white per MIL-STD-681.

All conductors are planetary cabled and contra-helically laid for optimum flexibility, with a Mylar tape serve over cable bundle. Shielded cables have a tinned copper braid overall, of 85-90% coverage per MIL-C-7078, and braid angles below 40° for easy pushback.

The outer jacket is black abrasion-resistant 105°C vinyl meeting MIL-I-631 Class F. All materials are self-extinguishing and fungus resistant. All cables are U. L. LISTED STYLE 2343; rated 80°C. (Higher temp. ratings apply to any non-U.L. service.) Specify polyurethane sheath for extreme rough usage or low-temp. service. Standard Putups: 100, 500 and 1000 ft. No-deposit reels. For shorter quantities or specific lengths, consult factory.

* Insulated wires also meet U.L. style 1007 and CSA type TR-64.
† Denotes U.L. Style 2344.

TECHNICAL DATA (all cables)

Insulation Breakdown Voltage:	Greater than 8000 volts AC RMS, 60 cps.
U.L. Voltage Rating:	300 volts RMS AC (appliance use). 600 volts RMS AC (electronic use).
Military Voltage Rating:	1000 volts RMS.
Capacitance:	Nominal capacitance from a wire to all else in the cable ranges from 40 to 65 mmfd per ft., @ 1000 cps; dependent on gauge and position.
Insulation Leakage Res.:	200. megohms/1000 ft. min. at 500 VDC from any conductor to all else in cable.
Sheath Leakage Res.:	10. megohms/1000 ft. min. at 500 VDC from overall shield through sheath to outside world.
Usable Temp. Range:	Suitable for continuous use from +105°C to −55°C.
Cold Bending Capability:	All cables are suitable for flexing to a circle diam. of approx. 6 cable diameters from +105°C to −20°C; Recommended flex diameter should be greater than 20 cable diam. for flexing at −40°C. For continuous flexing applications consult factory.

Conductor sizes 22, 20, 18, 16, 14 & 12 gauge. 22 AWG is 7 strand. All others 19 strand.

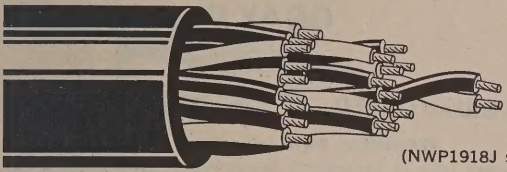
Heavy Duty Signal & Control Cables Twisted Pairs (NWP Series)



(NWP1918J shown)

IN STOCK MIL-SPEC

U.L. LISTED

Identical to National's NW-Series Cables except offered as twisted pairs.

National Wire & Cable Corporation manufactures a complete line of multiple pair control cables. Conductors are of tinned copper strand with $\frac{1}{64}''$ vinyl primary insulation for use up to 105°C per MIL-W-16878D Type C. Insulated for **1000** volts working voltage. Conductors are color coded using 10 standard basic colors, plus spiral tracers on white per table below.

All pairs are planetary cabled and contra-helically laid with a Mylar tape serve over the cable bundle. The overall jacket is a 105°C black vinyl plastic per MIL-I-631; or may be Neoprene to MIL-R-6855 Class 2 Grade 60 specification. (Neoprene at added cost).

SHIELDED CABLES

National Multiple Conductor SHIELDED CABLES are to the same specifications as above with addition of tinned copper braided shield over cable complex with 85-90% coverage to MIL-C-7078A.

TECHNICAL DATA (all cables)

Insulation Breakdown Voltage:	Greater than 8,000 volts AC RMS, 60 cps.
Capacitance:	Nominal capacitance wire to wire for a pair ranges from 27. to 40. mmfd/ft. Capacitance from both wires tied together measured to all else in common ranges from 35. to 60. mmfd/ft. dependent on gauge and position. Overall shield has negligible effect on W-W capacitance.
Insulation Leakage Res.:	200. megohms / 1000 ft. min. at 500 VDC from any conductor to all else in cable.
Sheath Leakage Res.:	10. megohms / 1000 ft. min. at 500 VDC from overall shield through sheath to outside world.
Usable Temp. Range:	Suitable for continuous use from +105°C to −55°C.
Cold Bending Capability:	All cables are suitable for flexing to a circle diam. of approx. 6 cable diameters from +105°C to −20°C; Recommended flex diameter should be greater than 20 cable diam. for flexing at −40°C. For continuous flexing applications consult factory.

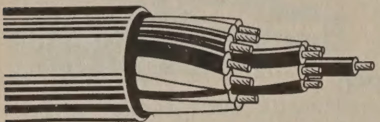
Miniature Signal & Control Cables Single Conductors (NQ Series)

EXTRA FLEXIBLE — GRAY PVC JACKET



(NQ1928J shown)

GRAY PVC JACKET

National Wire & Cable Corporation manufactures a complete line of highly flexible micro-miniature low-voltage instrument control cable. These are available as cabled pairs or singles, with optional overall shield of either foil with drain or a braided shield. Stocked with braided shields.

Conductors are stranded tinned copper with .010″ wall of tough extruded polyvinyl chloride primary insulation, rated for 300 volt use at +80°C under U. L. listed style 1061.* All are color coded using ten standard colors plus white with stripes per MIL-STD-681. Coded pairs use the same sequence as type NXP and NWP.

Conductors are planetary cabled and helically laid for optimum flexibility, with a barrier under braids. Shielded cables have a tinned copper braid of 90% coverage per MIL-C-7078, with braid angles below 40° for easy pushback; or have a 100% coverage foil shield in intimate contact with a drain wire for easy termination. See Section 3 of our master catalog for relative shield effectiveness.

Outer jacket is highly flexible abrasion-resistant gray polyvinyl chloride thermoplastic, meeting the requirements of U.L. listed style 2464.**

All materials are flame retardant and fungus resistant.

Standard Putups: 500 and 1000 ft. No-deposit reels. For shorter quantities or specific lengths, consult factory.

* Wire also meets MIL-W-16878 type B, rated 600 volts, +105°C.

** Jacket material is military rated for +105°C; meets MIL-I-631, Class F.

MIL-SPEC & U.L. LISTED STYLE 2464

TECHNICAL DATA (all cables)

Insulation breakdown voltage:	Greater than 3000 volts AC RMS, 60cps.
Capacitance:	Nominal capacitance from a wire to all else in a cable ranges from 25 to 45 pf/ft at 1kc, depending on gauge and position.
Insulation Leakage:	200 megohms/1000 feet minimum @ 500VDC from conductor to all else in cable.
Sheath Leakage:	10 megohms/1000 feet minimum @ 500VDC from shield or conductor group through sheath to ground.
Temperature Range:	U.L. rating: +80°C per U.L. style 2464. Military: Continuous use from −40°C to +105°C.
Bending Characteristics:	All cables are suitable for flexing to a circle diameter of 6 cable diameters from +105°C to −20°C. Recommended flex diameter should be greater than 20 cable diameters for flexing at −40°. For continuous flexing applications consult the factory.
Foil Shielded Cables:	The nominal overall diameter of foil shielded cables will be .006″ greater than the non-shielded cables of the same conductor count and wire size.
Characteristic Impedance: (NQP Paired Cables)	Ranges from 150 ohms to 45 ohms, dependent on wire size (AWG), geometry and drive method. Consult our technical staff for data on specific cable types.

MULTI-CONDUCTOR STOCK CABLED SINGLES

Conductor sizes 28, 26, 24, 22 are 7 strand. All others 19 strand.

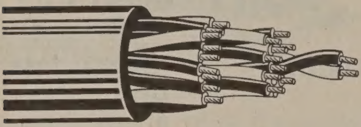
Miniature Signal & Control Cables Twisted Pairs (NQP Series)

EXTRA FLEXIBLE — GRAY PVC JACKET



(NQP1928J shown)

MIL-SPEC & U.L. LISTED **STYLE 2464**

GRAY PVC JACKET

National Wire & Cable Corporation manufactures a complete line of highly flexible micro-miniature low-voltage instrument control cable. These are available as cabled pairs or singles, with optional overall shield of either foil with drain or a braided shield. Stocked with braided shields.

Conductors are stranded tinned copper with .010″ wall of tough extruded polyvinyl chloride primary insulation, rated for 300 volt use at +80°C under U. L. listed style 1061.* All are color coded using ten standard colors plus white with stripes per MIL-STD-681. Coded pairs use the same sequence as type NXP and NWP.

Conductors are planetary cabled and helically laid for optimum flexibility, with a barrier under braids. Shielded cables have a tinned copper braid of 90% coverage per MIL-C-7078, with braid angles below 40° for easy pushback; or have a 100% coverage foil shield in intimate contact with a drain wire for easy termination. See Section 3 of our master catalog for relative shield effectiveness.

Outer jacket is highly flexible abrasion-resistant gray polyvinyl chloride thermoplastic, meeting the requirements of U.L. listed style 2464.**

All materials are flame retardant and fungus resistant. Standard Putups: 500 and 1000 ft. No-deposit reels. For shorter quantities or specific lengths, consult factory.

* Wire also meets MIL-W-16878 type B, rated 600 volts, +105°C.

** Jacket material is military rated for +105°C; meets MIL-I-631, Class F.

TECHNICAL DATA (all cables)

Insulation breakdown voltage:	Greater than 3000 volts AC RMS, 60cps.
Capacitance:	Nominal capacitance from a wire to all else in a cable ranges from 25 to 45 pf/ft at 1kc, depending on gauge and position.
Insulation Leakage:	200 megohms/1000 feet minimum @ 500VDC from conductor to all else in cable.
Sheath Leakage:	10 megohms/1000 feet minimum @ 500VDC from shield or conductor group through sheath to ground.
Temperature Range:	U.L. rating: +80°C per U.L. style 2464. Military: Continuous use from −40°C to +105°C.
Bending Characteristics:	All cables are suitable for flexing to a circle diameter of 6 cable diameters from +105°C to −20°C. Recommended flex diameter should be greater than 20 cable diameters for flexing at −40°. For continuous flexing applications consult the factory.
Foil Shielded Cables:	The nominal overall diameter of foil shielded cables will be .006″ greater than the non-shielded cables of the same conductor count and wire size.
Characteristic Impedance: (NQP Paired Cables)	Ranges from 150 ohms to 45 ohms, dependent on wire size (AWG), geometry and drive method. Consult our technical staff for data on specific cable types.

Digital Data Transmission Cables (D-200 Series)

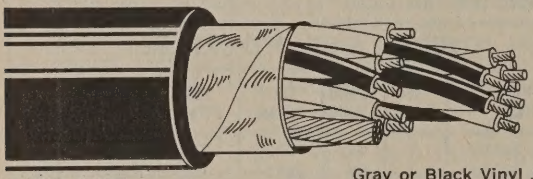
Low Voltage Computer Cable

Manufactured by our affiliate,
Dynatronic Cable Engineering Corp.

THE D-200 SERIES CABLES ARE MULTIPLE-PAIR FLEXIBLE CABLES DESIGNED FOR TRANSMISSION OF DIGITAL PULSE SIGNALS BETWEEN A COMPUTER AND ITS PERIPHERAL EQUIPMENT.

UL LISTED
U.S. Pat. No. 3489844

D-200 XX (XX designates number of pairs)



Gray or Black Vinyl Jackets

D-200 XXRF (RF designates braided shield)*

DESIGN FEATURES OF THE D-200 SERIES DIGITAL DATA CABLE

Unlike conventional flexible cable construction, the primary features offered by the D-200 series data cable are the high and accurately controlled characteristic impedance of every pair, regardless of its position in the cable and special geometry chosen to reduce crosstalk.

ADVANTAGES

1. Less crosstalk and noise from mismatched loads, due to proper matching.
2. Uniform light loading on drivers allows direct I.C. drive, accurate prediction of current demands from power supply, and driver power dissipation.
3. Proper load match reduces re-flection and inversion noise where driver end is not matched to line. (Typical of TTL.)
4. Special geometry and pair construction provides exceptionally close capacitance balance between pair wires, reducing differential crosstalk.

USAGE

We recommend use of balanced drive and differential-input line receivers for lowest crosstalk and best pulse-reduction, utilizing the 110 ohm balanced impedance of the pairs. With such a system, TTL and MECL speeds have been used on D-200 cable at 1 mc data rates over 1000 ft.

Where the system is single-ended drive and receive, all pairs exhibit the 78 ohm impedance. Since these line receivers cannot discriminate between noise and the desired signal, crosstalk limits the cable distance over which transmission is reliable. Typical runs for DTL having 50 ns risetimes are 200 ft. Where risetimes can be slowed to longer than 100 ns, run lengths are practical to 500 ft. Without differential line reception, runs over 500 ft are not recommended for D-200 cable due to external noise aspects.

The D-210 series cable are recommended for high noise or long-run application. (Utilizing individual shields.)

Although use of balanced drive and differential line reception will avoid most noise problems, there are some installations where the expected external noise is unknown but assumed to be very great. Here, the use of data cables having individually-shielded pairs may be considered as conservative engineering practice. The assurance of a lower received noise may justify the increased size, cost and risetime.

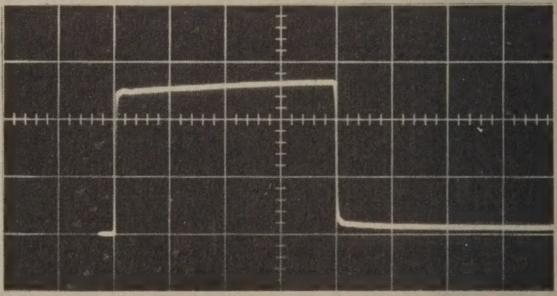
For these high noise-long run applications, Dynatronic Cable Engineering Corp has developed the D-210 series data cables. Electrical performance is essentially the same as the D-200 series cables, which use only an overall shield. *An overall tinned-copper shield braid may be specified on either series by the suffix -RF on the part number. Standard D-200 shield is aluminum-mylar foil.

For runs of 1000-5000 ft. or where extra-fast output pulse risetime is required, we offer the D-220 series cable: a larger version of the D-200 series having improved transmission properties with sufficient mechanical strength for long pulls in conduit. Consult factory for technical data.

PULSE TRANSMISSION LOSS in D-series data cables causes a moderate amplitude loss, with definite rounding of the leading and trailing edges from 50% to 90% amplitude. The photos below (for a 1.25 megabit clock rate) show typical waveforms. The D-220 and D-222 series cables offer even lower losses than the D-200 or D-210 cables for long-run or fast-clocked applications.

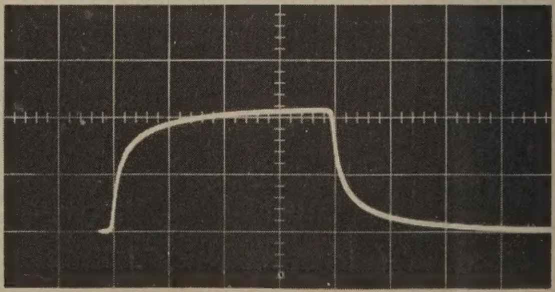
Contact our factory engineering staff for detailed pulse-shape versus distance information, or for special applications.

INPUT PULSE



Horizontal: 200. ns/cm
Vertical : 2. volts/cm

OUTPUT PULSE at 500.FT.



Horizontal: 200. ns/cm
Vertical : 2. volts/cm

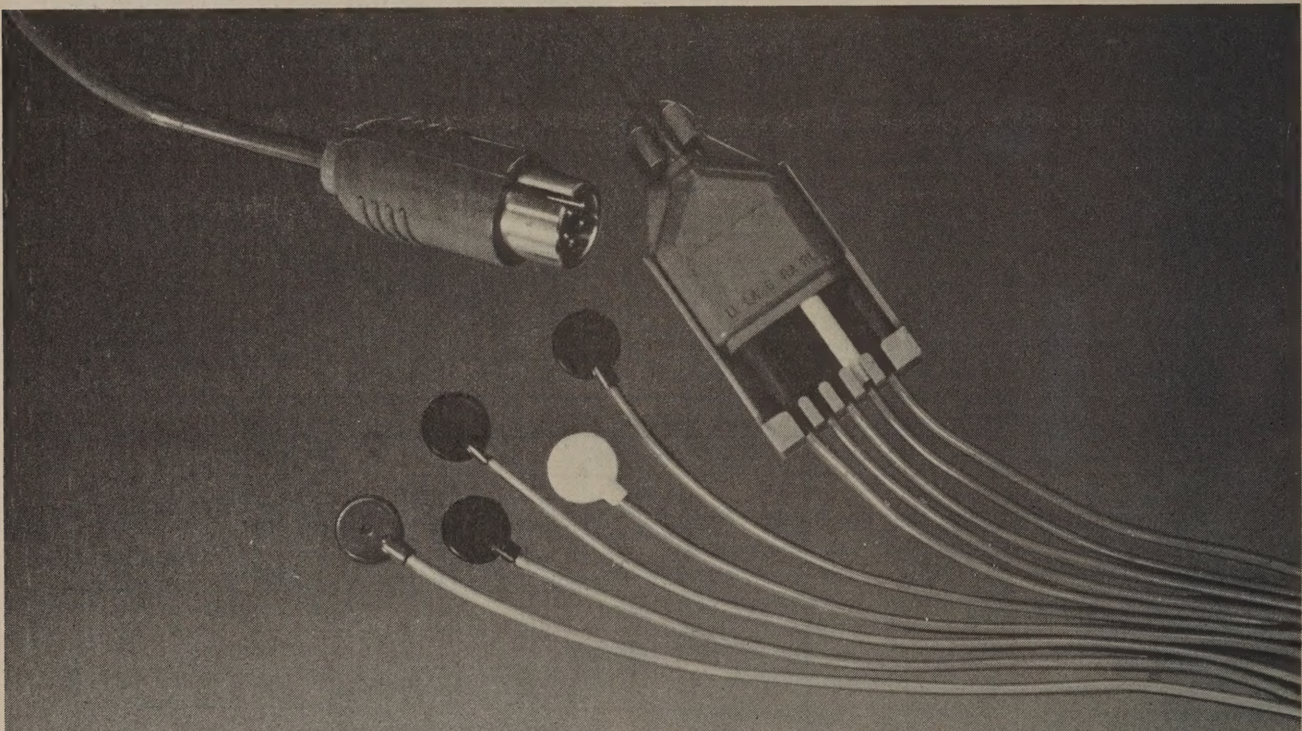
Molded Instrumentation Cables for all Types of Medical & Electronic Applications

AN AFFILIATE OF NATIONAL WIRE & CABLE CORPORATION



SPECIALISTS IN INJECTION-MOLDING OF CONNECTORS DIRECTLY ONTO CABLE!

INTEGRAL-MOLDED ELECTRONIC CABLE/CONNECTOR ASSEMBLIES

Utilizing integral cable molding techniques, National Cable Molding Corporation (NCM) manufactures all components "in-house" from wire insulation to cable manufacture, connector assembly, tooling and molding the entire unit ready for use!

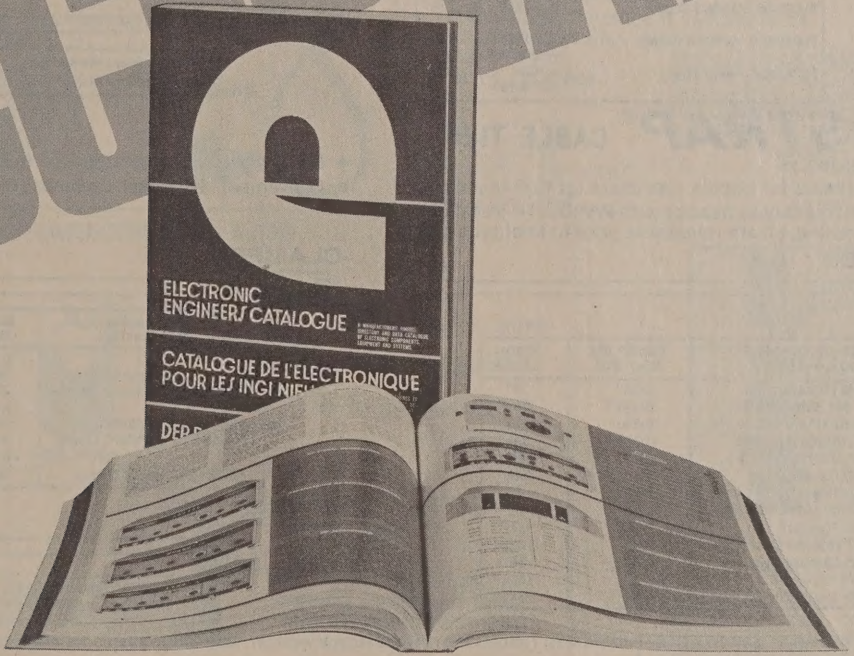
Write or call Mr. Frank W. Motley today for technical information or assistance. Phone: (213) 225-5611.

ELECTRONIC ENGINEERS CATALOGUE
CATALOGUE DE L'ELECTRONIQUE POUR LES INGENIEURS
DER PRODUKTKATALOG FÜR ELEKTRONIKER

The book is out...and the response is in...

IMMEDIATE AND OVERWHELMING

ACCEPTANCE



The ELECTRONIC ENGINEERS CATALOGUE is the only comprehensive, trilingual catalogue/source-directory of electronic products available to - and from - Western Europe and the United Kingdom.

It is divided into three distinct sections: 1. **The Product Index and Directory,** which lists more than 3,000 products alphabetically in English with their French and German equivalents. 2. **The Manufacturers' Catalogue Section,** which is a compilation of Manufacturers' Catalogues in alphabetical order. 3. **The Manufacturers' Sales Offices and Trade Marks Directory,** which alphabetically includes country, address, telex or TWX numbers of the Manufacturers' main and local sales offices and/or agents.

The ELECTRONIC ENGINEERS CATALOGUE offers U.S. manufacturers the most cost-efficient method of distributing their catalogue data to **25,000** electronic engineers and buyers throughout Western Europe and the United Kingdom. It represents the carefully conceived application of the time-proven **eem** "cataloging" concept to the elusive European marketplace.

United Technical Publications, Inc., Div. of Cox Broadcasting Corp. 645 Stewart Avenue, Garden City, New York 11530 / 516 222-2500

PANDUIT® wiring components

PAN-TY® CABLE TIES

- Strong, one-piece, all nylon. Minimum loop tensile strength up to 250 lbs.
- 39 sizes available including lashing ties. For bundle diameters up to 12 inches

CABLE TIES

Cat. No. & Cross-section	Bundle Dia. Min./Max.	Approx. Length
PLT1M Miniature Tie	1⁄16″-¾″	3⅞″
PLT1.5M Miniature Tie	1⁄16″-1¼″	5½″
PLT1.5I Intermediate Tie	1⁄16″-1¼″	5½″
PLT1.5S Standard Tie	1⁄16″-1½″	6⅜″
PLT2M Miniature Tie	1⁄16″-2″	8″
PLT2I Intermediate Tie	1⁄16″-2″	8″
PLT2S Standard Tie	1⁄16″-1¾″	7⅜″
PLT3I Intermediate Tie	1⁄16″-3″	11½″
PLT3S Standard Tie	1⁄16″-3″	11½″
PLT3H Heavy Tie	1⁄16″-3″	11½″
PLT4I Intermediate Tie	1⁄16″-4″	14½″
PLT4S Standard Tie	1⁄16″-4″	14½″
PLT4H Heavy Tie	3⁄16″-4″	14½″
PLT8H Heavy Tie	3⁄16″-9″	30⅝″

CLAMPS

PLC1M-S4 Miniature Clamp	1⁄16″-¾″ #4 Screw	4⅜″
PLC1.5I-S8 Intermediate Clamp	1⁄16″-1¼″ #8 Screw	6⅛″
PLC2S-S6 Standard Clamp	1⁄16″-1¾″ #6 Screw	7⅞″
PLC2S-S10 Standard Clamp	1⁄16″-1¾″ #10 Screw	7⅞″
PLC4H-S25 Heavy Clamp	3⁄16″-4″ ¼″ Screw	15¼″

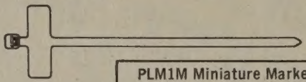
Applicable sizes of PAN-TY and STA-STRAP cable ties are Recognized under Components Program of Underwriters' Laboratories, Inc. and meet applicable Mil Specs.

- Fast—install quickly by hand or with PANDUIT® installation tools. Self-locking and releasable types available
- Economical and versatile. Use to secure wires, cables, hoses
- Convenient dispenser cartons

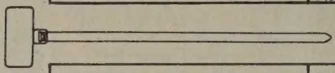
PUSH MOUNT TIES

Cat. No. & Cross-section	Bundle Dia. Min./Max.	Approx. Length
PLP1.5I Intermediate Push Mount Tie	1⁄16″-1¼″	6⅛″
PLP2S Standard Push Mount Tie	1⁄16″-1¾″	7⅞″

MARKER TIES



PLM1M Miniature Marker Tie	3⁄16″-¾″	4″
PLM2M Miniature Marker Tie	3⁄16″-2″	8″



PLF1M Miniature Flag Marker Tie	1⁄16″-¾″	4⅜″

PLM2S Standard Marker Tie	⅜″-1¾″	7¼″
PLM4S Standard Marker Tie	¾″-4″	14½″

STA-STRAP® CABLE TIES

- Strong, all nylon
- 21 sizes available for bundle diameters up to 8 inches
- Fast — install quickly by hand or with PANDUIT® installation tools. Self-locking, all are releasable prior to final tensioning

CABLE TIES

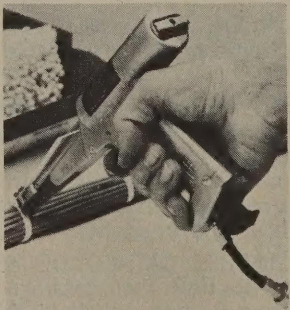
Standard colors of PAN-TY and STA-STRAP cable ties: Natural nylon white. Black weather resistant available for outdoor use. 10 other colors available.

PANDUIT®

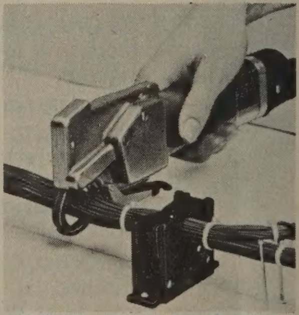
CABLE TIE INSTALLATION TOOLS

A complete tooling program to meet all production requirements for fast, neat harnessing.

GS2B Installation manual tool provides uniform tensioning and cutoff of all PANDUIT® miniature, intermediate and standard cross-section cable ties, clamps and markers; meets MIL-T-81306(AS), MS90387-1. Also available is GS4H manual installation tool for all standard and heavy ties; meets MIL-T-81306(AS), MS-90387-2.



PPTS hand-operated pneumatic cable tie installation tool. Installs all PANDUIT miniature, intermediate and standard cross-section cable ties, clamps and markers. Uses standard 70-80 psi air.



PATIM fully automatic cable tie installation tool. Automatically feeds cable tie around bundle, tensions the tie, and cuts off flush in less than 1 second. Weighs just 1¾ lbs. Accommodates bundles up to ¾″ dia.

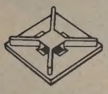
PANDUIT® wiring components

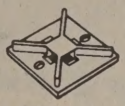
PANDUIT® MOUNTING & HARNESSING ACCESSORIES (Part of a Complete Selection)

ADHESIVE BACKED MOUNTS

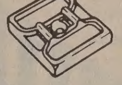
- Convenient mounting method. Many types for different applications.



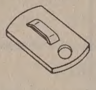
ABMM-A



ABM2S-A



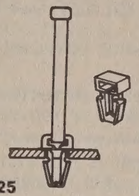
ABMS-A



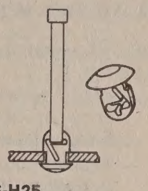
MABMS-A

PUSH MOUNTS

- For panel thickness ⅛″ max. Hole diam. nom. ¼″.

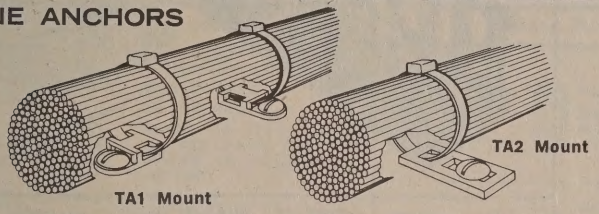


PM2H25



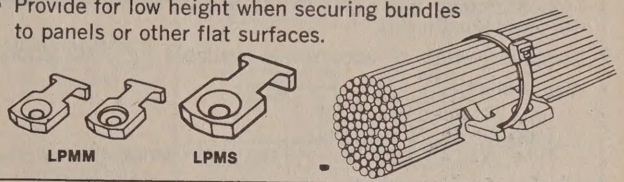
PBMS-H25

TIE ANCHORS



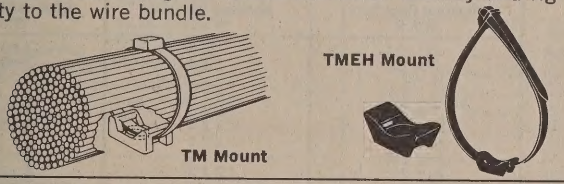
LOW PROFILE MOUNTS

- Provide for low height when securing bundles to panels or other flat surfaces.



TIE MOUNTS

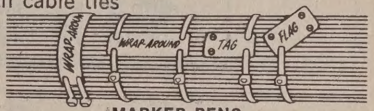
- Unique cradle design. Provides maximum stability and rigidity to the wire bundle.



MARKER PLATES

- Provide clear, permanent identification
- Secured to bundles with cable ties
- Made of nylon
- 6 sizes available

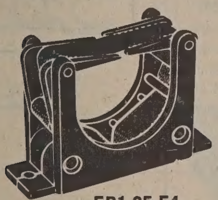
MP150 — ¾″ x 1½″
MP175 — ¾″ x 1¾″
MP200 — ¾″ x 2″
MP250W175 — 1¾″ x 2½″
MP250 — ¾″ x 2½″
MP350 — ¾″ x 3½″



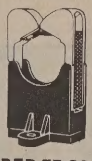
MARKER PENS
PX-0 Black **PX-2 Red**

- Used to mark nylon marker plates

HARNESSING AIDS



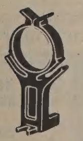
ER1.25-E4



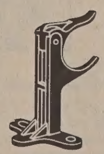
RER.75-S6

Elastic Retainers

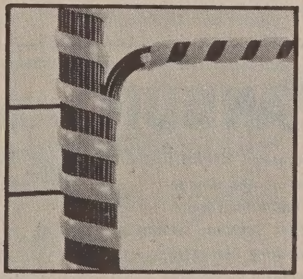
Automatically form bundles as wires are inserted.
RER.75-S6 — up to ¾″ bundle diameter.
ER1.25-E4 — up to 1¼″ bundle diameter.



Bundle Retainer
BR.75-E6
Maintains bundle above harness board at uniform height.



Corner Post
CPH.75-S8
Used to route wires around corners on the harness board. Maintains uniform height.

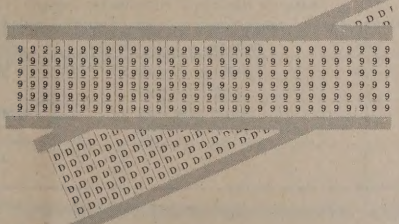


PANDUIT® SPIRAL WRAPPING

- Choose from three standard materials and three sizes covering a bundle range of ⅟₁₆″ up to 4″
- Easily installed with tool supplied in each package

PANDUIT® INSTA-CODE™

WIRE AND IDENTIFICATION MARKERS



FAST AND EASY WIRE IDENTIFICATION

- Self adhesive
- Permanent
- Meet industry standards
- Wide selection

CONVENIENT DISPENSER CARDS

Solid numbers: 0-100

Consecutive numbers: 1-33, 34-66, 67-99, 100-124, 125-149, 150-174, 175-199

Solid letters: A-Z

Consecutive letters: A-Z and A-J

Solid symbols: T1, T2, T3, L1, L2, L3, +, −, GRD, GND, SPARE

Voltage markers: 100V thru 13,800V

Self-laminating wire and cable markers.

Safety signs.

Plus handy books — with terminal markers. 16 assortments

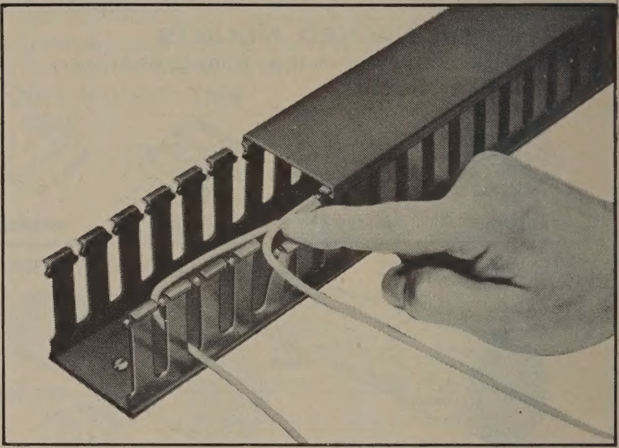
PANDUCT®

PLASTIC WIRING DUCT — TYPE "E"

- Reduce your total installed costs with patented snap-in slot design:
  - Holds breakout wires captive while providing complete accessibility for adding or removing wires — even with terminations attached.
  - Result: your total cost is reduced during initial installation, wire tracing, trouble shooting and circuit revisions.
- Non-slip cover prevents vibration slippage, yet easy to install or remove.
- Standard color: Light gray. White and dark gray available. Standard length: 6 ft.
- Complete variety of accessories available for installation.
- Also available:
  - Type "S" Solid Wall Duct
  - Type "D" Round Hole Duct
  - Type "NE" & "NS" Chlorine-Free, High-Temperature Duct



TYPE "E" SNAP-IN SLOT

Applicable sizes are recognized under Components Program of Underwriters' Laboratories, Inc.

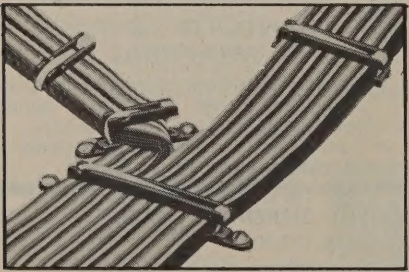
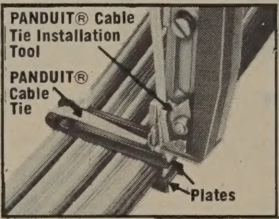
PANDUIT® FLAT CABLE MOUNT

Combination of PANDUIT® Cable Tie and unique Flat Cable Accessory provides . . . secure method of mounting or bundling flat cable



BUNDLING APPLICATION



- Secures stacked cables, folds, and breakouts
- Secures laminated and molded bus bars
- Available in 1", 2" and 3" widths — accommodates flat cable widths of 0-3"
- Secure location of flat cables reduces variations in transmission characteristics such as crosstalk, impedance and capacitance
- Can be used in applications where vibration and strain is a factor
- Strong, 100% nylon — safe, will not damage the flat cable
- Removable and reusable
- Can be used with any type of flat cable

MOUNTING APPLICATION

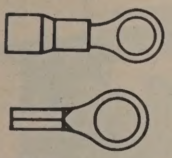
PAN-TERM® TERMINALS, SPLICES, DISCONNECTS, WIRE JOINTS and INSTALLATION TOOLS

For specific details on the wide range of PAN-TERM terminal products to meet your requirements, contact your local Panduit Distributor or Sales Office.

Listed by Underwriters' Laboratories, Inc. and approved by Canadian Standards Association. PAN-TERM terminating devices have successfully passed the test requirements of U.L. specification 486 and CSA specification C22.2 No. 65 where indicated in Bulletin T-2 which lists the complete line.

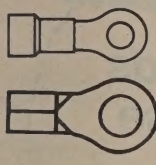
TERMINALS

Wire sizes from #22 through #10 AWG and stud sizes through ⅜″

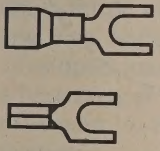


RING TONGUE
Nylon Insulated
TEFZEL* Insulated
Vinyl Insulated
Non-insulated
Available for #22-18, #16-14 and #12-10 wire. Stud sizes #4, #6, #8, #10, ¼″, 5⁄16″ and ⅜″

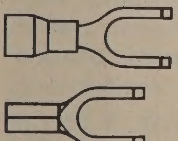
* TEFZEL Fluoropolymer Reg. TM, E. I. Dupont De Nemours Co.



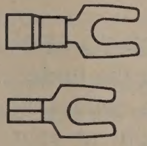
HEAVY DUTY RING TONGUE — .050″ stock
Nylon Insulated
Vinyl Insulated
Non-insulated
Available for #16-12 wire. Stud sizes #6, #8, #10, ¼″, 5⁄16″ and ⅜″



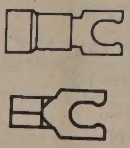
FORK TONGUE
Nylon Insulated
Vinyl Insulated
Non-insulated
Available for #22-18, #16-14 and #12-10 wire. Stud sizes #6, #8, #10 and ¼″



FLANGED FORK
Nylon Insulated
Non-insulated
Available for #22-18, #16-14 and #12-10 wire. Stud sizes #6, #8 and #10



LOCKING FORK
Nylon Insulated
Vinyl Insulated
Non-insulated
Available for #22-18, #16-14 and #12-10 wire. Stud sizes #6, #8 and #10. Wide Locking Forks available.

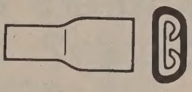


SHORT LOCKING FORK
Nylon Insulated
Vinyl Insulated
Non-insulated
Available for #22-18, #16-14 and #12-10 wire. Stud sizes #5, #6, #8, #10, ¼″.

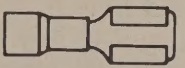
DISCONNECTS

Wire sizes from #22 through #10 AWG and tab sizes .250, .187, .145, and .110 by .032 or .020

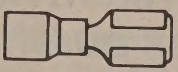
FEMALE DISCONNECTS



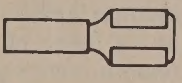
Vinyl Fully Pre-insulated
Available for #22-18, #16-14 and #12-10 wire. Tab sizes .250 x .032 and .187 x .020



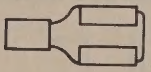
Vinyl Insulated — Funnel Entry Insulation Grip Sleeve
Available for #22-18 and #16-14 wire. Tab sizes .250 x .032 and .187 x .020



Nylon Insulated Funnel Entry
For #22-18 wire. Tab sizes .250 x .032 and .187 x .020
Insulation Grip Sleeve
For #16-14 wire. Tab sizes .250 x .032 and .187 x .020

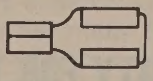


Sleeved Barrel Vinyl Insulated
Available for #22-18, #16-14 and #12-10 wire. Tab sizes .250 x .032, .187 x .020, .110 x .032, .110 x .020



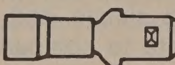
Sleeved Barrel Non-insulated
Available in all same sizes as above.

Butted Seam Vinyl Insulated
Available for #22-18 and #16-14 wire. Tab sizes .250 x .032 and .187 x .020

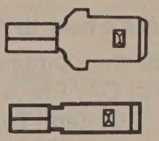


Butted Seam Non-insulated
Available for #22-18, #16-14 and #12-10 wire. Tab sizes .250 x .032, .187 x .020, .110 x .032 and .110 x .020

MALE DISCONNECTS



Vinyl Insulated Brazed Seam
Available for #22-18 and #16-14 wire. Tab sizes .250 x .032 and .145 x .032



Non-insulated Brazed Seam
Available for #22-18 wire. Tab sizes .250 x .032 and .145 x .032

SPLICES

Wire sizes from #22 through #10 AWG

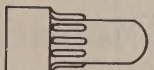
Butt Type
Nylon Insulated
Vinyl Insulated

Butt Type
Non-insulated

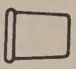
Parallel Type
Nylon Insulated
Non-insulated

WIRE JOINTS

Capacities from (2) #24 to (4) #10 AWG wires

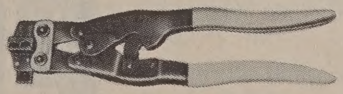


Nylon Insulated
Three sizes. Range from minimum of (2) #24 to maximum of (4) #12 wires



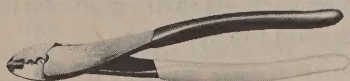
Non-insulated
Three sizes. Range from minimum of (2) #14 to maximum of (4) #10 wires

Installation Tools



Controlled Cycle Tools CT-500; CT-510; CT-520; CT-550; CT-570
Precision made tools to provide TOOL-CONTROLLED crimps for PAN-TERM insulated and non-insulated terminals, splices, disconnects and wire joints on wire ranging from #10 to #22. Color coded handles readily identify the tool needed for parts being crimped.

CT-100 Tool crimps PAN-TERM insulated and non-insulated terminals, splices, disconnects and wire joints on wire ranging from #10 to #22. Also cuts and strips wire, and cuts popular screws.



CT-200 Tool installs non-insulated PAN-TERM terminals, disconnects and splices on wire ranging from #10 to #22.

What can I use to keep all the manufacturers' product data I receive in order?
What system makes filing or retrieving manufacturers' catalogs fast and easy?
Which file system have thousands of engineers purchased because they know it works?

eem FILE SYSTEM

THE ONLY FILE SYSTEM DESIGNED SPECIALLY FOR THE ELECTRONIC ENGINEER!

The publishers of **eem** have put together a unique filing system for electronic product information. The complete system includes: a product index booklet which classifies electronic products into 3,000 listings both alphabetically and by product group, and 45 file folders imprinted with the **eem** product sections (extra gummed labels included for expanding the system.)

As you receive manufacturers' catalog data sheets, technical bulletins, or clip magazine articles, jot down the proper Product Section Numbers from the **eem** PRODUCT-TO-SECTION INDEX. Then simply file in order. When you require information on a specific product, refer to PRODUCT-TO-SECTION INDEX again to locate the correct file folder. It's simple, and you'll always have the necessary data to compare, specify and buy, right at your fingertips.

Here's how to order your eem FILE SYSTEM:

For the complete system send $10 (plus tax; N.Y., 8%, CA, 6½%) in check or money order to:

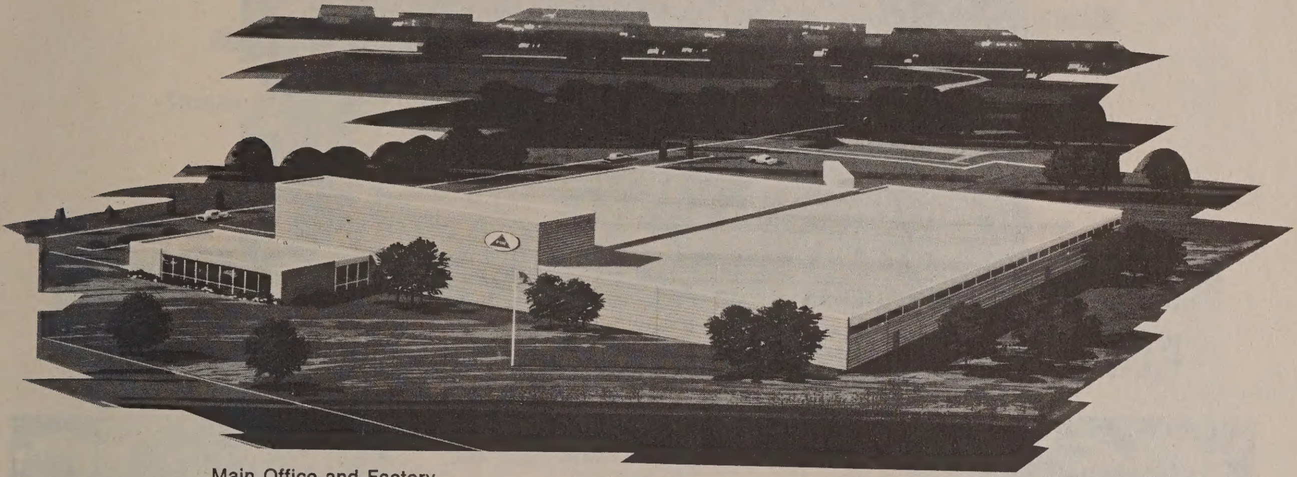
United Technical Publications, Inc.,
645 Stewart Avenue, Garden City, N.Y. 11530
Att: Circulation dept.

For an **eem FILE SYSTEM** without file folders send $7.50 (plus tax; N.Y. 8%; CA, 6½%).

United Technical Publications, Inc., Div. of Cox Broadcasting Corp. • 645 Stewart Ave., Garden City, N.Y. 11530

PIW®

PHILADELPHIA INSULATED WIRE CO., INC.



Main Office and Factory

333 NEW ALBANY ROAD / MOORESTOWN, N. J. 08057
(609) 235-6700 TOLL FREE 800-257-8357 TWX NO. 710-897-0187

When P.I.W. was founded in 1820, the original product line was hoop-skirts for the ladies. In 1842, P.I.W. developed insulated wire by wrapping cotton around a bare copper conductor. This first insulated wire was produced for Samuel F. B. Morse, the inventor of the telegraph.

Originally located in Philadelphia, Pennsylvania, P.I.W. produced annunciator wire, litz wire, organ cables, connecting wire, polyvinylchloride hookup wire and cables, and various braided glass and cotton constructions.

In 1959, P.I.W. moved to new facilities in Moorestown, New Jersey, when it was purchased by the Wilbur B. Driver Company of Newark, New Jersey. This move served to establish P.I.W. as a greatly respected producer of high temperature insulated wire for the computer, aerospace and electronics industries.

From the beginning, the goal of P.I.W. has been to surpass the exacting standards required in the manufacture of high temperature insulated wire. Despite a change of ownership in recent years, P.I.W. continues to maintain the skill and proficiency which established a reputation for quality and service that has endured for over a century and a half. Quality products and efficient service remain top priorities at Philadelphia Insulated Wire Company, Inc.

P.I.W. has the capability of producing the following insulations: TFE and FEP Teflon, Kynar, Polyethylene, Tefzel and Halar. PVC hookup wire and PVC control cables are also produced.

Complete information in P.I.W.'s outstanding line of insulated wire and cable is presented in this catalog, as well as technical descriptions denoting electrical characteristics, applications, packaging, etc. It has been impossible, however, within the confines of a catalog such as this, to set forth all the possible combinations of cable available. For more detailed information, please contact the nearest P.I.W. sales office.

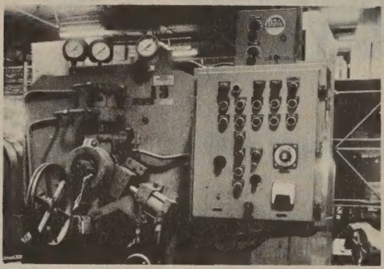
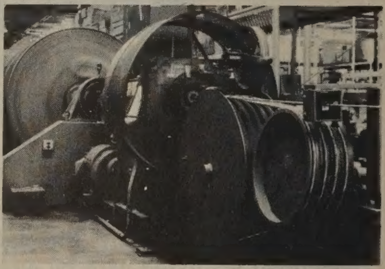
P.I.W.'s Production Department consists of the following operations:

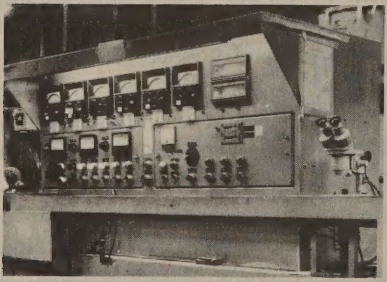




Paste Extrusion	— (PTFE compounds)
Melt Extrusion	— (FEP, Polyethylene, Tefzel, Halar, PVC, Nylon, etc.)
Tape Wrap	— (PTFE, Polyester, etc.)
Shielding	— (Silver Plated Copper, Tin Plated Copper, Nickel Plated Copper, Stainless Steel, etc.)
Braiding	— (Cotton, Nylon, Glass, etc.)

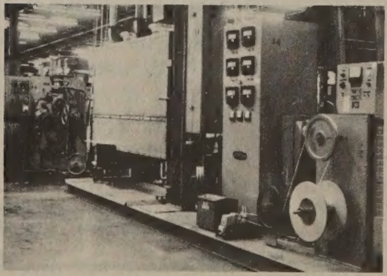
Each department can produce a finished product or can function as an integral operation for more complex insulations.

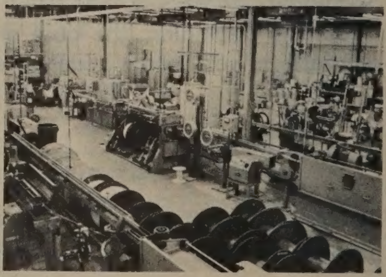
Secondary operations include cabling, bonding, shielding, impregnating, striping, jacketing, etc., as well as developing insulated conductors for every application.



P.I.W serves as a prime source for the following types of wire and cable:

Air Frame Wire	— (MIL-W-22759/9, 10, 11 & 12, Teflon)
Appliance Wire	— (Teflon, Thermoplastic)
Business Machine Wire	— (Teflon, Thermoplastic)
Building Wire	— (Thermoplastic)
Cathodic Protection Cables	— (High Molecular Weight Polyethylene, Teflon, Tefzel and Halar)
Coaxial Cables	— (MIL-C-17D, Teflon Types)
Computer Wire	— (Teflon, Kynar,Tefzel, Halar, etc.)
Control Cables	— (Multiconductor Cables, TFE and FEP Teflon, Tefzel, Halar, etc.)
Fire Alarm Cables	— (New York City Local Law No. 5, Approved Source, Teflon)
Heating Cables and Electric Heating Wire	— (Teflon, Thermoplastic)
Inter-communication Cables	— (Thermoplastic)
Motor Lead Wire	— (Teflon, Thermoplastic)
Organ Cables	— (Thermoplastic)





P.I.W. has the ability to insulate a wide range of conductors from 32 gauge to 750 MCM depending upon type of insulation. Flexibility allows P.I.W. to make long high speed production runs, and incorporates design changes to meet rapid technological advances.

Our specialized equipment results in minimum time loss with maximum reliability; a significant factor in holding down costs, and providing optimum deliveries.

The extent of P.I.W.'s manufacturing facilities and equipment are shown in the illustrations on this page.

PIW® LEADWIRE-TEFLON** MILITARY

P.I.W. Teflon hook-up wire is fabricated utilizing the most advanced techniques in extrusion and process control. The properties of Teflon, when combined with P.I.W. skill result in a product that can be used in severe temperature and environmental conditions. It has proven especially applicable to those situations requiring superior di-electric characteristics.

PIW® KYNAR® WIRE COMPUTER BACK PANEL WIRING

APPLICATION: Designed for use in automatic wire wrapping equipment for applications in the computer industry.

DESCRIPTION: Solid, Silver Plated, Oxygen-free, high conductivity (OFHC) Copper conductor, extruded Kynar® (Polyvinylidene fluoride) insulation.

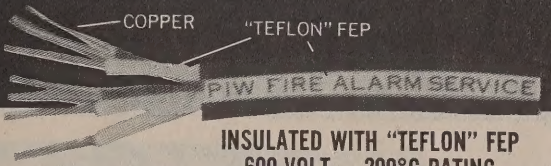
PIW FIRE ALARM CONTROL CABLES



INSULATED WITH "TEFLON" FEP
600 VOLT — 200°C RATING

APPLICATION:

These control cables have been designed for fire alarm and associated control circuits or control apparatus where maximum reliability is required. Typical application of these cables would be, floor warden and fire command control stations, smoke detection, voice communication, supervisory, and all associated systems.

SPECIFICATIONS

I CONDUCTORS: Solid soft bare copper per ASTM B3. Also available in tin plated copper solid or stranded.

II PRIMARY INSULATION: Extruded Teflon F.E.P. per ASTMD-2116. Minimum insulation wall thickness .018″ rated for 600 volt service at 200°C continuous operating temperature and conforming to U.L. approved wire.

CODING

Individual pairs shall be color coded for easy identification. Coding can also be furnished in accordance with I.P.C.E.A. methods, if desired.

CABLE LAY-UP

Individual pairs and cable lay are in accordance with standard commercial practice.

JACKET

The jacket is Teflon F.E.P. .025″ minimum wall thickness colored fire department red and is marked Fire Alarm Service at regular intervals for entire length.

SHIELDING

To meet shielding requirements on individual pairs for voice communication and other applications, a shield consisting of aluminized/mylar plus a solid tin plated copper drain wire shall be applied. A conventional braided shield is also available if desired.

NOTE:

Additional cable constructions conforming to Class "E" are available upon request.

PIW CATHODIC PROTECTION CABLE

HIGH MOLECULAR WEIGHT POLYETHYLENE — Application — Industrial and Utility Plants

Construction — Single conductor, uncoated Copper conductor, Black Polyethylene Uni-Insulation and Jacket 600 Volts IPCEA Specification.

Halar and High Molecular Weight Polyethylene

The cable is available in #8 AWG copper conductor with 20 mils of Halar primary insulation and a 40, 50, 60, 70, 80 or 90 mils of H.M.W.P.

Application — Deep well ground beds where chlorine gas from brakish water attacks and deteriorates cable.

PIW's high temperature insulations provide a unique combination of toughness, abrasion and resistance to the chemical reaction of soil corrosives. Whether your system utilizes deep wells or parallel ground beds; no matter what the condition or chemical composition of the soil — PIW's cable is designed to outlast all the other components of your system. These cables are available in 6 and 8 AWG; 7 strand Bare or Tinned Copper, various wall thicknesses. Other sizes available on special request.

* Cathodic Protection Cable also available in various insulations including Tefzel, FEP Teflon and Kynar. Consult PIW technical staff for further information.

PIW® SHIELDED TEFLON* CABLES

TEFLON Impregnated Braid/Over Shield

DESCRIPTION: Each conductor stranded silver plated copper, Type E extruded .010″ TFE Teflon insulation, color coded, cabled braided silver plated copper shield, 90% coverage, braided white fused Teflon impregnated, fiberglass braid overall.

CHARACTERISTICS: Temperature rating −65°C to +200°C. Voltage rating 600 volts. Resistant to acids, alkalis, oil, flame, moisture, solvents and fungus.

TEFLON FEP Extruded Jacket/Over Shield

DESCRIPTION: Each conductor stranded silver plated copper, Type E extruded TFE insulation color coded, cabled, braided silver plated copper shield 90% coverage, extruded FEP white Teflon jacket overall.

CHARACTERISTICS: Temperature rating −65°C to +200°C. Voltage rating 600 volts. Resistant to acids, alkalis, oil, flame, moisture, solvents and fungus. Extruded FEP Teflon jacket is tough and abrasion resistant.

PIW® QUALITY CONTROL

Each product manufactured by P.I.W. will meet or exceed all customers' specification, standards of reliability, and quality.

To insure this pledge our quality control system is equipped with the latest test equipment. P.I.W.'s Quality Control Department monitors our production process from raw material to finished product. The Philadelphia Insulated Wire Company, Inc., guarantees its product.

The heart of our production operation is the Quality Control Department. The test and measuring equipment throughout P.I.W. facilities is calibrated to comply with Military Specifications.

Standards and production processes are checked and inspected at every key stage of manufacture.

Together with production control, our laboratory engages in advanced product development and government QPL testing. Every procedure is supervised by carefully trained and experienced technicians and inspectors.

Fused, spiral tape wrapped wire with a Teflon impregnated glass yarn braid. The glass braid offers additional protection where cut through and added abrasion resistance are particularly important.

Government Spec	MIL-W-16878D — Latest Revision
Operating Temperature	+200°C
Operating Voltage	Type E — 600 volts RMS Type EE — 1000 volts RMS
Construction	Conductors - Silver coated copper conductor Insulation - Fused tape wrapped, with Teflon impregnated glass yarn braid. Colors - Standard colors available to MIL-STD 104. Other colors available on request.
Special Constructions	Available on request.

PIW® TEFLON (FEP) CONTROL CABLE

Teflon (FEP) insulated control cables can be used in steel mills, chemical plants, oil refineries and in other industries where control and signal circuits are exposed to high ambient temperature and corrosive chemical environments.

The ability of FEP to operate continuously at temperatures up to 400°F and its resistance to water, oil, grease and most chemicals make this an ideal insulation for applications where severe environmental conditions are encountered.

TEMPERATURE: Continuous service up to 400°F and for short periods up to 550°F.

ELECTRICAL: Excellent electrical properties, low dielectric constant (2.1), exceptionally high insulation resistance.

CHEMICAL: FEP is resistant to all known chemicals and solvents other than molten alkali metals and fluorine at elevated temperatures. Water absorption — .01%.

NYLON JACKET: Either an extruded nylon jacket or a nylon braid and lacquer can be furnished for abrasion protection. The protection afforded by the nylon is effective up to 300°F for a limited time.

CONSTRUCTION: Conductors: #18.

AWG 19/30 Silver-plated or Tin-plated Copper.

Insulation: Teflon 100 FEP.

Cabling: Individual conductors are concentrically cabled with glass fillers to give a uniformly smooth appearance. A glass tape is applied over the cable core when necessary.

Inner Jacket: Teflon 100 FEP.

Outer Jacket: Will be designed to fit the particular application of this cable. Jackets of extruded nylon or braided nylon and lacquer impregnation can be furnished where abrasion is unusually severe and temperatures encountered are below 300°F. Double glass braids can be furnished where abrasion is not severe and continuous service up to 400°F is needed.

PIW® FIXTURE WIRE "TEFLON" FEP

Applications: Designed for installation in lighting fixtures and in similar equipment where they are enclosed or protected and not subject to bending or twisting in use. They can also be used for connecting lighting fixtures to the conductors of the circuit that supplies the fixtures but are not intended for use as branch circuit conductors.

Type PF 200°C, 600 Volt, Single Conductor

AWG	Insulation Thickness (inches)	Nominal Wire O.D. (inches)		Approximate Weight Lb/M′		PIW Part No.
		Solid	7 Strand	Solid	7 Strand	
18	.020	.080	.086	8.50	8.80	400-024-00

Insulation — "Teflon" FEP

PIW® GENERAL PURPOSE WIRE "TEFLON" FEP

Applications: Designed for such industrial applications as infrared ovens, industrial ovens, high-wattage lighting fixtures, motor lead wire, rheostat wire, signal and control wire, locomotive headlight and control wiring around boilers, heaters, drying rooms—and scores of other industrial applications in the 200°C range.

NATIONAL ELECTRICAL CODE LISTED WIRE
Type FEP
200°C, 600 Volt, Single Conductor

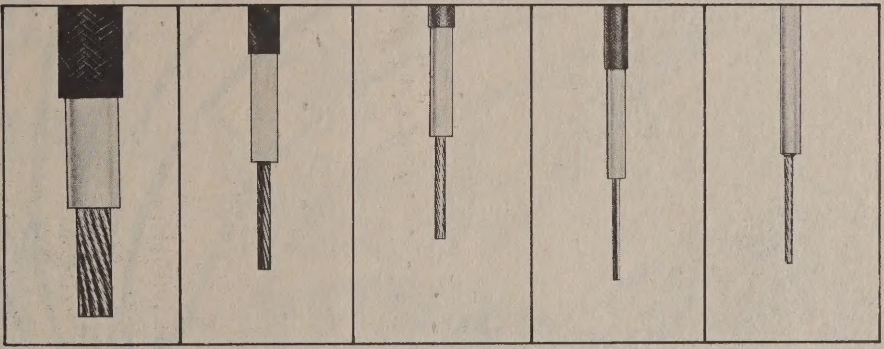
ROWE KNOWS WIRE AND CABLE

High Temperature silicone rubber wire and cable.

Rowe's silicone rubber insulation offers better performance and longer life than natural rubber or thermoplastic insulation. For example, our high temperature wire and cable is: heat stable to 200°C and flexible to −90°C, unaffected by severe thermal cycling, ultraviolet radiation, ozone or corona, resistant to ageing, moisture and chemicals, highly flame retardant and tough enough for unbraided lead wire.

Choose from a variety of UL listed styles or ask us to design one that meets your special requirements.



Power cable for 600 volts +.

Appliance & fixture wire for 300 volts +.

Apparatus & motor lead wire for 600 volts +.

Lighting wire for 600 volt transmission with solid tinned copper conductor, silicone rubber insulation and fiberglass braided covering.

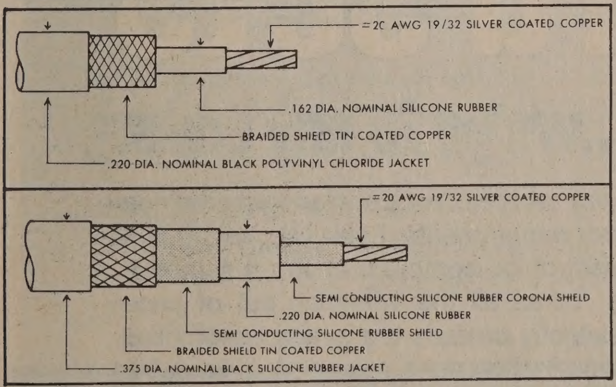
High Temp NB especially suited for motor lead wire. No braided covering necessary. Tinned copper, stranded or solid tinned copper conductor. Silicone rubber insulation in 10 colors.

All the above wire and cable feature tinned copper, stranded conductors, silicone rubber insulation, with fiberglass braided covering.

Hi-V cable, wire, and interconnections.

Well suited for a variety of industrial and military applications including accelerators, radar, x-ray, ECM and others. Hi-V combines semi-conducting, corona-suppressing layers with thermosetting materials for noise-free, corona-free cable and wire. It is available in single conductor, coaxial and triaxial configurations.

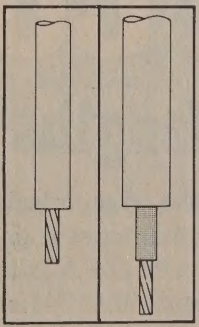
COAXIAL.



#20 AWG 19/32 SILVER COATED COPPER
.162 DIA. NOMINAL SILICONE RUBBER
BRAIDED SHIELD TIN COATED COPPER
.220 DIA. NOMINAL BLACK POLYVINYL CHLORIDE JACKET
#20 AWG 19/32 SILVER COATED COPPER
SEMI CONDUCTING SILICONE RUBBER CORONA SHIELD
.220 DIA. NOMINAL SILICONE RUBBER
SEMI CONDUCTING SILICONE RUBBER SHIELD
BRAIDED SHIELD TIN COATED COPPER
.375 DIA. NOMINAL BLACK SILICONE RUBBER JACKET

Features: 5-100KV minimum voltage ratings, 8-22 AWG corona-free and ozone resistant, 80°C to 200°C operating temperature range. Excellent for high pulse applications and for use with Rowe high voltage miniature coaxial connector series, G series connectors, Hi-pulse 40KV series and Rowe R75 connector series. All exhibit good corona-free RFI-EMI capabilities and have excellent flexibility properties.

SINGLE CONDUCTOR, UNSHIELDED.



Features: 5-60 KVDC minimum voltage ratings, 10-20 AWG corona-free, ozone-resistant material, 200°C operating temperature, excellent flexibility at high and low temperatures.

For reliability and performance that you can count on, see our wide range of high voltage connectors in the Connectors, Terminals and Sockets section.

shigoto cables and cord sets

...we go to any lengths ...we go to any ends.

That's why Shigoto can help make your ends meet. From hundreds of standard combinations to unusual characteristics that meet your own requirements. Even U.L. and C.S.A. approved. Our volume production for O.E.M.'s in electronics, communications, automotive, appliances, and practically every other industry, takes all the variables out of price-performance differences. Shigoto's ability to consistently produce top quality assemblies, when combined with large quantities, always brings in the prices you need. Unmatched quality has become our standard, our reliability and delivery schedules will become yours. Call, write, or wire your specs. At Shigoto, you'll find we'll go to any ends, to any lengths, to satisfy you.

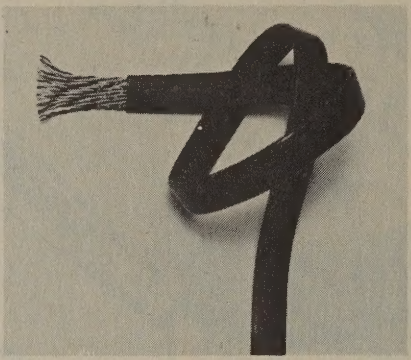
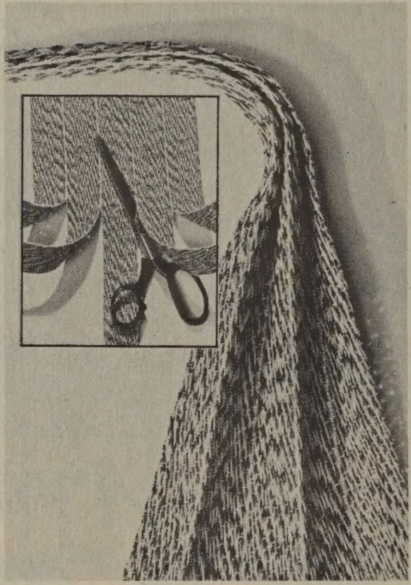
WOVEN CABLE

JACKETS AND SHIELDING
Shielding and extruded jackets for heavy-duty protection.



CUT AND FOLD LINES
Woven-in channels for folding and/or cutting. Cut line provides most rapid lead separation technique. Multiple fold lines allow compaction of broad cable to stacked fold for smaller openings, etc.



ULTRA-FLEXIBLE CABLES
Withstand continuous flexing without delamination while retaining insulation continuity.

ORDERING WOVEN CABLE

T 12/13 26 07 B N (1) (50")

- (50") — **Length of Cable**
- (1) — **Number of Layers**
- N — **Weave Material**
- B — **Wire Type**
- 07 — **Stranding**
- 26 — **AWG**
- 12/13 — **Number of Components**
- T — **Type of Weave**

Six basic characteristics of woven cable are indicated by this numbering code.

Type of Weave

S — Standard Weave (Plain and box weave)
T — Twill Weave
SpT — Stack Weave. Number in parenthesis at end of order number designates number of layers.
A — Accordion Fold
PS — Programmed Standard
HS — Woven Harness
CIC — Matched Impedance
C — Covered Cable

Number of Components. Fold lines are indicated by /, between the number of components desired on each side of the fold line. More than one fold line may be indicated in this manner: 12/13/26/12. TP following number of components indicates they are Twisted Pairs. TT are Triads.

AWG. Size of wire — 22, 24, 26, 30 etc.

Stranding. Number of strands required to make up the AWG size.

Wire Type. Using letters from MIL-W-16878D, such as Type B, C, E, ET, EE. Or at this point show UL style of wire required — UL-1007, UL-1061, etc.

Weave Material. Most commonly specified: N-Nylon NX-Nomex D-Dacron Pp-Polypropylene G-Glass.

Number of Layers. When ordering stack-weave cable, number of layers into which designated components are to be formed should be shown in parentheses at the end of the numbering code.

Length of Cable. When ordering programmed cable (PS, HS, CIC), show length in inches, in parentheses, at end of numbering code.

Special Requirements. For special requirements, drawings and detailed notes may be used. Dimensional drawings are necessary for all harnesses, accordion fold units and programmed lead units, as well as wire run list and bill of materials.

If a special array of conductors is needed, list and number each conductor. Indicate colors required. If using standard NEMA color code and repeat, simply note — "NEMA and repeat."

WORLD LEADERS IN THE DESIGN, DEVELOPMENT AND PRODUCTION OF WOVEN INTERCONNECT SYSTEMS.

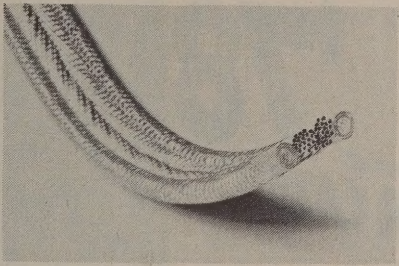
WOVEN ELECTRONICS®

RIBBON CABLE/IC INTERCONNECTS/CUSTOM HARNESSES. Woven cable and harnesses are designed and produced to meet your specific requirements. Assistance from Woven Electronics' design and engineering specialists can be important in fully employing the exceptional benefits of woven assembly forms. Total testing capabilities and stringent production monitoring assure you of the highest standards of technical reliability.

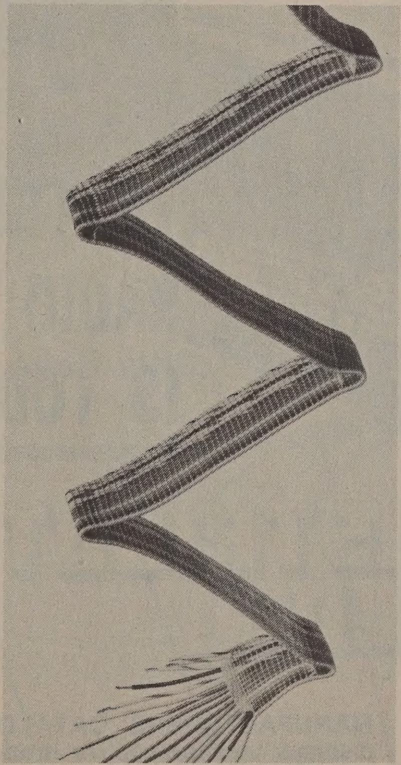
THE MOST VERSATILE, MOST RELIABLE OF ALL FLAT CABLE FORMS.

■ Fastest, easiest lead exposure ■ Independently insulated conductors. Tighter signal control. Sure protection. Longer life. ■ Widest design capabilities. Combine diverse conductor sizes, function, insulations. ■ Use any UL or MIL spec insulation. ■ Conductors are easily freed for discrete wiring.

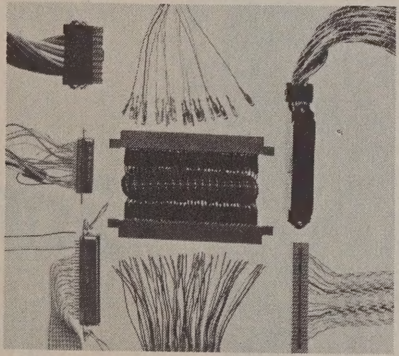
MULTI-FUNCTION CABLES
Air, Liquid, gas carrying tubes may be packed with signal and power conductors. Organize fibre-optic bundles, multiple diode arrays. Combine varied conductor sizes and functions.



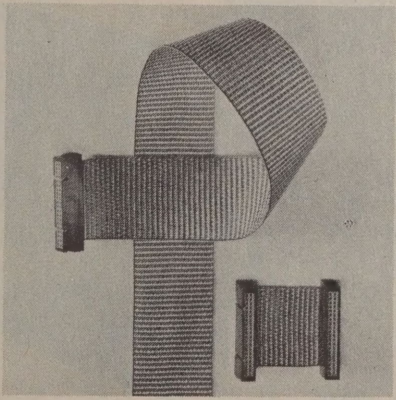
ACCORDION FOLD
Strain-relief threads at each fold prevent flexing fatigue. Optional reinforced cable edges prevent wear from movement.



CUSTOM HARNESSES AND JUMPERS
Expertly woven or hand tied, complete with branches, breakouts, terminations. Small jumpers or massive harness assemblies.

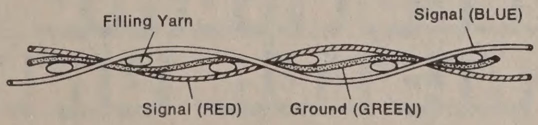


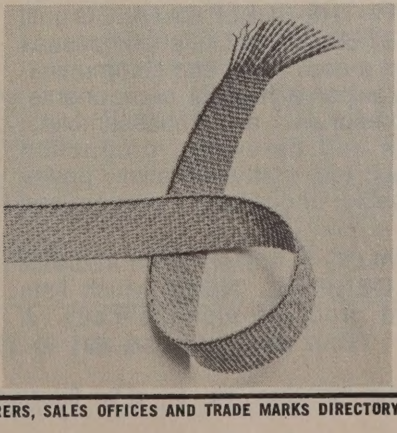
TERMINATION
Use of standard insulated wire in most woven cable eliminates need for special connectors or dies. Strip with automatic equipment, or order pre-cut with stripped and tinned ends. Complete interconnects supplied, ready to plug in.



MATCHED IMPEDANCE CABLE
Less than 10% deviation. Can be folded, rolled, twisted, tied without delamination or appreciable impedance alteration. Configuration of signal lines and ground planes minimizes crosstalk. Provided with or without termination, to your specs. Available in 80 ohm and 100 ohm standard.

Cross Sectional View, Wrap Direction





TWISTED SETS
Twisted pairs, triads and quads woven as flat ribbon cable. Rugged durability. Remarkable convenience in lead exposure and separation, without danger to adjacent insulation. Ideal method of ribbonizing PVC, TFE, Polyimid, FEP, Tefzel, Asbestos, 81044 Airframe — any insulation.

TRW HOLYOKE WIRE & CABLE

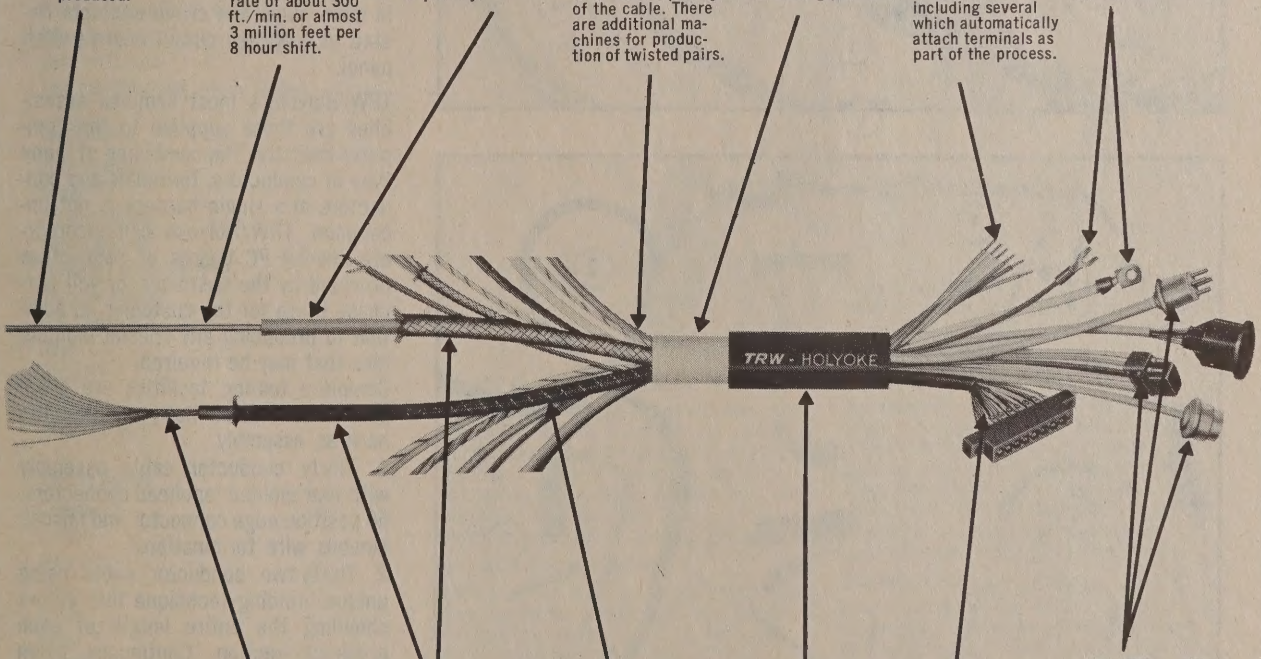
TOTAL CAPABILITY IN PRECISION CABLE ASSEMBLIES

At TRW/Holyoke Wire and Cable, "total capability" in the manufacture of precision cable assemblies and harnesses is a blend of complete facilities, advanced technology, and wide experience.

Every manufacturing step — from the drawing of individual copper wires to the attaching of hardware and molding of the connector — is performed internally to achieve maximum cost effectiveness and control of product quality.

Through its complete in-house wire and cable manufacturing facilities, TRW/Holyoke is equipped to fabricate any cable assembly or harness, regardless of its complexity.

Laced or textile braided assemblies, with shielded breakouts and solder or crimp attachment of any single or multiple termination can be supplied. Dies for molded connector assemblies are designed and built internally for a wide range of molding materials.



DRAWING — Copper wire is drawn to a specific diameter on seven machines, each with an average production rate of 6,000 ft./min. Wires as small as 36 AWG (.005") can be produced.

TINNING — Three tinning lines deposit 40 microinches of tin on the copper wire as it moves through the tinning baths. Each spool picks up wire at a rate of about 300 ft./min. or almost 3 million feet per 8 hour shift.

EXTRUDING — By changing the extruding die, insulated wire with insulation thicknesses up to 0.155" can be produced. The 12 extruding machines at TRW/Holyoke have a combined capacity in excess of 7,000,000 ft. per day.

CABLING — The cabling department has an average capacity of 100,000 ft. of cable per day. This varies greatly with the complexity of the cable. There are additional machines for production of twisted pairs.

WRAPPING — When required, special equipment like this is available for wrapping the cable with mylar shielding or textile binding. Usually, these operations are carried out as part of the cabling process.

CUTTING/STRIPPING — There are numerous machines, capable of preparing lengths of wire from 2 inches to 40 ft. including several which automatically attach terminals as part of the process.

CRIMPING — The assembly department has scores of crimping machines capable of handling the terminals of all major manufacturers. Critical parameters are held to a high degree of precision.

STRANDING — Depending upon the length of the twist or "lay" as well as the diameter of the wire, these 36 machines each produce stranded wire at a rate of 50-100 ft./min., utilizing the total output of the tinning lines.

BRAIDING — The braiding room contains over 400 machines, including "butt" braiders which produce "breakout" textile cables of the type shown on cable assembly page. Capacity is in excess of 2,000,000 ft. per day.

LACQUERING — This department can easily match the total capacity of the braiding room. A number of lacquer and saturant formulations are used to impart anti-fray, flame-retardant, moisture and fungus resistant properties.

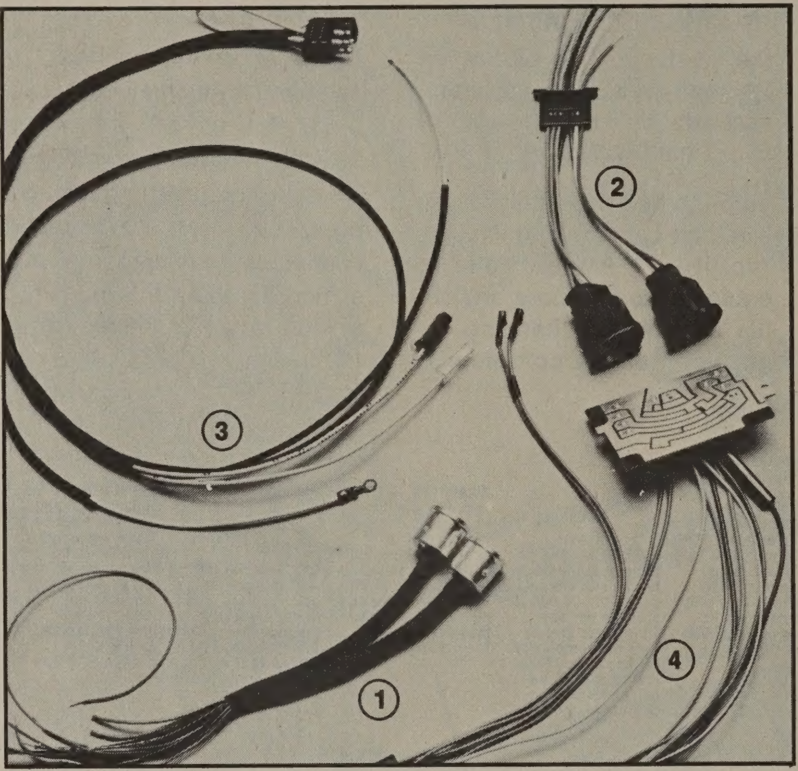
JACKETING — Jacketing of cables is accomplished on the extruding machines with the use of appropriately designed extruding dies and adjustment of temperatures, cooling profile, line speed, etc.

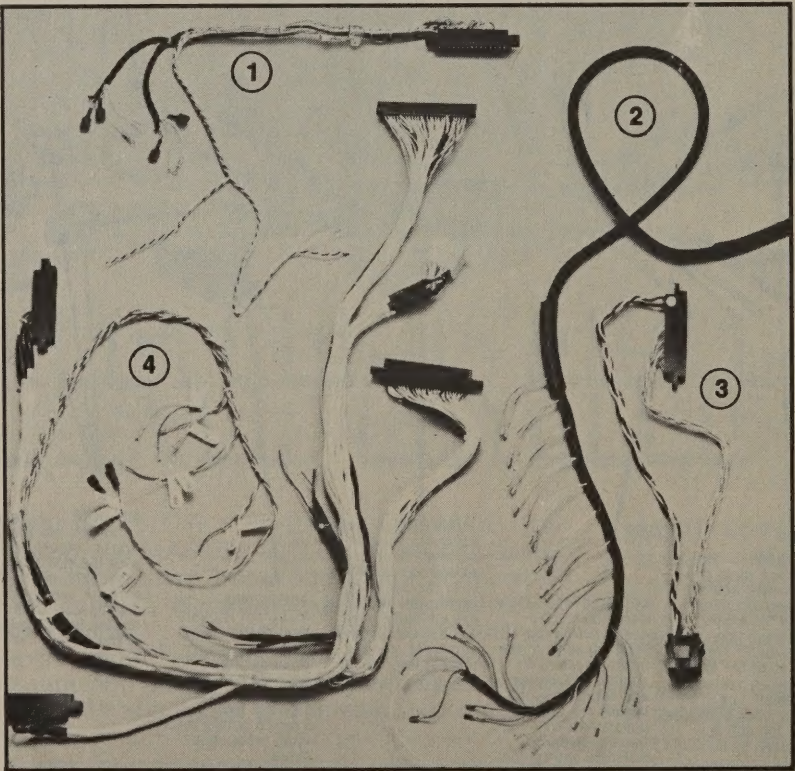
SOLDERING — Over 4,000 sq. ft., with numerous production lines is devoted to soldering in the assembly area. Internally designed jigs and tools are used to obtain maximum production rates.

MOLDING — Fifteen automatic machines, whose output varies with the size and complexity of the part are now in operation. Electrical testing is conducted at the machine as the part is completed.

TRW/HOLYOKE WIRE & CABLE, AN ELECTRONIC COMPONENTS DIV. OF TRW INC. / 720 MAIN STREET / HOLYOKE, MASS. 01040

TRW HOLYOKE WIRE & CABLE





CABLE ASSEMBLIES

Automotive cable assemblies produced by TRW/Holyoke cover the range from low voltage, low current semiconductor circuit devices to high power, high reliability types — all with the appropriate environmental terminations and connectors.

1. Passenger car rear seat control cable assembly incorporating Y-shaped "break-put" nylon braiding to two solder-terminated female connectors.

2. Dual connector electronic ignition cable assembly with molded grommet and molded-in blade contacts in pull-apart insulator shells.

3. Semi-trailer refrigeration system nylon braided cable assembly, for high reliability control application. Coded aircraft type connectors, terminated with pre-insulated crimped terminals and molded automotive type plug.

4. Automobile climate control cable assembly with crimp insertable contacts in male plugs and crimp contacts riveted to a printed circuit board switch panel.

TRW/Holyoke's most complex assemblies are those supplied to the computer industry. The combining of many type of conductors, terminals and connectors in a single harness is not uncommon. TRW/Holyoke can incorporate special PC boards or connectors provided by the customer, or will purchase these for the customer, in addition to producing any special molding dies that may be required.

Complete testing facilities are available — no matter how complex the harness assembly.

1. Thirty conductor cable assembly with four molded tapehead connectors, 50 position edge connector and miscellaneous wire terminations.

2. Thirty-two conductor cable using unique braiding technique that allows shielding the entire length of each breakout section. Continuous nylon braid to end of breakout combines minimum cable diameter with high flexibility.

3. Fifteen crimp-insertable terminations (4 twisted pairs, 7 single) in nylon plug and PC connector assembly.

4. Sixty-six conductor harness assembly with four crimp insertable terminal edge connectors, crimp plug and miscellaneous terminals.

TRW/HOLYOKE WIRE & CABLE, AN ELECTRONIC COMPONENTS DIV. OF TRW INC. / 720 MAIN STREET / HOLYOKE, MASS. 01040

TRW HOLYOKE WIRE & CABLE

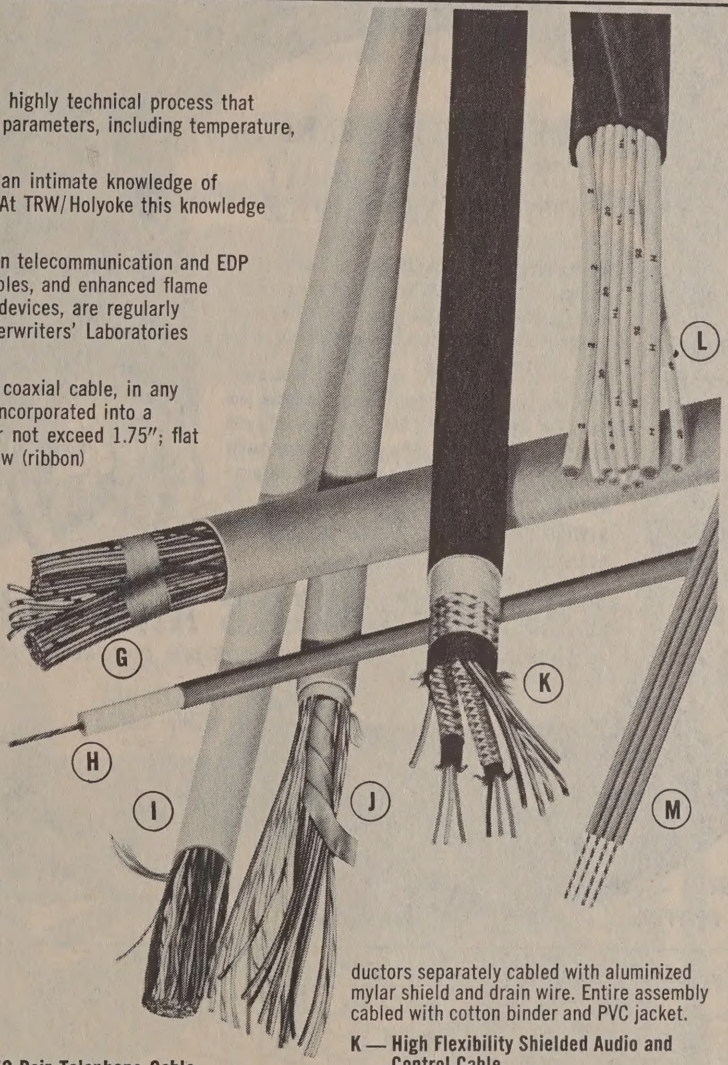
WIRE & CABLE

The manufacture of single-insulated conductors is a highly technical process that requires precision control of a variety of production parameters, including temperature, wire diameter, die size, and production rate.

Establishment of these parameters is the result of an intimate knowledge of equipment capabilities and material characteristics. At TRW/Holyoke this knowledge is based on over sixty years of experience.

Critical requirements, such as low cross talk levels in telecommunication and EDP cables, minimum impedance discontinuities in RF cables, and enhanced flame retardancy in home entertainment wires and wiring devices, are regularly engineered into products. The requirements of Underwriters' Laboratories fulfilled through design engineering.

Any combination of single wires, twisted pairs, and coaxial cable, in any number, with necessary fillers and bindings can be incorporated into a cable. The only limitation is that the cable diameter not exceed 1.75″; flat braided (woven) cable, up to 0.5″ width. Flat rainbow (ribbon) cable is available with 2 to 43 parallel conductors.



Manufacturing Options

Conductors

Copper, copper covered steel, cadmium bronze, phosphor bronze, precious metal alloys.
10 through 30 AWG
Solid or Stranded or Tinsel
Stranding from 7 to 500 strands
Bare or Tinned
Topcoat, Overcoat, Heavy Tinned — fused

Insulations

Polyethylene
Kynar***
Polypropylene
Polyurethane
Polyvinyl Chloride (PVC)
Silicone Rubber
FEP Teflon**
Nylon
Tefzel**

Insulation wall thickness from .002″ to .155″

Textile Braids

Celanese*
Cotton
Dacron**
Glass
Nylon
Orlon**
Rayon

. . . with or without lacquer

Shieldings

Conductive Vinyl
Aluminized Mylar**
Spiral Wrapped and Braided Copper

***Pennwalt Corp. T.M.
**DuPont T.M.
*Celanese Corp. T.M.

G — 52 Pair Telephone Cable

Semi-rigid thin wall insulated #24AWG solid conductors with band marked color coding. Conductors paired with programmed lay for minimum cross-talk. Assembled into 25 pair units with coding binders and four spare conductors, with flexible PVC sheath overall. Overall diameter .625″. Rated at 80°C.

H — High Voltage Lead Wire

Tinned copper conductors, solid or stranded, covered with flame retardant high dielectric strength insulation with 105°C. PVC jacket. Construction is designated as UL style #3239 and can be provided in a variety of conductors and voltage ratings to 40 KV.

I — Telephone Distribution Cable

25 pairs #24AWG solid conductors with thin wall semi-rigid insulation, spiral stripe coded. Pairs cabled with flexible bunch lay. PVC sheath extruded overall with nylon rip-cord under sheath. O.C. is 0.375″.

J — Mini Computer Memory Bank Cable

36 conductors with flexible stranding, PVC insulation and spiral stripe coding. 12 conductors separately cabled with aluminized mylar shield and drain wire. Entire assembly cabled with cotton binder and PVC jacket.

K — High Flexibility Shielded Audio and Control Cable

Cable core of seven #24AWG PVC insulated single conductors and two triple conductor cables of #24AWG stranded conductors PVC insulated with color coded textile braiding. These three conductors are then nylon braided as a unit and copper-braid shielded. The entire cable core is nylon braided and copper shielded with a PVC jacket overall.

L — Power and Control Cable

Nine #18AWG and two #12AWG stranded conductors insulated with 105°C. thermoplastic, then covered with lacquered glass braid and extruded nylon. Cabled with extruded thermoplastic jacket overall. Rated 600 volts, −55°C to +105°C. For on-the-road tractor-trailer interconnection.

M — Environmental Resistant Flat Cable

Four stranded conductors simultaneously insulated with high performance extruded silicone rubber compound to form an extremely flexible high reliability cable for military applications. Rated at 300V., −100°C. to +200°C., moisture, fungus and radiation resistant.

METHODS DESIGNED FOR BETTER QUALITY AND BETTER SERVICE

An important feature in maintaining the quality of our products is our ability to design and construct the tools necessary to do the job. We guarantee continuous performance of equipment & continuity of production.

The exacting specifications of Whitmor's space-age customers require a stringent quality assurance program. Our Q.C. meets Mil-Q-9858 & Mil-I-45208 with modifications required by customers. The same quality consciousness is applied to commercial work. We guarantee trouble free cable and wire!

NEW! THERMOPLASTIC RUBBER JACKETS AVAILABLE.

Whitmor — has what it takes to build cables for tough jobs!

20,000 square feet housing modern, high speed equipment makes it possible to fill orders on a 24 hour basis, if required.

WHITMOR WIRE AND CABLE CORPORATION

Manufacturers of custom, multiple conductor, Mil-Spec and U.L. approved cables.

*Designate jacketing desired as follows: V=vinyl X=Dur-X-thane P=polyethylene N=neoprene - Mil-S-6855 - Class 2 - Grade 60
EXAMPLE: W-1827P=Cable w/27 conductors, 18 gauge wire, w/polyethylene jacketing. **Add "S" to PART NO. for Shielded cable.
Other constructions available on request using 1/32" PVC insulation (3000 V, Military Type D); (600 V, Style 1015 U.L. Commercial)

TECHNICAL DATA

Whitmor Wire and Cable Corporation manufactures a complete line of multiple conductor control cables. All conductors are Type C per MIL-W-16878, insulated for 1000 V and 105° C. Conductors are color coded per MIL-STD 681. All conductors are planetary cabled and contra-helically laid with Mylar tape over the cable bundle.

® Dur-X-thane is Whitmor's Registered T.M. for extruded Polyurethane.

SHIELDED CABLES: Same specifications as above with additions of tinned copper braided shield over cable complex with 85%-95% coverage to MIL-C-7078A, cables shipped on non-returnable reels.

PRODUCT OFFERING

CANNON'S GOT IT

CANNON'S GOT IT

It's what you've come to expect from ITT Cannon. For your convenience, we've placed more than 265 pages of data at your fingertips in the 1977-78 edition of EEM.
Look:

CANNON® CONNECTORS, pages 1849 to 2026

Full range of standard connectors covering circular, PC packaging, RF (SMA), rectangular rack and panel connectors, microminiature, and the new Mas/Ter system of insulation displacement connectors.

CANNON DISTRIBUTION

All Cannon standard connector products are available through distribution. CAPS® distributors (Cannon Authorized Plug Specialists) and their branches are located in every key market throughout the country and stock at the local level. CAPS distributors assemble most Cannon standard connector series. This assures quick delivery of a wide range of thousands of items within the product lines. No matter where your facility is located, there is a Cannon distributor near you. Refer to Manufacturers EEM Directory Volume for a complete list of Cannon distributors. Cannon offers you many more products not shown in this edition of EEM. These products include SURE-SEAL™ Environmental Connectors, Rack and Panel, and many other specialized interconnect devices for transportation, telecommunications, energy and fiber optics applications. A full line of customer tooling is also available.

CANNON/ETC TERMINAL PRODUCTS, pages 2027 to 2038

Full-range, including loose-piece terminals; continuous strip terminals; barrier-type terminal blocks (closed and open back); cable ties; low-cost commercial connectors; hand-crimp semi-automatic tape and continuous strip automatic tooling.

CANNON/ETC DISTRIBUTION

All Cannon/ETC products are available through a nationwide distribution network. For the distributor nearest you, refer to Manufacturers EEM Directory Volume.

POMONA TEST ACCESSORIES, pages 2039 to 2113

ITT Pomona Electronics, part of ITT Cannon's total product offering, has a broad and versatile line of patch cords, cable assemblies, socket adapters, ¾" spaced molded test leads and other connector leads to suit virtually every need.

POMONA ELECTRONICS SALES OFFICES

Sales offices are located in all key areas of the U.S. For the sales office nearest you refer to Manufacturers EEM Directory Volume.

PRODUCT OFFERING: STANDARD CONNECTORS, TERMINAL PRODUCTS, AND ELECTRONIC TEST ACCESSORIES

Welcome to the ITT Cannon Electric store. A storehouse of components and systems that can solve your every need. What's more, in our store you'll discover we place high value on reliability and quality. And value means a lower total installed cost. One of the ways we help you keep your total installed costs down is by maintaining standard stocks of millions of connectors, terminals and test accessories in hundreds of distribution centers, one most likely near you.

CANNON CIRCULAR CONNECTORS are high performance, low-cost units, and include the new KJL-Series I connectors designed to MIL-C-38999, quick disconnect K Series (standard size down to subminiature and environmental), MS Series with the widest range of styles, and the MC Series for severe environments.

PC PACKAGING CONNECTORS are designed for data processing applications, from backplanes to fabrication. Included are Mas/Ter-UND insulation displacement connectors, DL Zero Insertion Force, rectangular connectors, Adapta-Con post and receptacle I/O connector system, Press-T-Mate™ press-fit connector system, ECS edgecard connectors for metal backplane applications.

RECTANGULAR RACK AND PANEL CONNECTORS, often the most economical solution, designed for minimum-volume use. Types include D Subminiature (standard and double density), DPX environment and non-environment resistant, DPK high reliability, environment resistant.

MICROMINIATURE CONNECTORS, where custom solutions are needed for size, weight, density problems. Available in rectangular, circular, strip, and special configurations. PC board component insertion, flat cable termination, and termination of connectors to your specification. Can reduce installation costs by 50%, weight and space by 80%.

ENVIRONMENTAL CONNECTORS, like Sure-Seal,™ the first proven truly water-resistant low-cost connector, meets most electrical and environmental requirements for automotive, marine, and appliance applications.

SPECIALIZED CONNECTOR CAPABILITIES include complete line of RF connectors, from SMA's to special-reliability designs; IC sockets for board-mounting DIP's; CATV connectors; and many more.

CUSTOMER TOOLING that speeds production and lowers total installed cost. Full range, from simple hand tools through crimp machines to semiautomatic strip-and-crimp machines, and tooling to meet MIL specs.

Cannon/ETC can!

ETC TERMINAL PRODUCTS, in any configuration, to meet any specification. Available in numerous tongue types, barrel styles, insulated and uninsulated barrels. Also splices, quick-disconnect terminals, cable ties, terminal blocks, and insulation displacement connectors, and, of course, manual and automatic crimping equipment.

POMONA ELECTRONICS TEST ACCESSORIES, ITT Pomona Electronics offers a broad and versatile line of patch cords, cable assemblies, socket adapters, ¾" spaced molded test leads and other connector leads to suit virtually every need. Extensive engineering and manufacturing facilities assure fast delivery of stock and custom designs.

Don't forget...This 1977-78 EEM Directory is your single source for the complete line of ITT Cannon standard connectors, ETC terminal products and ITT Pomona Electronics test accessories. ITT Cannon Electric, 666 East Dyer Road, Santa Ana, CA 92702, (714) 557-4700.
